PLEASE TAKE NOTICE that Plaintiffs Virginia Duncan, Richard Lewis, Patrick Lovette, David Marguglio, Christopher Waddell, and California Rifle & Pistol Association, Inc., through their undersigned counsel, object to the following evidence presented by Defendant Xavier Becerra in support of his Opposition to Plaintiffs' Motion for Preliminary Injunction, set for hearing before this Court at 10:00 a.m. on June 13, 2017.

- 1. Declaration of John J. Donohue, III, 4:19-21 (Paragraph 15; conclusion that "every survey of gun ownership conducted over time . . . shows that the percentage of household [sic] with guns today is lower than it was two decades ago."). The Court may exclude testimony if there is too great a gap between the data and the opinion proffered. *Gen. Elec. Co. v. Joiner*, 522 U.S. 136, 146-47 (1997); Fed. R. Evid. 702-703. The declarant does not identify the data upon which he bases the conclusion that every gun survey shows decline in ownership by household. Nothing in the prior statements by the declarant lays a foundation for reaching the conclusion, as the declarant identified only three past surveys of gun ownership he relied upon. In fact, the cited-to report attached as Exhibit "B" to the declaration states that "the percentage of individuals owning firearms has remained relatively constant over the past several decades (GSS 2010)." Declaration of John J. Donohue, III ("Donohue Decl."), Ex. B, at 6.
- 2. Declaration of John J. Donohue, III, 6:1-8 (Paragraph 20; assumption regarding the demographic trends on ownership of magazines over ten rounds). Fed. R. Evid. 702-703; Glen Elec. Co., 522 U.S. at 146; Daubert v. Merrell Dow Pharm., Inc., 43 F.3d 1311, 1321-22 (9th Cir. 1995). An expert's lack of certainty may lead to exclusion of evidence on the basis that the testimony is unreliable or unhelpful. Daubert, 43 F.3d at 1321-22. The declarant admits in the preceding paragraph that he has no basis for making the conclusions he reaches in paragraph 20: "I am not aware of any current social science research providing for an estimate for the number of American households that own large-capacity magazines . . . or for the number of LCMs in private hands in America." Donohue Decl., at 5:17-21. Despite this lack of knowledge or data, the declarant

admittedly speculates ("It is reasonable to assume . . . .") about the demographic trends regarding owners of magazines with a capacity greater than ten rounds.

The declarant also attempts to base his conclusion on a January 2013 New York Times/CBS News poll. *See Glen. Elec. Co.*, 522 U.S. at 146; Fed. R. Evid. 702-703. Little information is given about the poll except that it queried adults on whether they favored a ban on "high-capacity magazines." The declarant offers no basis as to why a poll on preferences on the legality of "high-capacity magazines" is reliable indicia of ownership of magazines with a capacity greater than ten rounds. Nothing in the declarant's statements suggests that use of such a poll regarding respondents' preferences on firearms laws is an accepted method within the declarant's field for determining firearms or magazine ownership rates. And the declarant offers no information that he is aware of the types of questions posed in the survey he relied upon, and whether such questions show indicia of being the same or similar to the issues raised in this lawsuit's challenge (e.g., whether the term "high-capacity magazine" was represented to poll respondents in eliciting the responses as magazines greater than ten rounds, or thirty rounds, or fifty rounds).

3. Declaration of John J. Donohue, III, 6:9-7:8 (Paragraph 21; "A review of the resolution of mass shootings in the U.S. suggests that bans on large capacity magazines can help save lives by forcing mass shooters to pause and reload ammunition. Citizens have frequently taken advantage of a perpetrator stopping to reload his weapon to tackle him or otherwise subdue him in at least 20 separate shootings in the United States since 1991 . . ."). Fed. R. Evid. 402, 702-703; *Glen Elec. Co.*, 522 U.S. at 146. The declarant provides no data or other citation for his claim that "shootings" were halted on 20 separate occasions while a perpetrator was reloading a magazine. First, the declarant does not confirm that the 20 "shootings" were mass shootings. Second, he does not indicate if he performed the "review" or if it was the work of some currently anonymous source. Third, it is impossible to determine if the review is, or includes the type of data, reasonably relied on by experts in the relevant field. *See* Fed. R. Evid. 703. If the 20

shootings referred to are not mass shootings, the declarant's statement is irrelevant to the instant discussion and should be ignored by the Court. *See* Fed. R. Evid. 402. There is reason to suspect at least some of those shootings are not relevant to the discussion of mass shootings because declarant refers to a shooting where no one was shot (the incident of October 29, 1994, outside the White House). Donohue, Decl., at 6:15.

