1. This action seeks injunctive and declaratory relief against various aspects of Senate Bill No. 23 (1999-2000 Reg. Sess.) (“SB 23”),¹ which amended the California Penal Code to criminalize transfer and/or possession of “assault weapons” (“AWs”) and sale or transfer “large capacity” ammunition feeding devices. Absent proper clarifying regulations, the challenged provisions of SB 23 violate both the United States and California Constitutions, wherefore this action is brought pursuant to 42 U.S.C. § 1983 as well as California law. This action also seeks injunctive and declaratory relief by way of citizen mandamus and pursuant to California Code of Civil Procedure section 526a for the illegal and wasteful expenditure of state funds.

2. The district attorney plaintiffs and the members of Law Enforcement Alliance of America have the duty to enforce California firearms laws. At the same time, it is these Plaintiffs’ duty *not* to arrest or prosecute where the law is vague and uncertain.

3. SB 23 required that by December 31, 2000, owners of certain firearms either remove or modify the feature(s) that made the firearm an “AW,” Penal Code section 12276.1,² or to register the firearm as an “AW.” (§ 12275 et. seq.) But the combination of defendants’ erroneous or unclear regulations with certain provisions of SB 23 itself make SB 23’s requirements or prohibitions vague, confusing, and unintelligible. The plaintiffs whose duty it is to enforce the law need declaratory relief from the Court—and an injunction requiring defendants to adopt clear regulations, so that they may properly enforce the SB 23 provisions involved herein.

4. Penal Code section 12276.1 is the portion of SB 23 containing the new definitions of features which, if part of a firearm, bring that firearm under the Assault Weapons Control Act (AWCA). The California Supreme Court has described the AWCA *mens rea* standard as that a criminal defendant reasonably should have known that the firearm possessed “the clearly discernable features described in section 12276.1.” (*In re Jorge M.* (2000) 23 Cal.4th 866, 888 [98

¹ Senate Bill No. 23 (1999-2000 Reg. Sess.) is codified at Penal Code §§ 12020(a)(2), (b)(19)-(29); 12020(c)(25); 12020.5; and 12276.1 and further defined in California Code of Regulations, title 11, §§ 978.10 to 978.44 (hereinafter “Regulations”).

² All further statutory references are to the Penal Code unless otherwise indicated.

1 Cal.Rptr.2d 466, 4 P.3d 297].) But as a result of defendants' erroneous and obfuscating
2 regulations purporting to define and clarify what certain of the section 12276.1 features are, those
3 features are not "clearly discernable." In addition, defendants have obscured the meaning of SB
4 23's provisions by issuing letter rulings and/or advice letters which, while consistent with SB 23's
5 statutory intent and other relevant statutes, directly conflict with defendants' own regulations
6 challenged herein.

7 5. Plaintiffs do not necessarily seek invalidation of any provision of SB 23. Plaintiffs seek
8 a declaratory judgment from this Court to clarify the laws in question, or, alternatively, an
9 injunction requiring defendants to issue clarifying regulations. Plaintiffs seek to enjoin
10 enforcement of the challenged portions of SB 23 until they are clarified, and extension of the
11 registration period for "AWs," section 12276.1, until a reasonable time after the laws have been
12 clarified, and an adequate public education campaign has occurred.

13

14

PARTIES

15

Plaintiffs

16

17 6. Plaintiffs EDWARD W. HUNT and NORMAN L. VROMAN are the District
18 Attorneys of Fresno and Mendocino Counties. Their duties require that they ascertain the
19 meaning of the SB 23 laws so that they can properly enforce them and supervise their deputies in
20 enforcing them. Said plaintiffs seek declaratory judgments on certain provisions of SB 23 or, in
21 the alternative, an order requiring defendants to issue adequate clarifying regulations.

21

22 7. DAVID D. SUNDY, Sr. is the former Chief of Police of the City of Oakdale. All
23 plaintiffs, including the district attorney plaintiffs and DAVID D. SUNDY, Sr., also bring suit in
24 their capacities as citizens and taxpayers. They are taxpayers within the meaning of California
25 Code of Civil Procedure section 526a, in that they have been assessed for and are liable to pay, or,
26 within one year before the commencement of the action, have paid, a tax in the State of California.
27 As citizens and taxpayers all the plaintiffs in this suit desire that the laws and regulations in
28 question be clear so that they can be administered fairly and uniformly throughout the state and
consistently with the federal and state constitutions and the legislative purposes.

1 8. Plaintiff the LAW ENFORCEMENT ALLIANCE OF AMERICA (LEAA) is a non-
2 profit, non-partisan advocacy association organized under section 501(c)(4) of the Internal
3 Revenue Code. Its principal offices are in Virginia and its executive director is James J. Fotis, a
4 retired New York police officer. LEAA's members include law enforcement officers, crime
5 victims, and concerned citizens, many of whom reside and work in California and some of whom
6 own firearms that are or may be covered by SB 23. In this action, LEAA represents its California
7 members, inter alia as officers whose duty it is to enforce the laws uniformly and consistent with
8 the legislative purposes and constitutional requirements.

9 9. Plaintiff CALIFORNIA RIFLE AND PISTOL ASSOCIATION, Inc. (hereinafter
10 CRPA) is a non-profit membership organization and is incorporated under the laws of California,
11 with headquarters in Fullerton. Among its other activities, CRPA works to preserve and expand
12 constitutional and statutory rights of gun ownership, including the right to self-defense and the
13 right to keep and bear arms. CRPA has 65,000 members, including members residing in Fresno
14 County who are members of the U.S. Armed Forces and police officers who possess rifles
15 pursuant to Penal Code section 12280(g). In this suit CRPA represents all its members both in
16 their general interests as taxpayers and citizens and in their particular interests as owners, or
17 prospective owners, of rifles the statute forbids.

18 10. Plaintiff CALIFORNIA SPORTING GOODS ASSOCIATION, INC. ("CSGA") is an
19 association of California firearms dealers, distributors and/or manufacturers' representatives. In
20 this suit, CSGA, on behalf of its members and their customers, seek clarification of the meaning
21 and application of the challenged provisions of SB 23 to them and their property.

22 11. Plaintiff HERB BAUER SPORTING GOODS, INC., is a California corporation with
23 its principal place of business in Fresno. BARRY BAUER is a Fresno retail firearms dealer who
24 owns HERB BAUER SPORTING GOODS, INC. BARRY BAUER is licensed by the California
25 Department of Justice to sell firearms. Said plaintiffs, for themselves and their customers, seek
26 clarification of the meaning and application of the challenged provisions of SB 23 to them and
27 their property.

28 12. Plaintiff PAUL POE owns a valuable centerfire semi-automatic detachable magazine

1 rifle whose barrel has a device intended to be a muzzle brake rather than a flash suppressor. But
2 said plaintiff does not and could not know whether the device on his rifle "redirects flash from the
3 shooter's field of vision" and thereby falls within the erroneous definitions defendants have
4 propounded of "flash suppressor." (Cal. Code Regs., tit. 11, § 978.20(b).)

5 13. Plaintiff MANNY MOE owns a valuable centerfire semi-automatic detachable
6 magazine rifle whose barrel has an attached device intended to be a muzzle brake rather than a
7 flash suppressor. But said plaintiff does not and could not know whether the device on his rifle
8 "reduces flash" and thereby falls within the erroneous definitions defendants have propounded of
9 "flash suppressor." (Cal. Code Regs., tit. 11, § 978.20(b).)

10 14. Plaintiff CHARLES COE owns a valuable centerfire semi-automatic detachable
11 magazine rifle whose barrel has an attached device substantially identical to the Browning BOSS.
12 Defendants have ruled the Browning BOSS is not a flash suppressor—even though it “reduces”
13 and/or “redirects” flash. (Cal. Code Regs., tit. 11, § 978.20(b).) Plaintiff COE does not and
14 cannot know whether the device on his rifle constitutes a flash suppressor as that term is used in
15 section 12276.1.

16 15. Plaintiff BARRY BOE owns a valuable centerfire semi-automatic detachable
17 magazine rifle whose barrel has an attached muzzle brake that is substantially identical to the
18 Springfield Armory Muzzle Brake. Defendants have ruled the Springfield Armory Muzzle Brake
19 is not a flash suppressor—even though it “reduces” and/or “redirects” flash. (Cal. Code Regs., tit.
20 11, § 978.20(b).) Plaintiff BOE does not and cannot know whether the device on his rifle
21 constitutes a flash suppressor as that term is used in section 12276.1.

22 16. The fictitiously named plaintiffs did not register their valuable rifles as AWs during
23 the registration period because they did not believe the rifles fell within the section 12276.1
24 criteria and did not and do not understand the reduce flash and redirect flash criteria of California
25 Code of Regulations, title 11, section 978.20(b) (hereinafter CCR section 978.20(b)), and were
26 and are unable to determine how those criteria apply to their rifles.

27 17. If said plaintiffs' valuable rifles are AWs, the rifles are illegal unregistered AWs and
28 said plaintiffs are required by law (§§ 12280 & 12288) to surrender the rifles without

1 compensation. Plaintiffs are entitled to a judicial determination of whether their rifles are AWs.
2 Plaintiffs further contend that if their rifles are judicially determined to be AWs they are entitled
3 to an opportunity to register those rifles as AWs and to keep them. To deny plaintiffs that
4 opportunity is a taking of property without due process of law and a denial of the equal protection
5 of the laws vis-a-vis owners of other AW rifles who were given clear criteria and/or not misled by
6 defendants as plaintiffs have been.

7

8

Defendants

9 18. Defendant STATE OF CALIFORNIA is a State on the far left side of the United
10 States.

11 19. Defendant WILLIAM LOCKYER is the Attorney General of California. He is the
12 chief law enforcement officer of California, and is charged by article V, section 13 of the
13 California Constitution and the AWCA with the duty to inform the general public, and to
14 supervise and instruct local prosecutors and law enforcement agencies, regarding the meaning of
15 the laws of the STATE, including the AWCA, and ensure the fair, uniform and consistent
16 enforcement of those laws throughout the state.

17 20. The true names and capacities of the defendants named as Does 1-100, whether
18 individual, corporate, associate or otherwise, are unknown to plaintiffs as of the time of the filing
19 of the complaint. Plaintiffs therefore sue said defendants by such fictitious names and will amend
20 this complaint with their true names and capacities when such are ascertained. Plaintiffs are
21 informed and believe, and thereon allege, that each of the Doe defendants is in some manner
22 responsible for the events and happenings alleged herein which proximately caused injury and
23 damage to plaintiffs.

24

25

STATUTORY OVERVIEW

26

The Assault Weapon Control Act

27

28

21. The identification and criminalization of “assault weapons” in California began in
1989 with the enactment of the Roberti-Roos Assault Weapons Control Act. Confronted with a

1 choice between identifying banned guns specifically by manufacturer and model on the one hand
2 (the list approach) and generically by design characteristics on the other (the generic approach),
3 the California Legislature initially adopted the list approach in Penal Code section 12276, which
4 bans certain guns by manufacturer and model names.

5 22. Penal Code section 12276.1, enacted in 1999 as part of SB 23, added a set of generic
6 definitions of AWs. The generic list is in addition to and does not displace the section 12276 list.
7 Under section 12276.1(a), an ordinary semiautomatic firearm becomes an "AW" if it possesses
8 any of several combinations of technical (often hyper-technical) features. Section 12276.1(a)
9 provides:

10 (a) Notwithstanding Section 12276 "assault weapon" shall also mean any of the
following:

11 (1) A semiautomatic, centerfire rifle that has the capacity to accept a detachable
magazine and any one of the following:

12 (A) A pistol grip that protrudes conspicuously beneath the action of the weapon.

13 (B) A thumbhole stock.

14 (C) A folding or telescoping stock.

15 (D) A grenade launcher or flare launcher.

16 (E) A flash suppressor.

17 (F) A forward pistol grip.

18 (2) A semiautomatic, centerfire rifle that has a fixed magazine with the capacity to
accept more than 10 rounds.

19 (3) A semiautomatic, centerfire rifle that has an overall length of less than 30
inches.

20 (4) A semiautomatic pistol that has the capacity to accept a detachable magazine
and any one of the following:

21 (A) A threaded barrel, capable of accepting a flash suppressor, forward handgrip, or
silencer.

22 (B) A second handgrip.

23 (C) A shroud that is attached to, or partially or completely encircles, the barrel that allows
the bearer to fire the weapon without burning his or her hand, except a slide that encloses
the barrel.

24 (D) The capacity to accept a detachable magazine at some location outside of the pistol
grip.

25 (5) A semiautomatic pistol with a fixed magazine that has the capacity to accept
more than 10 rounds.

26 (6) A semiautomatic shotgun that has both of the following:

27 (A) A folding or telescoping stock.

28 (B) A pistol grip that protrudes conspicuously beneath the action of the weapon,
thumbhole stock, or vertical handgrip.

(7) A semiautomatic shotgun that has the ability to accept a detachable magazine.

1 (8) Any shotgun with a revolving cylinder.

2 Section 12276.1 (d) provides:

3 (d) The following definitions shall apply under this section:

4 (1) "Magazine" shall mean any ammunition feeding device.

5 (2) "Capacity to accept more than 10 rounds" shall mean capable of accommodating more
6 than 10 rounds, but shall not be construed to include a feeding device that has been
permanently altered so that it cannot accommodate more than ten rounds.

7 **Registration And Other AW Controls**

8 23. In combination with section 12280(a), the enactment of section 12276.1 made it, as of
9 January 1, 2000, a serious felony for anyone to transport, import or loan a firearm having the
10 section 12276.1 features—a four year low-term sentence applies to taking an unregistered AW to a
11 shooting range, taking it hunting, permitting a friend to examine it, borrowing a friend's firearm at
12 the range, lending or borrowing such a firearm for hunting or during a hunt, or selling it to or
13 through a dealer.

14 24. In combination with section 12280(b), the enactment of section 12276.1 made mere
15 possession of an AW (as defined by new § 12276.1) a felony as of January 1, 2001 unless the
16 firearm was registered by December 31, 2000 or unless the offending feature was removed.

17 **"Large Capacity" Magazine (And Firearm) Ban**

18 25. In addition to the new generic definition of AWs, SB 23 expanded Penal Code section
19 12020 to prohibit the sale or transfer of "large capacity" magazines—defined in subdivision (c)(25)
20 to mean any magazine that accepts more than ten rounds of ammunition. "Tubular" magazines
21 are not exempted. Thus, in addition to separate conventional detachable magazines (a feature of
22 most AWs) this provision makes it illegal to sell, give or loan old-fashioned lever or pump-action
23 rifles or shotguns if they have non-detachable (tubular) magazines that hold more than ten rounds.
24 (See Old-fashioned lever or pump-action rifles of the type illustrated in Exhibit 1 (Gun Digest
25 2002 (56th ed. 2001) pp. 324-330 "*Centerfire Rifles - Lever and Slide*;" pictures and descriptions
26 of selected rifles) or shotguns of the type illustrated in Exhibit 2 (Gun Digest 2002 (56th ed. 2001)
27 pp. 390-394, "*Shotguns - Slide and Lever Actions*;" pictures and descriptions of selected
28 shotguns.)

Defendants' Failure To Issue Required Clarifying Regulations

26. In enacting SB 23, the Legislature was aware that portions of the law would be too uncertain to be understood by the general public, including public officials whose duty it is to enforce the criminal penalty provisions. The Legislature relied on defendants to issue clarifying regulations to remedy these uncertainties. Because much of SB 23 became effective by January 1, 2000, these regulations should have been issued at or before that time. Because the registration (or feature removal) requirement for firearms having the features specified in new section 12276.1 had a December 31, 2000 deadline, regulations clarifying section 12276.1's meaning should have been issued well prior to the December 31, 2000 deadline in order to give gun owners a reasonable time to comply with the law as the Legislature intended.

27. By early 2000 at the latest, defendants should have issued the necessary clarifying regulations, and should have carried out a meaningful public education campaign as mandated by the AWCA. Instead, the Attorney General engaged in a protracted and deeply flawed rule-making procedure. It was only after two failed attempts that the "regulations for Assault Weapons and Large Capacity Magazines" were belatedly adopted *just 24 days before the registration deadline*. As a result of defendants' long delay in issuing clarifying regulations, members of the public were left with less than 30 days to decide whether their firearms fell within the section 12276.1 definitions of an "AW."

28. As a result of the defects in defendants' regulations, the general public (including police officers who must register their own personal firearms if they fall under § 12276.1), remains confused, unaware of what section 12276.1 covers, and unable to comply with it. Plaintiffs are informed and believe, and thereupon allege: (a) that defendants themselves are aware of severe on-going public confusion; (b) that defendants have been deluged with queries from the public as to what firearms section 12276.1 covers, and what the supposedly clarifying regulations mean; (c) that these queries include many from police officers who are confused as to which of their own personal firearms are "AWs" that must be registered; and (d) that defendants responded to police officer and police union pressure by urging legislators to enact an extension of the registration deadline *for police officers only*, so that defendants could provide police officers the

1 clarification and special education denied to the general public.³

2 29. Defendants' third set of regulations did not resolve the ambiguities in the law.
3 Defendants could not and did not carry out the educational campaign required to clarify what
4 features render a firearm an AW. Instead, they merely publicized SB 23's existence—without
5 clarifying what SB 23 requires!

6 30. Defendants' failure in this respect is epitomized by their issuance of the "California
7 Attorney General 2000 Assault Weapons Identification Guide" (AWIG) to law enforcement. This
8 Guide is intended to inform and educate those who, like district attorney plaintiffs, enforce the
9 AWCA so that they know which firearms are "assault weapons." As to firearms specifically
10 named by section 12276 (which was enacted in 1989, ten years prior to § 12276.1), the AWIG
11 offers 67 pages of description and photographs. But as to which firearms fall within the new
12 section 12276.1 generic characteristic definitions, the AWIG offers no photographs or other
13 guidance to illustrate such things as a "conspicuously protruding" pistol grip, "flash suppressor"
14 designs, and other physical attributes and features specified in the definitions. Instead, the
15 language of section 12276.1 is simply reprinted in the AWIG without further explanation or
16 clarification.

17 31. Individuals possessing identical firearms in different counties may or will be subject
18 to different standards and risk prosecution based on inconsistent readings of SB 23's requirements
19 by local officials and police. By the same token, individuals acting lawfully in the eyes of the
20 local officials in their own counties may find themselves arrested and prosecuted if they transport
21 their firearm to or through other counties where local officials read SB 23 differently.

22

23 _____
24 ³ As eventually enacted, this legislation provides that law enforcement officers may own AWs
25 *for their personal use* if they have departmental permission. We emphasize that this proposed
26 amendment authorizes purely non-law enforcement use because existing legislation already totally
27 exempted officer possession of AWs "for law enforcement purposes, whether on or off duty," §
28 12280(g). Moreover, under § 12286 the DOJ currently has authority to issue AW permits to officers to
personally own such firearms. The proposed amendment is needed only because DOJ policy is not to
issue AW permits to ordinary people, including law enforcement officers in their personal capacities.
See documents set out in Exhibit 3 (Sen. Bill No. 626 (2001-2002 Reg. Sess.) as introduced Feb. 22,
2001) and Exhibit 4 (Sen. Amend. To Sen. Bill No. 626 (2001-2002 Reg. Sess.) Apr. 26, 2001) hereto
which is incorporated herein as if set out verbatim.

IRREPARABLE INJURY–NO ADEQUATE REMEDY AT LAW

1
2 32. Plaintiffs PAUL POE, MANNY MOE, CHARLES COE, and BARRY BOE bring this
3 lawsuit because they do not and cannot understand the law, and cannot otherwise obtain a
4 determination of the law and of their own responsibilities and the responsibilities of their
5 employees, customers, members, colleagues and associates. They risk prosecution and/or
6 surrender or confiscation of rifles without compensation even though they cannot determine
7 whether their property is illegal. Nor can they seek or receive advice from law enforcement
8 personnel and agencies because neither do law enforcement personnel and agencies know what
9 these laws mean.

10 33. Plaintiffs HERB BAUER SPORTING GOODS, INC., BARRY BAUER, DAVID D.
11 SUNDY, Sr., Plaintiff CRPA’s members, and Plaintiff CSGA's members and customers face
12 arrest, prosecution, loss of business licenses and deprivation of property without due process of
13 law because SB 23 threatens:

14 (1) the sale and/or possession of rifles with muzzle brakes that might be erroneously
15 considered to be flash suppressors;

16 (2) the sale and/or possession of any pistols with threaded barrels, because they could
17 theoretically accommodate flash suppressors, forward handgrips or silencers, either presently
18 existing or to be designed in the future;

19 (3) the sale and/or possession of shotguns with tubular magazines that would hold far
20 fewer than ten standard-size shells, because they could *theoretically* hold more than ten very short
21 shells;

22 (4) the sale and/or possession of weapons with “permanently” altered magazines, because
23 no definition is given for permanent.

24 34. Plaintiffs EDWARD W. HUNT, NORMAN L. VROMAN, and the law enforcement
25 officers represented by LAW ENFORCEMENT ALLIANCE OF AMERICA cannot meet their
26 obligations both to enforce state law and to refrain from enforcing vague and uncertain laws
27 without clarification of the challenged SB 23 provisions.

28 35. None of the Plaintiffs have a plain, speedy or adequate remedy at law to redress the

1 harms alleged in this complaint.

2 36. Plaintiffs also bring this action in their capacities as taxpayers and citizens.
3 Defendants, and each of them, by enacting, implementing and enforcing the provisions of SB-23,
4 along with the accompanying regulations, are wasting the funds and resources of the State of
5 California. The illegal and unnecessary expenditure and waste of state funds irreparably injures
6 plaintiffs and all taxpayers, and for this harm they have no adequate remedy at law. The State of
7 California expends State resources and funds, directly and indirectly, to enact, implement and
8 enforce the provisions of SB 23, along with the accompanying regulations. Said funds are derived
9 from taxes paid by plaintiffs and others to the State of California. Because the activities for which
10 funds are expended are illegal, the expenditure is illegal pursuant to California Code of Civil
11 Procedure section 526a, and should be enjoined.

12
13 **FIRST CAUSE OF ACTION**
14 **On Behalf of All Plaintiffs against All Defendants:**
15 **Declaratory and Injunctive Relief-**
16 **Unauthorized DOJ Redefinition of "Flash Suppressor"**

17 37. All the preceding paragraphs are realleged and incorporated herein by reference as if
18 set out verbatim.

19 38. Section 12276.1 defines as an AW any semiautomatic rifle with a "flash suppressor."
20 Defendants have unlawfully and unconstitutionally misdefined "flash suppressor" as "any device
21 that reduces or redirects muzzle flash from the shooter's field of vision." Before that regulation
22 became final, defendants recognized that the definition was overly broad, see Exhibit 5 (Cal. Dept.
23 of Justice, Firearms Div., Department of Justice Regulations for Assault Weapons and Large
24 Capacity Magazines - Final Statement of Reasons (Feb. 2000) p.2), but adopted the regulation
25 anyway.

26 39. "Flash suppressor" is a term with an established technical meaning. A "flash
27 suppressor" is a feature added (or integral) to military rifles. Its purpose is to reduce or eliminate
28 the flash that occurs when a rifle fires. Suppressing this flash serves several (purely military)
purposes, including minimizing the danger that the flash from soldiers firing at night will identify

1 their location to the enemy and draw return fire. Standard firearms reference sources such as the
2 GLOSSARY OF THE ASSOCIATION OF FIREARM AND TOOLMARK EXAMINERS define "*Flash*
3 *Suppressor*" as "A muzzle attachment *designed to reduce* muzzle flash." (italics added.) See
4 definitions and information included on the third page of Exhibit 6 (Glossary of the Association of
5 Firearm and Toolmark Examiners (2nd ed. 1985) p. 60), the third page of Exhibit 7 (SAAMI Non-
6 Fiction Writer's Guide, p. 47), the fifth page of Exhibit 8 (Nonte, Firearms Encyclopedia (1973) p.
7 104), the third page of Exhibit 9 (Smith & Smith, The Book of Rifles (3rd ed. 1963) p. 598), the
8 third page of Exhibit 10 (U.S. Army Special Forces Foreign Weapons Handbook (1967) p. V-12),
9 the third page of Exhibit 11 (Steindler, the Firearms Dictionary (1970) p.103), the third page of
10 Exhibit 12 (Mueller & Olson, Small Arms Lexicon and Concise Encyclopedia (1968) p. 83), the
11 second page of Exhibit 13 (Hogg & Weeks, Military Small Arms of the 20th Century (6th ed. 1991)
12 p. 341), the second page of Exhibit 14 (Long, The Complete AR-15/M16 Sourcebook (1992) pp.
13 172-173), and the second page of Exhibit 15 (Gun Digest 2002 (56th ed. 2001) p. 482), all of
14 which are incorporated herein as if set out verbatim.

15 40. Had defendants left "flash suppressor" undefined (or had they adopted the accepted,
16 technical definitions) both public officers and owners and other members of the public would
17 have found it reasonably possible to determine whether any particular rifle has a flash suppressor.
18 But CCR section 978.20(b), the regulation purporting to define "flash suppressor," defines it as
19 "any device designed, intended, or that functions to perceptibly reduce or redirect muzzle flash
20 from the shooter's field of vision." Defendants have thus substituted an aberrant and unintelligible
21 definition for the established technical meaning of flash suppressor.

22 41. Defendants themselves recognize that CCR section 978.20(b) enlarges the meaning of
23 "flash suppressor" to cover devices found on civilian sporting arms, such as "compensators" and
24 "muzzle brakes." Those devices also have established technical meanings which differentiate
25 them from a "flash suppressor." Many civilian rifles have compensators or muzzle brakes, these
26 being devices designed to control recoil. Some such devices may have incidental effects on flash.
27 But they are not *designed* to affect flash, that being irrelevant to civilian rifles which are not
28 expected to be fired at night.

1 42. A second respect in which CCR section 978.20(b) departs from established usage is in
2 unlawfully and unconstitutionally applying the term "flash suppressor" to devices (of which
3 "compensators" and "muzzle brakes" are two) that do not actually reduce flash but merely
4 "redirect" it.

5 43. The longer a rifle barrel is, the less flash will occur from firing it. Minor (but
6 "perceptibl[e]") reduction in flash will occur just because one rifle has a longer barrel than an
7 otherwise identical other rifle. Likewise, the attachment of *any* object to a rifle barrel will reduce
8 flash simply because it lengthens the barrel, not because of any particular quality or feature of the
9 object. By mis-defining "flash suppressor" as anything that perceptibly reduces or redirects
10 muzzle flash, defendants' regulation enlarges that concept to include things not designed to reduce
11 muzzle flash, not named or marketed as flash suppressors, not considered flash suppressors in the
12 industry and not understood as such by the Legislature, rifle owners and the general public.

13 44. A further problem is that defining flash suppressor in terms of any "perceptibl[e]"
14 reduction or redirection of flash requires testing of particular muzzle brakes or compensators, but
15 leaves wholly undefined the standards to be used in such testing. Defendants' failure to provide
16 standards leaves unanswered a host of crucial questions the district attorney plaintiffs will be
17 expected to answer by any forensic laboratory they employ to test whether a device "perceptibly"
18 reduces flash. More important, they are questions the defense may raise in any prosecution the
19 district attorney plaintiffs might bring -- and which the court will expect the district attorney
20 plaintiffs to answer. But those plaintiffs have no answers to these questions since defendants have
21 promulgated CCR section 978.20(b), which gratuitously gives rise to these questions while
22 supplying no answers to them.

23 45. California Code of Regulations section 978.20(b) is invalid in that it enlarges and
24 distorts the established meaning of "flash suppressor," thereby contradicting the plain meaning of
25 Penal Code section 12276.1(a)(1)(E). When the Legislature chose to use "flash suppressor," a
26 term of art having an established meaning, it is deemed to have intended only what falls within
27 that meaning, and not different things having different established meanings. When an
28 administrative agency construes a statutory term having a plain and well-established meaning, it is

1 bound by that meaning and is without authority to alter or expand that meaning. CCR section
2 978.20(b) is invalid in that it unlawfully and unconstitutionally alters and expands the well-
3 established meaning of the concept "flash suppressor," thereby expanding and altering the
4 meaning of Penal Code section 12276.1(a)(1)(E).

5 **Declaratory Judgment Allegation**

6 46. There is an actual and present controversy between the parties to this suit regarding
7 the validity of CCR section 978.20(b). Plaintiffs contend that, as the concept "flash suppressor" is
8 used in Penal Code section 12276.1(a)(1)(E), it applies only to devices expressly called "flash
9 suppressors" or which were designed for the purpose of flash suppression and marketed as
10 performing that purpose. Defendants deny and dispute plaintiffs' said contentions, so plaintiffs
11 seek a judicial declaration adopting and endorsing those contentions.

12
13 **SECOND CAUSE OF ACTION**

14 **On Behalf Of All Plaintiffs Against All Defendants:**

15 **Declaratory And Injunctive Relief
Uncertainty of "Flash Suppressor"**

16 **As Misidentified By California Code of Regulations Section 978.20(b)**

17 47. All the preceding paragraphs are realleged and incorporated herein by reference as if
18 set out verbatim.

19 48. CCR section 978.20(b) sets out three separate definitions of "flash suppressor":
20 "[F]lash suppressor' means [: 1)] any device designed, intended, [2)] or that functions to
21 perceptibly reduce or [3)] redirect muzzle flash from the shooter's field of vision." The second
22 definition (perceptible flash reduction) and the third definition (redirection) are fatally vague and
23 uncertain in all their applications since they require testing which the ordinary rifle owner is
24 unable to perform as more fully set out hereinafter.

25 49. Using the established definition of "flash suppressor" given in standard firearms
26 reference materials, it is relatively simple for a rifle owner or law enforcement officer, prosecutor,
27 or court to determine if a device on a rifle's muzzle is a "flash suppressor" as that concept is used
28 in section 12276.1. The first resort is to the device itself, which is either built into the end of the
barrel or is an attachment. If the device bears words including the legend "flash suppressor" it

1 may be presumed to have been designed to be a flash suppressor. If instead it bears some other
2 legend (e.g., "muzzle brake" or "compensator"), it may be presumed not to be a "flash
3 suppressor." If resort to a legend on the device be deemed insufficient, or if the device bears no
4 legend, resort may be had to the manual that accompanied it at sale and/or to marketing or
5 advertising materials or the patent application. Though research into such materials is not without
6 difficulty, defendants could have performed that research and promulgated a list of which rifles,
7 and/or separate attachment mechanisms are "flash suppressors," or are not. Had defendants
8 performed that research and promulgated such a regulation it would both have aided rifle owners
9 in complying with section 12276.1(a)(1)(E) and the public officials and officers charged with
10 enforcing it.

11 50. In contrast, CCR section 978.20(b) creates a host of uncertainties by defining "flash
12 suppressor" to include devices that are not intended to suppress flash if they do inadvertently have
13 some minor reductive effect (or even just some effect in redirecting flash out of the shooter's field
14 of vision). Among the fatal uncertainties is that neither owners nor public officials can be certain
15 of the relevant "field of vision" for the purposes of that definition. A rifle may be fired either from
16 the shoulder or from the hip (and "AWs" are commonly perceived as being fired from the hip). If
17 firing is from the hip, "the shooter's field of vision" is much greater than if the rifle is fired from
18 the shoulder. As a result a particular muzzle brake or compensator may redirect flash out of the
19 field of vision of a person shooting from the shoulder and yet not do so when the same rifle is
20 fired from the hip. Owners of rifles having the same device on their muzzles will be subject to
21 arrest and prosecution in some counties, but not in others, depending solely on which field of
22 vision local police and prosecutors decide is the correct one for determining whether the device
23 constitutes a flash suppressor. This uncertainty for owners, and inconsistency of enforcement, is
24 solely an artifact of CCR section 978.20(b)'s invalid expansion of the term "flash suppressor" to
25 include devices that unintentionally "redirect flash from the shooter's field of vision."

26 51. Further uncertainty and inconsistency arises because of the difference between iron
27 sights or telescopic sights. If a rifle fired from the shoulder has telescopic sights flash will rarely,
28 if ever, be within the field of vision of a shooter using those sights, regardless of whether there is a

1 muzzle brake or compensator on the rifle's barrel, or of what kind of muzzle brake or compensator
2 it may be. So CCR section 978.20(b) works an irrational and irrelevant distinction as to whether
3 or not particular muzzle brakes or compensators qualify as flash suppressors, rendering the rifles
4 they are on "AWs." On a rifle with iron sights a particular muzzle brake will so qualify if it has
5 the inadvertent effect of even slightly redirecting flash from the shooter's field of vision. But the
6 identical muzzle brake on the identical rifle will not so qualify if the rifle has telescopic sights
7 because the flash is not within the shooter's field of vision in any event. Yet neither owners nor
8 anyone else would anticipate that whether a particular muzzle brake is a flash suppressor depends
9 not on whether it was designed or operates as such, but on whether the rifle has telescopic sights
10 rather than iron sights. No one would anticipate that because having a telescopic sight does not
11 render a rifle any less military, or at all diminish the dangers it may present to public safety.

12 52. As to flash reduction (the second improper criterion in defendants' definition), there is
13 only one way to determine if the muzzle brake or compensator on a particular rifle reduces flash:
14 The rifle must be comparison-tested by firing it, first with the device still on it, and then without
15 the device, to see if there is perceptibly more flash with it removed. With some rifles, however,
16 the muzzle brake or compensator is an integral part of the barrel. Removal means cutting the
17 device off which will substantially reduce the rifle's value. If the testing proves that the device
18 does not perceptibly reduce flash, the owner will be entitled to receive the rifle back -- presumably
19 with compensation for its loss in value being paid by the law enforcement agency or district
20 attorney's office -- something for which no funds have been appropriate or assigned.

