capacity as Attorney General of the State  
of California; and DOES 1-10,

Defendants.

Case No: 17-cv-1017-BEN-JLB

**DECLARATION OF ANNA M.  
BARVIR IN SUPPORT OF  
PLAINTIFFS' MOTION FOR  
PRELIMINARY INJUNCTION;  
EXHIBITS E-LLL**

Date: June 13, 2017  
Time: 10:00 a.m.  
Dept: 5A  
Judge: Hon. Roger T. Benitez

**DECLARATION OF ANNA M. BARVIR**

1. I am an attorney at the law firm Michel & Associates, P.C., attorneys of record for Plaintiffs in this action. I am licensed to practice law before the United States District Court for the Southern District of California. I am also admitted to practice before the Eastern, Central, and Northern Districts of California, the courts of the state of California, the Supreme Court of the United States, and the D.C., Fourth, Ninth, and Tenth Circuit Courts of Appeals. I have personal knowledge of the facts set forth herein and, if called and sworn as a witness, could and would testify competently thereto.

2. On May 25, 2017, I contacted counsel for Defendant Attorney General Xavier Becerra, Mr. Anthony O'Brien, via email to meet and confer regarding Plaintiffs' intention to file a motion for preliminary injunction, requesting the court enjoin enforcement of California Penal Code section 32310(c)-(d), pending resolution of this case on the merits. Mr. O'Brien stated that his client would oppose Plaintiffs' motion. Plaintiffs are unable, however, to forego seeking preliminary relief while this case progresses, for they imminently face the violation of their fundamental, constitutional rights under the Second, Fifth, and Fourteenth Amendments and seeking preliminary relief from this Court is necessary.

3. On May 25, 2017, after providing notice to counsel for Defendant Becerra, Plaintiffs filed an ex parte application for order shortening time to hear Plaintiffs' Motion for Preliminary Injunction. The Court has not yet ruled on that application, and counsel for Defendant Becerra has indicated that he would oppose it.

6. On May 25, 2017, I visited the website [www.youtube.com](http://www.youtube.com) as well as websites for various firearm manufacturers and viewed videos embedded on those websites. ## DAN WESSON MAYHEM

Caliber: .40 S&W, 18-shot magazine capacity. **Barrel:** 6". **Weight:** 2.42 lbs. **Length:** 8.75" overall.

**Features:** The MAYHEM is based on an "All Steel" Hi-capacity version of the 1911 frame. It comes ready to dominate Limited IPSC/USPSA division or fulfill the needs of anyone looking for a superbly accurate target grade 1911. Taking weight away from where you don't want it and adding it to where you do want it was the first priority in designing this handgun. The 6" bull barrel and the tactical rail add to the static weight "good weight". We wanted a 6" long slide for the added sight radius and the enhanced pointability, but that would add to the "bad weight" so the 6" slide has been lightened to equal the weight of a 5". The result is a 6" long slide that balances and feels like a 5" but shoots like a 6". The combination of the all steel frame with industry leading parts delivers the most well balanced, softest shooting 6" limited gun on the market.

The Snake Scale serrations' aggressive 25 lpi checkering, and the custom competition G-10 grips ensure controllability even in the harshest of conditions. The combination of the all steel frame, bull barrel, and tactical rail enhance the balance and durability of the most formidable target grade Combat handgun on the market.

Many after-market rear sights will fit the BFR. Front sights are machined by Magnum in four heights and anodized flat black. The four heights accommodate all shooting styles, barrel lengths and calibers. All sights are interchangeable with each BFR's. **Features:** Crafted in the U.S.A., the BFR single action 5-shot stainless steel revolver frames are CNC machined inside and out from a "pre-heat treated" investment casting. This is done to prevent warping and dimensional changes or shifting that occurs during the heat treat process. The result is a dimensionally perfect-machined frame. Magnum Research designed the frame with large calibers and large recoil in mind, built to close tolerances to handle the pressure of true big-bore calibers. The BFR is equipped with Transfer Bar. This is a safety feature that allows the gun to be carried safely with all five chambers loaded. The transfer bar allows the revolver to fire ONLY after the hammer has been fully cocked and trigger pulled. If the revolver is dropped or the hammer slips while in the process of cocking it the gun will not accidentally discharge.