Further, though declarant's other three references are to mass shootings, the declarant provides no actual data or information as to why those instances support the conclusion that a ban on magazines with a capacity greater than ten rounds would have a statistically significant effect in reducing the number of casualties in mass shootings. For the sources declarant uses are based on hearsay accounts that a pause in reloading a magazine allowed the perpetrator to be subdued or for victims to escape. And declarant provides no context about what percentage of mass shootings the four shootings relied upon by the declarant represent as a total of mass shootings over a sampled period. The Court may exclude the testimony if there is too great a gap between the data and the opinion proffered. *Gen. Elec. Co.*, 522 U.S. at 146. Also, because the testimony is not founded on any media reports or facts or data that show there have been 20 mass shootings that ended because of a shooter having to change magazines, there is no data for the expert to reasonably rely on in making his opinion, which means that opinion is further inadmissible pursuant to Federal Rules of Evidence, rules 702 and 703.

4. Declaration of John J. Donohue, III, 9:11-12:4 (Paragraphs 28-36; legal arguments). Fed. R. Evid. 403, 701-703; *Daubert*, 509 U.S. at 590-93; *Daubert*, 43 F.3d at 1321-22; *Dukes*, 222 F.R.D. 189, 196-97 (N.D. Cal. 2004). An expert witness cannot give an opinion on his legal conclusion, i.e., an opinion on an ultimate issue of law." Fed. R. Evid. 403, 702; *United States v. Boulware*, 558 F.3d 971, 975 (9th Cir. 2009). Declarant reframes and analyzes Plaintiffs' evidence which simultaneously unfairly prejudices Plaintiffs, confuses the issues, misleads the trier of fact, and results in inadmissible legal conclusions.

Declarant unduly prejudices and misleads the trier of fact by incorrectly identifying

Plaintiffs as "the NRA." Donohue, Decl., at 9:12, 9:16, 11:3-4, 11:13-14.

Declarant unduly prejudices, confuses the issues, and misleads the trier of fact with hyperbole, stating "while the old lady or disabled person quaking with the blasting gun in her shaking hands will protect herself and her loved ones if she can only get off 30 plus shots without re-loading." Donohue, Decl., at 9:18-20. California bans magazines capable of holding more than 10 rounds—not more than 30 rounds. And Plaintiffs did not argue that self-defense against an attack is not possible without "get[ting] off 30 plus shots without re-loading."

Declarant unduly prejudices, confuses the issues, misleads the trier of fact, and makes a legal conclusion when declarant states: "First, the notion that safety will be enhanced if someone with quaking hands that prevent them from hitting their target in the first ten shots is able to spray additional bullets is ludicrous." Donohue, Decl., at 10:1-3. Plaintiffs' expert declared that the stress of an attack affects the fine motor skills of a victim, preventing the victim from efficiently changing a magazine during the attack. Declarant misleads the Court by suggesting Plaintiffs' expert was referring to the impact on gross motor skills needed to hold, point, and shoot a firearm against an attacker or multiple attackers. Further, Declarant does not identify any data upon which he bases his opinion.

Declarant does not identify any data upon which he bases his opinion that "the notion that safety will be enhanced if someone with quaking hands that prevent them from hitting their target in the first ten shots is able to spray additional bullets is ludicrous." Donohue, Decl., at 10:1-3.

Declarant unduly prejudices, confuses the issues, misleads the trier of fact, when he declares, without identifying any data upon which he bases his statement, that "[b]ullets from modern guns with large-capacity magazines can easily penetrate walls, which means that poorly directed shooting will pose a significant threat to other family members and neighbors." Donohue, Decl., at 10:3-5.

Declarant unduly prejudices, confuses the issues, and misleads the trier of fact by

stating that the "vast majority" of victims of violent crime "do not use a gun for self-defense." Donohue Decl., 10:6-7. The statistics regarding attacks *without* firearms is irrelevant to the instant discussion and should be ignored by the Court. Declarant refers to data from the National Crime Victimization Survey over the period from 2007-2011, but does not provide information as to how such data was collected, what biases the collector may have had in culling the information that was used, or other indicia of methodology or reliability. *See Dukes*, 222 F.R.D. at 196-97.

Declarant unduly prejudices, confuses the issues, and misleads the trier of fact by implying that a magazine over ten rounds cannot be "used" by an individual for self-defense. Donohue Decl., at 9:11-10:10 (purposefully using verbs: "blast," "spray," or "get off" instead of the verb "used").