21 53. The problem is particularly acute because some rifles with integral muzzle brakes or
22 compensators have barrels so short that removal of the device brings them below the minimum
23 legal length. Even if testing reveals that the rifle was legal before it was cut down for the test, the
24 rifle cannot be returned to its owner since it is now illegal for the owner to possess.⁴ Plaintiffs

25
26 ⁴ There are actually two length restrictions. First, Pen. Code, §§ 12020(a) & (c)(2) prohibits
27 possession of a rifle with a barrel of less than 16" length. Second, § 12276.1(a)(3) prohibits possession
28 of a semiautomatic center fire rifle whose overall length is less than 30" unless it was registered as an
AW before December 31, 2000. But, of course, the hypothetical rifle discussed in the text would not
have been registerable since it was not an AW – until the authorities cut off enough of its barrel in the

1 HUNT and VROMAN may then be liable to compensate the owner for the value of the rifle. It is
2 difficult to believe that when section 12276.1 uses the phrase "flash suppressor," it intends an
3 expanded meaning that imposes such costs on those who must enforce it. These difficulties of
4 testing for the district attorney plaintiffs are exceeded by the difficulties for the gun's owner whom
5 CCR section 978.20(b) compels to engage in testing to determine whether a compensator or
6 muzzle brake on the rifle qualifies as a flash suppressor so as to make the rifle an AW. If cutting
7 the device off the rifle would bring its barrel or overall length under the statutory minima, the
8 owner cannot do the cutting, nor can any gunsmith, since it is illegal for either of them to possess
9 such a "short-barreled" rifle. Legally barred from doing the necessary comparison-testing, owners
10 cannot ascertain whether their rifles have a flash suppressor as defined by DOJ.

11 54. Even when such testing is not illegal for the ordinary civilian to perform, it is
12 pragmatically impossible. Normally, flash can only be seen in the dark. But civilian outdoor rifle
13 ranges are generally not open after dark. As to indoor ranges, few will take rifles more powerful
14 than .22 long rifle caliber -- and none will allow customers to come in, turn the lights out, and
15 blaze away in the dark in order to test whether their muzzle brake or compensator meets the DOJ
16 definition of a "flash suppressor."

17 55. Nor does CCR section 978.20(b) provide the guidance and testing criteria crime
18 laboratories or experts need to determine if a particular muzzle brake, compensator or other feature
19 of the rifle qualifies as a flash suppressor under that regulation. Flash and flash reduction depend
20 on barrel length, bullet weight, type of gun powder, and other factors. Yet the regulations establish
21 no scientific criteria, i.e. lumens, footcandles, etc., by which to measure flash or its reduction.
22 Once again, all these problems are solely an artifact of the regulation's expansion of the term "flash
23 suppressor" beyond its well-established meaning of a device "designed to reduce muzzle flash."

24 56. A further indication of the erroneousness of defendants' CCR section 978.20(b)
25 definition of "flash suppressor" is its inconsistency with the DOJ rulings/advice letters attached
26 hereto as Exhibit 16 (DOJ, letter to Patton, Nov. 6, 2000), Exhibit 17 (NRA-ILA, letter to DOJ,

27
28 course of testing it so that the rifle's overall length fell below 30".

1 Oct. 11, 2000), Exhibit 18 (DOJ, response letter to NRA-ILA, Oct. 31, 2000), Exhibit 19
2 (Trutanich-Michel, LLP, letter to DOJ, Nov. 2, 2000), and Exhibit 20 (DOJ, response letter to
3 Trutanich-Michel, LLP, Dec. 15, 2000). Those letter rulings approve two devices as not being
4 “flash suppressors;” the Springfield M1A “Muzzle Break”⁵ (Exhibits 16, 18, 20) and the Browning
5 BOSS system (Exhibit 20). These devices are depicted in Exhibit 21 (Springfield Armory Web site
6 <<http://www.springfield-armory.com/prod-rifles-m1a.shtml>> [as of Sep. 5, 2001], picture of
7 Standard M1A rifle with typical muzzle brake), Exhibit 22 (Springfield Armory Web site
8 <<http://www.springfield-armory.com/shop>> [as of Sep. 5, 2001], pictures of typical muzzle brake
9 and California legal muzzle brake which can be placed on the M1A rifles), and Exhibit 23
10 (Browning Web site <<http://www.browning.com/products.catalog/firearms/boss/boss.htm>> [as of
11 Sep. 5, 2001], picture and description of Browning BOSS system). Defendants first issued these
12 rulings *before* promulgation of the aberrant and heterodox CCR section 978.20(b) definition. And
13 those letter rulings are correct – because neither of these devices is a flash suppressor as that term
14 is used in section 12276.1.⁶ Neither device is intended or designed to reduce flash, nor do they do
15 so. But, as the cited exhibits reflect, each device does “redirect” flash. Thus each device is a flash
16 suppressor according to the aberrant and heterodox CCR section 978.20(b) definition, though not
17 under the well-established technical meaning of “flash suppressor.” Nevertheless, even after
18 promulgating CCR section 978.20(b) defendants have never disavowed the letter rulings allowing
19 the Springfield “Muzzle Break” and the Browning BOSS system. The result of all this has been to
20 magnify the confusion caused by the CCR section 978.20(b) definition of “flash suppressor.” The
21 inconsistency between the aberrant and heterodox mis-definition in the regulation and both the
22 statute and the letter rulings has left plaintiffs and the general public even more confused as to
23 what CCR section 978.20(b) means, and how it applies to muzzle brakes, compensators, and other
24 devices that may have the incidental and unintended effect of redirecting flash.

25
26 ⁵ A muzzle brake is correctly spelled as “brake.” However, Springfield Armory’s muzzle brake
27 device apparently has a trade name spelled “Muzzle Break,” as is evidenced by Exhibit 21.

28 ⁶ The Browning BOSS is a device designed to increase accuracy by reducing muzzle vibration
when the rifle is fired. The Springfield “muzzle break” is an ordinary muzzle brake.

Declaratory Judgment Allegation

57. There is an actual and present controversy between the parties to this suit regarding the validity of CCR section 978.20(b). Plaintiffs contend that it is invalid because it adds two discrete erroneous definitions (actual flash reduction; redirection) to the meaning of "flash suppressor," and that each of these discrete definitions is fatally vague in its every application. Plaintiffs further contend that CCR section 978.20(b) thereby renders Penal Code section 12276.1(a)(1)(E) fatally vague. Defendants deny and dispute plaintiffs' said contentions, wherefore Plaintiffs seek a judicial declaration adopting and endorsing those contentions.

THIRD CAUSE OF ACTION
On Behalf of All Plaintiffs Against All Defendants:
Declaratory And Injunctive Relief-
Uncertainty of "Threaded Barrel Capable of Accepting A
Flash Suppressor, Forward Hand Grip, or Silencer"

58. All preceding paragraphs are realleged and incorporated herein by reference as if set out verbatim.

59. Under Penal Code section 12276.1(a)(4)(A), a semiautomatic pistol having a detachable magazine (i.e., almost all such pistols) is an AW if it has a "threaded barrel, capable of accepting a flash suppressor, forward handgrip, or silencer." Very few civilian pistols have threaded barrels that will accept such devices for, in general, civilian pistols have not been designed or intended to have or accommodate even a silencer, much less such outre attachments as flash suppressors or forward handgrips. Generally the only civilian pistols having threaded barrels are Olympic and other competition pistols designed for precision target shooting. See illustrations in attached Exhibit 24 (Gun Digest 2002 (56th ed. 2001) pp. 289-294 "Handguns - Competition Handguns;" pictures and descriptions of selected competition handguns, some of which have a threaded barrel). On such pistols the threads allow a weight or compensator to be screwed on to achieve the recoil control and perfect balance required for precision target shooting.

60. Whether a civilian precision target pistol that has a threaded barrel meets the statutory language of being "capable of accepting" a flash suppressor, forward handgrip, or silencer depends on whether there actually exists anywhere in the world such a device that has threads that conform

1 limited to circumstances in which the person possessing a threaded barrel pistol either: has actual
2 knowledge that there is somewhere a flash suppressor, forward handgrip or silencer which fits
3 those threads; or reasonably should have known that based on his actual knowledge of other arcane
4 facts that are relevant thereto. Defendants deny and dispute plaintiffs' said contention, wherefore
5 plaintiffs seek a judicial declaration adopting and endorsing that contention.

6
7 **FOURTH CAUSE OF ACTION**
8 **On Behalf of All Plaintiffs against All Defendants:**
9 **Declaratory and Injunctive Relief**
10 **Uncertainty of "Large Capacity Feeding Device"**
11 **In Relation to Tubular Magazines**

12 64. All preceding paragraphs are realleged and incorporated herein by reference as if set
13 out verbatim.

14 65. SB 23 amended Penal Code section 12020(a) to read in part: "Any person in this state
15 who does any of the following is punishable by imprisonment in a county jail not exceeding one
16 year or in the state prison: . . . (2) Commencing January 1, 2000, manufactures or causes to be
17 manufactured, imports into the state, keeps for sale, or offers or exposes for sale, or who gives, or
18 lends, any large-capacity magazine." (hereinafter section 12020(a)(2)). Section 12020(c)(25) goes
19 on to define "large-capacity magazine" as "any ammunition feeding device with the capacity to
20 accept more than 10 rounds, but shall not be construed to include a feeding device that has been
21 permanently altered so that it cannot accommodate more than 10 rounds nor shall it include any
22 .22 caliber tube ammunition feeding device." These prohibitions may be interpreted to apply not
23 only to the feeding device itself, but also to any shotgun having an integral tubular magazine that
24 meets the definition. That includes pump and lever action (a pre-Civil War era design) shotguns
25 and semi-automatic shotguns. (NOTE: as enacted this provision might also have been interpreted
26 as applicable to rifles, but it was subsequently amended to make it inapplicable to tubular
27 magazine rifles or shotguns.)

28 66. In a tubular magazine firearm the rounds are placed one behind the other. The number
of rounds a tubular magazine holds depends on the length of the rounds, which can vary. The
firearm may have been designed, advertised, and sold as having a capacity of ten or fewer

1 standard-length rounds. Yet, unbeknownst to the owner, it may also be able to take more than ten
2 smaller non-standard rounds if such "mini-rounds" exist. For instance, a shotgun purchased in
3 1998 may have been advertised as having, and may indeed have had, a tubular magazine with a
4 capacity of only six of the 2.75 inch rounds in terms of which magazine capacity of shotguns has
5 traditionally been measured throughout the 20th Century and to date. Such 2.75 inch rounds were
6 the standard, and generally the shortest shotgun rounds then extant in this country.⁷ Yet as of
7 today the same six-shot shotgun may be able to take 11 or more of the obscure 1.5 inch rounds an
8 obscure Mexican ammunition company began making sometime in late 1999. See photographs
9 attached hereto as Exhibit 25 (Aguila Ammunition brochure) and Exhibit 26 (Aguila Ammunition
10 Web site <<http://www.aguilaammo.com>> [as of Sep. 7, 2001], description of Aguila Minishells)
11 incorporated herein as if set out verbatim.

12 67. Even today these 1.5 inch rounds are made only in a few loadings and only in 12
13 gauge; and they will either not operate or not operate reliably in many or most pump and semi-
14 automatic 12 gauge shotguns. The existence of these 1.5 inch rounds is unknown to, and
15 unsuspected by, most shotgun owners in California and to many or most firearms dealers. The
16 ammunition itself is available in only a few California stores. Section 12020(c)(25) cannot
17 constitutionally be interpreted to make the section 12020(a)(2) criminal offense apply to a firearm
18 simply because it will take more than ten short non-standard rounds that may exist somewhere in
19 the world even though such mini-rounds: a) did not even exist when the owner bought the firearm;
20 b) may not be commercially available in California; c) are not possessed by the owner, who, d) is
21 not aware that they even exist. The mere existence of such unknown mini-rounds cannot suddenly
22 make it a crime for the owner of a shotgun to loan it to a hunting buddy even though such a loan
23 was perfectly legal when the owner bought the shotgun which was made and sold as having a
24 magazine capacity of less than 10 of the standard 2.75 inch round.

25 68. Defendants' failure to follow the Legislature's expectation that clarifying regulations
26

27 ⁷ Different lengths of shotgun round prevail in different nations. Among rounds found in the
28 United Kingdom is one of 2" length. Though rarely encountered in the United States that round is
available by special order.

1 would be issued presents a grave uncertainty problem for both owners and law enforcement as to
2 which tubular magazine firearms section 12020(a)(2) should be deemed to cover and which not to.
3 This uncertainty has been magnified by defendants' issuance of the advice letters attached hereto
4 as Exhibits 16 through 20 and incorporated herein as if set out verbatim. As more fully alleged
5 hereinafter in the Sixth Cause of Action, those letters unaccountably allow importation of certain
6 firearms having large capacity magazines under certain conditions. However rational and desirable
7 these DOJ exceptions may be, they appear to contradict the language of section 12020(a)(2).
8 Assuming that some coherent rationale might exist, defendants' failure to offer any rationale
9 whatever leaves plaintiffs and the general public in a state of utter confusion as to whether any
10 large capacity tubular magazine can be imported and, if such magazines may be imported, under
11 what conditions.

12 **Declaratory Judgment Allegation**

13 69. Plaintiffs contend that a) the capacity of a shotgun for purposes of section 12020(a)(2)
14 must be measured in terms of the traditional 2.75" long round; and, b) in general, section
15 12020(c)(25) must be interpreted as applicable only to whatever magazine capacity the
16 manufacturer designed, advertised and sold the firearm as having. Absent such interpretations
17 fixing and limiting its meaning, the section 12020(a)(2) crime is fatally uncertain. Plaintiffs seek
18 declaratory and injunctive relief vindicating this contention.

19
20 **FIFTH CAUSE OF ACTION**

21 **On Behalf Of All Plaintiffs Against All Defendants:**
22 **Declaratory And Injunctive Relief**
23 **Uncertainty of "Permanently Alter" In Relation To**
24 **Large Capacity Feeding Devices**

25 70. All preceding paragraphs are realleged and incorporated herein by reference.

26 71. If the section 12020(a)(2) ban were unqualified it would render unsalable millions of
27 tubular firearms and feeding devices owned by tens of thousands of California owners and dealers,
28 thereby severely reducing the value of their property. To avoid this, section 12020(c)(25) provides
that such firearms and separate feeding devices may be sold if they have "been permanently altered
so that [the feeding device] cannot accommodate more than ten rounds. . . ." (The same

1 qualification applies to section 12276.1(c)(2), which uses a more than ten round capacity as a
2 criterion for defining a semiautomatic firearm to be an AW.)

3 72. If construed over-literally, "permanently alter" has no ascertainable meaning and no
4 application at all. Alterations of metal or plastic objects are *always* subject to reversal, given the
5 necessary time, expertise, resources, and specialized tools and equipment. During the post-SB 23
6 regulatory process defendants recognized the necessity for clarifying "permanently altered" and
7 undertook to do so in the first of the three successive drafts of clarifying regulations they issued
8 (the first two sets in draft, the third set finalized) during the year 2000. But after the attempted
9 clarification was criticized in the comment period, defendants desisted from the effort. The current
10 regulations have no such clarification.

11 73. Defendants' refusal to issue a clarifying regulation results in confusion and
12 inconsistency in the enforcement of sections 12020(a)(2) and 12276.1(c)(2). Owners of "large
13 capacity feeding devices," and of tubular magazine firearms having such feeding devices, do not
14 know how to "permanently alter" them and are afraid even to try to do so for fear of not bringing
15 the device into compliance with the law. Owners are justifiably afraid because local officials who
16 are to enforce the law do not know what constitutes "permanent alteration" as that concept is used
17 by sections 12020(a)(2) and 12276.1(c)(2) and because a violation for selling a regulated
18 ammunition magazine can be a felony. A further problem and deterrent is that in relation to some
19 rifles a misguided attempt to alter their magazine capacity could actually result in turning them
20 into AWs under various provisions of the AWCA. As a result of such attempted compliance, the
21 owner would be subject to prosecution at least for unregistered possession of an AW (§ 12280(b))
22 and possibly for the mandatory four year minimum penalty for illegally manufacturing an AW (§
23 12280(a)).

24 74. Defendants' refusal to issue a clarifying regulation is wrong and unreasonable because
25 the term "permanently altered" needs to be clarified and is easily definable in context. The context
26 is the decades old practice of *non*-permanently altering firearm feeding devices to limit magazine
27 capacity. In California and other states, hunting regulations have often limited the number of
28 rounds that a firearm could hold when used in certain kinds of hunting. These limitations have

1 traditionally been complied with by the insertion of a dowel into the feeding device thereby
2 reducing the number of rounds it could hold. This limitation on magazine capacity was non-
3 "permanent" since the dowel was easily removable. Given this context, defendants could and
4 should have defined "permanent" alteration to be one that cannot be altered or reversed except by
5 physical alteration of the contours or dimensions of the magazine, e.g., alteration that involves
6 physically changing the contours or dimensions of the magazine by metalworking, machining or
7 supergluing (in the case of polymer (a type of plastic) magazines). Defendants reject this
8 definition and fail and refuse to issue a regulation to so clarify what "permanent" alteration means.
9 Defendants thereby are frustrating the purposes of section 12020(c)(25).

10 **Declaratory Judgment Allegation**

11 75. There is an actual and present controversy between the parties to this suit regarding
12 what sections 12020(c)(25) and 12276.1 requires as to the permanent alteration of large capacity
13 feeding devices. Plaintiffs contend that the concept of "permanent" alteration in those statutes
14 means a change that fixes magazine size at ten or less rounds through a process like metalworking,
15 machining, welding, brazing, soldering or application of bonding agents or adhesives that is not
16 easily reversible. Plaintiffs further contend that defendants should issue a regulation so stating.
17 Defendants deny and dispute plaintiffs' said contentions, wherefore plaintiffs seek a judicial
18 declaration adopting and endorsing those contentions.

19 **SIXTH CAUSE OF ACTION:**
20 **Defendants' Inconsistent Conduct and Confusion Caused Thereby**
21 **1. Inconsistency Regarding Springfield and Browning Products**
22 **2. Inconsistency Regarding "Detachable Magazine"**
23 **3. Inconsistency Regarding Importation of "Large Capacity" Magazine Rifles**

24 76. All the preceding paragraphs are realleged and incorporated herein by reference as if
25 set out verbatim.

26 77. In addition to the unconstitutional, confusing and erroneous regulations and inaction
27 previously described, defendants have issued rulings, advice letters, official statements and/or
28 taken other actions inconsistent with those erroneous regulations and/or defendants' formally
adopted policies. The inconsistency of these statements and/or actions and to defendants'
regulations is a source of insuperable confusion to the public and to those charged with enforcing

1 SB 23. Plaintiffs are, therefore, in need either of judicial clarification or of an order requiring that
2 defendants clarify the law and conform their conduct thereto.

3 **1. Inconsistency Regarding Springfield and Browning Products**

4 78. As set out in the first and second causes of action hereto, CCR section 978.20(b)
5 erroneously brings muzzle brakes, compensators and other non-flash suppressors within the
6 meaning of "flash suppressor." Defendants have exacerbated the confusion this error causes by
7 letter opinions declaring two devices, the Browning BOSS system, and the Springfield Armory
8 "Muzzle Break," not to be flash suppressors. Plaintiffs agree that the Springfield Armory "Muzzle
9 Break" and the Browning BOSS system are not flash suppressors *as that term is used in Penal*
10 *Code section 12276.1.* But, in fact, those devices meet the aberrant and heterodox CCR section
11 978.20(b) mis-definition of flash suppressor. Contrary to DOJ's acceptance of them, both the
12 Browning BOSS system and the Springfield Armory "Muzzle Break" are "flash suppressors" under
13 that mis-definition because they each redirect flash from the shooter's field of vision. (See DOJ
14 advice letters attached hereto as Exhibits 16-20 and depictions of the Springfield "Muzzle Break"
15 and Browning BOSS system attached hereto as Exhibits 21-23 and incorporated herein as if set out
16 verbatim).

17 79. The inconsistency of DOJ declaring these muzzle brakes not to be flash suppressors
18 though they meet DOJ's mis-definition of that term creates a quandary for the district attorney
19 plaintiffs and other public officer plaintiffs who are duty-bound to enforce SB 23. If these
20 plaintiffs deem the Springfield Armory "Muzzle Break" and Browning BOSS system to be flash
21 suppressors they are contradicting DOJ's specific finding that these devices are not flash
22 suppressors. Yet to deem them not flash suppressors flies in the face of the DOJ mis-definition
23 which is binding on these plaintiffs. The quandary is complicated by the fact that numerous other
24 muzzle brakes redirect flash exactly as do the Springfield Armory "Muzzle Break" and Browning
25 BOSS system. If in enforcing section 12276.1 plaintiffs deem these other muzzle brakes not to be
26 flash suppressors, plaintiffs will be acting inconsistently with the DOJ mis-definition. But for
27 those plaintiffs to treat these other muzzle brakes as flash suppressors would contradict DOJ's
28 determination that the indistinguishably operating Springfield armory "Muzzle Break" and

1 Browning BOSS system are not flash suppressors under section 12276.1.

2 80. Plaintiffs seek an order invalidating the current version of CCR section 978.20(b) and
3 requiring defendants to rewrite that regulation to conform to section 12276.1.

4 **2. Inconsistency Re "Detachable Magazine"**

5 81. For registration as an AW to be required under section 12276.1(a)(1) a rifle must have
6 "the capacity to accept a detachable magazine" California Code of Regulations, title 11,
7 section 978.20(a) (hereinafter CCR section 12.9.978.20(a)) defines "detachable magazine" as one
8 that "can be removed readily from the firearm with[out] . . . the use of a tool being required." This
9 prompted a written inquiry to DOJ as to the meaning of "detachable," and a following oral inquiry
10 as to whether owners could render their magazines fixed and "non-detachable" by putting a screw
11 through the magazine release so that it would not release without the use of a screw-driver to
12 remove the screw, and then filling in the screw hole with epoxy or superglue so that the screw
13 could not be removed even with a tool. (The rifle could then only be top-loaded through the open
14 receiver as a fixed magazine rifle is loaded. As such the rifle would become subject to Penal Code
15 section 12276.1(a)(2) which classifies a fixed magazine rifle as an AW only if the magazine will
16 take more than ten rounds.)

17 82. DOJ's response was a masterpiece of obfuscation. It admits that the use of a screw as
18 described renders the magazine non-detachable based on the regulation defining a "detachable
19 magazine." But, the DOJ letter then asserts, such an alteration violates "the spirit" of section
20 12276.1 (in some way which remains unexplained). Moreover, the DOJ letter warns, anyone who
21 fails to register a rifle so altered may be prosecuted by some district attorney somewhere, and the
22 prosecution may well succeed. (See the inquiry letter and DOJ response letter which are attached
23 hereto as Exhibit 27 (Trutanich Michel, LLP, letter to DOJ, Jan. 29, 2001) and Exhibit 28 (DOJ,
24 response letter to Trutanich Michel, LLP, Feb. 22, 2001) and incorporated herein as if set out
25 verbatim.)

26 83. Having been duly promulgated under the Administrative Procedure Act (APA), CCR
27 section 978.20(a) has the force of law. Defendants' duty is to exercise their supervisory power
28 over district attorneys and law enforcement agencies so as to assure that neither arrests nor

1 prosecutions occur on grounds that are inconsistent with those regulations. DOJ's threat that
2 persons with rifles altered conformably with CCR section 978.20(a) may be prosecuted by local
3 district attorneys is an implicit disclaimer that defendants intend to perform their supervisory duty
4 in this respect. This DOJ response letter and intention not to perform that duty constitutes an
5 attempted informal amendment of CCR section 978.20(a). It is illegal, having not been formalized
6 and promulgated according to the APA.

7 **3. Inconsistency Regarding Importation of "Large Capacity" Magazine Rifles**

8 84. The Single Action Shooting Society, Inc. (SASS), is a group that sponsors western
9 style shooting competitions generally using modern replicas of 19th Century lever action rifles. As
10 the photos attached Exhibit 1 illustrate, these rifles generally fall under the section 12020(a)(2)
11 restrictions in that they have magazine capacities of more than ten rounds. This could make them
12 non-importable "large capacity feeding devices," depending on how section 12020(a)(2) is
13 interpreted. Yet DOJ letters to SASS (written on official DOJ stationery) authorize non-California
14 SASS members to bring such rifles into the state with them for the purpose of participating in
15 SASS competitions. SASS has, in turn, published the fact of that permission in the SASS monthly
16 newspaper, COWBOY CHRONICLE, which goes to its more than 20,000 members and 300 affiliated
17 clubs all over the world. (Copies of defendants' correspondence, and of the SASS article
18 describing it, respectively, are attached hereto as Exhibit 29 (DOJ, letter to SASS, Mar. 16, 2000),
19 Exhibit 30 (DOJ, letter to SASS, Nov. 1, 2000), and Exhibit 31 (*Long Guns For End of Trail*,
20 *Cowboy Chronicle* (Mar. 2001) p. 9), which are incorporated herein as if set out verbatim.)

21 85. Defendants' SASS correspondence places plaintiff HUNT in a quandary, directly
22 impinging on his performance of his duties. One of the SASS-sponsored competitions is sited in
23 Fresno County. The permission defendants have granted appears inconsistent with section
24 12020(a)(2) if that provision is read as categorically banning importation of any "large capacity"
25 magazine rifle or shotgun. Plaintiffs believe that section 12020(a)(2) should instead be read as a
26 ban only on importation of such firearms for the purpose of sale. But defendants' SASS
27 correspondence does not enunciate this -- or any other -- rationale for allowing non-Californian
28 SASS members to bring these rifles into the state. In abeyance of any rationale from defendants,

1 plaintiff HUNT is left bereft of guidance as to any of the following problems:

2 a) As written, defendants' SASS correspondence refers only to a particular SASS-
3 sponsored competition in Riverside County: Does it also apply to and validate importation of large
4 capacity magazine rifles for use in the SASS-sponsored competition in Fresno? Would it also
5 apply to and validate importation of large capacity magazine rifles for competitions sponsored in
6 Fresno by some organization other than SASS?;

7 b) As written, defendants' SASS correspondence speaks only to the importation of large
8 capacity magazine rifles: Does it also validate importation of large capacity magazine shotguns for
9 use in competitive matches?;

10 c) What does defendants' SASS correspondence imply as to the legality of non-California
11 residents bringing large capacity magazine rifles and shotguns with them on coming to reside in
12 California?

13

14

Detriment to Plaintiffs

15 86. The inconsistent DOJ conduct described in this cause of action obscures the meaning
16 of the laws and regulations involved and confuses those whose duty it is to enforce the laws and
17 the public in general. In addition, it handicaps the district attorney plaintiffs and other enforcement
18 officials in any prosecution they might bring in relation to the affected statutes and regulations.
19 Inevitably (and properly) the defendant in such a prosecution will seize upon the inconsistencies to
20 argue: a) that the laws and regulations do not support the theory of the prosecution; and/or b) that
21 the laws and regulations are fatally uncertain; or c) that, however the laws and regulations should
22 properly be interpreted, due process precludes prosecution of people for acts done in reliance on
23 contrary interpretations by the Attorney General and/or DOJ. Even if those arguments are
24 incorrect, their presentation will enormously complicate and burden any prosecution the public
25 official plaintiffs might bring.

26 87. If defendants' actions described in this cause of action are correct, the California Code
27 of Regulations, title 11, section 978.20 regulations are invalid and incorrect -- and vice versa.
28 Plaintiffs seek an order that DOJ take whatever action is necessary (including promulgating new or

1 amended regulations) so that its regulations and its actions are consistent with each other and that
2 both are consistent with the statutes involved.

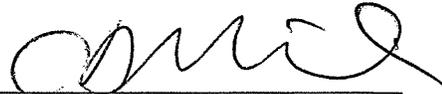

3 **PRAYER FOR RELIEF**

4 WHEREFORE, Plaintiffs pray for relief as follows:

- 5 1. Declaratory relief as set forth above;
- 6 2. Injunctive relief against enforcement of the provisions of the Penal Code enacted and/or
7 amended by SB 23 pending clarification of the vague and uncertain terms contained therein;
- 8 3. Injunctive relief mandating that the deadline for registering firearms covered by Penal
9 Code section 12276.1 be extended until the vague and uncertain terms contained therein have been
10 clarified -- or, in the alternative, declaratory judgment that no prosecution under Penal Code
11 section 12280(b) may be maintained insofar as it relies upon terms of section 12276.1 that have not
12 been clarified and were vague and uncertain at the time of the alleged violation;
- 13 4. For attorney's fees expenses of counsel, and costs of suit; and
- 14 5. For such other relief as the court may deem proper.

Introduced by Senators Perata and Peace

February 22, 2001

An act to amend Sections 12020 and 12280 of the Penal Code, relating to firearms.

LEGISLATIVE COUNSEL'S DIGEST

SB 626, as introduced, Perata. Large-capacity magazines.

Existing law, except as provided, generally prohibits the manufacturing, causing to be manufactured, importation into the state, keeping, offering or exposing for sale, giving, or lending, of any large-capacity magazine. Existing law also defines "large-capacity magazine" and specifies certain magazines that are not included within the definition.

This bill would exempt the manufacture of a large-capacity magazine for certain law enforcement agents, peace officers, and firearms licensees.

This bill would, in addition, specify additional magazines that are not included within the definition of "large-capacity magazine."

Existing law makes it an offense, with specified exceptions, to possess an assault weapon, as defined.

This bill would provide additional exceptions to the offense of possessing an assault weapon, regarding the loan at a target range of an assault weapon by a retired peace officer, as specified, and receipt and possession of an assault weapon by certain peace officers, if those officers register the assault weapon, as specified.

By imposing additional duties on local law enforcement agencies, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state.

Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Vote: majority. Appropriation: no. Fiscal committee: yes. State-mandated local program: yes.

The people of the State of California do enact as follows:

- 1 SECTION 1. Section 12020 of the Penal Code is amended to
- 2 read:
- 3 12020. (a) Any person in this state who does any of the
- 4 following is punishable by imprisonment in a county jail not
- 5 exceeding one year or in the state prison:
- 6 (1) Manufactures or causes to be manufactured, imports into
- 7 the state, keeps for sale, or offers or exposes for sale, or who gives,
- 8 lends, or possesses any cane gun or wallet gun, any undetectable
- 9 firearm, any firearm which is not immediately recognizable as a
- 10 firearm, any camouflaging firearm container, any ammunition
- 11 which contains or consists of any fléchette dart, any bullet
- 12 containing or carrying an explosive agent, any ballistic knife, any
- 13 multiburst trigger activator, any nunchaku, any short-barreled
- 14 shotgun, any short-barreled rifle, any metal knuckles, any belt
- 15 buckle knife, any leaded cane, any zip gun, any shuriken, any
- 16 unconventional pistol, any lipstick case knife, any cane sword, any
- 17 shobi-zue, any air gauge knife, any writing pen knife, any metal
- 18 military practice handgrenade or metal replica handgrenade, or
- 19 any instrument or weapon of the kind commonly known as a
- 20 blackjack, slungshot, billy, sandclub, sap, or sandbag.
- 21 (2) Commencing January 1, 2000, manufactures or causes to be
- 22 manufactured, imports into the state, keeps for sale, or offers or
- 23 exposes for sale, or who gives, or lends, any large-capacity
- 24 magazine.
- 25 (3) Carries concealed upon his or her person any explosive
- 26 substance, other than fixed ammunition.

1 (4) Carries concealed upon his or her person any dirk or dagger.
2 However, a first offense involving any metal military practice
3 handgrenade or metal replica handgrenade shall be punishable
4 only as an infraction unless the offender is an active participant in
5 a criminal street gang as defined in the Street Terrorism and
6 Enforcement and Prevention Act (Chapter 11 (commencing with
7 Section 186.20) of Title 7 of Part 1). A bullet containing or
8 carrying an explosive agent is not a destructive device as that term
9 is used in Section 12301.

10 (b) Subdivision (a) does not apply to any of the following:

11 (1) The sale to, purchase by, or possession of short-barreled
12 shotguns or short-barreled rifles by police departments, sheriffs'
13 offices, marshals' offices, the California Highway Patrol, the
14 Department of Justice, or the military or naval forces of this state
15 or of the United States for use in the discharge of their official
16 duties or the possession of short-barreled shotguns and
17 short-barreled rifles by peace officer members of a police
18 department, sheriff's office, marshal's office, the California
19 Highway Patrol, or the Department of Justice when on duty and the
20 use is authorized by the agency and is within the course and scope
21 of their duties and the peace officer has completed a training course
22 in the use of these weapons certified by the Commission on Peace
23 Officer Standards and Training.

24 (2) The manufacture, possession, transportation or sale of
25 short-barreled shotguns or short-barreled rifles when authorized
26 by the Department of Justice pursuant to Article 6 (commencing
27 with Section 12095) of this chapter and not in violation of federal
28 law.

29 (3) The possession of a nunchaku on the premises of a school
30 which holds a regulatory or business license and teaches the arts
31 of self-defense.

32 (4) The manufacture of a nunchaku for sale to, or the sale of a
33 nunchaku to, a school which holds a regulatory or business license
34 and teaches the arts of self-defense.

