Form 990, PART III

Statement of Program Service Accomplishments

The Natural Resources Defense Council (NRDC)'s purpose is to safeguard the Earth—its people, its plants and animals, and the natural systems on which all life depends. Our work is divided among seven broad program areas: Water and Coasts, Health and the Environment, Land and Forests, Air and Energy, Urban, International, and Nuclear. Working at the local, regional, national, and international levels, NRDC places special emphasis on public education, with the goal of keeping our more than 550,000 members—as well as the general public—up-to-date on environmental issues and developments. In addition, our legislative team targets all of these areas to keep environmental protection at the forefront of policy making.

Water and Coasts

Our oceans, coasts, lakes, streams, and wetlands all face multiple threats to their integrity. NRDC works on many fronts to protect, preserve, and restore our waters, and to safeguard the habitats and species they harbor.

In fiscal year 2002, NRDC's Water and Coasts Program:

- Sued to stop a major limestone mining project in the Everglades National Park, which would have caused massive damage to the Everglades ecosystem.
- Monitored the Everglades restoration effort to ensure that funds are not improperly diverted.
- Published in July 2001 *Cesspools of Shame: How Factory Farm Lagoons and Sprayfields Threaten Environmental and Public Health*, listing the track records of the largest polluters and recommending existing technology that is safer and more sustainable.
- Published in July 2001 *Clean Water, Clear Choice: Upcoming Bush Administration Decisions on Water Pollution*, outlining critical decisions faced by the Bush administration on several important water issues: arsenic and radon in drinking water, raw sewage in waterways, wetlands protection, and removal of PCBs from the Hudson River.
- Pushed the California Fish and Game Commission to designate a series of marine reserves—the equivalent of national parks in the ocean—in waters around California's Channel Islands, where fishing will be banned in a new 175-square-mile ocean wilderness.
- Sued the federal government for failing to protect beluga sturgeon, which hover on the brink of extinction.
- Filed and won a lawsuit in federal court against the National Marine Fisheries Service for its violation of laws requiring protection of Pacific groundfish. As a result, the agency will revise its fishery management plan to comply with the law.
- Crafted legislation to halt mountaintop removal mining, a new technique backed by the administration that poses grave dangers to America's land and waterways.
- Helped introduce legislation to protect all wetlands under the Clean Water Act.
- Opposed changes to national policy that would allow developers to fill and destroy wetlands.
- Published in July 2003 *Wetlands at Risk: Imperiled Treasures*, which looks at the potentially damaging consequences of a January 2001 Supreme Court decision regarding "isolated wetlands," and illustrates the vital role these areas play in ecosystems across the United States.
- Continued work to preserve the New Jersey Meadowlands—the Northeast's largest remaining wetlands—when the state's acting governor asked the developer to choose a new site for a proposed mall.
- Helped spur a December 2001 decision by EPA administrator Christine Todd Whitman to require General Electric to clean up the Hudson River, in spite of the company's best efforts to derail a cleanup plan the EPA had announced a year earlier.
- Published NRDC's 12th annual survey of water quality monitoring and advisory programs at U.S. beaches, which earned high-level coverage in the national and local press. This NRDC report has prompted major improvements in beachwater monitoring and notification in the past decade and has now begun to focus on sources of beach pollution.

20-1

STATEMENT # 2A

- Filed a lawsuit against the Navy for its deploying Low Frequency Active sonar over three-quarters of the world's oceans—with the judge finding that the Navy violated several federal laws in permitting this noise pollution
- Filed and won five lawsuits forcing livestock farms in the Chino Basin east of Los Angeles to clean up operations

Health and the Environment

Thousands of chemicals continue to pour into our environment—many of them known to cause serious harm to people and ecosystems. NRDC helps the public understand these threats, works for safeguards for children, who are particularly vulnerable, and presses for stronger, more protective laws.