Declarant also injects legal conclusions by making statements such as:

- "These unsupported assertions are either irrelevant or have no empirical assert." Donohue Decl., at 9:20-21.
- "The LCM ban is designed to address one particularly societally damaging problem—that of mass shootings." Donohue Decl., at 7-8.
- "[A]nd therefore they are an appropriate target of government concern and regulation."
- "This implies that the LCM ban is well-tailored to limit the behavior of criminals." Donohue Decl., at 12:1-2.

Declarant does not identify any data upon which he bases his opinion that "[b]ullets from modern guns with large-capacity magazines can easily penetrate walls, which means that poorly directed shooting will pose a significant threat to other family members and neighbors." Donohue, Decl., at 10:3-5.

Declarant does not identify any data upon which he bases his opinion that "it is irrelevant if most times that criminals use guns, they don't fire their guns more than ten times. The LCM ban is designed to address one particularly societally damaging problem—that of mass shootings. By definition, these incidents will involve firing of

26

27 28 regulation," Donohue Decl., at 10:8-10.

many bullets, and therefore they are an appropriate target of government concern and

Finally, as Defendants' Opposition has a separate caption page and the signature block is on page 26 of the Opposition, it seems these paragraphs of the Declaration are a knowing attempt to gain an "extra" few pages of briefing, i.e., an impermissible gambit intended to circumvent the relevant page limit. See CivLR 7.1(h).

Declaration of Lucy P. Allen, 3:12-5:21 (Paragraphs 7-11 and **5.** accompanying tables). Fed. R. Evid. 702-703; Gen. Gelec. Co., 522 U.S. at 146; Daubert, 43 F.3d at 1321-22; Claar v. Burlington N. R. Co., 29 F.3d 499, 502 (9th Cir. 1994); Dukes v. Wal-Mart, Inc., 222 F.R.D. 189, 196-97 (N.D. Cal. 2004). The declarant bases her opinions in these paragraphs, which refer to the average number of shots fired in defensive gun use scenarios, by using entirely anecdotal evidence drawn from a regular National Rifle Association magazine feature about defensive gun uses. The declarant provides no information as to how such data were collected by the NRA for its magazine feature, what biases the magazine's editors might have had in culling the information that was used in the feature, or other indicia of methodology or reliability. See Dukes, 222 F.R.D. at 196-97.

The lack of reliability in basing statistical conclusions on a self-selected group of self-reporting magazine readers, in which the declarant had no involvement or knowledge of what self-selection biases occurred, is patent. The declarant also provides no evidence that any credible member of the declarant's field would rely upon self-reported anecdotal data generated by a third party to form statistical conclusions. As set forth by Plaintiffs' expert supplemental Kleck's supplemental declaration, declarant's reliance on such unknown, anecdotal data generated by a third party, with no knowledge of the methodology or indicia of reliability of the information, is not an accepted practice within the field of statistical analysis, and violates basic, cardinal rules of statistical sampling and analysis. Kleck Suppl. Decl. ¶¶ 9-10.

In using anecdotal evidence gleaned from a third-party's magazine feature to make

statistical conclusions regarding defensive gun uses—in addition to the many biases and indicia of unreliability in such information—the declarant also does not discuss or account for alternative explanations for the data in reaching her conclusions. *See Claar*, 29 F.3d at 502. The declarant neither mentions nor assesses an alternative explanation for the data such as that the magazine editors themselves culled reported submissions on defensive gun uses based on editorial or space limitations.

Again, whether any of these or other alternative explanations is true or not, is unclear, but there is no indication that the declarant took any action to obtain knowledge of how the data was compiled and what limitations were present. Her conclusions are unreliable and violate basic rules of statistical sampling.

- 6. Declaration of Lucy P. Allen, in its entirety. Fed. R. Evid. 701, 702; Daubert v. Merrell Dow Pharm., Inc., 509 U.S. 579, 590-93 (1993); Dukes, 222 F.R.D. 189, 196-97 (N.D. Cal. 2004). Because the declarant engaged in a fundamentally-flawed statistical analysis of third-party anecdotal evidence, and proffered unqualified conclusions based upon such an unacceptable methodology, the Court should exercise its discretion to disregard the entirety of the declaration.
- 7. **Declaration of Daniel W. Webster, in its entirety.** Fed. R. Evid. 402, 701, 702; *Daubert*, 509 U.S. at 590-93; *Daubert*, 43 F.3d at 1321-22; *Dukes*, 222 F.R.D. 189, 196-97 (N.D. Cal. 2004). An expert's lack of certainty may lead to exclusion of evidence on the basis that the testimony is unreliable or unhelpful. Daubert, 43 F.3d at 1321-22. The Court may also exclude the testimony if there is too great a gap between the data and the opinion proffered. *Gen. Elec. Co.*, 522 U.S. at 146. Insofar as the declarant relied on the research and opinions of Dr. Christopher Koper—opinions which Dr. Koper has admitted lack sufficient support—the declarant misleads the trier of fact by only making speculative statements or making statements based on reports that are based on speculation. *See* Barvir Decl., Exhibit NNN at 12, 30-34.