35 (5) Any antique firearm. For purposes of this section, "antique
36 firearm" means any firearm not designed or redesigned for using
37 rimfire or conventional center fire ignition with fixed ammunition
38 and manufactured in or before 1898 (including any matchlock,
39 flintlock, percussion cap, or similar type of ignition system or
40 replica thereof, whether actually manufactured before or after the

1 year 1898) and also any firearm using fixed ammunition
2 manufactured in or before 1898, for which ammunition is no
3 longer manufactured in the United States and is not readily
4 available in the ordinary channels of commercial trade.

5 (6) Tracer ammunition manufactured for use in shotguns.

6 (7) Any firearm or ammunition which is a curio or relic as
7 defined in Section 178.11 of Title 27 of the Code of Federal
8 Regulations and which is in the possession of a person permitted
9 to possess the items pursuant to Chapter 44 (commencing with
10 Section 921) of Title 18 of the United States Code and the
11 regulations issued pursuant thereto. Any person prohibited by
12 Section 12021, 12021.1, or 12101 of this code or Section 8100 or
13 8103 of the Welfare and Institutions Code from possessing
14 firearms or ammunition who obtains title to these items by bequest
15 or intestate succession may retain title for not more than one year,
16 but actual possession of these items at any time is punishable
17 pursuant to Section 12021, 12021.1, or 12101 of this code or
18 Section 8100 or 8103 of the Welfare and Institutions Code. Within
19 the year, the person shall transfer title to the firearms or
20 ammunition by sale, gift, or other disposition. Any person who
21 violates this paragraph is in violation of subdivision (a).

22 (8) Any other weapon as defined in subsection (e) of Section
23 5845 of Title 26 of the United States Code and which is in the
24 possession of a person permitted to possess the weapons pursuant
25 to the federal Gun Control Act of 1968 (Public Law 90-618), as
26 amended, and the regulations issued pursuant thereto. Any person
27 prohibited by Section 12021, 12021.1, or 12101 of this code or
28 Section 8100 or 8103 of the Welfare and Institutions Code from
29 possessing these weapons who obtains title to these weapons by
30 bequest or intestate succession may retain title for not more than
31 one year, but actual possession of these weapons at any time is
32 punishable pursuant to Section 12021, 12021.1, or 12101 of this
33 code or Section 8100 or 8103 of the Welfare and Institutions Code.
34 Within the year, the person shall transfer title to the weapons by
35 sale, gift, or other disposition. Any person who violates this
36 paragraph is in violation of subdivision (a). The exemption
37 provided in this subdivision does not apply to pen guns.

38 (9) Instruments or devices that are possessed by federal, state,
39 and local historical societies, museums, and institutional
40 collections which are open to the public, provided that these

1 instruments or devices are properly housed, secured from
2 unauthorized handling, and, if the instrument or device is a
3 firearm, unloaded.

4 (10) Instruments or devices, other than short-barreled shotguns
5 or short-barreled rifles, that are possessed or utilized during the
6 course of a motion picture, television, or video production or
7 entertainment event by an authorized participant therein in the
8 course of making that production or event or by an authorized
9 employee or agent of the entity producing that production or event.

10 (11) Instruments or devices, other than short-barreled shotguns
11 or short-barreled rifles, that are sold by, manufactured by, exposed
12 or kept for sale by, possessed by, imported by, or lent by persons
13 who are in the business of selling instruments or devices listed in
14 subdivision (a) solely to the entities referred to in paragraphs (9)
15 and (10) when engaging in transactions with those entities.

16 (12) The sale to, possession of, or purchase of any weapon,
17 device, or ammunition, other than a short-barreled rifle or
18 short-barreled shotgun, by any federal, state, county, city and
19 county, or city agency that is charged with the enforcement of any
20 law for use in the discharge of their official duties, or the
21 possession of any weapon, device, or ammunition, other than a
22 short-barreled rifle or short-barreled shotgun, by peace officers
23 thereof when on duty and the use is authorized by the agency and
24 is within the course and scope of their duties.

25 (13) Weapons, devices, and ammunition, other than a
26 short-barreled rifle or short-barreled shotgun, that are sold by,
27 manufactured by, exposed or kept for sale by, possessed by,
28 imported by, or lent by, persons who are in the business of selling
29 weapons, devices, and ammunition listed in subdivision (a) solely
30 to the entities referred to in paragraph (12) when engaging in
31 transactions with those entities.

32 (14) The manufacture for, sale to, exposing or keeping for sale
33 to, importation of, or lending of wooden clubs or batons to special
34 police officers or uniformed security guards authorized to carry
35 any wooden club or baton pursuant to Section 12002 by entities
36 that are in the business of selling wooden batons or clubs to special
37 police officers and uniformed security guards when engaging in
38 transactions with those persons.

39 (15) Any plastic toy handgrenade, or any metal military
40 practice handgrenade or metal replica handgrenade that is a relic,

1 curio, memorabilia, or display item, that is filled with a permanent
2 inert substance or that is otherwise permanently altered in a
3 manner that prevents ready modification for use as a grenade.

4 (16) Any instrument, ammunition, weapon, or device listed in
5 subdivision (a) that is not a firearm that is found and possessed by
6 a person who meets all of the following:

7 (A) The person is not prohibited from possessing firearms or
8 ammunition pursuant to Section 12021 or 12021.1 or paragraph
9 (1) of subdivision (b) of Section 12316 of this code or Section 8100
10 or 8103 of the Welfare and Institutions Code.

11 (B) The person possessed the instrument, ammunition,
12 weapon, or device no longer than was necessary to deliver or
13 transport the same to a law enforcement agency for that agency's
14 disposition according to law.

15 (C) If the person is transporting the listed item, he or she is
16 transporting the listed item to a law enforcement agency for
17 disposition according to law.

18 (17) Any firearm, other than a short-barreled rifle or
19 short-barreled shotgun, that is found and possessed by a person
20 who meets all of the following:

21 (A) The person is not prohibited from possessing firearms or
22 ammunition pursuant to Section 12021 or 12021.1 or paragraph
23 (1) of subdivision (b) of Section 12316 of this code or Section 8100
24 or 8103 of the Welfare and Institutions Code.

25 (B) The person possessed the firearm no longer than was
26 necessary to deliver or transport the same to a law enforcement
27 agency for that agency's disposition according to law.

28 (C) If the person is transporting the firearm, he or she is
29 transporting the firearm to a law enforcement agency for
30 disposition according to law.

31 (D) Prior to transporting the firearm to a law enforcement
32 agency, he or she has given prior notice to that law enforcement
33 agency that he or she is transporting the firearm to that law
34 enforcement agency for disposition according to law.

35 (E) The firearm is transported in a locked container as defined
36 in subdivision (d) of Section 12026.2.

37 (18) The possession of any weapon, device, or ammunition, by
38 a forensic laboratory or any authorized agent or employee thereof
39 in the course and scope of his or her authorized activities.

1 (19) The sale of, giving of, lending of, importation into this
2 state of, or purchase of, any large-capacity magazine to or by any
3 federal, state, county, city and county, or city agency that is
4 charged with the enforcement of any law, for use by agency
5 employees in the discharge of their official duties whether on or
6 off duty, and where the use is authorized by the agency and is
7 within the course and scope of their duties.

8 (20) The sale to, lending to, transfer to, purchase by, receipt of,
9 or importation into this state of, a large capacity magazine by a
10 sworn peace officer as defined in Chapter 4.5 (commencing with
11 Section 830) of Title 3 of Part 2 who is authorized to carry a firearm
12 in the course and scope of his or her duties.

13 (21) The sale or purchase of any large-capacity magazine to or
14 by a person licensed pursuant to Section 12071.

15 (22) The loan of a lawfully possessed large-capacity magazine
16 between two individuals if all of the following conditions are met:

17 (A) The person being loaned the large-capacity magazine is not
18 prohibited by Section 12021, 12021.1, or 12101 of this code or
19 Section 8100 or 8103 of the Welfare and Institutions Code from
20 possessing firearms or ammunition.

21 (B) The loan of the large-capacity magazine occurs at a place
22 or location where the possession of the large-capacity magazine is
23 not otherwise prohibited and the person who lends the
24 large-capacity magazine remains in the accessible vicinity of the
25 person to whom the large-capacity magazine is loaned.

26 (23) The importation of a large-capacity magazine by a person
27 who lawfully possessed the large-capacity magazine in the state
28 prior to January 1, 2000, lawfully took it out of the state, and is
29 returning to the state with the large-capacity magazine previously
30 lawfully possessed in the state.

31 (24) The lending or giving of any large-capacity magazine to
32 a person licensed pursuant to Section 12071, or to a gunsmith, for
33 the purposes of maintenance, repair, or modification of that
34 large-capacity magazine.

35 (25) The return to its owner of any large-capacity magazine by
36 a person specified in paragraph (24).

37 (26) The importation into this state of, or sale of, any
38 large-capacity magazine by a person who has been issued a permit
39 to engage in those activities pursuant to Section 12079, when those

1 activities are in accordance with the terms and conditions of that
2 permit.

3 (27) The sale of, giving of, lending of, importation into this
4 state of, or purchase of, any large-capacity magazine, to or by
5 entities that operate armored vehicle businesses pursuant to the
6 laws of this state.

7 (28) The lending of large-capacity magazines by the entities
8 specified in paragraph (27) to their authorized employees, while
9 in the course and scope of their employment for purposes that
10 pertain to the entity's armored vehicle business.

11 (29) The return of those large-capacity magazines to those
12 entities specified in paragraph (27) by those employees specified
13 in paragraph (28).

14 (30) (A) *The manufacture of a large-capacity magazine for*
15 *any federal, state, county, city and county, or city agency that is*
16 *charged with the enforcement of any law, for use by agency*
17 *employees in the discharge of their official duties whether on or off*
18 *duty, and where the use is authorized by the agency and is within*
19 *the course and scope of their duties.*

20 (B) *The manufacture of a large-capacity magazine for use by*
21 *a sworn peace officer as defined in Chapter 4.5 (commencing with*
22 *Section 830) of Title 3 of Part 2 who is authorized to carry a firearm*
23 *in the course and scope of his or her duties.*

24 (C) *The manufacture of a large-capacity magazine for a person*
25 *licensed pursuant to Section 12071.*

26 (c) (1) As used in this section, a "short-barreled shotgun"
27 means any of the following:

28 (A) A firearm which is designed or redesigned to fire a fixed
29 shotgun shell and having a barrel or barrels of less than 18 inches
30 in length.

31 (B) A firearm which has an overall length of less than 26 inches
32 and which is designed or redesigned to fire a fixed shotgun shell.

33 (C) Any weapon made from a shotgun (whether by alteration,
34 modification, or otherwise) if that weapon, as modified, has an
35 overall length of less than 26 inches or a barrel or barrels of less
36 than 18 inches in length.

37 (D) Any device which may be readily restored to fire a fixed
38 shotgun shell which, when so restored, is a device defined in
39 subparagraphs (A) to (C), inclusive.

1 (E) Any part, or combination of parts, designed and intended
2 to convert a device into a device defined in subparagraphs (A) to
3 (C), inclusive, or any combination of parts from which a device
4 defined in subparagraphs (A) to (C), inclusive, can be readily
5 assembled if those parts are in the possession or under the control
6 of the same person.

7 (2) As used in this section, a “short-barreled rifle” means any
8 of the following:

9 (A) A rifle having a barrel or barrels of less than 16 inches in
10 length.

11 (B) A rifle with an overall length of less than 26 inches.

12 (C) Any weapon made from a rifle (whether by alteration,
13 modification, or otherwise) if that weapon, as modified, has an
14 overall length of less than 26 inches or a barrel or barrels of less
15 than 16 inches in length.

16 (D) Any device which may be readily restored to fire a fixed
17 cartridge which, when so restored, is a device defined in
18 subparagraphs (A) to (C), inclusive.

19 (E) Any part, or combination of parts, designed and intended
20 to convert a device into a device defined in subparagraphs (A) to
21 (C), inclusive, or any combination of parts from which a device
22 defined in subparagraphs (A) to (C), inclusive, may be readily
23 assembled if those parts are in the possession or under the control
24 of the same person.

25 (3) As used in this section, a “nunchaku” means an instrument
26 consisting of two or more sticks, clubs, bars or rods to be used as
27 handles, connected by a rope, cord, wire, or chain, in the design of
28 a weapon used in connection with the practice of a system of
29 self-defense such as karate.

30 (4) As used in this section, a “wallet gun” means any firearm
31 mounted or enclosed in a case, resembling a wallet, designed to be
32 or capable of being carried in a pocket or purse, if the firearm may
33 be fired while mounted or enclosed in the case.

34 (5) As used in this section, a “cane gun” means any firearm
35 mounted or enclosed in a stick, staff, rod, crutch, or similar device,
36 designed to be, or capable of being used as, an aid in walking, if
37 the firearm may be fired while mounted or enclosed therein.

38 (6) As used in this section, a “fléchette dart” means a dart,
39 capable of being fired from a firearm, which measures

1 approximately one inch in length, with tail fins which take up
2 five-sixteenths of an inch of the body.

3 (7) As used in this section, “metal knuckles” means any device
4 or instrument made wholly or partially of metal which is worn for
5 purposes of offense or defense in or on the hand and which either
6 protects the wearer’s hand while striking a blow or increases the
7 force of impact from the blow or injury to the individual receiving
8 the blow. The metal contained in the device may help support the
9 hand or fist, provide a shield to protect it, or consist of projections
10 or studs which would contact the individual receiving a blow.

11 (8) As used in this section, a “ballistic knife” means a device
12 that propels a knifelike blade as a projectile by means of a coil
13 spring, elastic material, or compressed gas. Ballistic knife does not
14 include any device which propels an arrow or a bolt by means of
15 any common bow, compound bow, crossbow, or underwater spear
16 gun.

17 (9) As used in this section, a “camouflaging firearm
18 container” means a container which meets all of the following
19 criteria:

20 (A) It is designed and intended to enclose a firearm.

21 (B) It is designed and intended to allow the firing of the
22 enclosed firearm by external controls while the firearm is in the
23 container.

24 (C) It is not readily recognizable as containing a firearm.

25 “Camouflaging firearm container” does not include any
26 camouflaging covering used while engaged in lawful hunting or
27 while going to or returning from a lawful hunting expedition.

28 (10) As used in this section, a “zip gun” means any weapon or
29 device which meets all of the following criteria:

30 (A) It was not imported as a firearm by an importer licensed
31 pursuant to Chapter 44 (commencing with Section 921) of Title 18
32 of the United States Code and the regulations issued pursuant
33 thereto.

34 (B) It was not originally designed to be a firearm by a
35 manufacturer licensed pursuant to Chapter 44 (commencing with
36 Section 921) of Title 18 of the United States Code and the
37 regulations issued pursuant thereto.

38 (C) No tax was paid on the weapon or device nor was an
39 exemption from paying tax on that weapon or device granted under
40 Section 4181 and subchapters F (commencing with Section 4216)

1 and G (commencing with Section 4221) of Chapter 32 of Title 26
2 of the United States Code, as amended, and the regulations issued
3 pursuant thereto.

4 (D) It is made or altered to expel a projectile by the force of an
5 explosion or other form of combustion.

6 (11) As used in this section, a “shuriken” means any
7 instrument, without handles, consisting of a metal plate having
8 three or more radiating points with one or more sharp edges and
9 designed in the shape of a polygon, trefoil, cross, star, diamond,
10 or other geometric shape for use as a weapon for throwing.

11 (12) As used in this section, an “unconventional pistol” means
12 a firearm that does not have a rifled bore and has a barrel or barrels
13 of less than 18 inches in length or has an overall length of less than
14 26 inches.

15 (13) As used in this section, a “belt buckle knife” is a knife
16 which is made an integral part of a belt buckle and consists of a
17 blade with a length of at least 2½ inches.

18 (14) As used in this section, a “lipstick case knife” means a
19 knife enclosed within and made an integral part of a lipstick case.

20 (15) As used in this section, a “cane sword” means a cane,
21 swagger stick, stick, staff, rod, pole, umbrella, or similar device,
22 having concealed within it a blade that may be used as a sword or
23 stiletto.

24 (16) As used in this section, a “shobi-zue” means a staff,
25 crutch, stick, rod, or pole concealing a knife or blade within it
26 which may be exposed by a flip of the wrist or by a mechanical
27 action.

28 (17) As used in this section, a “leaded cane” means a staff,
29 crutch, stick, rod, pole, or similar device, unnaturally weighted
30 with lead.

31 (18) As used in this section, an “air gauge knife” means a
32 device that appears to be an air gauge but has concealed within it
33 a pointed, metallic shaft that is designed to be a stabbing
34 instrument which is exposed by mechanical action or gravity
35 which locks into place when extended.

36 (19) As used in this section, a “writing pen knife” means a
37 device that appears to be a writing pen but has concealed within it
38 a pointed, metallic shaft that is designed to be a stabbing
39 instrument which is exposed by mechanical action or gravity

1 which locks into place when extended or the pointed, metallic shaft
2 is exposed by the removal of the cap or cover on the device.

3 (20) As used in this section, a “rifle” means a weapon designed
4 or redesigned, made or remade, and intended to be fired from the
5 shoulder and designed or redesigned and made or remade to use
6 the energy of the explosive in a fixed cartridge to fire only a single
7 projectile through a rifled bore for each single pull of the trigger.

8 (21) As used in this section, a “shotgun” means a weapon
9 designed or redesigned, made or remade, and intended to be fired
10 from the shoulder and designed or redesigned and made or remade
11 to use the energy of the explosive in a fixed shotgun shell to fire
12 through a smooth bore either a number of projectiles (ball shot) or
13 a single projectile for each pull of the trigger.

14 (22) As used in this section, an “undetectable firearm” means
15 any weapon which meets one of the following requirements:

16 (A) When, after removal of grips, stocks, and magazines, it is
17 not as detectable as the Security Exemplar, by walk-through metal
18 detectors calibrated and operated to detect the Security Exemplar.

19 (B) When any major component of which, when subjected to
20 inspection by the types of X-ray machines commonly used at
21 airports, does not generate an image that accurately depicts the
22 shape of the component. Barium sulfate or other compounds may
23 be used in the fabrication of the component.

24 (C) For purposes of this paragraph, the terms “firearm,”
25 “major component,” and “Security Exemplar” have the same
26 meanings as those terms are defined in Section 922 of Title 18 of
27 the United States Code.

28 All firearm detection equipment newly installed in nonfederal
29 public buildings in this state shall be of a type identified by either
30 the United States Attorney General, the Secretary of
31 Transportation, or the Secretary of the Treasury, as appropriate, as
32 available state-of-the-art equipment capable of detecting an
33 undetectable firearm, as defined, while distinguishing innocuous
34 metal objects likely to be carried on one’s person sufficient for
35 reasonable passage of the public.

36 (23) As used in this section, a “multiburst trigger activator”
37 means one of the following devices:

38 (A) A device designed or redesigned to be attached to a
39 semiautomatic firearm which allows the firearm to discharge two
40 or more shots in a burst by activating the device.

1 (B) A manual or power-driven trigger activating device
2 constructed and designed so that when attached to a semiautomatic
3 firearm it increases the rate of fire of that firearm.

4 (24) As used in this section, a “dirk” or “dagger” means a
5 knife or other instrument with or without a handguard that is
6 capable of ready use as a stabbing weapon that may inflict great
7 bodily injury or death. A nonlocking folding knife, a folding knife
8 that is not prohibited by Section 653k, or a pocketknife is capable
9 of ready use as a stabbing weapon that may inflict great bodily
10 injury or death only if the blade of the knife is exposed and locked
11 into position.

12 (25) As used in this section, “large-capacity magazine” means
13 any ammunition feeding device with the capacity to accept more
14 than 10 rounds, but shall not be construed to include *any of the*
15 *following*:

16 (A) A feeding device that has been permanently altered so that
17 it cannot accommodate more than 10 rounds ~~nor shall it include~~
18 ~~any~~.

19 (B) A .22 caliber tube ammunition feeding device.

20 (C) A tubular magazine that is contained in a lever-action
21 firearm.

22 (d) Knives carried in sheaths which are worn openly suspended
23 from the waist of the wearer are not concealed within the meaning
24 of this section.

25 SEC. 2. Section 12280 of the Penal Code is amended to read:

26 12280. (a) (1) Any person who, within this state,
27 manufactures or causes to be manufactured, distributes,
28 transports, or imports into the state, keeps for sale, or offers or
29 exposes for sale, or who gives or lends any assault weapon, except
30 as provided by this chapter, is guilty of a felony, and upon
31 conviction shall be punished by imprisonment in the state prison
32 for four, six, or eight years.

33 (2) In addition and consecutive to the punishment imposed
34 under paragraph (1), any person who transfers, lends, sells, or
35 gives any assault weapon to a minor in violation of paragraph (1)
36 shall receive an enhancement of one year.

37 (b) Except as provided in Section 12288, and in subdivisions
38 (c) and (d), any person who, within this state, possesses any assault
39 weapon, except as provided in this chapter, is guilty of a public
40 offense and upon conviction shall be punished by imprisonment in

1 the state prison, or in a county jail, not exceeding one year.
2 However, if the person presents proof that he or she lawfully
3 possessed the assault weapon prior to June 1, 1989, or prior to the
4 date it was specified as an assault weapon, and has since either
5 registered the firearm and any other lawfully obtained firearm
6 specified by Section 12276 or 12276.5 pursuant to Section 12285
7 or relinquished them pursuant to Section 12288, a first-time
8 violation of this subdivision shall be an infraction punishable by
9 a fine of up to five hundred dollars (\$500), but not less than three
10 hundred fifty dollars (\$350), if the person has otherwise possessed
11 the firearm in compliance with subdivision (c) of Section 12285.
12 In these cases, the firearm shall be returned unless the court finds
13 in the interest of public safety, after notice and hearing, that the
14 assault weapon should be destroyed pursuant to Section 12028.

15 (c) A first-time violation of subdivision (b) shall be an
16 infraction punishable by a fine of up to five hundred dollars
17 (\$500), if the person was found in possession of no more than two
18 firearms in compliance with subdivision (c) of Section 12285 and
19 the person meets all of the following conditions:

20 (1) The person proves that he or she lawfully possessed the
21 assault weapon prior to the date it was defined as an assault weapon
22 pursuant to Section 12276.1.

23 (2) The person is not found in possession of a firearm specified
24 as an assault weapon pursuant to Section 12276 or Section
25 12276.5.

26 (3) The person has not previously been convicted of violating
27 this section.

28 (4) The person was found to be in possession of the assault
29 weapons within one year following the end of the one-year
30 registration period established pursuant to subdivision (a) of
31 Section 12285.

32 (5) The person has since registered the firearms and any other
33 lawfully obtained firearms defined by Section 12276.1, pursuant
34 to Section 12285, except as provided for by this section, or
35 relinquished them pursuant to Section 12288.

36 (d) Firearms seized pursuant to subdivision (c) shall be
37 returned unless the court finds in the interest of public safety, after
38 notice and hearing, that the assault weapon should be destroyed
39 pursuant to Section 12028.

1 (e) Notwithstanding Section 654 or any other provision of law,
2 any person who commits another crime while violating this section
3 may receive an additional, consecutive punishment of one year for
4 violating this section in addition and consecutive to the
5 punishment, including enhancements, which is prescribed for the
6 other crime.

7 (f) Subdivisions (a) and (b) shall not apply to the sale to,
8 purchase by, or possession of assault weapons by the Department
9 of Justice, police departments, sheriffs' offices, marshals' offices,
10 the Youth and Adult Corrections Agency, the Department of the
11 California Highway Patrol, district attorneys' offices, Department
12 of Fish and Game, Department of Parks and Recreation, or the
13 military or naval forces of this state or of the United States, *or any*
14 *federal law enforcement agency* for use in the discharge of their
15 official duties.

16 (g) (1) Subdivision (b) shall not prohibit the possession or use
17 of assault weapons by sworn peace officer members of those
18 agencies specified in subdivision (f) for law enforcement
19 purposes, whether on or off duty.

20 (2) *Subdivisions (a) and (b) shall not prohibit the delivery,*
21 *transfer, or sale of an assault weapon to, or the possession of an*
22 *assault weapon by, a sworn peace officer member of an agency*
23 *specified in subdivision (f), provided that the peace officer is*
24 *authorized by his or her employer to possess or receive the assault*
25 *weapon. Required authorization is defined as verifiable written*
26 *certification from the head of the agency, identifying the recipient*
27 *or possessor of the assault weapon as a peace officer and*
28 *authorizing him or her to receive or possess the specific assault*
29 *weapon. For this exemption to apply, in the case of a peace officer*
30 *who possesses or receives the assault weapon prior to January 1,*
31 *2002, the officer shall register the assault weapon pursuant to*
32 *Section 12285 on or before April 1, 2002; in the case of a peace*
33 *officer who possesses or receives the assault weapon on or after*
34 *January 1, 2002, the officer shall register the assault weapon*
35 *pursuant to Section 12285 not later than 90 days after possession*
36 *or receipt. The peace officer must include with the registration, a*
37 *copy of the authorization required pursuant to this paragraph.*

38 (3) *Nothing in this section shall be construed to limit or prohibit*
39 *the delivery, transfer, or sale of an assault weapon to, or the*
40 *possession of an assault weapon by, a member of a federal law*

1 *enforcement agency provided that person is authorized by the*
2 *employing agency to possess the assault weapon.*

3 (h) Subdivisions (a) and (b) shall not prohibit the sale or
4 transfer of assault weapons by an entity specified in subdivision (f)
5 to a person, upon retirement, who retired as a sworn officer from
6 that entity.

7 (i) Subdivision (b) shall not apply to the possession of an
8 assault weapon by a retired peace officer who received that assault
9 weapon pursuant to subdivision (h).

10 (j) Subdivision (b) shall not apply to the possession of an
11 assault weapon, as defined in Section 12276, by any person during
12 the 1990 calendar year, during the 90-day period immediately after
13 the date it was specified as an assault weapon pursuant to Section
14 12276.5, or during the one-year period after the date it was defined
15 as an assault weapon pursuant to Section 12276.1, if all of the
16 following are applicable:

17 (1) The person is eligible under this chapter to register the
18 particular assault weapon.

19 (2) The person lawfully possessed the particular assault
20 weapon described in paragraph (1) prior to June 1, 1989, if the
21 weapon is specified as an assault weapon pursuant to Section
22 12276, or prior to the date it was specified as an assault weapon
23 pursuant to Section 12276.5, or prior to the date it was defined as
24 an assault weapon pursuant to Section 12276.1.

25 (3) The person is otherwise in compliance with this chapter.

26 (k) Subdivisions (a) and (b) shall not apply to the manufacture
27 by persons who are issued permits pursuant to Section 12287 of
28 assault weapons for sale to the following:

29 (1) Exempt entities listed in subdivision (f).

30 (2) Entities and persons who have been issued permits pursuant
31 to Section 12286.

32 (3) Entities outside the state who have, in effect, a federal
33 firearms dealer's license solely for the purpose of distribution to
34 an entity listed in paragraphs (4) to (6), inclusive.

35 (4) Federal military and law enforcement agencies.

36 (5) Law enforcement and military agencies of other states.

37 (6) Foreign governments and agencies approved by the United
38 States State Department.

39 (l) Subdivision (a) shall not apply to a person who is the
40 executor or administrator of an estate that includes an assault

1 weapon registered under Section 12285 or that was possessed
2 pursuant to subdivision (g) or (i) which is disposed of as authorized
3 by the probate court, if the disposition is otherwise permitted by
4 this chapter.

5 (m) Subdivision (b) shall not apply to a person who is the
6 executor or administrator of an estate that includes an assault
7 weapon registered under Section 12285 or that was possessed
8 pursuant to subdivision (g) or (i), if the assault weapon is possessed
9 at a place set forth in paragraph (1) of subdivision (c) of Section
10 12285 or as authorized by the probate court.

11 (n) Subdivision (a) shall not apply to:

12 (1) A person who lawfully possesses and has registered an
13 assault weapon pursuant to this chapter, *or who lawfully possesses*
14 *an assault weapon pursuant to subdivision (i)*, who lends that
15 assault weapon to another if all the following apply:

16 (A) The person to whom the assault weapon is lent is 18 years
17 of age or over and is not in a class of persons prohibited from
18 possessing firearms by virtue of Section 12021 or 12021.1 of this
19 code or Section 8100 or 8103 of the Welfare and Institutions Code.

20 (B) The person to whom the assault weapon is lent remains in
21 the presence of the registered possessor of the assault weapon, *or*
22 *the person who lawfully possesses an assault weapon pursuant to*
23 *subdivision (i)*.

24 (C) The assault weapon is possessed at any of the following
25 locations:

26 (i) While on a target range that holds a regulatory or business
27 license for the purpose of practicing shooting at that target range.

28 (ii) While on the premises of a target range of a public or private
29 club or organization organized for the purpose of practicing
30 shooting at targets.

31 (iii) While attending any exhibition, display, or educational
32 project that is about firearms and that is sponsored by, conducted
33 under the auspices of, or approved by a law enforcement agency
34 or a nationally or state recognized entity that fosters proficiency
35 in, or promotes education about, firearms.

36 (2) The return of an assault weapon to the registered possessor,
37 *or the lawful possessor*, which is lent by the same pursuant to
38 paragraph (1).

1 (o) Subdivision (b) shall not apply to the possession of an
2 assault weapon by a person to whom an assault weapon is lent
3 pursuant to subdivision (n).

4 (p) Subdivisions (a) and (b) shall not apply to the possession
5 and importation of an assault weapon into this state by a
6 nonresident if all of the following conditions are met:

7 (1) The person is attending or going directly to or coming
8 directly from an organized competitive match or league
9 competition that involves the use of an assault weapon.

10 (2) The competition or match is conducted on the premises of
11 one of the following:

12 (i) A target range that holds a regulatory or business license for
13 the purpose of practicing shooting at that target range.

14 (ii) A target range of a public or private club or organization
15 that is organized for the purpose of practicing shooting at targets.

16 (3) The match or competition is sponsored by, conducted under
17 the auspices of, or approved by, a law enforcement agency or a
18 nationally or state recognized entity that fosters proficiency in, or
19 promotes education about, firearms.

20 (4) The assault weapon is transported in accordance with
21 Section 12026.1 or 12026.2.

22 (5) The person is 18 years of age or over and is not in a class
23 of persons prohibited from possessing firearms by virtue of
24 Section 12021 or 12021.1 of this code or Section 8100 or 8103 of
25 the Welfare and Institutions Code.

26 (q) Subdivision (b) shall not apply to any of the following
27 persons:

28 (1) A person acting in accordance with Section 12286.

29 (2) A person who has a permit to possess an assault weapon
30 issued pursuant to Section 12286 when he or she is acting in
31 accordance with Section 12285 or 12286.

32 (r) Subdivisions (a) and (b) shall not apply to any of the
33 following persons:

34 (1) A person acting in accordance with Section 12285.

35 (2) A person acting in accordance with Section 12286 or
36 12290.

37 (s) Subdivision (b) shall not apply to the registered owner of an
38 assault weapon possessing that firearm in accordance with
39 subdivision (c) of Section 12285.

1 (t) Subdivision (a) shall not apply to the importation into this
2 state of an assault weapon by the registered owner of that assault
3 weapon, if it is in accordance with the provisions of subdivision
4 (c) of Section 12285.

5 (u) As used in this chapter, the date a firearm is an assault
6 weapon is the earliest of the following:

7 (1) The effective date of an amendment to Section 12276 that
8 adds the designation of the specified firearm.

9 (2) The effective date of the list promulgated pursuant to
10 Section 12276.5 that adds or changes the designation of the
11 specified firearm.

12 (3) The operative date of Section 12276.1, as specified in
13 subdivision (d) of that section.

14 SEC. 3. Notwithstanding Section 17610 of the Government
15 Code, if the Commission on State Mandates determines that this
16 act contains costs mandated by the state, reimbursement to local
17 agencies and school districts for those costs shall be made pursuant
18 to Part 7 (commencing with Section 17500) of Division 4 of Title
19 2 of the Government Code. If the statewide cost of the claim for
20 reimbursement does not exceed one million dollars (\$1,000,000),
21 reimbursement shall be made from the State Mandates Claims
22 Fund.

AMENDED IN SENATE APRIL 26, 2001

SENATE BILL

No. 626

Introduced by Senators Perata and Peace

February 22, 2001

An act to amend Sections 12020 and 12280 of the Penal Code, relating to firearms.

LEGISLATIVE COUNSEL'S DIGEST

SB 626, as amended, Perata. Large-capacity magazines.

Existing law, except as provided, generally prohibits the manufacturing, causing to be manufactured, importation into the state, keeping, offering or exposing for sale, giving, or lending, of any large-capacity magazine. Existing law also defines "large-capacity magazine" and specifies certain magazines that are not included within the definition.

This bill would exempt the manufacture of a large-capacity magazine for certain law enforcement agents, peace officers, ~~and firearms licensees~~ *government agencies, the military, or for export. The bill would also exempt certain purchases and loans of large-capacity magazines, as specified.*

This bill would, in addition, specify additional magazines that are not included within the definition of "large-capacity magazine."

Existing law makes it an offense, with specified exceptions, to possess an assault weapon, as defined.

This bill would provide additional exceptions to the offense of possessing an assault weapon, regarding the loan at a target range of an assault weapon by a retired peace officer, as specified, and receipt and possession of an assault weapon by certain peace officers, if those officers register the assault weapon, as specified.

By imposing additional duties on local law enforcement agencies, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Vote: majority. Appropriation: no. Fiscal committee: yes. State-mandated local program: yes.