In fiscal year 2002, NRDC's Health and the Environment Program

- Helped lead the fight to preserve a new, stricter standard limiting public exposure to arsenic in drinking water
- Exposed scientific evidence linking atrazine, the nation's most widely used agricultural pesticide, to deformities in frogs and to cancer in workers at a manufacturing plant—and used the information to press EPA to ban its use
- Argued our case against filed in the United States District Court for the District of Maine against Mallinckrodt Inc., for polluting the Penobscot River with mercury. In July 2002, the court ordered Mallinckrodt to fund an independent study of mercury contamination along 20 river miles downstream of the plant and in Penobscot Bay, and to perform remediation
- Brought to light, using information obtained through Freedom of Information Act requests, instances of industry influence on government decisions—including the possibility that the manufacturer of the herbicide atrazine had covered up evidence of the chemical's harmful effects
- Published a series of hard-hitting scientific articles on the problem of the chemical industry's extraordinary influence over the Environmental Protection Agency
- Protested industry influence on the scientific working groups of the International Agency for Research on Cancer, which earned NRDC an invitation to a meeting of the prestigious agency

Land and Forests

Parks and wild places face an array of threats. NRDC is working hard to keep these special places safe, on several fronts: pressing for permanent protection for millions of acres of wildlands, promoting better management of publicly owned lands, developing plans for protecting national parks, and reducing both damaging forestry practices and the consumption of wood.

In fiscal year 2002, NRDC's Land and Forests Program

- Rallied an enormous public outcry against plans to drill for oil in the Arctic National Wildlife Refuge and won a key victory when the Senate voted in April against a measure to open the refuge to drilling
- Won a lawsuit filed against the EPA for allowing timber companies to use Alaska coastal waters for dumping waste
- Safeguarded the landmark "roadless area" protections that save 58 million undeveloped acres in national forests from logging and road building
- Urged Forest Service to grant protected wilderness status to unspoiled stretches of Alaska's Tongass National Forest
- Mounted a campaign to persuade major commercial lumber users not to purchase Tongass products until the Forest Service takes protective action to safeguard the forest
- Played leadership role in trade negotiations to encourage forest conservation in both North and South America
- Pressed the British Columbia government in Canada to implement a hard-won agreement to protect the Great Bear Rainforest
- Sued the federal government for approving oil and gas drilling leases in Utah's redrock canyons
- Won a stay to halt seismic exploration near Arches National Park

- Stopped projects destructive to wilderness in Wyoming, Colorado, and New Mexico

Air and Energy

No environmental task is more critical than keeping the air clean, a project NRDC tackles in myriad ways. We focus special attention on the two biggest sources of air pollution—electric power plants and motor vehicles. We also recently launched our Climate Center, drawing on NRDC's decades of leadership in atmospheric issues to tackle challenges presented by global warming.

In fiscal year 2002, NRDC's Air and Energy Program:

- Publicly debunked industry and administration claims that oil independence can be gained by additional drilling on U.S. public lands such as the Arctic National Wildlife Refuge
- Put forth in January 2002 a common-sense plan for achieving energy security by reducing dependence on all oil, foreign and domestic in a report entitled, *Dangerous Addiction: Ending America's Oil Dependence*
- Won our court pursuit, under the Freedom of Information Act, of Bush administration records pertaining to the Cheney energy task force
- Gained widespread media attention of our analysis that industry lobbyists had great influence over the task force's deliberations and final recommendations
- Brought to light, using information obtained through Freedom of Information Act requests, other instances of industry influence on government decisions—including the ouster of a respected global warming scientist from the chairmanship of the Intergovernmental Panel on Climate Change, and the possibility that the manufacturer of the herbicide atrazine had covered up evidence of the chemical's harmful effects
- Published in October 2001 *Feeling the Heat in Florida: Global Warming on the Local Level*, about the early effects on climate manifested through retreating and eroding shorelines, dying coral reefs, saltwater intrusion into inland aquifers, upswings in forest fires, and warmer air and sea-surface temperatures
- Published in July 2001 *Clean Getaway: Toward Safe and Efficient Vehicles*, demonstrating how manufacturer innovations in nearly every market segment show that safe, efficient, clean designs are readily available and achievable
- Published in August 2001 *Energy Efficiency Leadership in a Crisis: How California is Winning*
- Played a key role in crafting and pushing forward a landmark bill requiring automakers for the first time to limit carbon dioxide and other global warming pollutants in new cars and light trucks sold in the state. The bill was ultimately passed by the California legislature's passage signed into law by Governor Gray Davis
- Pushed California to require that renewable sources of energy account for 20 percent of statewide electricity use—the most ambitious goal in the country
- Pressed ahead on work with our Climate Center, devoted solely to global warming issues, making important advances toward reducing global warming pollution from electric power plants and vehicles
- Helped craft federal legislation to regulate CO₂ and other major power plant emissions
- Defended the monumental 2000 diesel truck and buses rule we helped secure—which cut diesel truck and bus pollution as much as 95 percent—by pressing the EPA to uphold rules and rebuff legal challenges from engine manufacturers and industry groups
- Persuaded California's air board to tighten particulate standards and expand proposed diesel emissions regulations to include refrigerated containers at ports and railyards
- Forced the Defense Department, through a lawsuit, to agree in principle to complete new environmental impact analyses of its proposed missile defense testing activities in Alaska and the northeastern Pacific

Urban

The urban environment is a major focus of NRDC, and our goal is to make cities better, healthier places to live. For decades, we have tackled issues ranging from garbage to air and water pollution to the loss of

STATEMENT #2A

open space Our efforts in New York, Washington, D C , Los Angeles, and San Francisco have helped make these and other cities cleaner, greener, and more livable

In fiscal year 2002, NRDC's Urban Program

- Defended a southern California rule requiring public agencies to buy only "low-emission" cars and light- and medium-duty trucks, all cities and transit agencies to buy only cleaner, alternative-fuel buses, and all public entities and their contractors to buy alternative-fuel garbage trucks
- Helped stop an illegal expansion of the Port of Los Angeles
- Won two legal victories that will benefit Orange County by preserving more than a half million acres of coastal habitat and improving water quality through dairy farm waste controls
- Helped convince California governor Davis to acquire for state parkland two of the largest parcels of vacant land in historic downtown Los Angeles—the Chinatown Cornfield and Taylor Yard properties, which were threatened by development that an NRDC lawsuit halted.
- Helped convince Washington, D C , to buy 100 compressed natural gas buses and to build a natural gas fueling station
- Helped substitute a greenbelt for a proposed heavily polluting industrial complex in downtown Los Angeles, which would have threatened the health of local residents
- Published in November 2001 *Solving Sprawl Models of Smart Growth in Communities Across America*, presenting case studies throughout America of development that fights sprawl
- Published in February 2002 *The Environmental Impacts of the World Trade Center Attacks A Preliminary Assessment*, a report outlining the facts, the environmental impacts, and the government response to environmental emergency—and offers recommendations for improving New York's readiness for future environmental health emergencies
- Pressed the New York City Council to oppose Mayor Bloomberg's proposal to cut recycling program to paper only—suspending recycling of glass, plastic, and metal, metal component was saved, and we won a commitment to restore plastic and glass in 2003 and 2004 respectively
- Won a new farmland protection and helped pass a national brownfields law that will preserve open space and revitalize cities
- Launched an education program to demonstrate that green building can cut wood use and energy use
- We worked to set national standards for commercial and residential construction and have those incorporated into redevelopment plans for Lower Manhattan.

International

Environmental problems do not recognize national borders NRDC's efforts, too, cross these borders, embracing threatened ecosystems in many areas around the globe

In fiscal year 2002, NRDC's International Program.