Plaintiffs will respectfully request the Court to sustain the above objections at the hearing on the motion and to strike the evidence referred to above. To the extent that the

Court concludes any of the disputed evidence is admissible or preliminarily admissible, Plaintiffs request that, based on the discussion above, each and every disputed evidentiary item be given little or no weight in the Court's deliberations vis-à-vis the pending motion. See Dr. Suess Enters., L.P. v. Penguin Books USA, Inc., 924 F. Supp 1559, 1562 (S.D. Cal. 1996), aff'd, 109 F.3d 1394 (9th Cir. 1997) (holding that a court hearing a preliminary injunction motion has discretion to weigh evidence that may not meet the standards for admissibility at trial). 57 more new permits. You would have to get one that's 1 2 already existing somehow. 3 0 So I could -- I could purchase one from 4 somebody whose already owned? 5 Α Correct. If -- if you went through all the 6 proper procedures and background checks. 7 All right. But I couldn't do that with respect to a semi-automatic long gun that's banned in 8 Maryland? 9 10 Α You would -- you could keep the one that you have right now, but you wouldn't be able to 11 12 transfer it, no. 13 0 But I could if I jumped through the 14 right hoops get myself a machine gun; correct? 15 Α Well, you know, Maryland legislatures and the federal -- federal legislatures have different 16 17 considerations, different ways they chose to approach 18 the issue. 19 Q Right. And so the federal government never 20 actually banned machine guns? 21 Α In a strict sense, that's perhaps true, but

58 1 they very heavily regulate them and restrict them. 2 Understood. We wouldn't want them falling 3 into criminal hands, would we? 4 Α No. 5 Are you an expert in ballistics? 0 6 Α I have some general knowledge. I -- I 7 should hesitate to call myself an expert, per se. Q All right. And while you're an expert in 8 9 firearms policy, are you an expert in firearms? 10 Α How do you mean? 11 0 Technical aspects of firearms, for instance. 12 13 I have a limited basic working knowledge. 14 Of course in doing the assault weapons work, I had to 15 learn a lot about different makes and models and their I'm not the sort of person who could take 16 features. 17 apart a firearm for you and put it back together. 18 Q You are not? 19 Α No. 20 Do you own any firearms? Q 21 Α No.

		59
1	Q	Have you ever owned any firearms?
2	A	No.
3	Q	Have you fired firearms?
4	A	Yes.
5	Q	When did you do that?
6	А	In the I was in a police lab and I fired
7	some firea	rms before.
8	Q	And when was that?
9	A	Several years back.
10	Q	And where was that?
11	A	I remember firing some guns in a lab in
12	Kansas Cit	y. I'm not sure if I've been any place else,
13	but I remen	mber that one.
14	Q	All right. And what firearms did you fire
15	at the pol	ice lab in Kansas City?
16	A	Some different handguns.
17	Q	And do you recall what makes and models you
18	fired?	
19	A	Not clearly, no.
20	Q	Do you recall if you fired revolvers?
21	A	Yeah, there was one revolver and at least

82 MR. SWEENEY: All right. Let's pull out 1 2 the 2004 article. Let's mark this as the next exhibit. 3 I think we're finally at five. (Koper Exhibit 5 was marked for 4 5 identification.) (Off the record.) 6 7 BY MR. SWEENEY: Let's go back on the record. 8 Q 9 On page 81 of your 2004 report that we've 10 marked as Koper Exhibit 5, you state your conclusions with respect to the effect of the assault weapon and 11 12 large capacity magazine federal ban; correct? 13 Α Are you referring to the first full 14 paragraph? 15 0 Yes, I am. 16 Α That's a partial statement of it, yes. 17 All right. And you state there quote, 18 "Because offenders can substitute non-banned guns and small magazines for banned AWs and LCMs, " meaning 19 20 assault weapons and large capacity magazines? 21 Α Correct.