The people of the State of California do enact as follows:

1 SECTION 1. Section 12020 of the Penal Code is amended to
2 read:

3 12020. (a) Any person in this state who does any of the
4 following is punishable by imprisonment in a county jail not
5 exceeding one year or in the state prison:

6 (1) Manufactures or causes to be manufactured, imports into
7 the state, keeps for sale, or offers or exposes for sale, or who gives,
8 lends, or possesses any cane gun or wallet gun, any undetectable
9 firearm, any firearm which is not immediately recognizable as a
10 firearm, any camouflaging firearm container, any ammunition
11 which contains or consists of any flechette dart, any bullet
12 containing or carrying an explosive agent, any ballistic knife, any
13 multiburst trigger activator, any nunchaku, any short-barreled
14 shotgun, any short-barreled rifle, any metal knuckles, any belt
15 buckle knife, any leaded cane, any zip gun, any shuriken, any
16 unconventional pistol, any lipstick case knife, any cane sword, any
17 shobi-zue, any air gauge knife, any writing pen knife, any metal
18 military practice handgrenade or metal replica handgrenade, or
19 any instrument or weapon of the kind commonly known as a
20 blackjack, slungshot, billy, sandclub, sap, or sandbag.

21 (2) Commencing January 1, 2000, manufactures or causes to be
22 manufactured, imports into the state, keeps for sale, or offers or

1 exposes for sale, or who gives, or lends, any large-capacity
2 magazine.

3 (3) Carries concealed upon his or her person any explosive
4 substance, other than fixed ammunition.

5 (4) Carries concealed upon his or her person any dirk or dagger.

6 However, a first offense involving any metal military practice
7 handgrenade or metal replica handgrenade shall be punishable
8 only as an infraction unless the offender is an active participant in
9 a criminal street gang as defined in the Street Terrorism and
10 Enforcement and Prevention Act (Chapter 11 (commencing with
11 Section 186.20) of Title 7 of Part 1). A bullet containing or
12 carrying an explosive agent is not a destructive device as that term
13 is used in Section 12301.

14 (b) Subdivision (a) does not apply to any of the following:

15 (1) The sale to, purchase by, or possession of short-barreled
16 shotguns or short-barreled rifles by police departments, sheriffs'
17 offices, marshals' offices, the California Highway Patrol, the
18 Department of Justice, or the military or naval forces of this state
19 or of the United States for use in the discharge of their official
20 duties or the possession of short-barreled shotguns and
21 short-barreled rifles by peace officer members of a police
22 department, sheriff's office, marshal's office, the California
23 Highway Patrol, or the Department of Justice when on duty and the
24 use is authorized by the agency and is within the course and scope
25 of their duties and the peace officer has completed a training course
26 in the use of these weapons certified by the Commission on Peace
27 Officer Standards and Training.

28 (2) The manufacture, possession, transportation or sale of
29 short-barreled shotguns or short-barreled rifles when authorized
30 by the Department of Justice pursuant to Article 6 (commencing
31 with Section 12095) of this chapter and not in violation of federal
32 law.

33 (3) The possession of a nunchaku on the premises of a school
34 which holds a regulatory or business license and teaches the arts
35 of self-defense.

36 (4) The manufacture of a nunchaku for sale to, or the sale of a
37 nunchaku to, a school which holds a regulatory or business license
38 and teaches the arts of self-defense.

39 (5) Any antique firearm. For purposes of this section, "antique
40 firearm" means any firearm not designed or redesigned for using

1 rimfire or conventional center fire ignition with fixed ammunition
2 and manufactured in or before 1898 (including any matchlock,
3 flintlock, percussion cap, or similar type of ignition system or
4 replica thereof, whether actually manufactured before or after the
5 year 1898) and also any firearm using fixed ammunition
6 manufactured in or before 1898, for which ammunition is no
7 longer manufactured in the United States and is not readily
8 available in the ordinary channels of commercial trade.

9 (6) Tracer ammunition manufactured for use in shotguns.

10 (7) Any firearm or ammunition which is a curio or relic as
11 defined in Section 178.11 of Title 27 of the Code of Federal
12 Regulations and which is in the possession of a person permitted
13 to possess the items pursuant to Chapter 44 (commencing with
14 Section 921) of Title 18 of the United States Code and the
15 regulations issued pursuant thereto. Any person prohibited by
16 Section 12021, 12021.1, or 12101 of this code or Section 8100 or
17 8103 of the Welfare and Institutions Code from possessing
18 firearms or ammunition who obtains title to these items by bequest
19 or intestate succession may retain title for not more than one year,
20 but actual possession of these items at any time is punishable
21 pursuant to Section 12021, 12021.1, or 12101 of this code or
22 Section 8100 or 8103 of the Welfare and Institutions Code. Within
23 the year, the person shall transfer title to the firearms or
24 ammunition by sale, gift, or other disposition. Any person who
25 violates this paragraph is in violation of subdivision (a).

26 (8) Any other weapon as defined in subsection (e) of Section
27 5845 of Title 26 of the United States Code and which is in the
28 possession of a person permitted to possess the weapons pursuant
29 to the federal Gun Control Act of 1968 (Public Law 90-618), as
30 amended, and the regulations issued pursuant thereto. Any person
31 prohibited by Section 12021, 12021.1, or 12101 of this code or
32 Section 8100 or 8103 of the Welfare and Institutions Code from
33 possessing these weapons who obtains title to these weapons by
34 bequest or intestate succession may retain title for not more than
35 one year, but actual possession of these weapons at any time is
36 punishable pursuant to Section 12021, 12021.1, or 12101 of this
37 code or Section 8100 or 8103 of the Welfare and Institutions Code.
38 Within the year, the person shall transfer title to the weapons by
39 sale, gift, or other disposition. Any person who violates this

1 paragraph is in violation of subdivision (a). The exemption
2 provided in this subdivision does not apply to pen guns.

3 (9) Instruments or devices that are possessed by federal, state,
4 and local historical societies, museums, and institutional
5 collections which are open to the public, provided that these
6 instruments or devices are properly housed, secured from
7 unauthorized handling, and, if the instrument or device is a
8 firearm, unloaded.

9 (10) Instruments or devices, other than short-barreled shotguns
10 or short-barreled rifles, that are possessed or utilized during the
11 course of a motion picture, television, or video production or
12 entertainment event by an authorized participant therein in the
13 course of making that production or event or by an authorized
14 employee or agent of the entity producing that production or event.

15 (11) Instruments or devices, other than short-barreled shotguns
16 or short-barreled rifles, that are sold by, manufactured by, exposed
17 or kept for sale by, possessed by, imported by, or lent by persons
18 who are in the business of selling instruments or devices listed in
19 subdivision (a) solely to the entities referred to in paragraphs (9)
20 and (10) when engaging in transactions with those entities.

21 (12) The sale to, possession of, or purchase of any weapon,
22 device, or ammunition, other than a short-barreled rifle or
23 short-barreled shotgun, by any federal, state, county, city and
24 county, or city agency that is charged with the enforcement of any
25 law for use in the discharge of their official duties, or the
26 possession of any weapon, device, or ammunition, other than a
27 short-barreled rifle or short-barreled shotgun, by peace officers
28 thereof when on duty and the use is authorized by the agency and
29 is within the course and scope of their duties.

30 (13) Weapons, devices, and ammunition, other than a
31 short-barreled rifle or short-barreled shotgun, that are sold by,
32 manufactured by, exposed or kept for sale by, possessed by,
33 imported by, or lent by, persons who are in the business of selling
34 weapons, devices, and ammunition listed in subdivision (a) solely
35 to the entities referred to in paragraph (12) when engaging in
36 transactions with those entities.

37 (14) The manufacture for, sale to, exposing or keeping for sale
38 to, importation of, or lending of wooden clubs or batons to special
39 police officers or uniformed security guards authorized to carry
40 any wooden club or baton pursuant to Section 12002 by entities

1 that are in the business of selling wooden batons or clubs to special
2 police officers and uniformed security guards when engaging in
3 transactions with those persons.

4 (15) Any plastic toy handgrenade, or any metal military
5 practice handgrenade or metal replica handgrenade that is a relic,
6 curio, memorabilia, or display item, that is filled with a permanent
7 inert substance or that is otherwise permanently altered in a
8 manner that prevents ready modification for use as a grenade.

9 (16) Any instrument, ammunition, weapon, or device listed in
10 subdivision (a) that is not a firearm that is found and possessed by
11 a person who meets all of the following:

12 (A) The person is not prohibited from possessing firearms or
13 ammunition pursuant to Section 12021 or 12021.1 or paragraph
14 (1) of subdivision (b) of Section 12316 of this code or Section 8100
15 or 8103 of the Welfare and Institutions Code.

16 (B) The person possessed the instrument, ammunition,
17 weapon, or device no longer than was necessary to deliver or
18 transport the same to a law enforcement agency for that agency's
19 disposition according to law.

20 (C) If the person is transporting the listed item, he or she is
21 transporting the listed item to a law enforcement agency for
22 disposition according to law.

23 (17) Any firearm, other than a short-barreled rifle or
24 short-barreled shotgun, that is found and possessed by a person
25 who meets all of the following:

26 (A) The person is not prohibited from possessing firearms or
27 ammunition pursuant to Section 12021 or 12021.1 or paragraph
28 (1) of subdivision (b) of Section 12316 of this code or Section 8100
29 or 8103 of the Welfare and Institutions Code.

30 (B) The person possessed the firearm no longer than was
31 necessary to deliver or transport the same to a law enforcement
32 agency for that agency's disposition according to law.

33 (C) If the person is transporting the firearm, he or she is
34 transporting the firearm to a law enforcement agency for
35 disposition according to law.

36 (D) Prior to transporting the firearm to a law enforcement
37 agency, he or she has given prior notice to that law enforcement
38 agency that he or she is transporting the firearm to that law
39 enforcement agency for disposition according to law.

- 1 (E) The firearm is transported in a locked container as defined
2 in subdivision (d) of Section 12026.2.
- 3 (18) The possession of any weapon, device, or ammunition, by
4 a forensic laboratory or any authorized agent or employee thereof
5 in the course and scope of his or her authorized activities.
- 6 (19) The sale of, giving of, lending of, importation into this
7 state of, or purchase of, any large-capacity magazine to or by any
8 federal, state, county, city and county, or city agency that is
9 charged with the enforcement of any law, for use by agency
10 employees in the discharge of their official duties whether on or
11 off duty, and where the use is authorized by the agency and is
12 within the course and scope of their duties.
- 13 (20) The sale to, lending to, transfer to, purchase by, receipt of,
14 or importation into this state of, a large capacity magazine by a
15 sworn peace officer as defined in Chapter 4.5 (commencing with
16 Section 830) of Title 3 of Part 2 who is authorized to carry a firearm
17 in the course and scope of his or her duties.
- 18 (21) The sale or purchase of any large-capacity magazine to or
19 by a person licensed pursuant to Section 12071.
- 20 (22) The loan of a lawfully possessed large-capacity magazine
21 between two individuals if all of the following conditions are met:
- 22 (A) The person being loaned the large-capacity magazine is not
23 prohibited by Section 12021, 12021.1, or 12101 of this code or
24 Section 8100 or 8103 of the Welfare and Institutions Code from
25 possessing firearms or ammunition.
- 26 (B) The loan of the large-capacity magazine occurs at a place
27 or location where the possession of the large-capacity magazine is
28 not otherwise prohibited and the person who lends the
29 large-capacity magazine remains in the accessible vicinity of the
30 person to whom the large-capacity magazine is loaned.
- 31 (23) The importation of a large-capacity magazine by a person
32 who lawfully possessed the large-capacity magazine in the state
33 prior to January 1, 2000, lawfully took it out of the state, and is
34 returning to the state with the large-capacity magazine previously
35 lawfully possessed in the state.
- 36 (24) The lending or giving of any large-capacity magazine to
37 a person licensed pursuant to Section 12071, or to a gunsmith, for
38 the purposes of maintenance, repair, or modification of that
39 large-capacity magazine.

1 (25) The return to its owner of any large-capacity magazine by
2 a person specified in paragraph (24).

3 (26) The importation into this state of, or sale of, any
4 large-capacity magazine by a person who has been issued a permit
5 to engage in those activities pursuant to Section 12079, when those
6 activities are in accordance with the terms and conditions of that
7 permit.

8 (27) The sale of, giving of, lending of, importation into this
9 state of, or purchase of, any large-capacity magazine, to or by
10 entities that operate armored vehicle businesses pursuant to the
11 laws of this state.

12 (28) The lending of large-capacity magazines by the entities
13 specified in paragraph (27) to their authorized employees, while
14 in the course and scope of their employment for purposes that
15 pertain to the entity's armored vehicle business.

16 (29) The return of those large-capacity magazines to those
17 entities specified in paragraph (27) by those employees specified
18 in paragraph (28).

19 (30) (A) The manufacture of a large-capacity magazine for
20 any federal, state, county, city and county, or city agency that is
21 charged with the enforcement of any law, for use by agency
22 employees in the discharge of their official duties whether on or
23 off duty, and where the use is authorized by the agency and is
24 within the course and scope of their duties.

25 (B) The manufacture of a large-capacity magazine for use by
26 a sworn peace officer as defined in Chapter 4.5 (commencing with
27 Section 830) of Title 3 of Part 2 who is authorized to carry a firearm
28 in the course and scope of his or her duties.

29 (C) The manufacture of a large-capacity magazine for a person
30 ~~licensed pursuant to Section 12071—export or for sale to~~
31 *government agencies or the military pursuant to applicable*
32 *federal regulations.*

33 (31) *The loan of a large-capacity magazine for use solely as a*
34 *prop for a motion picture, television, or video production.*

35 (32) *The purchase of a large-capacity magazine by the holder*
36 *of a special weapons permit issued pursuant to Section 12095,*
37 *12230, 12250, 12286, or 12305, for any of the following purposes:*

38 (A) *For use solely as a prop for a motion picture, television, or*
39 *video production.*

40 (B) *For export pursuant to federal regulations.*

1 (C) For resale to law enforcement agencies, government
2 agencies, or the military, pursuant to applicable federal
3 regulations.

4 (c) (1) As used in this section, a “short-barreled shotgun”
5 means any of the following:

6 (A) A firearm which is designed or redesigned to fire a fixed
7 shotgun shell and having a barrel or barrels of less than 18 inches
8 in length.

9 (B) A firearm which has an overall length of less than 26 inches
10 and which is designed or redesigned to fire a fixed shotgun shell.

11 (C) Any weapon made from a shotgun (whether by alteration,
12 modification, or otherwise) if that weapon, as modified, has an
13 overall length of less than 26 inches or a barrel or barrels of less
14 than 18 inches in length.

15 (D) Any device which may be readily restored to fire a fixed
16 shotgun shell which, when so restored, is a device defined in
17 subparagraphs (A) to (C), inclusive.

18 (E) Any part, or combination of parts, designed and intended
19 to convert a device into a device defined in subparagraphs (A) to
20 (C), inclusive, or any combination of parts from which a device
21 defined in subparagraphs (A) to (C), inclusive, can be readily
22 assembled if those parts are in the possession or under the control
23 of the same person.

24 (2) As used in this section, a “short-barreled rifle” means any
25 of the following:

26 (A) A rifle having a barrel or barrels of less than 16 inches in
27 length.

28 (B) A rifle with an overall length of less than 26 inches.

29 (C) Any weapon made from a rifle (whether by alteration,
30 modification, or otherwise) if that weapon, as modified, has an
31 overall length of less than 26 inches or a barrel or barrels of less
32 than 16 inches in length.

33 (D) Any device which may be readily restored to fire a fixed
34 cartridge which, when so restored, is a device defined in
35 subparagraphs (A) to (C), inclusive.

36 (E) Any part, or combination of parts, designed and intended
37 to convert a device into a device defined in subparagraphs (A) to
38 (C), inclusive, or any combination of parts from which a device
39 defined in subparagraphs (A) to (C), inclusive, may be readily

1 assembled if those parts are in the possession or under the control
2 of the same person.

3 (3) As used in this section, a “nunchaku” means an instrument
4 consisting of two or more sticks, clubs, bars or rods to be used as
5 handles, connected by a rope, cord, wire, or chain, in the design of
6 a weapon used in connection with the practice of a system of
7 self-defense such as karate.

8 (4) As used in this section, a “wallet gun” means any firearm
9 mounted or enclosed in a case, resembling a wallet, designed to be
10 or capable of being carried in a pocket or purse, if the firearm may
11 be fired while mounted or enclosed in the case.

12 (5) As used in this section, a “cane gun” means any firearm
13 mounted or enclosed in a stick, staff, rod, crutch, or similar device,
14 designed to be, or capable of being used as, an aid in walking, if
15 the firearm may be fired while mounted or enclosed therein.

16 (6) As used in this section, a “fléchette dart” means a dart,
17 capable of being fired from a firearm, which measures
18 approximately one inch in length, with tail fins which take up
19 five-sixteenths of an inch of the body.

20 (7) As used in this section, “metal knuckles” means any device
21 or instrument made wholly or partially of metal which is worn for
22 purposes of offense or defense in or on the hand and which either
23 protects the wearer’s hand while striking a blow or increases the
24 force of impact from the blow or injury to the individual receiving
25 the blow. The metal contained in the device may help support the
26 hand or fist, provide a shield to protect it, or consist of projections
27 or studs which would contact the individual receiving a blow.

28 (8) As used in this section, a “ballistic knife” means a device
29 that propels a knifelike blade as a projectile by means of a coil
30 spring, elastic material, or compressed gas. Ballistic knife does not
31 include any device which propels an arrow or a bolt by means of
32 any common bow, compound bow, crossbow, or underwater spear
33 gun.

34 (9) As used in this section, a “camouflaging firearm
35 container” means a container which meets all of the following
36 criteria:

37 (A) It is designed and intended to enclose a firearm.

38 (B) It is designed and intended to allow the firing of the
39 enclosed firearm by external controls while the firearm is in the
40 container.

- 1 (C) It is not readily recognizable as containing a firearm.
2 "Camouflaging firearm container" does not include any
3 camouflaging covering used while engaged in lawful hunting or
4 while going to or returning from a lawful hunting expedition.
5 (10) As used in this section, a "zip gun" means any weapon or
6 device which meets all of the following criteria:
7 (A) It was not imported as a firearm by an importer licensed
8 pursuant to Chapter 44 (commencing with Section 921) of Title 18
9 of the United States Code and the regulations issued pursuant
10 thereto.
11 (B) It was not originally designed to be a firearm by a
12 manufacturer licensed pursuant to Chapter 44 (commencing with
13 Section 921) of Title 18 of the United States Code and the
14 regulations issued pursuant thereto.
15 (C) No tax was paid on the weapon or device nor was an
16 exemption from paying tax on that weapon or device granted under
17 Section 4181 and subchapters F (commencing with Section 4216)
18 and G (commencing with Section 4221) of Chapter 32 of Title 26
19 of the United States Code, as amended, and the regulations issued
20 pursuant thereto.
21 (D) It is made or altered to expel a projectile by the force of an
22 explosion or other form of combustion.
23 (11) As used in this section, a "shuriken" means any
24 instrument, without handles, consisting of a metal plate having
25 three or more radiating points with one or more sharp edges and
26 designed in the shape of a polygon, trefoil, cross, star, diamond,
27 or other geometric shape for use as a weapon for throwing.
28 (12) As used in this section, an "unconventional pistol" means
29 a firearm that does not have a rifled bore and has a barrel or barrels
30 of less than 18 inches in length or has an overall length of less than
31 26 inches.
32 (13) As used in this section, a "belt buckle knife" is a knife
33 which is made an integral part of a belt buckle and consists of a
34 blade with a length of at least 2¹/₂ inches.
35 (14) As used in this section, a "lipstick case knife" means a
36 knife enclosed within and made an integral part of a lipstick case.
37 (15) As used in this section, a "cane sword" means a cane,
38 swagger stick, stick, staff, rod, pole, umbrella, or similar device,
39 having concealed within it a blade that may be used as a sword or
40 stiletto.

1 (16) As used in this section, a “shobi-zue” means a staff,
2 crutch, stick, rod, or pole concealing a knife or blade within it
3 which may be exposed by a flip of the wrist or by a mechanical
4 action.

5 (17) As used in this section, a “leaded cane” means a staff,
6 crutch, stick, rod, pole, or similar device, unnaturally weighted
7 with lead.

8 (18) As used in this section, an “air gauge knife” means a
9 device that appears to be an air gauge but has concealed within it
10 a pointed, metallic shaft that is designed to be a stabbing
11 instrument which is exposed by mechanical action or gravity
12 which locks into place when extended.

13 (19) As used in this section, a “writing pen knife” means a
14 device that appears to be a writing pen but has concealed within it
15 a pointed, metallic shaft that is designed to be a stabbing
16 instrument which is exposed by mechanical action or gravity
17 which locks into place when extended or the pointed, metallic shaft
18 is exposed by the removal of the cap or cover on the device.

19 (20) As used in this section, a “rifle” means a weapon designed
20 or redesigned, made or remade, and intended to be fired from the
21 shoulder and designed or redesigned and made or remade to use
22 the energy of the explosive in a fixed cartridge to fire only a single
23 projectile through a rifled bore for each single pull of the trigger.

24 (21) As used in this section, a “shotgun” means a weapon
25 designed or redesigned, made or remade, and intended to be fired
26 from the shoulder and designed or redesigned and made or remade
27 to use the energy of the explosive in a fixed shotgun shell to fire
28 through a smooth bore either a number of projectiles (ball shot) or
29 a single projectile for each pull of the trigger.

30 (22) As used in this section, an “undetectable firearm” means
31 any weapon which meets one of the following requirements:

32 (A) When, after removal of grips, stocks, and magazines, it is
33 not as detectable as the Security Exemplar, by walk-through metal
34 detectors calibrated and operated to detect the Security Exemplar.

35 (B) When any major component of which, when subjected to
36 inspection by the types of X-ray machines commonly used at
37 airports, does not generate an image that accurately depicts the
38 shape of the component. Barium sulfate or other compounds may
39 be used in the fabrication of the component.

1 (C) For purposes of this paragraph, the terms “firearm,”
2 “major component,” and “Security Exemplar” have the same
3 meanings as those terms are defined in Section 922 of Title 18 of
4 the United States Code.

5 All firearm detection equipment newly installed in nonfederal
6 public buildings in this state shall be of a type identified by either
7 the United States Attorney General, the Secretary of
8 Transportation, or the Secretary of the Treasury, as appropriate, as
9 available state-of-the-art equipment capable of detecting an
10 undetectable firearm, as defined, while distinguishing innocuous
11 metal objects likely to be carried on one’s person sufficient for
12 reasonable passage of the public.

13 (23) As used in this section, a “multiburst trigger activator”
14 means one of the following devices:

15 (A) A device designed or redesigned to be attached to a
16 semiautomatic firearm which allows the firearm to discharge two
17 or more shots in a burst by activating the device.

18 (B) A manual or power-driven trigger activating device
19 constructed and designed so that when attached to a semiautomatic
20 firearm it increases the rate of fire of that firearm.

21 (24) As used in this section, a “dirk” or “dagger” means a
22 knife or other instrument with or without a handguard that is
23 capable of ready use as a stabbing weapon that may inflict great
24 bodily injury or death. A nonlocking folding knife, a folding knife
25 that is not prohibited by Section 653k, or a pocketknife is capable
26 of ready use as a stabbing weapon that may inflict great bodily
27 injury or death only if the blade of the knife is exposed and locked
28 into position.

29 (25) As used in this section, “large-capacity magazine” means
30 any ammunition feeding device with the capacity to accept more
31 than 10 rounds, but shall not be construed to include any of the
32 following:

33 (A) A feeding device that has been permanently altered so that
34 it cannot accommodate more than 10 rounds.

35 (B) A .22 caliber tube ammunition feeding device.

36 (C) A tubular magazine that is contained in a lever-action
37 firearm.

38 (d) Knives carried in sheaths which are worn openly suspended
39 from the waist of the wearer are not concealed within the meaning
40 of this section.

1 SEC. 2. Section 12280 of the Penal Code is amended to read:
2 12280. (a) (1) Any person who, within this state,
3 manufactures or causes to be manufactured, distributes,
4 transports, or imports into the state, keeps for sale, or offers or
5 exposes for sale, or who gives or lends any assault weapon, except
6 as provided by this chapter, is guilty of a felony, and upon
7 conviction shall be punished by imprisonment in the state prison
8 for four, six, or eight years.

9 (2) In addition and consecutive to the punishment imposed
10 under paragraph (1), any person who transfers, lends, sells, or
11 gives any assault weapon to a minor in violation of paragraph (1)
12 shall receive an enhancement of one year.

13 (b) Except as provided in Section 12288, and in subdivisions
14 (c) and (d), any person who, within this state, possesses any assault
15 weapon, except as provided in this chapter, is guilty of a public
16 offense and upon conviction shall be punished by imprisonment in
17 the state prison, or in a county jail, not exceeding one year.
18 However, if the person presents proof that he or she lawfully
19 possessed the assault weapon prior to June 1, 1989, or prior to the
20 date it was specified as an assault weapon, and has since either
21 registered the firearm and any other lawfully obtained firearm
22 specified by Section 12276 or 12276.5 pursuant to Section 12285
23 or relinquished them pursuant to Section 12288, a first-time
24 violation of this subdivision shall be an infraction punishable by
25 a fine of up to five hundred dollars (\$500), but not less than three
26 hundred fifty dollars (\$350), if the person has otherwise possessed
27 the firearm in compliance with subdivision (c) of Section 12285.
28 In these cases, the firearm shall be returned unless the court finds
29 in the interest of public safety, after notice and hearing, that the
30 assault weapon should be destroyed pursuant to Section 12028.

31 (c) A first-time violation of subdivision (b) shall be an
32 infraction punishable by a fine of up to five hundred dollars
33 (\$500), if the person was found in possession of no more than two
34 firearms in compliance with subdivision (c) of Section 12285 and
35 the person meets all of the following conditions:

36 (1) The person proves that he or she lawfully possessed the
37 assault weapon prior to the date it was defined as an assault weapon
38 pursuant to Section 12276.1.

1 (2) The person is not found in possession of a firearm specified
2 as an assault weapon pursuant to Section 12276 or Section
3 12276.5.

4 (3) The person has not previously been convicted of violating
5 this section.

6 (4) The person was found to be in possession of the assault
7 weapons within one year following the end of the one-year
8 registration period established pursuant to subdivision (a) of
9 Section 12285.

10 (5) The person has since registered the firearms and any other
11 lawfully obtained firearms defined by Section 12276.1, pursuant
12 to Section 12285, except as provided for by this section, or
13 relinquished them pursuant to Section 12288.

14 (d) Firearms seized pursuant to subdivision (c) shall be
15 returned unless the court finds in the interest of public safety, after
16 notice and hearing, that the assault weapon should be destroyed
17 pursuant to Section 12028.

18 (e) Notwithstanding Section 654 or any other provision of law,
19 any person who commits another crime while violating this section
20 may receive an additional, consecutive punishment of one year for
21 violating this section in addition and consecutive to the
22 punishment, including enhancements, which is prescribed for the
23 other crime.

24 (f) Subdivisions (a) and (b) shall not apply to the sale to,
25 purchase by, or possession of assault weapons by the Department
26 of Justice, police departments, sheriffs' offices, marshals' offices,
27 the Youth and Adult Corrections Agency, the Department of the
28 California Highway Patrol, district attorneys' offices, Department
29 of Fish and Game, Department of Parks and Recreation, or the
30 military or naval forces of this state or of the United States, or any
31 federal law enforcement agency for use in the discharge of their
32 official duties.

33 (g) (1) Subdivision (b) shall not prohibit the possession or use
34 of assault weapons by sworn peace officer members of those
35 agencies specified in subdivision (f) for law enforcement
36 purposes, whether on or off duty.

37 (2) Subdivisions (a) and (b) shall not prohibit the delivery,
38 transfer, or sale of an assault weapon to, or the possession of an
39 assault weapon by, a sworn peace officer member of an agency
40 specified in subdivision (f), provided that the peace officer is

1 authorized by his or her employer to possess or receive the assault
2 weapon. Required authorization is defined as verifiable written
3 certification from the head of the agency, identifying the recipient
4 or possessor of the assault weapon as a peace officer and
5 authorizing him or her to receive or possess the specific assault
6 weapon. For this exemption to apply, in the case of a peace officer
7 who possesses or receives the assault weapon prior to January 1,
8 2002, the officer shall register the assault weapon pursuant to
9 Section 12285 on or before April 1, 2002; in the case of a peace
10 officer who possesses or receives the assault weapon on or after
11 January 1, 2002, the officer shall register the assault weapon
12 pursuant to Section 12285 not later than 90 days after possession
13 or receipt. The peace officer must include with the registration, a
14 copy of the authorization required pursuant to this paragraph.

15 (3) Nothing in this section shall be construed to limit or prohibit
16 the delivery, transfer, or sale of an assault weapon to, or the
17 possession of an assault weapon by, a member of a federal law
18 enforcement agency provided that person is authorized by the
19 employing agency to possess the assault weapon.

20 (h) Subdivisions (a) and (b) shall not prohibit the sale or
21 transfer of assault weapons by an entity specified in subdivision (f)
22 to a person, upon retirement, who retired as a sworn officer from
23 that entity.

24 (i) Subdivision (b) shall not apply to the possession of an
25 assault weapon by a retired peace officer who received that assault
26 weapon pursuant to subdivision (h).

27 (j) Subdivision (b) shall not apply to the possession of an
28 assault weapon, as defined in Section 12276, by any person during
29 the 1990 calendar year, during the 90-day period immediately after
30 the date it was specified as an assault weapon pursuant to Section
31 12276.5, or during the one-year period after the date it was defined
32 as an assault weapon pursuant to Section 12276.1, if all of the
33 following are applicable:

34 (1) The person is eligible under this chapter to register the
35 particular assault weapon.

36 (2) The person lawfully possessed the particular assault
37 weapon described in paragraph (1) prior to June 1, 1989, if the
38 weapon is specified as an assault weapon pursuant to Section
39 12276, or prior to the date it was specified as an assault weapon

1 pursuant to Section 12276.5, or prior to the date it was defined as
2 an assault weapon pursuant to Section 12276.1.

3 (3) The person is otherwise in compliance with this chapter.

4 (k) Subdivisions (a) and (b) shall not apply to the manufacture
5 by persons who are issued permits pursuant to Section 12287 of
6 assault weapons for sale to the following:

7 (1) Exempt entities listed in subdivision (f).

8 (2) Entities and persons who have been issued permits pursuant
9 to Section 12286.

10 (3) Entities outside the state who have, in effect, a federal
11 firearms dealer's license solely for the purpose of distribution to
12 an entity listed in paragraphs (4) to (6), inclusive.

13 (4) Federal military and law enforcement agencies.

14 (5) Law enforcement and military agencies of other states.

15 (6) Foreign governments and agencies approved by the United
16 States State Department.

17 (l) Subdivision (a) shall not apply to a person who is the
18 executor or administrator of an estate that includes an assault
19 weapon registered under Section 12285 or that was possessed
20 pursuant to subdivision (g) or (i) which is disposed of as authorized
21 by the probate court, if the disposition is otherwise permitted by
22 this chapter.

23 (m) Subdivision (b) shall not apply to a person who is the
24 executor or administrator of an estate that includes an assault
25 weapon registered under Section 12285 or that was possessed
26 pursuant to subdivision (g) or (i), if the assault weapon is possessed
27 at a place set forth in paragraph (1) of subdivision (c) of Section
28 12285 or as authorized by the probate court.

29 (n) Subdivision (a) shall not apply to:

30 (1) A person who lawfully possesses and has registered an
31 assault weapon pursuant to this chapter, or who lawfully possesses
32 an assault weapon pursuant to subdivision (i), who lends that
33 assault weapon to another if all the following apply:

34 (A) The person to whom the assault weapon is lent is 18 years
35 of age or over and is not in a class of persons prohibited from
36 possessing firearms by virtue of Section 12021 or 12021.1 of this
37 code or Section 8100 or 8103 of the Welfare and Institutions Code.

38 (B) The person to whom the assault weapon is lent remains in
39 the presence of the registered possessor of the assault weapon, or

1 the person who lawfully possesses an assault weapon pursuant to
2 subdivision (i).

3 (C) The assault weapon is possessed at any of the following
4 locations:

5 (i) While on a target range that holds a regulatory or business
6 license for the purpose of practicing shooting at that target range.

7 (ii) While on the premises of a target range of a public or private
8 club or organization organized for the purpose of practicing
9 shooting at targets.

10 (iii) While attending any exhibition, display, or educational
11 project that is about firearms and that is sponsored by, conducted
12 under the auspices of, or approved by a law enforcement agency
13 or a nationally or state recognized entity that fosters proficiency
14 in, or promotes education about, firearms.

15 (2) The return of an assault weapon to the registered possessor,
16 or the lawful possessor, which is lent by the same pursuant to
17 paragraph (1).

18 (o) Subdivision (b) shall not apply to the possession of an
19 assault weapon by a person to whom an assault weapon is lent
20 pursuant to subdivision (n).

21 (p) Subdivisions (a) and (b) shall not apply to the possession
22 and importation of an assault weapon into this state by a
23 nonresident if all of the following conditions are met:

24 (1) The person is attending or going directly to or coming
25 directly from an organized competitive match or league
26 competition that involves the use of an assault weapon.

27 (2) The competition or match is conducted on the premises of
28 one of the following:

29 (i) A target range that holds a regulatory or business license for
30 the purpose of practicing shooting at that target range.

31 (ii) A target range of a public or private club or organization
32 that is organized for the purpose of practicing shooting at targets.

33 (3) The match or competition is sponsored by, conducted under
34 the auspices of, or approved by, a law enforcement agency or a
35 nationally or state recognized entity that fosters proficiency in, or
36 promotes education about, firearms.