- With environmentalists in Belize, filed that country's first-ever environmental lawsuit challenging the government's approval of the Chalillo dam, which threatens to flood and destroy Belize's Macal River Valley, one of Central America's wildest places Construction was halted, and the court required public hearings on the proposed dam.
- Fought the Canadian softwood lumber import subsidy
- Helped defeated a destructive oil drilling project off Costa Rica's Talamanca Coast.
- Broke ground with environmentalists and builders in China on China's first major green office building, the Chinese Ministry of Science and Technology in Beijing
- Helped the Chinese Ministry of Science and Technology implement an \$80 million program to advance fuel cell vehicles
- Secured commitment that construction for the 2008 Olympics in Beijing will meet green building standards

STATEMENT #2A

Nuclear

Since NRDC was founded, we have worked to rid the Earth of the threats posed by nuclear weapons, in the process establishing crucial precedents in applying environmental laws to U S nuclear and national security programs

In fiscal year 2002, NRDC's Nuclear Program

- Represented community and local environmental groups in challenging an inadequate rule, proposed by the Environmental Protection Agency, for protecting groundwater from contamination by the nuclear waste repository at Yucca Mountain, Nevada
- Challenged in court the Department of Energy's reclassification of high-level radioactive waste storage tanks as "incidental waste " A federal district court judge denied the Department of Energy's motion to dismiss
- Informed the public about continuing nuclear threats

Legislative

NRDC's legislative team works to protect and expand our country's bedrock environmental laws. It ensures that existing laws are followed and presses for new protections to meet the many threats that continue to plague our air, water, land, and health

In fiscal year 2002, NRDC's Legislative Program.

- Focused much attention on the flawed energy bill as it moved its way through the House and Senate
- Developed a powerful bipartisan coalition that put energy efficiency improvements and renewable energy standards onto the national legislative agenda
- Collaborated with dozens of other organizations to oppose environmental rollbacks orchestrated by the Bush administration, helping to convince the media to bring the environment to the forefront.
- Drew public attention to the need to for increased vigilance on environmental matters
- Provided a steady stream of objective and reliable information to legislators as the California energy crisis exacerbated
- Helped expose sneak attacks on national monuments, wetlands and global warming controls, among others that were buried in spending bills
- In California, helped push through the state legislature eight major bills that will serve as model for other states—on clean cars, renewable energy, and smart growth, among other issues
- Published in February 2002 *Environment in the Crosshairs: Assessing Federal Legislation in 2001*, tracking environmental legislation throughout 2002
- Published in July 2001 *Hostile Environment: How Activist Federal Judges Threaten Our Air, Water, and Land*, tracking several federal judges who have placed their own political agenda above the clear mandates of our environmental laws

Communications and Public Education

NRDC works hard to harness the power of our growing membership—and of all concerned citizens—in the fight to protect the environment and public health. Educating and empowering the public are vital parts of our mission, and toward those ends we have made increasing use of a powerful tool: the Internet.

Among our accomplishments on these fronts in the fiscal year 2002, we

- Took the year's most important environmental stories to newsrooms around the country—particularly NRDC's expose of the Cheney Energy plan, which produced editorials in major U S dailies
- Continued the BioGems website, devoted to protecting critical endangered areas throughout the Americas, with spectacular results

- Surpassed the one million mark of messages sent to decision-makers by January 2002 by BioGems Defenders
- Grew our roster of online activists to nearly 500,000
- Worked to protect Utah's Redrock Wilderness with NRDC's BioGems Defenders, who sent tens of thousand of messages to Congress urging permanent protections
- Teamed with NRDC's BioGems Defenders to oppose harmful drilling projects in Wyoming's Powder River Basin, Colorado's Roan Plateau, and the San Juan Basin of New Mexico and Colorado
- Helped bring about pressure from Costa Ricans and more than 27,000 letters from BioGems Defenders that resulted in the Costa Rican government rejecting a plan by two U S oil companies to drill for oil off the country's Caribbean coast.
- Ran strategically placed television and newspaper ads highlighting critical environmental battles such as those surrounding Arctic drilling and administration efforts to rewrite environmental laws and regulations