"There is not a clear rationale for 1 0 expecting the ban to reduce assaults and robberies with 2 3 Am I reading that correctly? Α 4 Yes. And that correctly and accurately state 5 0 6 your conclusion with respect to the impact on firearm-related crime of the federal ban on assault 7 weapons and large capacity magazines; correct? 8 9 Α That's a partial statement of it. 10 All right. But -- but accurate in and of Q itself? 11 12 Α Yes. 13 Q Okay. And when you say you would not 14 expect the assault weapon or large capacity magazine 15 ban to reduce assaults with guns, that would include assaults leading to homicides; correct? 16 17 Α Not exactly. What I'm saying here is I 18 don't expect the overall level of assaultive violence with guns to change whether or not these guns and 19 20 magazines are available, but what I am hypothesizing is 21 that changes in the use of these guns and magazines

83

84 could affect the share of attacks that involve -- that 1 2 result in injuries or deaths. 3 0 But -- but they -- you would not expect a ban on assault weapons or large capacity magazines to 4 5 actually reduce the number of firearm-related assaults or robberies; correct? 6 7 Α Correct. And you would not expect a ban on assault 8 0 9 weapons or large capacity magazines to reduce 10 firearm-related home invasions; correct? 11 Α No. Correct, I mean. 12 0 And you wouldn't expect a ban on assault weapons or large capacity magazines to reduce the 13 14 number of firearms assaults on police officers; 15 correct? That's fair enough. 16 Α Correct. 17 On note 95 on that page, you address I 18 believe state bans on assault weapons in which you say, "A few studies suggest that state-level assault weapon 19 20 bans have not reduced crime." Am I reading that 21 correct?

85 1 Α Yes. 2 And is that still your view today? 0 3 Α I've not seen any further studies of this 4 yet, but yes, I mean, essentially that's the 5 conclusion. 6 All right. 7 With the qualifiers that are stated in the rest of the footnote. 8 9 Q Let's mark this as Exhibit 6, please. 10 me show you what I've marked as Exhibit 6, which is an 11 article authored by Mark Gius, G-I-U-S, on an 12 examination of the effects of concealed weapon laws and 13 assault weapons bans on state-level murder rates. 14 (Koper Exhibit 6 was marked for 15 identification.) 16 Α Okay. 17 And I first ask you are you familiar with 18 this article? 19 I've not read this. Α No. 20 And has anyone mentioned this to you? Q Defense counsel did mention the existence 21 Α

86 1 of this. 2 All right. And this appeared in Applied 3 Economics Letters; right? 4 Α Okay. And is that a peer reviewed journal, to 5 0 6 your knowledge? 7 Α I don't know. All right. And, you know, do you make it 8 0 9 your business to keep up with the literature on the 10 impact of firearms bans? 11 I try to. How extensively I'm engaged in 12 that research might ebb and flow a little bit depending 13 on what exactly I'm working on at that time, so I see 14 this article, for example, just came out in last 15 November so that's quick to keep up with. All right. And my reading of this, and I 16 0 17 appreciate if you just put it in front of you, is that 18 it concludes using data for the period I believe 1980 to 2009 that state-level assault weapons bans did not 19 20 reduce state-level murder rates. And that would be 21 consistent with the prior studies in your footnote 95

matters as much or more than statistical significance.

Q All right. And above that -- no, nevermind. Scratch that.

Turning back to your 2004 study, did you have anything in here on the impact on homicide rates of the federal assault weapons and large capacity magazine ban?

We did a few things here that were a bit Α As I said, the analysis of the key initial intermediate outcome measures showed mixed results. So we saw that there was a reduction in the use of assault weapons, but not clearly a reduction yet in the use of guns with large capacity magazines. So any further analysis of impacts on measures like of injuries and deaths was going to be ambiguous and somewhat problematic, but nonetheless I did put together a few basic trend lines for descriptive purposes looking at some measures that I thought might potentially be affected by ups and downs in the use of assault weapons and large capacity magazines. So I was looking at a few different things like the percentage of violent gun

94 crimes resulting in death. I think the percentage of 1 qunshot victimizations resulting in death. 2 3 summarized in chapter nine of this report some of the 4 other findings that we had had in the '97 report when 5 we had looked at some different similar types of 6 outcome measures. 7 On page 96 of your 2004 report marked as 0 Exhibit 5, that's your summary of your conclusions; 8 9 correct? 10 Α Yes. 11 And in the third sentence you state, "There 12 has been no discernable reduction in the lethality and 13 injuriousness of gun violence, " is that correct? 14 Α Yes. 15 And is that still your view today based upon your study and analysis of the impact of the 16 17 federal ban on assault weapons and large capacity 18 magazines? 19 Α Yes. Based on the data that I analyzed, it's still my view of it. Again, subject to the 20 21 qualifications that I noted earlier.