37 (4) The assault weapon is transported in accordance with
38 Section 12026.1 or 12026.2.

39 (5) The person is 18 years of age or over and is not in a class
40 of persons prohibited from possessing firearms by virtue of

1 Section 12021 or 12021.1 of this code or Section 8100 or 8103 of
2 the Welfare and Institutions Code.

3 (q) Subdivision (b) shall not apply to any of the following
4 persons:

5 (1) A person acting in accordance with Section 12286.

6 (2) A person who has a permit to possess an assault weapon
7 issued pursuant to Section 12286 when he or she is acting in
8 accordance with Section 12285 or 12286.

9 (r) Subdivisions (a) and (b) shall not apply to any of the
10 following persons:

11 (1) A person acting in accordance with Section 12285.

12 (2) A person acting in accordance with Section 12286 or
13 12290.

14 (s) Subdivision (b) shall not apply to the registered owner of an
15 assault weapon possessing that firearm in accordance with
16 subdivision (c) of Section 12285.

17 (t) Subdivision (a) shall not apply to the importation into this
18 state of an assault weapon by the registered owner of that assault
19 weapon, if it is in accordance with the provisions of subdivision
20 (c) of Section 12285.

21 (u) As used in this chapter, the date a firearm is an assault
22 weapon is the earliest of the following:

23 (1) The effective date of an amendment to Section 12276 that
24 adds the designation of the specified firearm.

25 (2) The effective date of the list promulgated pursuant to
26 Section 12276.5 that adds or changes the designation of the
27 specified firearm.

28 (3) The operative date of Section 12276.1, as specified in
29 subdivision (d) of that section.

30 SEC. 3. Notwithstanding Section 17610 of the Government
31 Code, if the Commission on State Mandates determines that this
32 act contains costs mandated by the state, reimbursement to local
33 agencies and school districts for those costs shall be made pursuant
34 to Part 7 (commencing with Section 17500) of Division 4 of Title
35 2 of the Government Code. If the statewide cost of the claim for
36 reimbursement does not exceed one million dollars (\$1,000,000),
37 reimbursement shall be made from the State Mandates Claims
38 Fund.

O

Department of Justice Regulations for Assault Weapons and Large Capacity Magazines

FINAL STATEMENT OF REASONS

Hearing Dates: February 24, 2000, Sacramento, California
February 28, 2000, Los Angeles, California

UPDATE OF INITIAL STATEMENT OF REASONS

Section 978.10 - Title and Scope

There is no information to be updated. This section was adopted as originally proposed.

Section 978.20 - Definitions of Terms Used to Identify Assault Weapons

Section 978.20 further defines terms used in Penal Code section 12276.1 to describe the characteristics that identify a firearm as an assault weapon. The six terms (Section 978.20 (a-f)) initially identified in this section are addressed separately relative to the revisions made to each of the original definitions proposed by the Department and subsequently noticed and modified.

978.20(a) - Detachable Magazine

The proposed definition as originally noticed to the public defined a detachable magazine as "any magazine that can be readily removed without the use of tools." During the initial public comment period (December 31, 1999 through February 28, 2000), comments were received that caused the Department to make revisions to the definition. Comments expressed concern about the use of the term "magazine," which is often erroneously used to describe clips that are used to load ammunition into a fixed magazine. Recognizing that to be true, the Department changed the word "magazine" to the statutory term "ammunition feeding device" (PC section 12276.1(c)(1)). The Department also added the phrase "without disassembly of the firearm action" as a result of public comment stating that there are firearms with fixed magazines that can be field stripped (disassembled in the field) without using any tools (such as the M1 Garand). Including those firearms in the definition of a "detachable magazine" would have been inconsistent with the legislative intent of the statute. Several comments were made that claimed that an assault weapon pursuant to PC section 12276 has a detachable magazine requiring the use of a bullet tip or cartridge to remove it from the firearm. The comments claimed that if a bullet or ammunition cartridge were to be considered a tool, these types of firearms statutorily defined as assault weapons would not meet the definition of having a detachable magazine. For that reason the Department added "For the purpose of this definition, a bullet or ammunition cartridge is not a tool." It was also necessary to add linked or belted ammunition to the definition of an ammunition feeding device because that type of ammunition system feeds cartridges directly into the firing chamber, like the spring and follower of a box-type magazine. The definition was accordingly revised to read "detachable magazine means any ammunition feeding device that can be removed readily from the firearm without disassembly of the firearm action or the use of a tool(s). For the purpose of this definition, a bullet or ammunition cartridge is not a tool. Ammunition feeding device includes any belted or linked ammunition."

This revised definition was noticed to the public in the first of two 15-day comment periods (May 10 through May 30, 2000). The change in terms from a magazine to an ammunition feeding device prompted new comments relating to firearms that use clips, stripper clips, and en bloc clips to load ammunition into fixed magazines. Although people affected by the regulations understand ammunition clips are clearly not considered magazines, use of the statutory term "ammunition feeding device" caused the affected parties to speculate that clips may be included in the definition. The exclusion of clips from the definition is necessary to keep the legislative intent of the statute intact. Comments also claimed that a bullet or ammunition cartridge should be considered a tool because the type of firearm that utilizes a bullet or ammunition cartridge to release the magazine is a firearm with a fixed magazine, clearly not intended by the Legislature to be categorized as an assault weapon. The Department further researched the claims and confirmed that it is necessary to identify a bullet or ammunition cartridge as a tool to allow certain firearms with fixed magazines to remain fixed by definition. The definition was again revised to read "detachable magazine means any ammunition feeding device that can be removed readily from the firearm with neither disassembly of the firearm action nor the use of a tool being required. A bullet or ammunition cartridge is considered a tool. Ammunition feeding device includes any belted or linked ammunition, but does not include clips, en bloc clips, or stripper clips that load cartridges into the magazine."

This second revision prompted a second 15-day comment period (July 12 through July 31, 2000). None of the comments received during the second 15-day comment period warranted additional revisions to the definition.

978.20 (b) - Flash Suppressor

This term was originally defined as "any device that reduces or conceals the visible light or flash created when a firearm is fired. This definition includes flash hidere, but does not include compensators and muzzle brakes (devices attached to or integral with the muzzle barrel to utilize propelling gasses for counter-recoil)." There were two primary problems with the definition when it was originally noticed to the public (December 31, 1999 through February 28, 2000). The most significant problem with the original definition was that it included and/or excluded particular devices by name (flash hider, muzzle brake, compensator) without consideration of whether the devices actually suppress flash. After further consideration prompted by public comments, the Department concluded that the absence of statutorily defined specific measurement standards or a statutory requirement to establish those standards demonstrates a legislative intent to identify any device that reduces or redirects flash from the shooter's field of vision as a flash suppressor regardless of its name and intended/additional purpose. Thus, "flash hidere" are flash suppressors only if they reduce or redirect flash from the shooter's field of vision. Conversely, "compensators" and "muzzle brakes" are not flash suppressors only if they do not reduce or redirect flash from the shooter's field of vision. The revised definition is clearly consistent with the legislative intent of the statute as it neither includes nor excludes any particular device on the basis of its name only. Additionally, "conceals" in the original definition presented the possibility of an overly broad interpretation which could have included any device positioned between the shooter's eye and the muzzle flash, such as the sights on a gun. To avoid such unintended interpretation, the word "conceals" was replaced with "redirects." Accordingly, the original definition was changed to:

“flash suppressor means any device that reduces or redirects muzzle flash from the shooter’s field of vision.”

This revised definition was noticed to the public during the first 15-day comment period (May 10 through May 30, 2000). Comments addressing this version of the definition prompted further reconsideration and revision. As such, the definition was revised a second time by replacing “. . . that reduces or redirects muzzle flash . . .” with “. . . designed, intended, or that functions to reduce or redirect muzzle flash . . .” This change was necessary because it became clear that flash suppressors are typically attached by twisting or screwing the device onto the threaded barrel of a firearm. Therefore, by simply making a half turn (180 degrees), an otherwise fully operational flash suppressor would not function as prescribed in the prior definition. The revised definition eliminates this potential loophole. Accordingly, this final revision “flash suppressor means any device designed, intended, or that functions to reduce or redirect muzzle flash from the shooter’s field of vision,” was noticed during the second 15-day comment period (July 12 through July 31, 2000). Although additional comments were received, no comments were received during the second 15-day comment period that resulted in substantial revision to the definition. However, the Department made a non-substantial revision by adding “perceptibly” to the phrase “reduce or redirect” to confirm that if a reduction or redirection of flash is so minuscule that it is imperceptible to the human eye, it could not reasonably be considered a reduction.

978.20 (c) - Forward Pistol Grip

The proposed definition originally noticed to the public defined a forward pistol grip as “any protrusion in front of the trigger that is designed or intended to grasp and control the firearm.” As a result of public comment during the initial comment period (December 31, 1999 through February 28, 2000), the Department determined the term “any protrusion” appeared to lack clarity in that it could include many shooting accessories or parts of the firearm that may be used to grasp and control the firearm, but could not be considered forward pistol grips, such as sling swivels, bipods and monopods, palm rests, etc. The definition was therefore revised by replacing “any protrusion” with “a grip that allows for a pistol style grasp.” The Department believes that the concept of a “pistol style grasp” is generally understood by persons affected by the regulations. The revised definition: “forward pistol grip means a grip that allows for a pistol style grasp forward of the trigger” was then noticed to the public during the first 15-day comment period (May 10 through May 30, 2000). Although additional comments were received, no comments were received during the first 15-day comment period that warranted additional revisions to the definition.

978.20(d) - Permanently Altered

As originally noticed to the public, the statutory term “permanently altered” was defined to mean “any irreversible change or alteration.” However, after consideration of public comment received during the initial comment period (December 31, 1999 through February 28, 2000), the Department determined that the proposed definition failed to provide any additional clarity to the statutory term “permanently altered.” Furthermore, the Department found that none of the comments considered provided additional clarity while maintaining the legislative intent. The term “permanently altered” as used in the statute appears to be sufficiently understood without

further definition. As such, the regulations were revised to delete this originally proposed definition and it has not been adopted by the Department.

978.20 (e) - Pistol Grip that Protrudes Conspicuously Beneath the Action of the Weapon

This term was originally defined as “any component that allows for the grasp, control, and fire of the firearm where the portion grasped is located beneath an imaginary line drawn parallel to the barrel that runs through the top of the exposed trigger” and noticed during the initial comment period (December 31, 1999 through February 28, 2000). This definition was subject to broad interpretation primarily due to the wording “any component.” The definition was accordingly initially revised by replacing “any component” with “a grip that allows for a pistol style grasp.” The Department believes that the concept of a “pistol style grasp” is generally understood by persons affected by the regulations. This revision: “pistol grip that protrudes conspicuously beneath the action of the weapon means a grip that allows for a pistol style grasp below the top of the exposed trigger” was noticed to the public during the first 15-day notice period (May 10 through May 30, 2000).

Subsequent comments resulted in additional modifications. To further clarify the criteria that establishes a “pistol style grasp” and its relationship to a grip that protrudes conspicuously beneath the action of the weapon, the condition “in which the web of the trigger hand (between the thumb and index finger) can be placed below the top of the exposed portion of the trigger while firing” was added to the definition. The revision also reflects a change from “top of the exposed trigger” to “top of the exposed portion of the trigger” because as one contributor pointed out, the former would mean the upper portion of a trigger, a part of which is exposed, with the balance hidden from view in the receiver of the firearm. The final revised definition: “Pistol grip that protrudes conspicuously beneath the action of the weapon means a grip that allows for a pistol style grasp in which the web of the trigger hand (between the thumb and index finger) can be placed below the top of the exposed portion of the trigger while firing” was noticed during the second 15-day comment period (July 12 through July 31, 2000). Although additional comments were received, no comments were received during the second 15-day comment period that warranted additional revisions to the definition.

978.20(e) - Thumbhole Stock

The proposed definition originally noticed to the public defined a thumbhole stock as “any stock with any opening that enables the firearm to be grasped, controlled and fired with one hand.” Comments received during the initial comment period (December 31, 1999 through February 28, 2000) stated that the term “any stock with any opening” is overly broad and ambiguous. The Department agrees that any opening can include openings other than thumbholes. As a result, the Department changed “any stock with any opening” to “a stock with a hole.” Significant public input received during the initial comment period also addressed the subjectivity of the phrase “fired with one hand.” It appears from the comments that it could be an arbitrary standard that requires consideration of physical characteristics such as strength and dexterity that vary from person to person. The Department accordingly determined its use would add confusion rather than clarity to the definition. The definition was revised to specify the physical characteristic of a thumbhole stock as “a stock with a hole that allows the thumb of the trigger hand to penetrate the stock,” and was noticed during the first 15-day comment period (May 10 through May 30, 2000). The comments received during this 15-day notice raised additional challenges regarding the

definition of the term “penetrate.” In an effort to further clarify the definition, the Department added the phrase “into or through” to the phrase “penetrate the stock.” The final revised definition: “thumbhole stock means a stock with a hole that allows the thumb of the trigger hand to penetrate into or through the stock” was noticed during the second 15-day comment period (July 12 through July 31, 2000). Although additional comments were received, none resulted in substantial revision to the definition. However, the Department made a non-substantial revision by adding “while firing” to make it explicit in the definition that the placement of the thumbhole must allow the thumb of the trigger hand to penetrate into or through the stock while firing.

978.30 (a) Requirements for Assault Weapon Registrations

There is no information to be updated. This section was adopted as originally proposed.

978.30 (b) Requirements for Assault Weapons Registrations

The originally proposed regulation section 978.30 (b) identified the required Assault Weapon Registration Application form (FD023) and stated the information to be provided on the form. Comments were received during the initial comment period (December 31, 1999 through February 28, 2000) concerning the disposition of an application when submitted within 30 days of the end of the registration period, since the regulations allow for a 30-day time frame for determining completeness of the application. As a result, the Department revised the regulation to specify that applications submitted to the Department with a postmark date no later than the end of the registration period with the appropriate fee, will be processed even if the application must be returned to the applicant for completion or correction after the close of the registration period. Other comments had also stated that the proposed regulation did not make a provision for firearms with extra barrels, or what must be done if the barrel must be changed in order to comply with safety or hunting regulations. The Department agreed, and deleted the requirement that barrel length information be provided on the registration application. Another contributor stated that the exact date and name and address of the person or firearms dealer from whom the assault weapon was acquired may not be known. Additional comments stated that the registration process must provide for registrations without requiring acquisition information because long guns acquired before 1990 did not required receipts, waiting periods or seller information. The Department agreed, and revised the regulation to state that the month and date of acquisition are to be provided if known. The year of acquisition is required because only assault weapons acquired before specific dates as provided by the Penal Code qualify for registration. Additionally, the regulation was revised so that the name and address of the person or firearms dealership from whom the assault weapon was acquired is optional. These revisions were noticed to the public during the first 15-day comment period (May 10 through May 30, 2000). Additional comments were received, but none were sufficient to warrant further revisions to the regulation.

978.30(c) - Requirements for Assault Weapon Registrations

Penal Code section 12285 (e) requires that the Department’s registration procedures provide the option of joint registration for assault weapons owned by family members residing in the same household. As originally proposed, the Department’s procedures in section 978.30(c) required that the joint registrations identify one individual as the primary registrant, and that joint registrations remain valid only while the primary and co-registrant(s) live in the same household. Comments received during the initial comment period (December 31, 1999 through February 28,

2000) stated that the Department set forth additional and unnecessary requirements by designating a primary registrant, as well as requiring that the joint registration remain valid only while the registrants reside in the same household. Admittedly, had the Legislature intended these requirements they should have been statutorily stated in a much clearer manner. As such, the Department deleted these requirements from the regulation, and the proposed regulations was revised to read "Joint registrations will be permitted for assault weapons owned by family members residing in the same household." This revised regulation was noticed during the first 15-day comment period (May 10 through May 30, 2000). Although additional comments were received during the first 15-day comment period, none were sufficient to warrant further revision to the regulation.

978.31 - Fees

There is no information to be updated. This section was adopted as originally proposed.

978.32 - Processing Times

There is no information to be updated. This section was adopted as originally proposed.

978.33 Voluntary Cancellations

This section was not proposed or noticed in either the initial comment period (December 31, 1999 through February 28, 2000), or the first 15-day comment period (May 10 through May 30, 2000), but was noticed to the affected parties in the second 15-day comment period (July 12 through July 31, 2000). Comments received during the initial comment period stated that a procedure needs to be in place for cancellation of an assault weapon registration due to theft, destruction, or modification of the firearm to no longer meet the definition of an assault weapon. The Department agreed and added Section 978.33 to the proposed regulations. Because it was fully anticipated and expected by the affected parties there would be a procedure for voluntary cancellations, the addition of this section is considered by the Department to be a substantial modification sufficiently related to the text of the regulation as originally proposed. Thereafter, section 978.33 was noticed to the public during the Department's second 15-day comment period. After full consideration of the comments received, the Department adopts this regulation as proposed.

978.40 - Requirements for Large Capacity Magazine Permits Pursuant to Penal Code Section 12079

There is no information to be updated. This section was adopted as originally proposed.

978.41 - Processing Times

There is no information to be updated. This section was adopted as originally proposed.

978.42 - Term Length of Large Capacity Magazine Permits

There is no information to be updated. This section was adopted as originally proposed.

978.43 - Large Capacity Magazine Permit Record Keeping

There is no information to be updated. This section was adopted as originally proposed.

978.44 - Large Capacity Magazine Permit Revocations

There is no information to be updated. This section was adopted as originally proposed.

Additional technical theoretical, and/or empirical studies, reports, or documents

In addition to the sources cited in the initial statement of reasons, the Department relied on information from the following sources when formulating the five definitions in the proposed regulation:

- Jane's Infantry Weapons, Glossary, Twentieth Edition, 1994-95
- Sporting Arms and Ammunition Manufacturers' Institute, Inc. (SAAMI), Technical Correspondent's Handbook, Glossary of Industry Terms
- SAAMI Non-Fiction Writer's Guide
- National Rifle Association Institute for Legislative Action (NRA-ILA), Firearms Glossary
- Department of the Treasury, Bureau of Alcohol, Tobacco and Firearms, Federal Firearms Regulations Reference Guide, 2000
- California Attorney General's Assault Weapons Identification Guide, 1993
- Complete Guide to Guns & Shooting, by John Malloy, 1995

The addition of the above reference material to the rulemaking file was noticed and made available to the public from July 12, through July 31, 2000.

Local Mandate Determination

The proposed regulations do not impose any mandate on local agencies or school districts.

Business Impact

The proposed regulations do not have any significant adverse impact on small business.

Consideration of Alternatives

No alternative which was considered would be either more effective than or equally effective as and less burdensome to affected private persons than the proposed regulations.

Objections or Recommendations/Responses

The proposed regulations resulted in significant input from the affected persons. During the initial 45-day comment period (December 31, 1999 through February 28, 2000), the Department received written input from approximately 1,300 individuals. The Department also held two public hearings to receive oral testimony on the proposed regulations. During the first hearing, held in Sacramento on February 24, 2000, the Department heard testimony from 57 people. Fifty one

people gave testimony in the second hearing in Los Angeles on February 28, 2000. In response to revisions to the regulations, approximately 190 letters were received during the first 15-day comment period (May 10 through May 30, 2000). Further revisions resulted in a second 15-day comment period (July 12 through July 31, 2000). An additional 85 letters were received during the second 15-day period.

In order to properly manage the immense volume of public comment, the Department developed a system consisting of a Comment/Response spreadsheet and Comment Identification Key to assist with public comment organization. The Comment/Response spreadsheets were used to categorize all comments (written and oral) and responses, and are included hereto as Attachments A, B, and C, representing each of the three comment periods (December 31, 1999 through February 28, 2000, May 10, through May 30, 2000, and July 12 through July 31, 2000, respectively). The spreadsheets also include a frequency count for all comment summaries. The Comment Identification Key was used to credit contributors with the appropriate comment summaries and is located under Part J in the rulemaking file. Additionally, Speaker Logs and video recordings for both public hearings are found under Part E in the rulemaking file. The logs include a list of speakers in chronological order and the digital video tracking number to identify at what point on the video tapes each speaker testified.

During the interpretive analysis of public comment, comment codes were assigned to the summaries of each comment, recommendation and objection (all like-comment summaries were assigned the same comment code), and entered into the Comment/Response spreadsheet. Each defined term and regulation were assigned to a specific category during each comment period. For example, section 978.20(a), the definition of detachable magazine, was assigned Category 1 in each of the comment periods (noted as A, B and C). Therefore, all summarized comments beginning with 1. (A1., B1., and C1.) represent comments pertaining to the definition of a detachable magazine. The frequency column on the spreadsheet represents the number of contributors who made each of the summarized comments. All comments, both written and oral, were responded to in this manner and were either accepted or rejected for the reasons identified in the attachments.

**Comparison
Microscope**

Essentially two microscopes connected to an optical bridge which allows the viewer to observe two objects simultaneously with the same degree of magnification. This instrument can have a monocular or binocular eyepiece. Sometimes referred to as COMPARISON MACROSCOPE.

Comparison Projector

An instrument which will project a magnified image onto a screen.

Compensator

A device attached to or integral with the muzzle end of the barrel to utilize propelling gases for counter-recoil. Also called MUZZLE BRAKE.

Coning Effect

See CRATERING.

Conoidal Bullet

See BULLET, CONOIDAL.

Cook-Off

See CARTRIDGE COOK-OFF.

Copper Clad Steel

A composite structure of copper and steel used for the manufacture of certain bullet jackets.

Copper Jacketed Bullet

See BULLET, COPPER JACKETED.

Copper Washed Bullet

See BULLET, COPPER WASHED.

Cordite

A double base smokeless powder made of gun cotton, nitroglycerin and mineral jelly and shaped in long cylindrical strands.

Five-in-One-Blank

A blank cartridge that was designed for use in firearms of different calibers. It can be used in caliber 38-40, 44-40 and 45 Colt revolvers and in caliber 38-40 and 44-40 rifles. Also called MOVIE BLANK.

Fixed Ammunition

A cartridge comprised of a cartridge case, primer, propellant powder and projectile(s).

Flake Powder

See POWDER, FLAKE.

Flare

See SMOKE RING.

Flash Hole

1. A hole(s) pierced or drilled through the web in the primer pocket of a metallic cartridge case.
2. The hole in the end of a battery cup primer used in shotshells.
3. The hole in a percussion nipple.

**Flash Inhibitor**

A material that is added to propellant for the purpose of reducing muzzle flash.

Flash Suppressor

A muzzle attachment designed to reduce muzzle flash.

Flat-Nosed Bullet

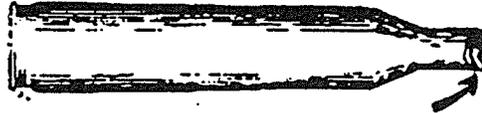

See BULLET, FLAT-NOSED.

Flats

On double barrel, hinged frame guns, the flat mating surfaces beneath the barrel chambers and on the receiver, below and in front of the standing breech. The receiver flats are more commonly known as the WATER TABLE.

Mouth Pull-Down

If a bullet is incorrectly inserted into the mouth of a cartridge case, it may deform the case mouth rearward and downward, causing a defect called *mouth pull-down*.

Movie Blank

See FIVE-IN-ONE BLANK.

Mushroom

A descriptive term for a soft point, hollow point, or special type of bullet point that is designed to expand to increased sectional diameter with minimum weight loss upon impact with a target.

Mushrooming

The act of expansion of a bullet upon impact with a target.

Musket

A firearm with long barrel and forend or forearm extending nearly to the muzzle.

Muzzle

The end of a firearm barrel from which the bullet or shot emerges.

Muzzle Blast

The resultant noise that occurs at the muzzle of a firearm when the projectile leaves the muzzle and the hot gases are released.

Muzzle Booster

See RECOIL INTENSIFIER.

Muzzle Brake

A device at or in the muzzle end of a barrel that uses the emerging gas behind the projectile to reduce recoil.

Muzzle Cap

A cover put on the muzzle end of a barrel to keep out foreign matter.

Non-Fiction Writer's Guide

A writer's resource to
firearms and ammunition

Prepared as a service to professional journalists by the
Sporting Arms and Ammunition Manufacturers' Institute

every gun purchaser must complete a BATF form 4473. On this form, they must provide verification of identity and answer questions regarding any criminal history, mental competency, and drug use, among other things.

There are many firearms and firearm-related products banned under Federal law. For example, it is illegal to manufacture and sell to the public: sawed-off shotguns, silencers, machine guns, armor-piercing ammunition, ammunition magazines capable of holding more than 10 rounds, and numerous so-called "assault weapons."

Federal law also requires manufacturers to include an indelible serial number on all firearms. The manufacturer must keep records of the serial number, date of manufacture, type of firearm, and to whom it was sent. The BATF routinely traces firearms used in crime by contacting the manufacturer and recreating the chain of distribution.

Other agencies and regulatory bodies also regulate the firearms and ammunition industry. For example, the Federal Aviation Administration has regulations regarding firearms on aircraft. Shipping regulations and package labeling requirements promulgated by the Department of Transportation regulate how ammunition must be shipped. With a few specific exceptions, firearms can only be shipped across state lines between federally licensed FFL holders. Individuals cannot buy firearms through the mail.

In total, there are an estimated 20,000 Federal, state and local gun laws on the books. Some of these laws cover individual buyers, some govern what can be made and sold, others regulate how and under what terms and conditions firearms and ammunition can be distributed throughout the country. Firearms and ammunition, while exempt from the CPSA, are subject to the same product liability laws as other products. As such, the responsible firearms and ammunition industry is dedicated to the manufacturing of quality, safe products for use by responsible, law-abiding citizens.

Additionally, the Sporting Arms and Ammunition Manufacturers' Institute promulgates manufacturing standards for firearms and ammunition using the American National Standards Institute (ANSI) process.

SAAMI is an accredited standards developer for the ANSI. As such, SAAMI's standards for industry test methods, definitive proof loads, and ammunition performance specifications are subject to ANSI review and various ANSI criteria.

According to ANSI, "Approval of an American National Standard requires verification by ANSI that the requirements for due process, consensus, and other criteria for approval have been met by the standards developer."

"Consensus is established when, in the judgment of the ANSI Board of Standards Review, substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made toward their resolution."

Standards are developed when the governing body, SAAMI, proposes a new standard and circulates the draft to canvasses. Canvasses for each standard include government agencies (such as the Federal Bureau of Investigation and the US Customs Service), non-SAAMI member companies, and interested parties (such as the National Institute of Standards and Technology). Once the draft standard has been reviewed and returned to SAAMI with comments or corrections, the canvass group votes on whether or not to accept the standard. If there is disagreement and a canvasee opposes the standards but the standard is accepted by the other members of the canvass group, there is an ANSI appeals process that decides the matter.

It is ANSI and SAAMI policy that every five years the standards be revised or reaffirmed. Even if the standards remain the same, they must go through the approval process outlined above. Simply stated, the standards accepted by ANSI and promulgated by SAAMI are reviewed and accepted by outside experts, and every five years the validity of the standards are re-affirmed.

In 1996, SAAMI was audited by ANSI and received high marks for technical expertise, professionalism, and competency. The audit concluded that, "SAAMI staff is competent and knowledgeable concerning the SAAMI standards process and ANSI requirements. The standards are processed in a professional manner."

CALIBER

A term used to designate the specific cartridges for which a firearm is chambered. It is the approximate diameter of the circle formed by the tops of the lands of a rifled barrel. It is the numerical term included in the cartridge name to indicate a rough approximation of the bullet diameter (i.e. .30 caliber - .308" diameter bullet).

CARBINE

A rifle of short length and light weight originally designed for horse-mounted troops.

CARTRIDGE

A single round of ammunition consisting of the case, primer, propellant, powder, and one or more projectiles.

CARTRIDGE, CENTERFIRE

Any cartridge intended for use in rifle, pistols, and revolvers that has its primer central to the axis at the head of the case. *Note: Most cartridges, including shotshells, are centerfire with the exception of 22 caliber rimfire ammunition. If you were to look at the bottom of a centerfire cartridge, you would see a small circle in the middle of the base, hence, "centerfire." There are a few rimfire ammunition calibers besides the 22, but they are rare and not widely available.*

CARTRIDGE, MAGNUM

Any cartridge or shotshell that is larger, contains more shot, or produces a higher

velocity than standard cartridges or shotshells of a given caliber or gauge.

CARTRIDGE, RIMFIRE

A cartridge containing the priming mixture in the rim of the base, usually a 22.

CARTRIDGE, SMALL BORE

A general term that refers to rimfire cartridges. Normally 22 caliber ammunition used for target shooting, plinking, and small game hunting.

CHAMBER

In a rifle, pistol, or shotgun, it is the part of the barrel that accepts the ammunition. In a revolver, it refers to the holes in the cylinder where the cartridges are loaded.

CHOKE

An interior tube at the end of a shotgun barrel that controls shot dispersion. Chokes typically come in cylinder, improved cylinder, modified, improved modified, and full. *Note: A cylinder choke produces a very wide shot dispersion, whereas a full choke will provide a much tighter shot pattern. Different chokes are used for skeet, trap, and sporting clays. In hunting, the type of game and conditions will determine choke type.*

CLIP

See *MAGAZINE*.

COCK

To place the hammer, or striker, in position for firing by pulling it back fully.

CYLINDER

The round, rotatable part of a revolver that contains the cartridge chambers.

DERRINGER

A generic term referring to many variations of pocket-sized pistols. The name comes from the pistol's original designer, Henry Derringer. *Note: According to the American Derringer Company, Henry Deringer's name is spelled with one 'R.' The proper spelling of Derringer firearms is with two 'R's.*

DISCHARGE

To cause a firearm to fire.

DOUBLE BARREL

Two barrels on a firearm mounted to one frame. The barrels can be vertically (over-under) or horizontally (side-by-side) aligned.

DUMDUM

See *BULLET*; *DUMDUM*.

FIREARM

An assembly of a barrel and action from which a projectile is propelled as a result of combustion.

FIRING PIN

The part of a firearm that strikes the primer of a cartridge to start the ignition of the primer.

FLASH SUPPRESSOR

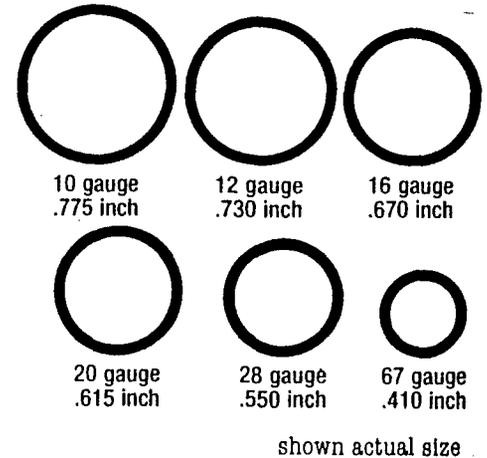

An attachment to the muzzle designed to reduce muzzle flash. *Note: A flash suppressor is not a silencer.*

FULL COCK

The position of the hammer when the firearm is ready to fire.

GAUGE

A term used to identify most shotgun bores, with the exception of the .410 shotgun. It relates to the number of bore diameter lead balls weighing one pound. *Note: The .410 shotgun is a caliber. The .410 refers to the diameter of the barrel. (see picture below)*

GROUP

A series of shots fired at the target used to adjust the sights or determine the accuracy of a firearm.

HALF COCK

The position of the hammer about half retracted and intended to prevent release of the hammer by a normal pull of the trigger.

HAMMER

The part of the firing mechanism that strikes the firing

pin, which, in turn, strikes the primer.

HAMMERLESS

A firearm having an internal hammer or striker.

JACKET

The envelope enclosing the lead core of a bullet.

JAM

A malfunction that prevents the action from operating. Jams may be caused by faulty or altered parts, ammunition, poor maintenance of the firearm, or improper use of the firearm.

JUMP

The upward and rearward recoil of a firearm when it is fired. It is commonly called recoil or "kick."

LANDS

The uncut surface of the bore of a rifled barrel.

LOAD

The combination of components used to assemble a cartridge or shotshell. The term also refers to the act of putting ammunition into a firearm.

MACHINE GUN

See *ACTION, AUTOMATIC*.

MAGAZINE

A receptacle on a firearm that holds several cartridges or shells for feeding into the chamber. Magazines take many forms, such as box, drum, rotary, or tubular and may be

fixed or removable. *Note: The 1994 crime bill banned the manufacture and importation of magazines with a capacity greater than 10 rounds.*

MAGNUM

See *CARTRIDGE, MAGNUM*.

MISFEED

Any malfunction during the feeding cycle of a repeating firearm that results in the failure of a cartridge to enter the chamber completely.

MISFIRE

A failure of the cartridge to fire after the primer has been struck by the firing pin.

MUZZLE

The front end of a firearm barrel from which the bullet or shot emerges.

MUZZLE FLASH

The illumination (flash) resulting from the expanding gases from the burning propellant particles emerging from the barrel behind the projectile and uniting with oxygen in the air.

MUZZLE LOADER

Any firearm loaded through the muzzle. Also called "black powder" firearms. They may be antique, replica, or of modern design.

NOSE

The point or tip of a bullet.

OVER AND UNDER

A firearm with two barrels, one above the other.

PATTERN

The distribution of shot fired from a shotgun. Generally measured as a percentage of pellets striking in a 30 inch circle at 40 yards.

PISTOL

A term for a one-hand held firearm with a single chamber. (A revolver has at least five chambers.)

PISTOL, AUTOMATIC

The common but improperly used term to describe semi-automatic pistols. See *ACTION, SEMI-AUTOMATIC* for a description of how these pistols operate.

PISTOL, DOUBLE ACTION

A pistol mechanism in which a single pull of the trigger cocks and releases the hammer.

PISTOL, SINGLE ACTION

A pistol mechanism that requires the manual cocking of the hammer before the trigger releases the firing mechanism.

PLINKING

The informal shooting at inanimate objects at indefinite points. *Note: Plinking typically refers to casual shooting at pine cones, tin cans, or other such objects for fun and practice.*

POWDER

Commonly used term for the propellant in a cartridge or shotshell. See also *PROPELLANT*.

POWDER, BLACK

The earliest type of propellant, allegedly made by the Chinese or Hindus. First used for firearms in the 13th century, it is a mechanical mixture of potassium or sodium nitrate, charcoal, and sulfur. It makes a large cloud of smoke when fired.

POWDER, SMOKELESS

A modern propellant containing mainly nitrocellulose or both nitrocellulose and nitroglycerin. Relatively little smoke is created when fired.

PRESSURE

The force developed by the expanding gases generated by the combustion of the propellant.

PRIMER

An ignition component consisting of brass or gilding metal cup, priming mixture, anvil, and foiling disc. It creates a spark when hit by a firing pin, igniting the propellant powder.

PROPELLANT

The chemical composition which, when ignited by a primer, generates gas. The gas propels the projectile. See also *POWDER*.

RECEIVER

The basic unit of a firearm which houses the firing mechanism and to which the barrel and stock are assembled. In revolvers, pistols and break-open firearms, it is called the frame.

Fifth Printing, 1975

Designed by Jeff Fitschen

Manufactured in the United States of America

(Continued on back flap.)

Probably the most practical form is the Drilling, which contains three barrels, the two upper forming a typical side-by-side shotgun with the third and rifled barrel centered beneath them.

Guns of this type have long been extremely popular in Europe where hunting is often conducted simultaneously for deer, boar, other big game, and game birds as well.

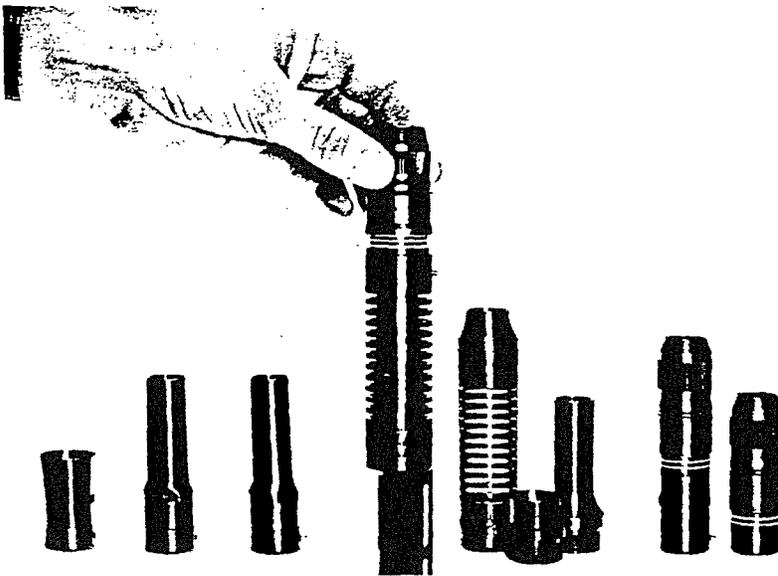

See also DRILLING.

Various combination gun designs: (A) Over-and-under, shotgun on top, rifle under. (B) Over-and-under shotgun with rifle at side. (C) Shotgun on top with rifles under and at side. (D) Side-by-side shotgun with rifle on top. (E) Side-by-side rifle and shotgun. (F) Side-by-side shotgun with one rifle under. (G) Side-by-side shotgun with two rifles under. (H) Side-by-side double rifle with shotgun under.

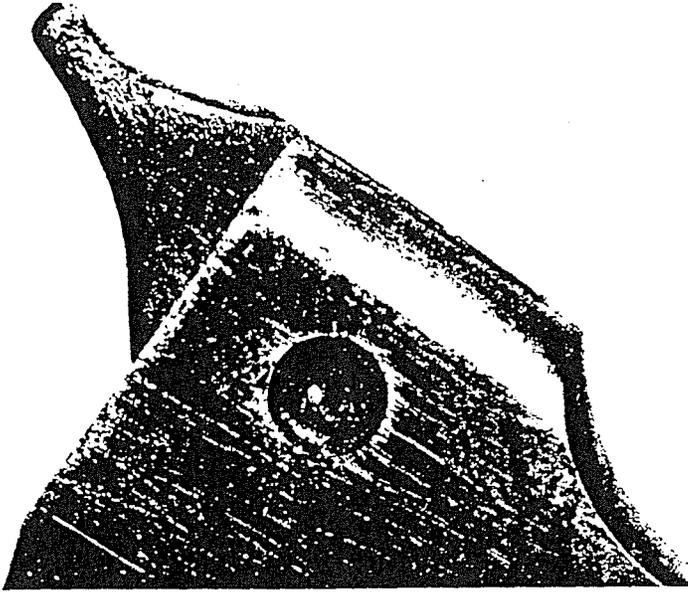

Compensator A device fitted to the muzzle of any firearm whose function is to reduce the upward movement of the muzzle brought about by recoil forces. The earliest form of this device to see commercial application was the Cutts Compensator, marketed for many years by Lyman Gunsight Co.

A compensator fits over the muzzle and uses slots in its outer end to deflect propellant gases upward, thus providing downward thrust to counteract recoil-induced jump. Their effectiveness depends to a large extent upon the volume and the direction of the gases diverted, and other factors such as the stock design, center of gravity, etc.

See also CUTTS COMPENSATOR and MUZZLE BRAKE.

Cutts compensator with interchangeable choke tubes (left), and adjustable choke, (right).

Firing pins are generally concealed and not easily seen or examined. Here is an exposed revolver hammer (Smith & Wesson M1917) with firing pin at upper left and the pitting that results from much use.

there is a certain minimum and maximum protrusion required for efficient and uniform primer ignition. Less than minimum will produce either erratic ignition or misfires — while excess protrusion may pierce the primer cup and allow gas to escape back into the action.

In some designs, excessive protrusion will result in the nose of the firing pin protruding beyond the breech face even when cocked, and thus interfering with proper feeding, and possibly causing a premature firing as the cartridge is chambered.

Typical firing pin protrusion in a modern bolt-action Mauser-type rifle is .055 inch minimum, .065 inch maximum.

Fit and Finish Terms describing overall workmanship in guns. Generally, a gun containing close but smooth-fitting metal parts, a very smooth polish and blue on metal surfaces, good quality inletting and very close fitting of wood to metal, etc. would be regarded as having good fit and finish.

Flanged The British terminology for a rimmed cartridge case; thus any rimmed cartridge of British origin may be found labeled as “.450/3¼ Flanged.”

Flash Hider A device attached to the muzzle of any gun for the purpose of concealing (not reducing) the flash or flame gen-

Flash Hider / Flint

Modern prong-type suppressor as supplied on the Finnish M.62, 7.62mm assault rifle.

erated by the burning propellant and by the ignition of expanding gases as they contact the oxygen-rich atmosphere. Usually a large conical or tubular extension clamped to the muzzle.

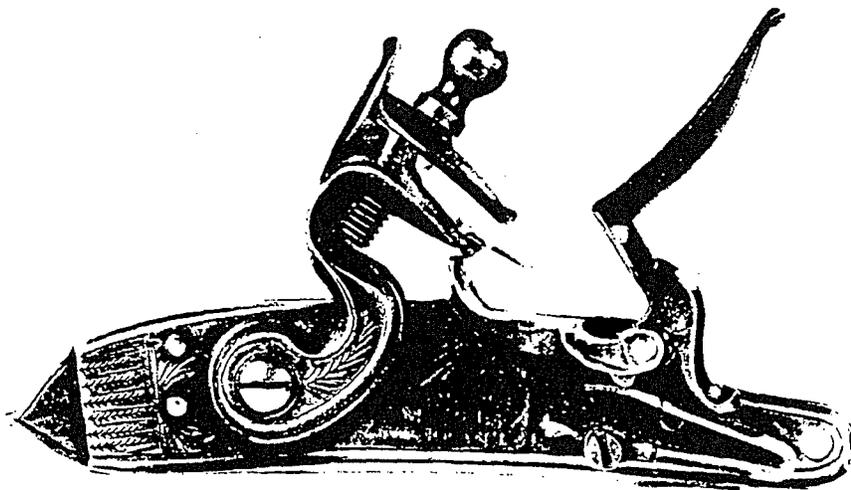

See also FLASH SUPPRESSOR.

Flash Suppressor A device attached to the muzzle of a firearm that serves to disrupt, or reduce the amount of flame produced upon firing. The most common type consists of tuning-fork-like fingers which extend beyond the muzzle and vibrate under the impulse of firing to disrupt and reduce flash.

See also FLASH HIDER.

Flinch An involuntary movement occurring either at the instant of firing or in anticipation thereof, which deflects the gun off target before the bullet exits the muzzle. Flinching is generally caused by some fear—either real or subconscious—of the discharge, or by attempting to compensate for recoil before it actually occurs.

Flint The angular piece of flint or similar stone or mineral deposit used in a flintlock to strike sparks from the frizzen. The

Conventional flint in proper position for firing in flintlock.

flint was once made only by hand from natural flint nodules, but is now sometimes cut from agate, certain forms of Arkansas stone, and other sparking material. It is also called "gunflint."

available in 6mm or greater. However, that isn't practical, so a medium-weight sporter of maximum accuracy is your best bet.

If the rifle is too light, it may be a joy to carry but it won't settle down quickly when you're huffing and puffing, and it may not be as consistently accurate as you'd like. A rifle weighing 8 to 8½ pounds with scope and sling is about right.

Flat-shooting cartridges are essential, with good long-range performance and wind-bucking ability. The 6mm's with 100-grain bullets at 3,000 feet per second may be considered minimum, with the 7mm-.30 belted magnums being the practical maximum.

Multi-Groove See POLLY-GROOVE and RIFLING.

Muzzle Bell Simply a funneling or flaring of the bore at the muzzle, usually produced by over-zealous use of a bent or rough cleaning rod to the extent that the tops of the lands, and perhaps a bit of the grooves as well, are worn away. Belling is probably more common among rifles whose design requires cleaning from the muzzle, and which by nature of their use, are cleaned almost daily with sectional rods not noted for their straightness.

Belling reduces accuracy, the degree dependent upon the amount of belling, and whether it is concentric with the bore. The only practical cure for inaccuracy caused by this condition is amputation of the belled portion, and recrowning at the cutoff point.

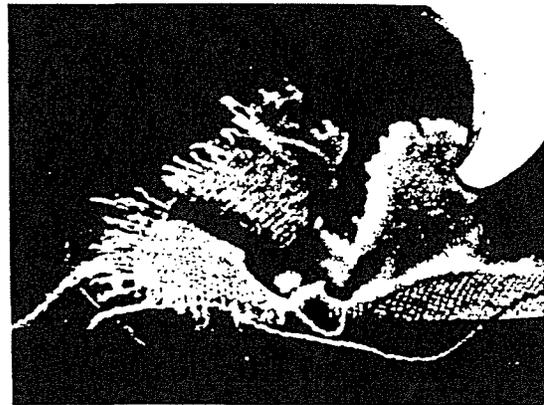

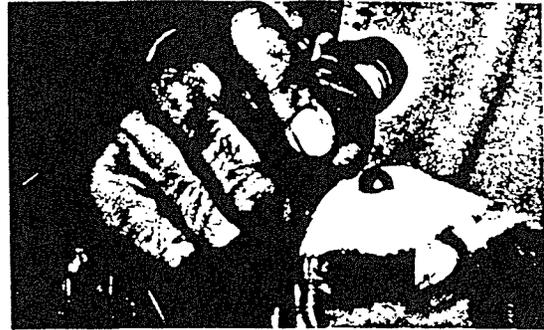

Belling can be prevented by: (1) using only straight, clean, and smooth cleaning rods, (2) a cleaning rod guide over the muzzle, (3) cleaning only from the breech, and (4) cleaning no more vigorously or frequently than absolutely necessary.

If one wants to retain original external dimensions and contours of a barrel, belling can be corrected by counterboring precisely concentric with the bore, and to a diameter which will not reduce barrel walls more than 50 per cent from their original thickness.

Muzzle Brake A device attached to the muzzle to reduce recoil and, to some extent, muzzle jump. Regardless of the vast array of sizes, shapes, and internal configurations, all brakes function by momentarily trapping propellant gases as they emerge from the muzzle and by diverting them at right angles to the bore's centerline, or slightly rearward.

When gases are diverted in sufficient quantities, they reduce rearward thrust, and if deflected rearward, exert forward thrust and thus tend to counterbalance a portion of recoil. Generally speaking, the greater the percentage of gases diverted

LOADING AND FIRING THE MUZZLE-LOADER

and the more nearly they approach 180 degrees change in direction, the greater the amount of recoil reduction produced.

Practical limitations generally prevent achieving more than about 40 per cent recoil reduction with even the best and most efficient muzzle brakes. It is not possible to divert gas directly rearward because of its effect on the shooter, and even approaching rearward diversion can produce shock-wave effects on bystanders and also greatly increases the intensity of the muzzle blast.

The disadvantages of size and bulk, interference with line of sight, increased muzzle blast and discomfort, and cost have generally limited the use of muzzle brakes on conventional sporting guns. On the other hand, they have become very widely used on military arms, and are almost universally used on weapons over .50 caliber.

See also CUTTS COMPENSATOR.

Muzzle-Loader Any gun with a solid breech which must be loaded through the muzzle by first pouring in a charge of *black powder*, followed by a projectile (or projectiles), sometimes

Printed and Bound in the United States of America

BY THE TELEGRAPH PRESS,

Established 1831

Harrisburg, Pennsylvania

2. **FLYING FIRING PIN.** A firing pin shorter than the length of its travel in the breechblock. A spiral spring coiled around the pin retains it in position in the breechblock. When the impact of the hammer drives the firing pin forward, compressing the spring and exploding the primer, the compressed spring immediately draws the firing pin back into the breechblock. This is a safety feature, since the firing pin is not in contact with the primer except when driven forward by the hammer at the instant of firing. Also known as a rebound type firing pin.

Examples: Colt Government Model .45; Tokarev 7.62mm.

3. **INERTIA FIRING PIN.** A firing pin assembled into the breechblock and free to move forward or backward. It is impelled forward by the blow of the hammer or striker, and backward by the explosion of the primer. See *Hammer* and *Striker*.

FIRING POINT. 1. For competitive purposes, a firing position properly graded and marked with a numbered marker.

2. In general, any position selected as a vantage point for shooting.

FLASH HIDER. A device attached to the muzzle of a rifle to reduce muzzle flash. Mis-named because its function is to reduce, not to hide, muzzle flash.

FLASH SUPPRESSOR. A prong type arrangement fitted to the muzzle of weapons which reduces muzzle flash.

FLINT. A piece of silica cut to proper size and shape to be clamped into the hammer (or cock) of a flintlock firearm. When the hammer falls, the projecting flint strikes the steel frizzen, showering sparks into the priming powder exposed in the pan.

FLINTLOCK. A type of ignition system for firearms representing one of the notable advances in the development of small arms. The muzzle-loading barrel is pierced with a touchhole on the side, near the breech. On the outside of the barrel and lying adjacent to the touchhole, a pan is fixed to hold a small quantity of priming powder. A suitably shaped hinged cover, called the frizzen, protects the priming powder from wind and light rain. When the trigger is pulled, the hammer carrying the flint strikes in a downward arc, knocking the frizzen forward on its hinge and showering sparks into the priming pan. The flash from the burning priming powder is transmitted through the touchhole into the main charge inside the barrel, and the gun is discharged.

Flintlocks were used as late as the American Civil War, but their period of greatest popularity extended from about 1670 to about 1835.

FOLDING TRIGGER. See *Trigger 3*.

FOLLOWER. The small metal platform atop the magazine spring, on which the bottom cartridge of the stack rests. The follower transmits the thrust of the magazine spring to the stack of cartridges, so that they will feed at the proper angle into the feed guides for delivery into the chamber of the gun.

FORE-END. That portion of the stock extending under the barrel forward from the receiver.

FORESIGHT. See *Sight 2(a)*.

FOULING. Foreign matter in the bore.

1. Ordinal
light rust.

2. Lumpy
as metal fouling

MOUSQUETON. French artillery carbine.

MUSHROOM BULLET. See *Bullet 10*.

MUSHROOMING. The round, fairly regular expansion caused by impact of a bullet outward from the nose and flowing back toward the base, the bullet remaining mostly in one piece and retaining most of its original weight. A bullet which breaks into numerous pieces on impact does not mushroom. A bullet of any type may mushroom. There is no necessary connection between a mushroom bullet and one which has mushroomed or which exhibits good mushrooming qualities. See *Bullet 10*.

MUSKET. A term originally applied to a smoothbore arm invented about 1540 which succeeded the *Harquebus*. Later applied to all military smoothbores of the long type with fore-ends extending the length of the barrel. Still later during the transition from single-shot to magazine rifles the term "rifled musket" or "rifle musket" was applied to single-shot military rifles apparently to distinguish them from repeating rifles.

MUZZLE. The forward end of the gun barrel from which the bullet emerges.

MUZZLE BLAST. Atmospheric disturbance at the muzzle following the emergence of the bullet, caused by the expansion of the powder gases in the air.

MUZZLE BRAKE. A device attached to the muzzle of a gun, designed to deflect the propelling gases emerging from the muzzle behind the bullet, and to utilize the energy of these gases to pull the gun forward to counter the recoil of the weapon.

MUZZLE ENERGY. The computed energy of the bullet as it leaves the muzzle of the gun. Usually measured in foot pounds. A function of bullet weight and velocity.

MUZZLE FLASH. The incandescent flash in the air at the muzzle of the gun following the departure of the bullet; caused by the expansion of powder gases, the ignition of oxygen in the air and the expulsion of burning powder grains.

MUZZLE-LOADER. A gun which can be loaded only from the muzzle.

MUZZLE VELOCITY. See *Velocity 2*.

N

NECK. Pertaining to bottleneck cartridge cases, that forward portion of the case which is reduced in diameter to hold the bullet. See *Case 2*.

NIPPLE. In percussion-lock weapons, a small tube screwed into the breech and projecting sufficiently on the outside to permit seating the percussion cap (primer) over the end of the tube. When the primer is exploded by the hammer, the resulting flame passes down through the tube into the chamber, igniting the propelling charge.

O

OGIVE. In ballistics, the radius of the curve of the nose of the bullet.

OPEN SIGHTS. See *Sights 2 (d)*.

ire
When drawn to the rear, these recoiling components are also drawn rearward. This action "cocks" the weapon in preparation for firing. (In most belt-fed machineguns this rearward movement of the cocking handle must be accomplished more than once in order to position the first cartridge for chambering.) Most Cocking Handles are automatically disengaged from the recoiling components while the weapon is firing. Not to be confused with Bolt Handle which is a handle attached directly to the bolt.

COCKING PIECE.

A component of the firing mechanism attached to the rear of the striker or firing pin which allows this piece to be drawn to the rear manually to cock the firing mechanism.

COMPENSATOR.

e
A device attached to the muzzle of a weapon, which due to its design allows the gases following the bullet out of the muzzle to be deflected upward through slots in the top surface of the compensator. The lower portion of the compensator is solid, so that while some gas escapes through the top, gas is also pressing against the bottom. This pressure against the bottom of the compensator, literally pushing the compensator down, pushes the muzzle down. This action tends to retard the muzzle climb which is an instability factor in a full-automatic firing weapon.

COOLING FLANGES.

os
Rings, ribs, ridges or flanges, machined into the exterior surface of the barrel circumference. This exposes more of the barrel metal to the air and in effect causes the barrel to cool more rapidly than if the surface were smooth.

CRANK.

A curved arm attached to an axle which is in turn attached to a recoiling component inside the receiver. Actuating the crank manually draws the recoiling parts to the rear (cocking). The opposite end of the crank serves as a lever to transmit recoiling energy to a recoil spring. The compressed energy of the spring is then transmitted back through the crank to force the recoiling parts forward.

2. Inertia Type: A firing pin which moves forward when struck by a hammer and is impelled rearward by the force of the exploding primer.

3. Fixed Type: A protrusion machined into the face of the bolt which functions the primer when the bolt has fully chambered the cartridge. Found in most blowback submachineguns.

4. Restrained Type: A firing pin which is engaged by a sear or other device which holds the firing pin to the rear as the bolt moves forward. This action compresses a firing pin spring which forces the firing pin forward when the firing pin is released.

FLASH HIDER.

An attachment attached to the muzzle of a weapon which shields the muzzle flash, or a circular disk attached to the barrel just to the rear of the muzzle to shield the flash from the firer.

FLASH SUPPRESSOR.

A two, three or four prong device attached to the muzzle of a weapon which tends to cool the hot gases as they leave the muzzle behind the bullet. Cooling the gases reduces the flash.

FOLLOWER.

A metal platform on which the last round in the magazine rests. The follower transmits the thrust of the magazine spring to the ammunition in the magazine so that the top round is properly positioned for feeding into the chamber.

GAS CYLINDER.

In gas operated weapons, an expansion chamber in which the gas piston rides. Generally, gas enters the gas cylinder from the gas port in the barrel where it impinges against the face of the gas piston to drive the piston rearward. After a short rearward movement of the piston, the gas is allowed to escape from the gas chamber.

GAS PISTON.

A piston or rod carried on the forward end of a major recoil component in a gas operated weapon. The front end of this piston is enclosed by the gas cylinder. Gas entering the cylinder from the barrel strikes the face of the piston driving it rearward.

MUZZLE BRAKE.

A device at the muzzle of the weapon which deflects the emerging powder gases. The energy imparted by this act of deflection pulls the weapon forward to offset some of the rearward motion of recoil.

MUZZLE FLASH.

The incandescent flash in the air at the muzzle of the weapon which occurs when the bullet leaves the barrel. This flash is caused by the expansion of the emerging powder gases, ignition of oxygen in the air and expulsion of burning powder grains.

MUZZLE VELOCITY.

The computed velocity in feet-per-second (fps), at which the bullet leaves the barrel. This velocity is computed by a formula which contains factors regarding propellant weight, propellant composition, bullet weight and configuration, etc.

NECK.

The forward portion of a bottleneck cartridge case which is smaller in diameter than the body of the case.

OGIVE.

The radius of the curve of the nose of a bullet.

OPERATING HANDLE.

A handle (projection) attached to the operating rod, slide or bolt which can be grasped to manually open or close the action.

OPERATING ROD.

In gas operated weapons, the rod which connects the gas piston to other components. When the rod is moved by the force of the gas against the face of the piston it causes the action to unlock and open.

OPERATIONS.

Refers to the way a weapon works, see System.

Library of Congress Catalog Card Number 75-107957

PRINTED IN U.S.A.

Flash Hider

FLASH HIDER a device that reduces but does not hide muzzle flash. Fastened to the muzzle of military small arms, the flash hider does not reduce muzzle blast. Also known as **FLASH SUPPRESSOR**.

FLASH HOLE small hole in the center of the primer pocket of a cartridge case or shotshell hull. Through it, the primer flash ignites the powder charge. *Also see:* Primer Pocket.

FLASH INHIBITOR a coating of potassium sulphate is applied to many of the currently used smokeless propellant powders to reduce, by chemical means, the amount of muzzle flash (*q.v.*).

FLASH SUPPRESSOR *see* Flash Hider.

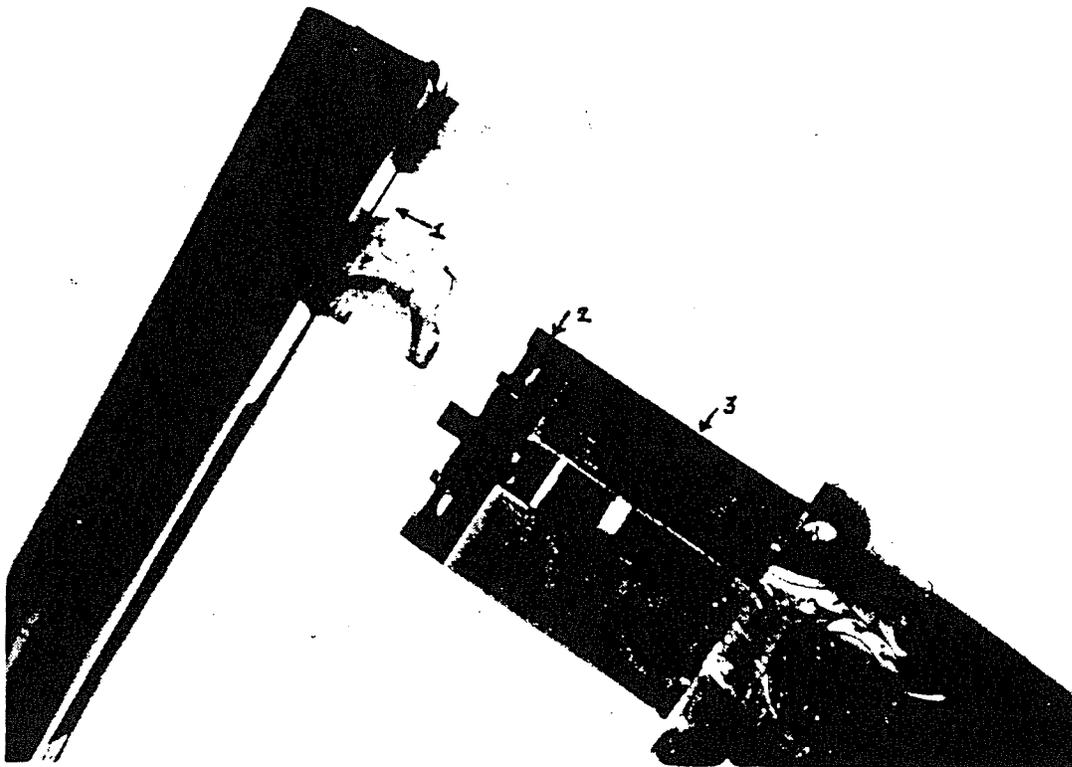

Flat Shooting

FLASK *see* Powder Flask.

FLAT-NOSED BULLET *see* Bullet, Flat-nosed.

FLATS on side-by-side shotguns, the lower barrel surfaces near the chambers that make contact with the **ACTION BAR FLATS**. The action bar flats are the flat sections which extend forward from the breech face, housing at their forward end the knuckle. Located in the knuckle is the hinge pin which engages the hook on the forward (toward the muzzle) lump. *Also see:* Action, Hinged Frame; Knuckle; Lump, Hook of; English Gun Terms (Water Table).

FLAT SHOOTING a term that describes, not very accurately, the

Arrow (1) indicates barrel flats, arrow (2) the knuckle, and arrow (3) the action bar flats.

Monte Carlo Pad

MONTE CARLO LACE ON PAD a commercial device that allows the shooter to add a Monte Carlo comb-like device to the stock of his gun.

MORRIS TUBE a rifled tube, popular in England & Europe, that fits into the barrel of a rifle or shotgun. The Morris Tube is designed so that the original sights of the firearm can be used, & firing as well as extraction system is that of the gun. The Morris Tube uses cartridges smaller than those used normally in the firearm equipped with such a firing system. *Also see:* Barrel Insert.

MOUNT or SCOPE MOUNT *see* Scope Bases.

MOVIE BLANK *see* Five in One Blank.

MRT abbr. for Midrange Trajectory (*q.v.*)

MULTI-BARREL ARRANGEMENTS *see* Barrel Arrangements.

MULTIPLE LEAF SIGHT *see* Sight, Leaf.

MUSHROOM *see* Bullet, Mushroom.

MUSKET the term originally described a smoothbore gun, was later applied primarily to military smoothbores. These guns had long forends, were sometimes equipped with a bayonet. When rifling became accepted, some muskets were made with rifled barrels & became known as rifled

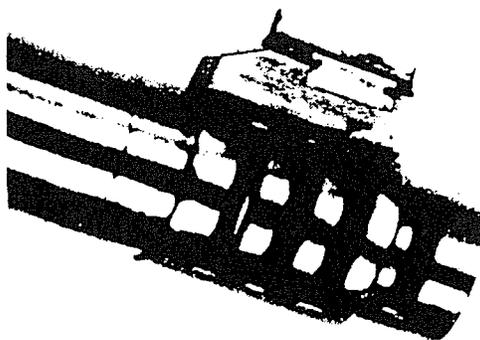

Muzzle Brake

muskets. Use of the term musket, as applied to modern hunting rifles, is inappropriate.

MUZZLE the forward end of the barrel where the projectile exits.

MUZZLE BLAST a violent & sometimes noisy disturbance caused by the exit of the hot powder gases from the confinement of the muzzle of a gun after a projectile has left the barrel.

MUZZLE BRAKE a device fastened to the muzzle of a rifle, sometimes to the muzzle of a shotgun, that reduces recoil (*q.v.*) & to some extent also cuts down on muzzle

jump (*q.v.*). Muzzle brakes are found primarily on heavy recoil rifles, & although they do reduce recoil & jump, the slots in the brake tend to increase muzzle blast somewhat by directing it backward toward the shooter. Muzzle brakes are also

Muzzle Cap

known as compensators. *Also see:* Compensator, Cutts.

MUZZLE CAP small rubber cap, sometimes a toy balloon, pulled over the muzzle of a hunting rifle to prevent entry of rain or snow into the barrel. Muzzle caps need not be removed prior to shooting.

MUZZLE CROWNING the rounding-off after a muzzle has been cut square & flush. Crowning is done with a special crowning reamer. Crowning protects the critical part of the rifling from accidental ~~damage~~, & if the muzzle is not squared, powder gases will escape prematurely, thus tipping the bullet base as it leaves the muzzle.

MUZZLE ENERGY *see* Energy, Muzzle.

MUZZLE JUMP actually occurs between the moment of ignition of the powder in a cartridge or shell & the moment the projectile leaves the barrel. The vertical jump or rise of the barrel is too fast to affect the trajectory. Jump is sometimes measured as the angle between the bore axis before & after firing. *Also see:* Kick; Recoil.

MUZZLE LOADER any firearm where powder & projectile are inserted into the barrel through the muzzle. While early muzzle loaders used loose powder & a bullet or shot with or without wadding, some later muzzle loaders used paper cartridges

Muzzle Velocity

which contained powder & projectile & where the paper acted as wadding.

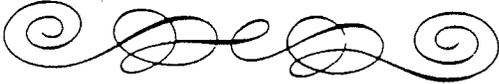

MUZZLE, FALSE a short piece of barrel, rifled on the inside & often tapered. The false muzzle carries pins which match corresponding holes in the muzzle of the rifle. The pins serve to align the rifling of the barrel with that of the false muzzle. The false muzzle temporarily seated on the top of the barrel serves only to introduce the bullet into the bore with minimal damage to the soft lead projectile. False muzzles are used on some muzzle-loading rifles as well as on many of the Schuetzen rifles or target rifles made by H.M. Pope & other barrel makers of that period.

MUZZLE FLASH as the bullet leaves the muzzle, it is followed by hot powder gases & also burning powder particles. As these make contact with the oxygen of the air, the incandescent flash becomes apparent. *Also see:* Flash Hider; Flash Inhibitor.

MUZZLE PROTECTOR some rifles must be cleaned from the muzzle. In order to prevent accidental damage to the lands by the cleaning rod, a special muzzle protector should be used. Similar in design to the false muzzle (*see* Muzzle, False), the device is presently not commercially offered, but can be made up easily by any gunsmith. *Also see:* Throat Protector.

MUZZLE VELOCITY abbr. MV, *see* Velocity, Muzzle.

flame staining

the practice of enhancing a plain stock by scorching its surface with a blowtorch, thereby creating irregular lines which resemble natural figuring.

flammable

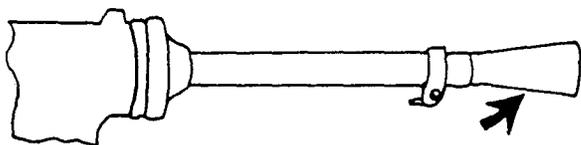

has the same meaning as inflammable, i.e. capable of being easily ignited. Its use is preferred to inflammable because of the possible ambiguity of the prefix "in" which as a prefix technically means "not" or "non".

flareback

a burst of flame from the breech of a gun. It is caused by gases that remain in the barrel and when the breech is opened, pass to the rear where they ignite when mixed with air.