Q All right. And are you aware of anyone else's data with respect to studying the impact of the federal ban on assault weapons and large capacity magazines that reached a conclusion different from the conclusion that you state here?

A No.

Q Would you agree with me that the government interest to be served by the federal assault weapon ban and large capacity magazine ban was the reduction of firearm-related violence; correct?

A You could view it that way or you could view it more specifically as trying to get a reduction in shootings in incidents with high numbers of shots fired. And so, you know, again, I tended to view -- judge this more specifically in terms of effects on gun injuries and gun deaths. As I noted in the report, given the trends in use of assault weapons and large capacity magazines that had been observed to that point, I felt it was actually premature to make any definitive conclusions about the ban's effects on gun deaths and injuries. I felt that the effects of the

96 ban were still unfolding at that time and might still 1 2 take a while to fully unfold. 3 0 Isn't it true that as you sit here today, you cannot conclude with a reasonable degree of 4 5 scientific probability that the federal ban on assault weapons and large capacity magazines reduced crimes 6 7 related to guns? Α 8 Correct. 9 0 And it didn't reduce the number of deaths 10 or injuries caused by guns either; correct? 11 Α Correct. 12 0 Returning to your report for a moment, 13 Professor. I lost my copy of. 14 On paragraph five at the top of page two 15 you say, "Based on my research, I found, among other things, that assault pistols" --16 17 Α Could you clarify for me? I'm sorry. 18 Q I'm sorry. Page two. 19 Page two. Got you. Α 20 Paragraph five. Q 21 Α Uh-huh.

97 Under "Summary of Findings." 1 Q 2 Α Okay. 3 0 You state, "Based on my research, I found, among other things, that assault pistols are used 4 5 disproportionately in crime in general, and that assault weapons more broadly were disproportionately 6 used in murder and other serious crimes in some 7 available data sources, " correct? 8 9 Α Yes. 10 Let's see if we can pull that apart so I 11 can understand what you're saying here. Now, how do 12 you define assault pistols? 13 Α Handguns that have the military style 14 features qualifying as assault weapons. 15 0 And would you agree with me that they became popularly used by criminals in connection with 16 17 the so-called crack epidemic of the 1980s? 18 Α I don't know that I can make a statement 19 that specific. I can say that, I mean, there are 20 statistics in the report on how widely they were used 21 in crime. Generally assault weapons accounted for a

21

131 and considering mass shootings by the number of people shot as opposed to the number of people killed --Α Uh-huh. -- and if you assume four or more, can you 0 state to a reasonable degree of scientific probability based upon the evidence available to you that banning assault rifles will reduce the number of incidents of mass shootings? I can't say that based -- I mean, I can't Α make a firm projection of that based on any particular available data. There might be data to suggest that there could be some reduction in that, but it's hard to really clearly project what that would be or how difficult it might be to detect statistically. 0 We have to work with a legal standard for expert opinion in the reasonable probability range. Α Uh-huh. 0 I'm not sure in the legal context what, you know, firm means as you mean it, but I'm trying to understand whether you can state your opinion to a

reasonable degree of scientific probability that

banning assault rifles would reduce the incidents of public shootings, mass shootings.

A Again, I mean, all I can say is attacks with those sorts of weapons tend to result in more victims being hit, so it stands to some reason that if you reduced the use of these types of weapons, it could reduce the tallies of victims hit in these incidents.

And it's not actually just a matter of the mass shooting incidents. It's also a matter of incidents with high numbers of shots fired, regardless of how many people get hit. So that has to be taken into account as well.

And I've tended to focus more on that issue in my research, you know, going back to the Jersey City data, for example, that suggested that about five percent of gunshot victimization stemmed from incidents with more than ten shots fired. And so based on that, one might project a small percentage reduction in shootings overall from this type of legislation.

Q Do you have your publication of your New Jersey data? Did you publish that?

	133
1	A Yes. Uh-huh.
2	Q And when we looked at your CV, I know we
3	talked about it briefly, and is this the Reedy and
4	Koper 2003 article?
5	A Yes.
6	Q How many incidents did you study that
7	involved more than ten shots being fired?
8	A In the sample that we had, I believe there
9	were something like maybe six incidents that involved
10	more than ten shots fired.
11	Q And do you recall what the base was of
12	total incidents?
13	A It's in the it's in the study.
14	Q Why don't we mark this since we're going to
15	be talking about it? Exhibit 9.
16	(Koper Exhibit 9 was marked for
17	identification.)
18	MR. FADER: And John, maybe in the next
19	five minutes if we can take a little water break.
20	MR. SWEENEY: Now. Let's break right now.
21	(Off the record.)