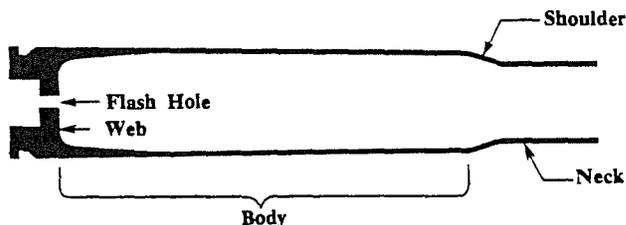

flare pistol

a pistol for discharging a flame for signalling or illuminating purposes.

flash hider

a muzzle attachment for a gun to conceal the flame when it is fired at night.

flash hole

the hole in the primer pocket through which the primer flash passes to enter the powder charge. Its function is similar to that of the touchhole in the flintlocks.

flash in the pan

the flash produced in the pan of a flintlock by igniting the small powder charge in the pan with the sparks produced by the flint striking the steel frizzen. The flash if it passed through the touchhole ignited the propellant powder charge

in the bore. Failure to do so resulted only in a pyrotechnic display without results giving rise to the use of the expression for other unsuccessful efforts.

flashless-nonhygroscopic powder

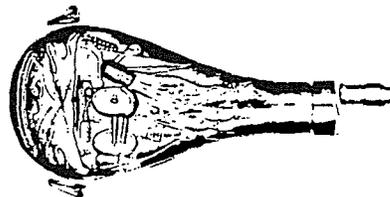

smokeless powder that does not readily absorb or hold moisture and does not produce a flash upon explosion. Used mainly as a propelling charge for projectiles.

flash pan

See "pan"

flash point

with respect to oils is the lowest temperature at which the vapor produced by heating the oil will flash up without setting the oil on fire. The fire or burning point is the lowest temperature at which the oil will burn. The flash points of mineral lubricating oils with few exceptions lie between 300 and 600 degrees Fahrenheit. Heating to the flash point decomposes the oil as a lubricant; heating to the burning point causes the risk of fire.

flask

a small flattened container with a narrow neck used to carry powder or shot for muzzleloading firearms.

flat fire

another term for "flat trajectory fire"

flat nose bullet

a bullet whose shape is characterized by having a flattened end instead of a rounded nose, i.e., it curves from its maximum diameter to a flat end instead of a rounded end or point. Commonly employed in cartridges intended for tubular magazine rifles.

mul

multipurpose gun

a gun suitable for a number of different types of target or game.

munitions

a word that embraces ammunitions, weapons and all other kinds of necessary war materials.

muriatic acid

another name for hydrochloric acid.

mushroom

the effect produced by certain bullets by expanding on or shortly after impact. The word is also used for some soft point or hollow point bullets. See "SP" and "HP"

musket

until about 1750 all shoulder arms of smooth bore were called muskets. The term later was applied indiscriminately to rifled as well as smooth bores. The name originated in the 16th century for a form of arquebus as a "maschetto" in Spanish, "mousget" in French and in England it became in sequence "mousquit", "mouskitt" and eventually "musket".

musketeer

a soldier armed with a musket.

musketry

fire delivered by rifles or other small arms. Also means training in the use of such.

muskettoon

a colloquial term for a muzzle-loading firearm of carbine length having a smooth bore.

muzzle

the front end of a gun barrel from which the bullet emerges.

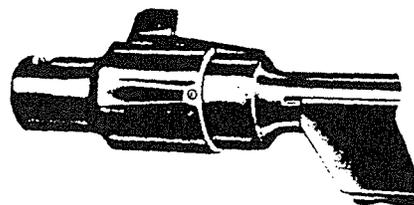

muzzle blast

the surge of hot air and gases that bursts from the muzzle of a gun as the projectile leaves it. Also called powder blast.

muz

muzzle bore sight

generally a disk with cross hairs that are exactly in the center of the bore when the disk is fitted into the muzzle end of a gun. Used with a "breech bore sight" to establish the axis of the bore. See "bore sight"

muzzle brake

an attachment secured to the muzzle of a gun, which may be a cannon, rifle or shotgun, to utilize some of the muzzle blast to apply a forward force to the barrel at the instant the gun is reacting backward in recoil. Basically it is a tube screwed to the muzzle, having a bore of diameter slightly larger than the bore of the barrel to enable the bullet or shot charge to pass freely through it. The wall of the tube is provided with holes or slits at right angles to the bore or inclined backward and outward at a slight angle to permit a portion of the muzzle blast to thus act against the tube and escape from it.

muzzle cap

a cap for covering the muzzle end of a gun barrel to keep out deleterious matter.

muzzle compensator

a device attached to the muzzle of a gun barrel which utilizes the escaping gases to control the direction and amount of undesirable muzzle movement. It may also reduce the recoil energy of the weapon.

muzzle energy

the energy of a bullet at the instant it leaves the muzzle of a gun, expressed in foot pounds.

muzzle flash

the flash that appears at the muzzle of a gun when it is fired. It is caused by the expanding powder gases that ignite when they and burning powder pieces meet the air at the muzzle of the gun.

GLOSSARY

or integral with it, below, above, or to one side of the weapon. The cartridges are held inside the box and impelled to the magazine mouth by a spring.

Breech The rear end of a gun barrel; the entrance to the chamber through which the ammunition is loaded.

Breech-block Analogous to 'bolt' in that it is a component which closes the breech; there is no rigorous rule of definition, but, in general, a bolt implies a cylindrical component which is revolved to lock, while a breech-block is generally rectangular, more massive, and locks without rotation.

Buffer A resilient component at the rear of an automatic weapon against which the bolt or breech-block comes to rest after recoil. It absorbs some of the recoil energy and assists in controlling the rate of fire. The resilience may be due to springs, rubber, oil or pneumatic media.

Bullet General term used to describe the projectiles fired by small arms.

Bullpup Colloquial term for a rifle in which the mechanism is set well back in the stock so that the end of the receiver is against the firer's shoulder. This design permits the use of a full-length barrel in a weapon which is shorter overall than one of conventional stocked shape.

Butt That part of a shoulder arm which rests against the firer's shoulder and transfers the recoil force to his body.

Calibre The diameter of the interior of a gun barrel, defined as the diameter of a cylinder which will fit inside the lands of the rifling. More commonly, the diameter as measured from the top of one land to the top of the opposite land.

Carbine A short rifle; traditionally the arm of cavalry, engineers, etc., whose primary battlefield role is not that of using a rifle but who required a self-defence weapon. More recently it implies a shorter type of assault rifle for airborne and special forces.

Cartridge A unit of ammunition, consisting of a cap, cartridge case, propelling charge and bullet. Also called a 'round' of ammunition.

Cartridge brass A mixture of 70% copper and 30% zinc from which cartridge cases are traditionally made.

Cartridge case Metal or plastic container which holds the propellant charge and the means of ignition. Can be various shapes and incorporates a design feature which enables it to be removed from the chamber.

Cartridge headspace Distance between the face of the bolt and the rear of the chamber when the breech is closed. A critical dimension, since if it is insufficient the bolt will not close and if it is too great the cartridge may set back on firing and burst.

Caseless cartridge A small-arm cartridge which dispenses with the conventional type of case and has the propellant formed into a solid mass attached to the bullet. It may or may not incorporate the means of ignition. It has the advantage of weight-saving and of removing the extraction requirement

from the operating cycle, but demands that the chamber be effectively sealed by the breech mechanism.

Chamber Enlarged-diameter section at the rear of the barrel in which the cartridge is positioned for firing.

Change lever A lever or switch which allows the firer to select single shots or automatic fire in certain types of weapon. Also called a 'selector'; may be combined with the safety catch.

Charger A metal or plastic frame in which cartridges are held and from which they can be loaded into the magazine of a weapon. The loaded charger is positioned opposite the magazine and the cartridges are swept from the charger into the magazine by thumb pressure. Common on bolt-action rifles, occasionally found on automatic pistols and rifles.

Clip A metal frame in which cartridges are held and from which they are loaded into the weapon's breech. Differs from a *charger* in that the loaded clip is inserted into the magazine, the cartridges are removed from it one at a time as they are loaded, and the empty clip is usually ejected as the last cartridge is removed. The clip forms an integral part of the feed system; without it, the weapon cannot be used. Found on bolt-action rifles, notably the Mannlicher, and on some automatic rifles, notably the Garand.

Closed bolt A weapon is said to 'fire from a closed bolt' when the bolt is closed up to the breech (but not necessarily locked) before the trigger is pulled. It has the advantage over the 'open bolt' system (*qv*) that there is no shift of mass after the trigger is pulled and the weapon is therefore generally more accurate.

Coaxial A machine-gun in a tank or other armoured vehicle turret which is parallel to the main armament and traverses and elevates in sympathy with it.

Compensator Device attached to, or forming part of, the muzzle of a weapon and which diverts some of the escaping gas upwards or to one side so as to counter the tendency of the gun muzzle to rise or swing during automatic fire.

Compound bullet A bullet built up from a heavy core surrounded by a jacket of lighter metal. The core provides the necessary density and mass, while the lighter jacket is ductile and engraves in the weapon's rifling.

Cook-off Premature ignition of the propelling charge by heat absorbed from a chamber made hot by prolonged firing.

Cycle of Operation The series of operations necessary to cause a weapon to fire one round and return to a state of readiness. May be performed by hand or by an automatic mechanism. It consists of:

- 1 Chambering the round
- 2 Closing and possibly locking the breech
- 3 Firing
- 4 Unlocking and opening the breech
- 5 Extracting the spent case
- 6 Ejecting the spent case
- 7 Cocking the firing mechanism
- 8 Feeding the next cartridge into place.

Not all these functions may be present; e.g., a blowback weapon does not perform unlocking and locking, a caseless

weapon does not perform extraction and ejection, and they may not be in the order given – e.g., cocking can take place before extraction – but the entire cycle must be followed by any small arm.

Cyclic rate The theoretical rate of fire of an automatic weapon assuming a continuous and infinite supply of ammunition – i.e., disregarding the need to change magazines or belts.

Cylinder Component of a revolver which carries the individual chambers. It is held behind the barrel on an axis pin or 'arbor' and is revolved by a mechanical link to the hammer or trigger so as to present successive chambers to be fired.

Delayed Blowback A blowback (*qv*) weapon in which the rearward movement of the bolt is mechanically delayed for a brief period to allow the chamber pressure to drop to a level at which it is safe to open the breech.

Differential recoil In small arms, an operating system in which the recoiling mass of the weapon – the barrel and breech mechanism – is still moving forward in the counter-recoil stroke when the gun fires. The recoil force of the explosion must then arrest the forward movement and reverse it, so absorbing much of the force. It is similar to 'Advanced Primer Ignition' (*qv*) in effect, but is used with locked-breech weapons.

Disconnecter A mechanism in self-loading weapons which disconnects the trigger from the firing mechanism after each shot. It can only be reconnected by the firer releasing the trigger. It prevents a semi-automatic weapon firing in the automatic mode. In selective-fire weapons it is thrown out of action by the selector or change-lever.

Double action A pistol firing mechanism which permits firing in either of two ways; either by manually cocking the hammer and then releasing it by trigger pressure, or by pulling through on the trigger so as to cock and release the hammer.

Double pull A trigger mechanism on selective-fire weapons in which pressing the trigger a short distance gives single shots, pressing it further, usually against an additional spring, gives automatic fire.

Double trigger Trigger mechanism on some selective-fire weapons in which two triggers are provided, one giving single shots and the other giving automatic fire.

Drum magazine A circular magazine into which cartridges are loaded axially or radially and propelled to the weapon's feed system by spring pressure or by mechanical rotation driven by the gun. The spring system is more usual, e.g., Thompson, Lahti and other submachine-guns; the mechanical system is uncommon, but was used on the Lewis machine-gun.

Dum-Dum A bullet with a soft nose which deforms easily on striking and thus causes severe wounding. So-called from the manufacture of such bullets for the British Army at Dum-Dum Arsenal in India in the 1880s. Shortly afterwards outlawed for military use. In common usage, any bullet which has been modified, as by cutting or incising the nose, so as to make it deform more easily on striking.

Duplex A cartridge containing more than one bullet.

Ejector Component of a weapon which throws the spent cartridge case clear after it has been extracted.

Explosive Bullet (1) A small-arms bullet containing a charge of explosive and intended to detonate on striking; intended for observation and range-finding purposes. Frequently called a 'Spotter' bullet. (2) By definition of the Hague Convention, 'Any bullet which expands or flattens easily in the human body.' Such bullets are proscribed for military use.

Extractor A claw-like device which removes the empty cartridge case from the chamber of a weapon and presents it to the ejector.

Feed That portion of the operating cycle of a weapon in which the cartridge is removed from the ammunition supply and loaded into the chamber.

Feedway The area of a weapon mechanism in which the cartridge is removed from the ammunition supply and aligned before loading into the chamber.

Fermeture nut System of breech locking used with some automatic weapons which has a collar around the weapon chamber with interrupted lugs. Operated by a gas piston, which gives a part-turn to the collar, this movement engages or disengages the lugs from mating lugs on the breech bolt, allowing it to be withdrawn or locked to the barrel.

Fin stabilisation A method of stabilising a projectile in flight by fins at the rear end, as with an arrow. Used with flechettes.

First Catch The point on the trajectory of a bullet when it falls close enough to the ground to strike the head of a standing man; the start of the 'Beaten Zone'.

First Graze The point on the trajectory of a bullet where it will strike the ground or a prone man; the end of the 'Beaten Zone'.

Flash eliminator Attachment to the muzzle of a weapon which cools the emergent propellant gas so that it does not cause flash or flame when meeting the outside air.

Flash Hider Muzzle attachment intended to conceal the muzzle flash from the firer so as to prevent his being dazzled when firing in poor light. It can also act as a flash eliminator but is not so efficient in this role.

Flashless Term used to classify propellant powders and signifies that firing will not produce flash, or at least not sufficient flash to be readily detected by an enemy. Flashlessness depends upon the weapon; a powder which is flashless on one weapon might not be flashless in another of different type, and each gun/cartridge combination has to be determined by trial.

Flechette A thin, fin-stabilised projectile resembling an arrow and much smaller than the bore of the weapon in which it is fired, and therefore needs to be supported in the bore by some form of sabot (*qv*).

firing pin or hammer is cocked and merely needs to be released, longest in open bolt weapons where the bolt must move forward and chamber the cartridge before firing can take place.

Long Recoil System of operating an automatic weapon in which barrel and bolt recoil, locked together, for a distance greater than the length of a complete cartridge. The bolt is then unlocked and held, while the barrel runs forward again, so opening the breech. During this movement the empty case is extracted and ejected. After the barrel has stopped moving the bolt is released, to run forward, load a round and lock to the barrel ready for firing. The long movement tends to absorb much of the recoil force.

LSW Light Support Weapon. Contemporary term for a squad automatic weapon or light machine-gun.

Machine-gun An automatic firearm capable of delivering continuous fire.

Machine Pistol Ambiguous term which can mean either a self-loading pistol modified to deliver automatic fire, or a submachine-gun.

Machine Rifle Obsolescent term used to describe a heavy-barrelled automatic rifle capable of being used as a light machine-gun. It differs from a 'true' machine-gun in not having an interchangeable barrel and being based directly upon an existing automatic rifle design.

Magazine A feed system for a firearm in which cartridges are stored in an integral or attachable carrier, from which they are fed into the weapon by spring or other agency.

Magazine Safety A safety device used in pistols which interrupts the firing mechanism when the magazine is removed. Prevents the accidental firing of a round inadvertently left in the chamber.

Misfire Total failure of a propelling charge to ignite. Often due to defective ammunition but can also be due to mechanical defects in the weapon.

MMG Medium Machine-Gun; a machine-gun of rifle calibre, capable of sustained fire for long periods; usually water-cooled.

MRBF Mean Rounds Between Failures. The average number of rounds a weapon can be expected to fire before a major defect occurs.

Muzzle The front end of the gun barrel, from which the projectile emerges.

Muzzle brake A device fitted to the muzzle of a weapon and designed to deflect some of the emergent gas and direct it against surfaces so as to produce a pull on the muzzle and thus reduce the recoil force. Not widely used on small arms, since the gas diverts sideways and increases the blast and noise level to the firer and his companions.

Muzzle velocity The speed at which the bullet leaves the muzzle of the gun. Also referred to as 'Vo', the Velocity at zero distance from the weapon.

Non-ramming Breech-block Term used to describe breech closing systems which do not reciprocate and therefore cannot load the cartridge into the chamber. Rarely found today, but the most common examples were the Martini rifle action and the Madsen machine-gun. Most recently used with the US M73 tank machine-gun, which had a horizontal sliding breech-block.

Open bolt A weapon is said to fire 'from an open bolt' when the bolt is held back until released by the trigger. This means that the barrel and chamber are empty when the trigger is engaged, and allows the weapon to cool down between shots. The disadvantage is that the balance of the weapon changes as the bolt moves forward, leading to a possible lack of accuracy. For this reason some selective-fire weapons are designed to fire from a closed bolt in single-shot fire, from an open bolt in automatic fire.

Parabellum Descriptive term used for weapons and ammunition developed by the Deutsche Waffen-und Munitions-fabrik, Berlin; derives from their telegraphic address 'Parabellum Berlin'.

Primary Extraction The first movement of extracting the spent cartridge case which takes place as the bolt is being unlocked. It is usually slow and powerful and moves the case a very small amount, freeing it for the much faster secondary extraction stroke which removes it from the chamber. When primary extraction is not incorporated in a weapon's design (as on some blowback weapons) its absence can lead to ruptured cases unless lubrication or a fluted chamber are used.

Primer Or 'primer cap'. The sensitive component in the base of the cartridge which, when struck by the firing pin, explodes and ignites the propellant charge inside the cartridge case. Can also be electrically initiated, though this is rare in small arms.

Propellant Explosive used to generate gas and so drive the bullet from the weapon. Usually based on nitro-cellulose, though nitro-glycerin and nitro-guanidine are often incorporated. Found in a wide variety of shapes and sizes, selected to control the rate of burning to suit different weapons.

Rebated rimless Type of cartridge case in which the extraction rim is considerably smaller than the base of the cartridge case. Used in weapons where it is necessary completely to enclose the case in the chamber but still have it held by the bolt, and also in order to allow a large case to be manipulated by a standard-size bolt face.

Receiver The body of a weapon; the casing inside which the bolt operates and to which the magazine and barrel are attached.

Recoil Rearward movement of the barrel or weapon due to reaction against the forward ejection of the bullet.

Recoil Intensifier A device attached to the muzzle of a recoil-operated weapon which resists the emergent gas and thus makes the rearward movement more positive and provides a reserve of power to overcome friction due to dirt or lack of lubrication.

THE COMPLETE

AR-15/M16 SOURCEBOOK

What

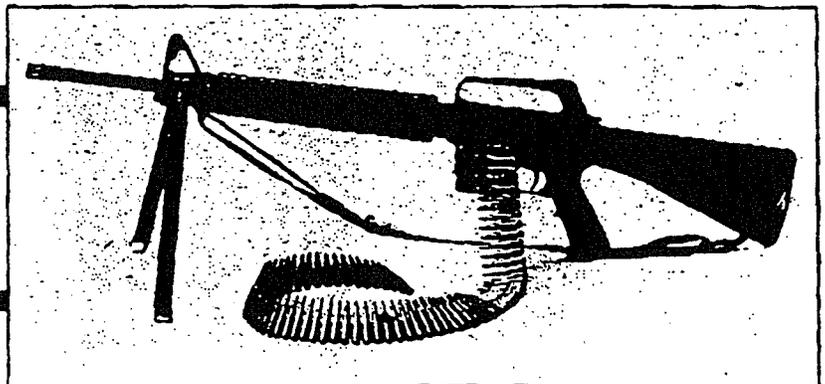

Every

Shooter

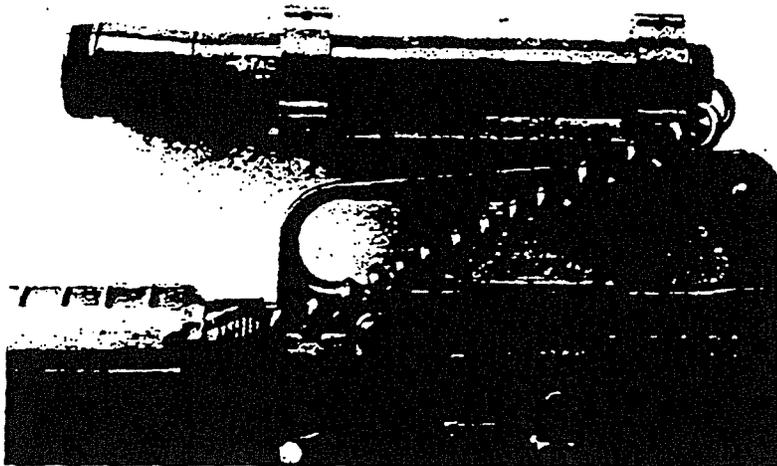

Needs to

Know

Duncan Long

Tac Star attached to an A.R.M.S. scope mount. A pressure switch is mounted on the handguard for rapid activation without having to alter the hold on the rifle.

weighing only 9.1 ounces, the Tac Star delivers 20,000 candlepower to dazzle any opponent standing in its beam. The flashlight also comes with a momentary switch on a coiled cord that can easily be attached on the handguard of the rifle to allow the user to flick the light on and off at will without changing the rifle's position.

The Tac Star is built to last with a solid aluminum body and rechargeable nicad batteries. A special recharging unit is marketed by Adventurer's Outpost that enables a user to recharge the flashlight by plugging into a car's cigarette lighter. The high quality of the Tac Star makes any other lighting system for a rifle second choice.

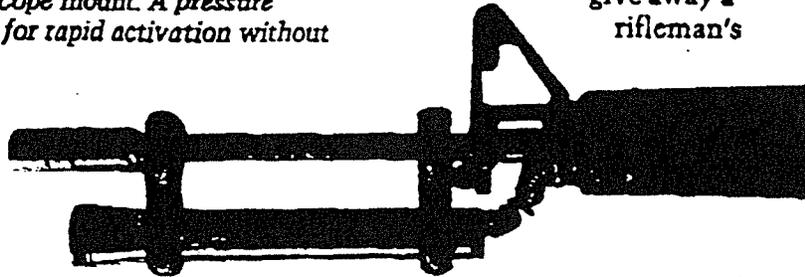

Adventurer's Outpost also offers nylon bushings for \$4 per set of two that allow inserting mini-AA flashlights into scope rings or the company's barrel mounts designed for lasers or the Tac-Light. Best of all, for an additional \$13, Adventurer's Outpost sells a remote pressure switch that replaces the endcap of the flashlight, turning it into an off/on system suitable

for use with a rifle.

(It should be noted that in many areas of the United States, using flashlights on firearms when hunting is illegal. There are parts of the country, however, where hunting raccoons or other animals with a flashlight is legal. In such areas, the flashlight mounts discussed above may be an ideal way to engage in the hunt.)

FLASH SUPPRESSORS AND MUZZLE BRAKES

Flash suppressors minimize the muzzle flash, which can give away a rifleman's

Tac Star mounted in Adventurer Outpost's special 1-inch mounts.

position in combat. Consequently, most modern military and police rifles have flash suppressors (also called flash hiders) attached to their muzzles. These devices don't completely eliminate muzzle flash, but they do reduce it, especially with ammunition designed for minimal flash and with rifles having longer barrels.

Muzzle brakes reduce felt recoil and make shooting a more enjoyable experience. Compensators help prevent recoil forces from pushing the barrel upward and off target and are generally the same as muzzle brakes; most modern designs both reduce and compensate for recoil. The trade-off for reduced recoil and compensation often is added noise and flash, though some muzzle brakes do a pretty good job of keeping this to a minimum. Some

ACCESSORIES FOR THE AR-15

modern systems try to combine both the muzzle brake and the flash hider to have the best of both systems.

A flash hider or muzzle brake has an added plus of protecting a barrel from dings and damage. This is important since damage to the muzzle can quickly ruin accuracy. Consequently, even sports shooters who don't need to reduce flash realize that a flash hider or muzzle brake makes good sense on an AR-15. Oddly enough, many flash hidiers also reduce bullet dispersion, making a barrel more accurate, and may even increase muzzle velocity by a few feet per second. The increased accuracy is a good reason for target shooters to purchase barrels threaded for a flash hider or muzzle brake.

The A1-style birdcage flash hider is cheap and works well; the A2-style is nearly as effective and has the lower cutouts missing so it acts as a compensator to keep the barrel on target during strings of fire (and also prevents a dust cloud during prone shooting). These two hidiers may be all most shooters need.

For maximum flash hiding, the open-prong flash hider is hard to beat. One modern version of this that almost completely eliminates flash on 20-inch barrels and comes close with 16-inch or shorter barrels is the Vortex offered by Western Ordnance International Corp. for \$25.

The 2 1/4-inch Vortex has computer-designed prongs that are slightly offset to create a swirl of gas that ignites any burning powder residue. Originally, the unit

was designed just for hiding flash, but it was discovered that it also reduced the size of groups as well as recoil somewhat. (The trade-off is a few feet per second loss in velocity—something most shooters won't be able to tell the difference with.) Because of all the enhancements the Vortex offers, it's now being sold as a multi-purpose device.

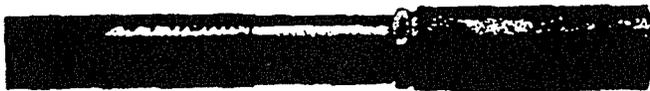

For those who hated the original duckbill flash hidiers on the AR-15, the Vortex has a feature that helps prevent the device from getting caught on vegetation—a groove around its prongs that permits wrapping a small piece of wire around it to make a birdcage hider. Provided just a small wire is used, the increase in flash is imperceptible.

For those wanting reduction of recoil, Fabian Brothers' muzzle brake is most ideal. The unit drops felt recoil by around 44 percent and stabilizes the muzzle enough to put bursts of automatic fire in one spot with just a bit of practice on a selective-fire rifle. The original design, sold as the Mil/Brake, didn't do much to suppress flash, but it was revamped when it became the Muzzle Stabilizer; now the birdcage-style slits at its front greatly reduce flash.

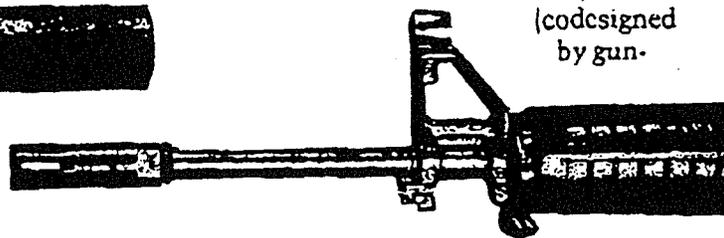

In addition to the standard .223 Muzzle Stabilizer, Fabian Brothers also makes a 9mm model for AR-15 carbines. Cost of either version is \$40 from L.L. Baston.

Another good compensator/muzzle brake—used by Jerry Miculek to win the 1989 Steel Challenge—is the

Clark/Miculek
(codsigned
by gun-

Original Mil/Brake offered by Fabian Brothers.

Updated Fabian Brothers muzzle brake with flash hider assembly. Note hooded target sight on this rifle. (Photo courtesy of Fabian Brothers)

smith Jim Clark) muzzle brake. This unit is modeled after the style used on artillery and tank cannons, with twin holes on either side of its cylinder. These openings bleed gas to the side to almost eliminate all muzzle rise. Cost is \$45 from L.L. Baston.

LASER SIGHTS

Some of the first laser sights for hand-held firearms were created for the AR-15. These monstrosities often filled the stock with batteries and looked like huge scopes mounted on top of the guns. Cost ran into the thousands of dollars, and batteries to power them quickly added to the hemorrhage of money when the units were used for practice. But these lasers worked as nighttime aiming systems and paved the way for more modern—and much smaller—laser sights. Even modern laser sights have many of the limitations of the originals but, thanks to today's electronics, are now tiny and reasonably priced.

Lasers create a tight beam of coherent red light that appears as a bright dot up to 100 or 200 yards away in dim light. While the beam is straight and a ballistic arch is curved, the two are close enough that a laser mounted parallel to a bore will coincide within several inches to the impact of a bullet over several hundred yards. This makes it practical to pinpoint targets without using an AR-15's standard sights.

There are several drawbacks to a laser sight. One is that it's useful only in dim light since sunlight hides the beam's red dot. When used in a really dark environment, the laser is readily seen but it doesn't illuminate the target. Therefore, either a light source has to be added or the firing done more or less blindly (which is practical if returning fire toward muzzle flashes). The beam also can be seen as a bright red light by anyone facing the muzzle of an AR-15 with a laser on it, and in fog, rain, or smoke, the beam becomes a beacon leading to the shooter's position.

For military users, the beam has another important drawback: it creates a bright light in night vision gear.

But there are times when the laser shines (so to speak). In dim light and indoors, the laser works very well to quickly acquire a target so a shooter can be "on target" in only a moment without shouldering and aiming his AR-15. For those who can operate within the parameters of a laser sight, it can be a very useful aiming device, especially when operated with a momentary switch left on only long enough to acquire a target and fire, then turned off.

Prices for good lasers at the time of this writing are from \$200 to \$350 each. The units have shelf lives of at least 10 years, and an operational life is 10,000 or more hours. The life of batteries ranges from 30 minutes to several hours depending on the laser and whether it's flashed on and off or left on continuously (which is harder on the batteries). Newer lasers have a flickering strobe beam that makes the batteries last even longer.

Some newer lasers can be mounted in Weaver rings, within 1-inch scope rings, or in Adventurer's Outpost's flashlight barrel mounts created for the Tac Star. Most manufacturers also offer a clamp mount that couples their lasers to a scope, making it possible to have an optical system for situations too bright for a laser.

For those wanting to mount a laser with a standard scope and perhaps a Tac Star or some other device on one quick-detach mount, SARCO carries the Tri-Mount. It has three Weaver bases and mounts in the handle of an AR-15, placing one base alongside the carrying handle, one on top, and one on the other side. And the center of the base is grooved so the iron sights can still be used! This makes a wide range of mounting systems possible and might even be exploited for a "quick on/quick off" assembly consisting of a flashlight, laser, and scope to trans-

CHOKES & BRAKES

Briley Screw-In Chokes

Installation of these choke tubes requires that all traces of the original choking be removed, the barrel threaded internally with square threads and then the tubes are custom fitted to the specific barrel diameter. The tubes are thin and, therefore, made of stainless steel. Cost of installation for single-barrel guns (pumps, autos), lead shot, 12-gauge, **\$149.00**; 20-gauge **\$159.00**; steel shot **\$179.00** and **\$189.00**, all with three chokes; un-single target guns run **\$219.00**; over/unders and side-by-sides, lead shot, 12-gauge, **\$369.00**, 20-gauge **\$389.00**; steel shot **\$469.00** and **\$489.00**, all with five chokes. For 10-gauge auto or pump with two steel shot chokes, **\$189.00**; over/unders, side-by-sides with three steel shot chokes, **\$349.00**. For 16-gauge auto or pump, three lead shot chokes, **\$179.00**; over/unders, side-by-sides with five lead shot chokes, **\$449.00**. The 28 and 410-bore run **\$179.00** for autos and pumps with three lead shot chokes, **\$449.00** for over/unders and side-by-sides with five lead shot chokes.

Cutts Compensator

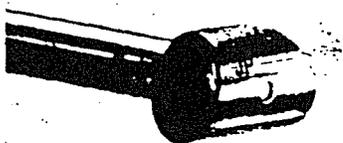

The Cutts Compensator is one of the oldest variable choke devices available. Manufactured by Lyman Gunsight Corporation, it is available with a steel body. A series of vents allows gas to escape upward and downward. For the 12-ga. Comp body, six fixed-choke tubes are available: the Spreader—popular with Skeet shooters; Improved Cylinder; Modified; Full; Superfull, and Magnum Full. Full, Modified and Spreader tubes are available for 12 or 20. Cutts Compensator, complete with wrench, adaptor and any single tube **\$87.50**. All single choke tubes **\$26.00** each. No factory installation available.

Dayson Automatic Brake System

This system fits most single barrel shotguns threaded for choke tubes, and cuts away 30 grooves on the exterior of a standard one-piece wad as it exits the muzzle. This slows the wad, allowing shot and wad to separate faster, reducing shot distortion and tightening patterns. The A.B.S. Choke Tube is claimed to reduce recoil by about 25 percent, and with the Muzzle Brake up to 60 percent. Ventilated Choke Tubes available from .685" to .725", in .005" increments. Model I Ventilated Choke Tube for use with A.B.S. Muzzle Brake, **\$49.95**, for use without Muzzle Brake, **\$52.95**; A.B.S. Muzzle Brake, from **\$69.95**. Contact Dayson Arms for more data.

Gentry Quiet Muzzle Brake

Developed by gunmaker David Gentry, the "Quiet Muzzle Brake" is said to reduce recoil by up to 85 percent with no loss of accuracy or velocity. There is no increase in noise level because the noise and gases are directed away from the shooter. The barrel is threaded for installation and the unit is blued to match the barrel finish. Price, installed, is **\$150.00**. Add **\$15.00** for stainless steel. **\$45.00** for knurled cap to protect threads. Shipping extra.

JP Muzzle Brake

JP Muzzle Brake

Designed for single shot handguns, AR-15, Ruger Mini-14, Ruger Mini Thirty and other sporting rifles, the JP Muzzle Brake redirects high pressure gases against a large frontal surface which applies forward thrust to the gun. All gases are directed up, rearward and to the sides. Priced at **\$79.95** (AR-15 or sporting rifles), **\$89.95** (bull barrel and SKS, AK models), **\$89.95** (Ruger Minis), Dual Chamber model **\$79.95**. From JP Enterprises, Inc.

KDF Slim Line Muzzle Brake

This threaded muzzle brake has 30 pressure ports that direct combustion gases in all directions to reduce felt recoil up to a claimed 80 percent without affecting accuracy or ballistics. It is said to reduce felt recoil of a 30-06 to that of a 243. Price, installed, is **\$179.00**. From KDF, Inc.

Laseraim

Simple, no-gunsmithing compensator reduces felt recoil and muzzle flip by up to 30 percent. Machined from single piece of Stainless Steel (Beretta/Taurus

model made of aircraft aluminum). In black and polished finish. For Colt Government/Commander and Beretta/Taurus full-size pistols. Weighs 1 ounce, **\$49.00**. From Laseraim Arms Inc.

Mag-Na-Port

Electrical Discharge Machining works on any firearm except those having non-conductive shrouded barrels. EDM is a metal erosion technique using carbon electrodes that control the area to be processed. The Mag-Na-Port venting process utilizes small trapezoidal openings to direct powder gases upward and outward to reduce recoil. No effect is had on bluing or nickeling outside the Mag-Na-Port area so no refinishing is needed. Rifle-style porting on single shot or large caliber handguns with barrels 7 1/2" or longer is **\$110.00**; Dual Trapezoidal porting on most handguns with minimum barrel length of 3", **\$100.00**; standard revolver porting, **\$78.50**; porting through the slide and barrel for semi-autos, **\$115.00**; traditional rifle porting, **\$125.00**. Prices do not include shipping, handling and insurance. From Mag-Na-Port International.

Mag-Na-Brake

A screw-on brake under 2" long with progressive integrated exhaust chambers to neutralize expanding gases. Gases dissipate with an opposite twist to prevent the brake from unscrewing, and with a 5-degree forward angle to minimize sound pressure level. Available in blue, satin blue bright or satin stainless. Standard and Light Contour installation cost **\$179.00** for bolt-action rifles, many single action and single shot handguns. A knurled thread protector supplied at extra cost. Also available in Varmint style with exhaust chambers covering 220 degrees for prone-position shooters. From Mag-Na-Port International.

Poly-Choke

Marble Arms Corp., manufacturer of the Poly-Choke adjustable shotgun choke, now offers two models in 12-, 16-, 20-, and 28-gauge—the Ventilated and Standard style chokes. Each provides nine choke settings including Xtra-Full and Slug. The Ventilated model reduces 20 percent of a shotgun's recoil, the company claims, and is priced at **\$135.00**. The Standard Model is **\$125.00**. Postage not included. Contact Marble Arms for more data.

Pro-port

A compound ellipsoid muzzle venting process similar to Mag-Na-Porting, only exclusively applied to shotguns. Like Mag-Na-Porting, this system reduces felt recoil, muzzle jump, and shooter fatigue. Very helpful for trap doubles shooters. Pro-Port is a patented process and installation is available in both the U.S. and Canada. Cost for the Pro-Port process is **\$129.50** for over/unders (both barrels); **\$99.50** for only the top or bottom barrel, and **\$78.50** for single-barrel shotguns. Optional pigeon porting costs **\$25.00** extra per barrel. Prices do not include shipping and handling. From Pro-port Ltd.

Que Industries Adjustable Muzzle Brake

The Que Brake allows for fine-tuning of a rifle's accuracy by rotating the brake to one of 100 indexed stops. Mounts in minutes without barrel modification with heat-activated tensioning ring. The slotted exhaust ports reduce recoil by venting gases sideways, away from rifle. **\$189.50**. From Que Industries.

SSK Arrestor muzzle brakes

SSK Arrestor Brake

This is a true muzzle brake with an expansion chamber. It takes up about 1" of barrel and reduces velocity accordingly. Some Arrestors are added to a barrel, increasing its length. Said to reduce the felt recoil of a 458 to that approaching a 30-06. Can be set up to give zero muzzle rise in any caliber, and can be added to most guns. For handgun or rifle. Prices start at **\$95.00**. Contact SSK Industries for full data.

RE: Response to Letter Dated October 25, 2000

Dear Mr. Patton:

Thank you for your recent correspondence with the California's Department of Justice (DOJ) Firearms Division. The issues you addressed relative to our staff "in-house," problem resolution will be discussed with those individuals. Our goal is to provide timely, accurate, and consistent public information and responses.

The "California-legal" Springfield Armory M1A "muzzle brake/stabilizer" has been accepted by the Bureau of Alcohol, Tobacco and Firearms and the California DOJ. No registration is required as long as no other offending characteristics exist on the rifle.

Thank you for your continued interests in the California assault weapons laws.

Sincerely,

A handwritten signature in cursive script, appearing to read "Dale A. Ferranto".

DALE A. FERRANTO, Assistant Director
Firearms Division

RE: NRA California Infomercial

Dear Tim:

During a recent discussion with Ed Worley, he shared your concern about the tone of our infomercial.

As you well know, the level of confusion concerning the assault weapon issue is profound. Late last month, I fielded a call from one of our members whose story I wish we could have included in the infomercial. More than any other, it haunts me.

The caller lives in Plumas County. His concerns focused on the flash suppressor/muzzle brake question. He had been trying to follow the tortured evolution of the proposed definitions-but felt inadequate. His knowledge of firearms seemed well above average, and perhaps because of that, he couldn't reconcile the definitions with what he thought he knew. His fear was of making he or his son inadvertent felons. He wanted to buy his son a Springfield M1A and he had recently purchased an M1D Garand (which has a flash suppressor). I explained to him our concerns about your departments position on the M1A flash suppressor/muzzle brake issue. I also informed him that the M1D was not likely to be classified as an assault weapon. My caution on the M1A was the possibility of local prosecutors disregarding DOJ interpretations.

He had purchased the M1D because it is the rifle he used in the Marine Corps. He went on to say that he had originally moved to Plumas County when he returned from Korea. There he had served with the First Marine Division at the Chosin Reservoir. He came home less his legs and a hand. His worry about such a threat to his freedom is our collective shame.

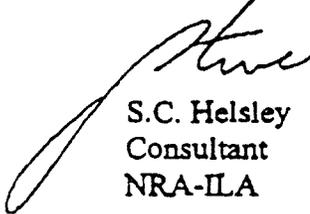

California Infomercial

October 11, 2000

Page 2

The failure of the Lungren administration concerning "assault weapons" was a lack of leadership or any concern for inadvertent victims. Your department was tasked with producing clear regulations in a timely manner - but you have not. The sorry state of affairs that has plagued the assault weapon issue continues. As the decent man I know you are, in the early morning dawn when reality impinges, the process must make your heart ache like it does mine.

Sincerely,

S.C. Helsley
Consultant

RE: NRA California Infomercial

Dear Mr. Helsley:

Thank you for your letter of October 11, 2000. You are correct that I have shared with Ed Worley my grave concern about the California Infomercial the NRA has been frequently playing on television. Although I understand the privacy concerns and the philosophical belief of many of the members of your organization regarding registration of assault weapons, I feel it is imperative that you fully inform gun owners that registration allows them to preserve their property right in those firearms the Legislature has deemed to be assault weapons.

It is essential that these honest gun owners who have possessed their firearms before they became controlled by the assault weapons' statutes realize that the only way they can lawfully remain in possession of their property is to timely register. As you well know, after December 31, 2000, any person who has not registered their assault weapon will be in possession of contraband. Furthermore, they will be subject to criminal sanction as misdemeanants or, potentially, felons which may result in a lifetime prohibition from purchasing and possessing firearms, if convicted.

The strong message imparted by your infomercial is that registration leads to confiscation and, therefore, to be avoided at all costs. A more likely scenario is that failure to register will result in a loss of property and may result in a lifetime prohibition against firearm ownership. While I understand the position taken by the NRA, I feel it is extremely misleading and utterly fails to impart the critical legal implications I have discussed above. That is the message I shared with Ed Worley, and I now share with you and the rest of the officers of your organization.

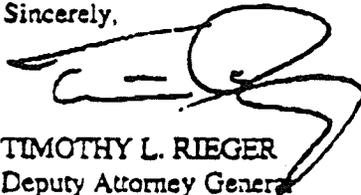

As for the M1A muzzle break, you are aware of the great lengths our office has gone to ensure that a distinction is made between flash suppressors and other devices, such as muzzle breaks. You can assure your caller in Plumas that the Springfield muzzle break was tested by Ed Owen, Jr., of the BATF Firearms and Technology Branch, and been determined not to be a flash suppressor. You can also assure your caller that the California Attorney General's office has adopted BATF's determination and he can replace his flash suppressor with that muzzle break.

Steven C. Helsley
October 31, 2000
Page 2

As a former marine and current soldier, I respect and admire the sacrifices your veteran caller has made on behalf of our wonderful country and you can assure him that we will continue to take the time and effort to make determinations such as this one in order to allay his fear and concern.

I remain, like all those in the California Department of Justice Firearms' Division, your faithful public servant.

Sincerely,

A handwritten signature in black ink, appearing to read 'T. Rieger', with a large, stylized flourish extending from the end of the name.

TIMOTHY L. RIEGER
Deputy Attorney General
Firearms Division

Re: Firearm Dealer Meetings/DOJ Emerging Policies on SB23 Implementation

Dear Mr. DeAlba:

As a result of DOJ's recent meetings with California firearm dealers questions on SB23 are pouring into my office. Unfortunately, it does not seem that DOJ's efforts are providing the hoped for policy clarifications. I hope that as you finalize your positions on key issues that you will mail the information to dealers and not simply rely on the Internet.

In the meantime, I'd appreciate if you could advise me with respect to the following so that I can pass the information on to my clients:

FLASH SUPPRESSOR/ MUZZLE BRAKE

DOJ has been informing dealers that it approved the Springfield M1A muzzle brake to replace the original flash suppressor because "BATF approved it." As you know, BATF has no objective criteria for such approval. In your three drafts of proposed regulations, no linkage to BATF was proposed. If you have formally approved the Springfield Muzzle Brake, I would like a copy of documentation to that effect. If a Public Records Act Request is necessary, I will submit it. Please let me know.

Given DOJ's latest definition of "flash suppressor," I assume that the Browning BOSS would make their BAR hunting rifle an "assault weapon." If it is not, can you please explain why?

SALE OF RECEIVERS

I am told that Mr. Rieger cautioned dealers about continuing to sell "FAL Type" receivers. Part of the logic was the Attorney General's inability (some think unwillingness) to control the actions of local prosecutors. Based (I assume) on assurances from your Department, California Dealers are advertising their FAL Type receivers as "DOJ Approved." FAL Type rifles can be modified to eliminate the offending characteristics of SB23. Is it your position that no FAL Type receiver regardless of brand name, county of origin or design can be sold? If so, then I assume that all such rifles must be registered regardless of modifications. If this is your position - it does not appear that any attempt has been made to notify the public to that effect.

MULTIPLE REGISTRANTS & DOMESTIC PARTNERS

DOJ is apparently taking the position that people can register the same SB23 or "series" gun to multiple parties in the same household, but that they must be your spouse or your children who are over 18 years old and they must reside in the same home. Is this correct? What about domestic partners?

Mr. DeAlba
November 2, 2000
Page 2

MODIFICATIONS

The legislature structured SB 23 so that most effected owners could register or modify their firearms. I have a number of clients who wish to modify their firearms in such a way that registration as an SB23 "assault weapon" will not be necessary. There had been great hope that the proposed assault weapon regulations would have been finalized by now and could provide guidance. Since it appears that no final regulations will be available this year we must proceed without them. This requires DOJ to make some decisions.

My clients wish to submit, for DOJ's approval, firearms that have been modified consistent with the July 12, 2000 proposed regulations. The elements addressed would be:

- What constitutes a conspicuously protruding pistol grip
- Flash suppressors and muzzle breaks.
- Grenade launcher modification
- Conversion of a detachable magazine to one that is fixed
- What constitutes a large capacity feeding device for tube fed shotguns
- Permanent alteration of large capacity feeding devices
- What constitutes elimination of muzzle threads on a pistol barrel.

I assume that all the proposed modifications would render the firearms non "assault weapons" and would meet DOJ's approval. After such approval, I hope that you would notify the owner, and perhaps local law enforcement, in writing to protect owners of such firearms from unwarranted arrest and prosecution. Your department has the lead role in implementation, administration and interpretation of SB 23.

Please let me know how to proceed to make these firearms available for inspection or otherwise.

Thank you for courtesy and cooperation.

Sincerely,
TRUTANICH • MICHEL, LLP

Re: Senate Bill 23

Dear Mr. Michel:

Thank you for your letter of November 2, 2000, regarding California Department of Justice policies concerning Senate Bill 23 (SB23) implementation.

The Department of Justice (DOJ) has advised Mr. William Dailey, counsel for Springfield, Inc., that the M1A muzzle brake submitted to both BATF and our office is approved for sale in California. In that particular case our office placed a great deal of reliance upon the determination of Ed Owen, Chief of the Firearms Technology Branch for the United States Bureau of Alcohol, Tobacco and Firearms. It is also the opinion of the California Department of Justice that the Browning Boss system is not a flash suppressor but a recoil reduction device. Mr. Dailey can be contacted at (309) 736-0696.

With respect to the sales of receivers for rifles which can be configured as assault rifles, Mr. Rieger has been wisely counseling dealers to proceed with caution with respect to the sales of potential assault weapons. As you are well aware, dealers can place themselves in harms way by selling rifles with the characteristics which make them assault weapons within the meaning of SB23. Your assumption that the California Department of Justice has "approved" FAL type receivers for sale is *incorrect*. You represent that dealers are selling FAL type receivers as "DOJ approved." The department has not "approved" the sale of any receiver for a potential assault weapon. Although FAL rifles are covered by SB23, the receivers cannot be sold with characteristics which make the rifle an assault weapon.

Penal Code section 12285, subdivision (e), provides the option of "joint registration for assault weapons owned by family members residing in the same household." Family members include blood relatives, married spouses and adopted children.

C.D. Michel
December 15, 2000
Page 2

The regulations for SB 23 were adopted at 3:49 p.m. on December 1, 2000.

Currently, an "Information Bulletin" to all licensed firearm dealers is being disseminated by the Firearms Division to dealers and law enforcement agencies in California.

If you have any further questions, please telephone Tim Rieger, Deputy Attorney General, at (916) 263-0802.

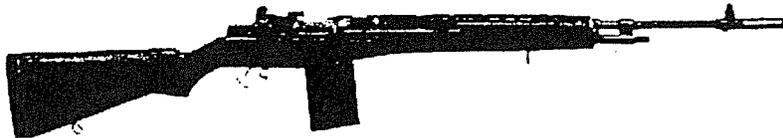

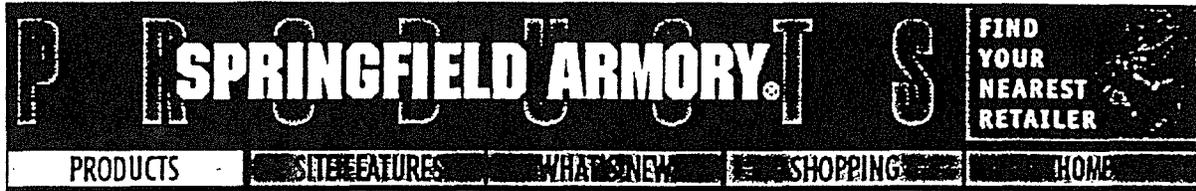

Sincerely,

BILL LOCKYER
Attorney General

DAVID DE ALBA
Special Assistant Attorney General

BROWNING

The BOSS

Ballistic Optimizing Shooting System

No matter who you are, no matter what you hunt, regardless of your bullet weight or ammunition brand, the Browning BOSS[®] will make you a better shooter. Period.

Pinpoint accuracy in four simple steps.

1. Zero out the BOSS.
2. Set the BOSS to the specified "Sweet Spot" setting.
3. Fine tune.
4. Sight in.

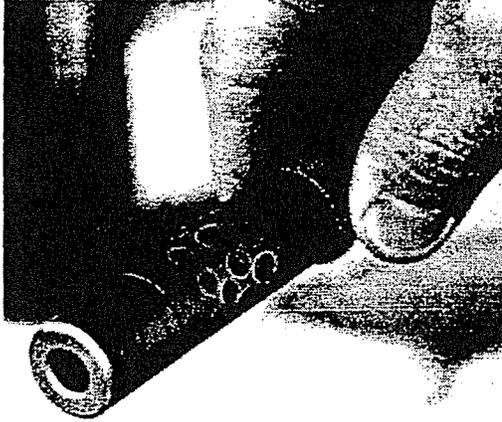

***Change your bullet weight as easy as a 1, 2 3 step.
That's versatility.***

The serious shooter knows that certain loads shoot differently out of every rifle. A rifle that shoots a 140-grain slug well may not perform with a 180-grain load -- no matter what powder or bullet you try. The BOSS[®] allows your Browning rifle to shoot any load with fine-tuned accuracy. Now, the Browning BOSS-equipped rifle can be the perfect rifle for anything you want to hunt. You can shoot a 140-grain slug at deer one day and a 180-grain at elk the other -- all with fine-tuned accuracy -- with the simple turn of your BOSS.

The rumors about the BOSS are accurate.

Serious shooters spend hours at the reloading bench, tediously experimenting with powders, primers, bullet types and seating to have the ability to shoot a group that can be covered with a dime. These same types of shooters spend a great deal of money with a trusted gunsmith, hoping the master craftsman can create a finely tuned barrel and flawlessly fitted stock that will bring this system into perfect harmony.

Browning's Ballistic Optimizing Shooting System (BOSS) is a patented breakthrough in rifle accuracy. This system, available only on Browning BAR, A-Bolt and Acera rifles, allows you to control the vibrations of your barrel so you can tune your barrel to any load. Any shooter can shoot groups they didn't think possible with an out-of-the-box rifle.

Simple, Quick and Easy

The BOSS is a simple system consisting of a weighted body and a threaded adjustment ring. By turning the BOSS the rifle can be harmonically tuned to any load. Using the BOSS is easy and can be done with three simple steps. First, calibrate the BOSS by aligning the zeros. Second, set the BOSS to the sweet spot settings found in the BOSS manual shipped with the rifle. These sweet spot settings have been developed by Browning according to caliber, ammunition brand and bullet weight. Third, fine tune the BOSS by firing a two shot group and turning the BOSS in one tenth increments. As you adjust the BOSS you will see your group size decrease. And even more amazing is this type of fine-tuned accuracy can be achieved with any quality load and any brand of factory ammunition.

Two BOSS Systems

The Browning BOSS has two configurations: The muzzle brake BOSS which can reduce recoil as much as 30% in some calibers. This is a valuable feature when shooting heavy magnum loads. Less recoil means quicker follow-up shots and more comfort in the field and on the range.

Also available is the BOSS-CR. The CR stands for conventional recoil and gives the shooter the option of shooting the BOSS system with standard recoil and muzzle blast. Both BOSS systems offer the same tunable accuracy and both are packaged with your new BOSS rifle.

Free Video

The BOSS is for real – it received Popular Mechanics' award for design and engineering. In an independent test by Popular Mechanics Magazine, the Browning A-Bolt with the BOSS beat all other competitors for accuracy.

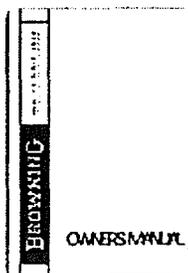

It was a great compliment when Jim Carmichel, shooting editor for Outdoor Life said, "the BOSS system is the kind of genius John Browning would have developed." It's been over 60

years since John Browning was creating designs that would change firearm technology forever. Browning is still doing that today.

For your copy of a free video about the BOSS owners manual and how it works call 1-800-333-3504.

WARNING:

The BOSS with muzzle brake provides substantial increased noise (muzzle blast). Always wear hearing protection to prevent hearing loss or damage.

Breve Historia

Con una calidad ampliamente reconocida en el mercado nacional e internacional desde 1961, TECNOS fabrica y comercializa cartuchos deportivos para escopeta calibre .22 y Fuego Central para el exigente mercado nacional e internacional, incluyendo los Estados Unidos de Norteamérica. Esta presencia mundial se ha ganado debido a que contamos con personal ampliamente calificado y equipo de la más avanzada tecnología. Un estricto control de calidad en nuestros productos, desde la selección y aprobación de nuestras materias primas hasta múltiples pruebas de velocidad, presión, agrupación y funcionamiento que se realizan en nuestro completo laboratorio balístico, nos permiten asegurar un producto de máxima confiabilidad. Los cartuchos aguila, son exportados a varios países en diversos continentes donde tienen una gran aceptación y demanda ya que cumplen estrictamente con los estándares internacionales de fabricación tales como SAAMI y CIP. Contamos con tres modernas y eficientes líneas de fabricación para cartuchos Cal. 22 Deportivo, salva e industrial, cartuchos para escopeta Cal. 12, 16, 20, 410 y 8 industrial y cartuchos de fuego central Cal. 25, .32 auto, .32 S&W, .38 auto, 9 mm., .38 super, .38 especial, .45 ACP, .40 S&W, .357 magnum, .30 carabina y la nueva línea IQ.

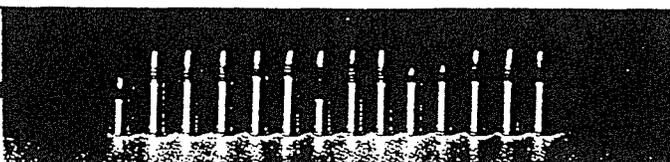

A brief History

With renowned quality in the national and international markets since 1961, TECNOS manufactures and markets sport shotshells, .22 rimfire, and centerfire ammunition for the demanding domestic and international markets, including the United States. This worldwide presence is due to our widely qualified personnel and the most technologically advanced equipment, plus a strict quality control of our products. The selection and approval of our raw materials and the various tests of velocity, pressure, accuracy and functionality, permit the production of a totally dependable product. All this is carried out in state of the art chemistry and ballistic laboratories. Aguila cartridges are exported to various countries, where they have great acceptance and demand due to their excellent international standards of manufacturing such as SAAMI and CIP. We currently operate three modern and efficient production lines for .22 rimfire cartridges (including blanks and industrial), shotshells, 12 ga., 16 ga., 20 ga., 410 and industrial 8 ga., and centerfire ammunition in calibers such as the new IQ line, 9mm Luger, .380 ACP, .38 Spl., and many others.

This new type of 1-3/4" 12 ga shotshell (1-1/2" OAL loaded) was developed as part of the innovation drive carried out by Industrias Tecnos SA de CV from Cuernavaca, Mexico, manufacturer of "AGUILA" ammunition. The original idea was to create a new shotshell with law enforcement and military applications in mind. The new cartridge would generate a milder recoil (less shoulder punishment and faster reacquisition of the target after the first shot is fired), would provide more firepower (being able to load 12-14 rounds in a 20" bbl shotgun) and would be ergonomically friendlier (being able to grab a big lot of shells with one hand and comfortably place them in the pocket). Due to its smaller size one police officer/soldier would be able to carry about 40% more rounds than regular shotshells. All this, while providing the necessary power for Police/Military work.

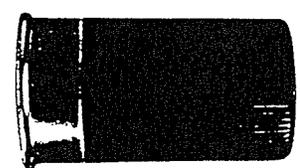

Early in our development work it was clear that this new round would hardly cycle semi-automatics while also having difficulties in feeding some pump action shotguns flawlessly. This lead us to consider the development of a weapons system which would include a new shotgun (more about this later) especially designed for the MINISHELL. In the meantime, after some testing we realized that the WINCHESTER™ 1300 series cycle MINISHELLS flawlessly (12 rds in an 18" bbl "Defender"); MOSSBERGS™ and REMINGTONS™ needed a minor modification in their elevators to produce similar results.

Minishells

- This new type of 1-3/4" 12 ga shotshell (1-1/2" OAL loaded) was developed as part of the innovation drive carried out by Industrias Tecnos SA de CV from Cuernavaca, Mexico, manufacturer of "AGUILA" ammunition. The original idea was to create a new shotshell with law enforcement and military applications in mind. The new cartridge would generate a milder recoil (less shoulder punishment and faster reacquisition of the target after the first shot is fired), would provide more firepower (being able to load 12-14 rounds in a 20" bbl shotgun) and would be ergonomically friendlier (being able to grab a big lot of shells with one hand and comfortably place them in the pocket). Due to its smaller size one police officer/soldier would be able to carry about 40% more rounds than regular shotshells. All this, while providing the necessary power for Police/Military work.
- Early in our development work it was clear that this new round would hardly cycle semi-automatics while also having difficulties in feeding some pump action shotguns flawlessly. This lead us to consider the development of a weapons system which would include a new shotgun (more about this later) especially designed for the MINISHELL. In the meantime, after some testing we realized that the WINCHESTER™ 1300 series cycle MINISHELLS flawlessly (12 rds in an 18" bbl "Defender"); MOSSBERGS™ and REMINGTONS™ needed a minor modification in their elevators to produce similar results.
- **All Types of MINISHELLS are loaded to SAAMI specs according to 12ga shotshells of regular size, namely 2-3/4" or 3" in length. This means that regular shells and MINISHELLS generate the same pressure in the chamber of 12ga shotguns. MINISHELLS should NEVER be used in signal/flare guns or any other firearm other than 12ga caliber SAAMI approved shotguns. Failure to comply with this may result in injury or death to the user or others.**
- While we were producing shooting prototypes and focusing in the law enforcement/military markets, information about this project was somehow leaked to the civilian market in Mexico which became intrigued by the new cartridge. Due to this, we decided to do some

merchandising by selling **MINISHELLS** in a 7-1/2 birdshot load; results turned to be quite encouraging. The reason was that the milder recoil encouraged female and young shooters to fire the same 12ga shotgun carried by their older more experienced shooter, who in turn found the lighter shot load (18 grams) a bigger challenge to shoot skeets than with regular loads.

- CENTURION ORDNANCE, INC., TECNOS' U.S. wholly owned subsidiary started importing and selling **MINISHELLS** in birdshot and slugs loads in the U.S. market. The reaction was similar to that in Mexico, plus CAS participants who found the tiny shotshell very convenient to reload. "Coach guns" with automatic ejector are normally not permitted; WINCHESTERS M1897 cycles them fairly well.
- The first prototypes of the MicroShotgun especially designed for **MINISHELLS** have been delivered and are being fire-tested. There will be two versions, one pump and the other will be semi automatic. This will be a very compact shotgun, especially due to the fact that the receiver will be shorter as well as the ejection port; cycling stroke (pump) will be shorter and the slide cycling time in the semi automatic will be faster.

Additional **MINISHELLS** loads will be offered to the civilian as well as the law enforcement/military markets.

Re: SB-23 "Detachable" Magazine Regulations

Dear Messrs. DeAlba & Rieger:

Many members of my associational clients have been inquiring about what qualifies as a "non-detachable" magazine. The DOJ regulations define a "detachable" magazine as "any ammunition feeding device that can be removed readily from a firearm with *neither* disassembly of the firearm action *nor* use of a tool being required." (Emphasis added).

It would seem in reading the regulation that, conversely, a "non-detachable" magazine would be any magazine that requires *either* disassembly of the firearm action *or* the use of a tool to remove the magazine being required. In other words, for a magazine to be non-detachable it is not necessary that *both* disassembly of the firearm action *and* use of a tool be necessary, only one or the other.

I'd appreciate it if you could clarify this. I look forward to hearing from you shortly.

Sincerely,
TRUTANICH • MICHEL, LLP

C. D. Michel

Re: SB 23 "Detachable" Magazine Regulations

Dear Mr. Michel:

Thank you for your letter of January 29, 2001, requesting clarification of the SB-23 "detachable" magazine regulations. The regulation states, in pertinent part, that a detachable magazine is "any ammunition feeding device that can be readily removed from a firearm with neither disassembly of the firearm action nor use of a tool being required."

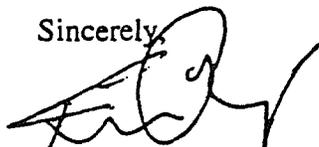

The Attorney General's office agrees that your interpretation is reasonable regarding the converse of the wording of the statute. A non-detachable magazine could mean a magazine that requires either disassembly of the firearm action or the use of a tool to remove the magazine, but not both disassembly and the use of a tool.

However, this office once again cautions that attempts to circumvent the law could lead to litigation of the kind seen in *People v. Dingman*. You and your clients presented the hypothetical of a 10-round magazine with a screw drilled through the receiver into the magazine as an example of a conversion which would require a tool for removal, thus exempting such a firearm from the definition of an assault weapon. A modification maneuver of this type is viewed with scepticism by this office and violates the spirit, if not the letter of the law within the meaning of Penal Code section 12276.1. The fifty-eight district attorneys within this state are likely to share such scepticism and proceed with a prosecution pursuant to Penal Code section 12280 in a case of this nature.

Re: 19th Annual END of TRAIL World Championship of Cowboy Action Shooting and Wild West Jubilee

Dear Mr. Davis:

The Department of Justice recognizes the sport and entertainment value associated with the 19th Annual END of TRAIL World Championship of Cowboy Action Shooting and Wild West Jubilee. This event to be held in Norco, California, April 26 - 30, 2000, will provide entertainment and sport for more than 15,000 individuals. We recognize the need of competitors to possess replicas of antique "cowboy" rifles for participation in your event. We have no objection to your regulated possession and use of such rifles as well as the possession of such rifles for the specific purpose of travel into and within our state for this year's event.

Additionally, our office will contact Riverside District Attorney Grover Trask along with Riverside County Sheriff Larry Smith and communicate our position of non-objection to the event and the rifles that are utilized by participants.

Finally, I appreciate your close working relationship with this office, wish you success, and will make Assistant Director Dale Ferranto and myself available to help address any issues surrounding the possession of antique or replicas of antique "cowboy" rifles during this year's event.

Sincerely,

A handwritten signature in black ink, appearing to read "Randy Rossi", written over a large, loopy flourish.

NEWS

LONG GUNS FOR END of TRAIL

Enjoy the 20th anniversary END of TRAIL festivities! Sign-ups are proceeding at a record pace. Don't be left out!

Last year a flawed piece of legislation outlawed our lever-action rifles capable of holding more than ten rounds, making it illegal to bring these guns into California. Everyone with whom we've spoken in the California Department of Justice and the California Legislature readily agreed our cowboy guns were not the intended subject of this legislation. Although technically illegal, the Department of Justice wrote a letter to SASS and communicated with the Riverside County (site of END of TRAIL) District Attorney's Office and Sheriff's Office assuring us the law would not be enforced, and making responsible officials available in the off-chance some over-zealous officer did proceed to enforce the legislation. The remedial legislation continues to take a circuitous route

to approval while the original law remains on the books. The Department of Justice has agreed to offer the same assurances again this year for END of TRAIL participants.

It's "OK" to bring your long guns to END of TRAIL! If this situation changes, and it's not expected to, SASS will notify all those potentially affected.

As for "out of states" attending other Cowboy Action Shooting™ matches in California, the state has no objections to bringing in your "large capacity" rifles. However, it is recommended you have someone in the local area contact their county District Attorney and Sheriff and confirm they have no intent of enforcing the regulations during the period corrective legislation is being sought. ♣

JUNIOR END of TRAIL COMPETITORS

As specified in the SASS Shooters Handbook, Juniors are competitors 12 through 16 years old. Young Adults are competitors 17 through 21 years of age. Young Adults is not a shooting category, it is simply a reduced match fee for young adults who will compete in the regular (adult) shooting categories. The END of TRAIL applications published in prior issues of The Cowboy Chronicle were in error. SASS apologizes for any inconvenience this may have caused. If you know your previously submitted application is in error, please contact the SASS Office to ensure the matter is settled to your satisfaction before arriving at END of TRAIL. The birthdays of older Juniors will be verified prior to on site distribution of Junior shooter's packets. ♣

BILL RUGER, SR. RETIRES

On October 24, 2000, Sturm, Ruger & Co., Inc. reported at the meeting of its Board of Directors that William B. Ruger announced his retirement as Chairman of the Board of Directors, Chief Executive Officer, and Treasurer effective immediately.

Ruger, who directed the growth of the Company from its incorporation in 1949, intends to remain on the Board of Directors as Chairman Emeritus and as a Director. He will serve as a consultant to the Company.

William B. Ruger, Jr. was elected to the position of Chairman of the Board of Directors and Chief Executive Officer. A graduate of Harvard College, he joined Sturm, Ruger in 1964.

Speaking of the management succession, founder William B. Ruger said, "I'm confident that this Company's original conception, and its current philosophy, will continue. It is that thread of the arms collector and user, of having insight into what the market asks of firearm designs, and being successful in giving our guns the attributes people like. To the extent this is maintained, our business can only succeed and become stronger as the years go by." ♣

PROOF OF SERVICE

STATE OF CALIFORNIA
COUNTY OF LOS ANGELES

I, Haydee Villegas, am employed in the City of San Pedro, Los Angeles County, California. I am over the age eighteen (18) years and am not a party to the within action. My business address is 407 North Harbor Boulevard, San Pedro, California 90731.

On August 2, 2002, I served the foregoing document(s) described as

FIRST AMENDED COMPLAINT FOR DECLARATORY AND INJUNCTIVE RELIEF FOR: (1) VIOLATION OF 42 U.S.C. § 1983; (2) DEPRIVATION OF LIBERTY AND PROPERTY WITHOUT DUE PROCESS OF LAW IN VIOLATION OF FEDERAL AND STATE CONSTITUTIONS; and (3) ILLEGAL AND UNNECESSARY EXPENDITURE OF STATE FUNDS (Cal. Code Civ. Proc., § 526a)

on the interested parties in this action by placing
 the original
 a true and correct copy
thereof enclosed in sealed envelope(s) addressed as follows:

Douglas J. Woods
Attorney General's Office
1300 "I" Street, Ste. 125
Sacramento, CA 94244-2550

X (BY MAIL) As follows: I am "readily familiar" with the firm's practice of collection and processing correspondence for mailing. Under the practice it would be deposited with the U.S. Postal Service on that same day with postage thereon fully prepaid at San Pedro, California, in the ordinary course of business. I am aware that on motion of the party served, service is presumed invalid if postal cancellation date is more than one day after date of deposit for mailing an affidavit.

Executed on August 2, 2002, at San Pedro, California.

(PERSONAL SERVICE) I caused such envelope to delivered by hand to the offices of the addressee.

Executed on August 2, 2002, at San Pedro, California.

X (STATE) I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

(FEDERAL) I declare that I am employed in the office of the member of the bar of this of this court at whose direction the service was made.

HAYDEE VILLEGAS