134 1 BY MR. SWEENEY: 2 Back on the record. 3 While we were on the break, I tried to focus myself on the portions of your 2003 study which 4 5 we have marked as Exhibit 9. First of all, it appears that there were some -- well, if I look at the data 6 7 tables that you have on page 153 of Exhibit 9, figure one involves assault incidents with a semi-automatic 8 9 pistol; correct? 10 Α Yes. 11 0 And you had 239 of those; right? 12 Α Yes. 13 Q How many of those involved more than ten shots being fired? Where would I find that number? 14 15 Α That would be on page 154 on table one. We had -- one column has minimum shots fired estimates, 16 the other has maximum shots fired estimates if there 17 18 happened to be a range in the data. 19 Am I correct in interpreting this that it's Q six out of approximately 165 pistol incidents in which 20 more than ten shots were fired? 21

135 Yes. 1 Α 2 So that's roughly 3.6 percent? Does that 3 sound about right to you? 4 Α Yes. Let me see if I can understand this 5 0 Okay. 6 study a little bit more. Going back to page 153 figure 7 one, outcomes of assault incidents involving semi-automatic pistols, you state handgun type was not 8 9 associated with attack outcomes; correct? 10 Α In this categorical tree, that's correct. 11 All right. So regardless of whether 12 someone was using a semi-automatic pistol or a 13 revolver, there was no difference in the outcome be it 14 injury or death? 15 Α Overall for the incident, yes. All right. And immediately below figure 16 0 17 two you state, "Although pistol cases involved higher 18 numbers of shots, they were not significantly more likely to result in injuries either fatal or nonfatal 19 20 than were revolver cases," is that correct? 21 Α Yes. I think what we're talking about

2

136 there is when you're looking at the likelihood that a gunfire incident resulted in any victimization, you know, any injury, I think there was no significant difference there. We did find a difference in the number of people who are wounded. On the right-hand column, second full paragraph you state, "Finally, figures one and two show that gunshot injury incidents involving pistols were less likely to produce a death than were those involving revolvers, " correct? Α Yes. 0 Had you differentiated between pistols with large capacity magazines and those without large capacity magazines here? Α There was only limited data on that, so we couldn't examine that in a great deal of depth. So is it fair to say that based upon the data in this study, pistols involving larger capacity magazines were less likely to produce a death than were those involving revolvers?

A I wouldn't necessarily say that. It would

137 You'd have to look specifically at the cases 1 2 where a large capacity magazine was involved. 3 Q All right. But we don't really have that 4 breakdown reliably, do we, or at least completely? 5 Α Not completely. 6 0 Can you interpret the data here to support 7 the statement that gunshot injury incidents involving pistols with large capacity magazines were more likely 8 9 to produce death than were those involving revolvers? 10 Does your data support that statement? 11 Α More likely to produce death? 12 0 Yes. I can't say that based on what we have 13 Α No. 14 here. 15 0 All right. Now, under your discussion below beginning with the second sentence, you state, 16 17 "Gun attackers using pistols tend to fire more shots 18 than attackers using revolvers, " correct? 19 Α Yes. 20 And then you go on to say, "This shot Q 21 differential does not appear to influence the

138 probability that an incident will result in injury or 1 death, nor the number of wounds sustained by gunshot 2 3 victims." Am I reading that correctly? Α 4 Yes. And that's the conclusion of this study; 5 0 6 correct? 7 MR. FADER: Objection. Well, that's -- yeah, that's 8 THE WITNESS: 9 only one conclusion. As we go on to say, offenders 10 using pistols tend to fire -- tend to wound more persons. Also, it should be noted that while this is 11 12 not reported in this particular article, for the 2004 13 report on assault weapons we did some additional 14 analyses of cases involving more than ten shots and 15 those cases actually had a 100 percent injury rate. 16 You know, at least one person was injured in all of 17 those cases. 18 BY MR. SWEENEY: 19 Now, there were only a handful of such Q 20 cases in this study; correct? 21 Α Correct.

169 MR. FADER: Objection. 1 2 THE WITNESS: It's hard to -- to break 3 down -- once again, you know, as we mentioned earlier, 4 it's harder to break down all these specific features 5 and describe which ones put a gun at highest risk of 6 being used in crime, I think, other than noting that 7 they're -- they're large capacity magazines and different aspects of their design that are designed to 8 9 facilitate rapid fire. 10 BY MR. SWEENEY: And isn't it true that criminals 11 12 overwhelmingly choose handguns over long guns to commit 13 crimes? 14 Α Yes. 15 0 And your data would indicate that to the extent there's a criminal preference for using assault 16 17 pistols, there isn't one evident from the evidence with 18 respect to using assault rifles by criminals; correct? 19 MR. FADER: Objection. 20 THE WITNESS: It's not as clear. As we've discussed earlier, there are a few statistics from 21

170 which one might try to infer that, but the case, yeah, 1 2 it's not as clear. It's fair to say. 3 BY MR. SWEENEY: Now, in paragraph eight of your report, you 4 Q 5 state in the second sentence that Maryland's 6 recently-enacted ban on assault weapons and large 7 capacity magazines has the quote "potential" close quote to accomplish a couple of things; correct? 8 9 Α Yes. Okay. 10 Now, when you say potential, I'm trying to Q 11 understand what you mean here. Would you agree with me 12 that any law would have the potential to produce a 13 benefit? 14 MR. FADER: Objection. 15 THE WITNESS: Might depend on -- on what it 16 In this case, you know, I'm saying potential based 17 largely on my studies of the federal assault weapons 18 ban and what -- what we found there. BY MR. SWEENEY: 19 20 Can you state with a reasonable degree of 0 21 scientific probability that the ban on assault weapons

and large capacity magazines in Maryland will reduce the number of crimes committed with assault weapons and other firearms with large capacity magazines?

A I can't put a probability on that. You know, all I can say is based on the experience with the federal assault weapons ban, that there are grounds for believing that the Maryland law could achieve that in extrapolating from the results of the federal study. Otherwise, one has to actually study the implementation of the Maryland law to begin putting, you know, probabilities on it and measuring those effects.

Q All right. Can you say to a reasonable degree of scientific probability that the ban on assault weapons and large capacity magazines in Maryland will reduce the number of shots fired in gun crimes?

A Not sure what you mean by a reasonable probability 'cause I just I can't put a probability on it and tell you how likely it is to occur.

Q Can you say to a reasonable degree of scientific probability that the Maryland ban on assault

172 weapons and large capacity magazines will reduce the 1 number of gunshot victims in such crimes? 2 3 Α Again, same answer. I can't state it with an exact probability at this time. 4 5 And if I ask you the same question with 0 respect to number four, reduce the number of wounds per 6 7 qunshot victim, and five, reduce the lethality of gunshot injuries when they do occur, and six, reduce 8 9 the substantial societal costs that flow from 10 shootings, would your answer be the same? 11 Α Yes. 12 0 Okay. Now, the Maryland law does not 13 prohibit all semi-automatic firearms; correct? 14 Α Correct. 15 0 And criminals can substitute semi-automatic firearms that aren't banned; correct? 16 Those and other guns. 17 Α 18 0 Right. And isn't that variable something that you can't control and one of the reasons why you 19 20 can't say to any probability whether or not the ban 21 will accomplish the six items that you state in

paragraph eight of your report? 1 2 MR. FADER: Objection. 3 THE WITNESS: In principle, the substitution of non-banned guns and magazines has the 4 5 potential to lessen the lethality and injuriousness of 6 gun attack incidents. So I wouldn't say that the 7 Maryland ban is going to reduce the rate of gun crime, but what I am saying is there's a possibility it could 8 9 reduce shots fired, people hit, wounds inflicted, those 10 sorts of things in attacks that -- that happen. BY MR. SWEENEY: 11 If a particular banned assault rifle, a 12 13 Colt AR-15, can readily be substituted with a Colt AR 14 HBAR, isn't the ban unlikely to have any significant 15 impact on the use of assault rifles in crime? 16 Α Well, that one particular instance, it 17 seems that the policy makers for whatever reason have 18 allowed one similar variation of the AR-15 to still be I don't know what all the considerations were 19 20 in doing that. I suppose it was part of political 21 bargaining. But it does raise the possibility that

A Uh-huh.

Q Is that because you cannot say to a reasonable degree of scientific probability?

A In some of these cases, you have very small numbers of incidents. It may be hard to do say statistical significance tests. In some cases, there are statistical significance tests showing that there is a significant difference between the two sets of cases. So beyond that, it's harder to say. I mean, we don't -- we don't have randomized trials testing the impact of weapon type on attack outcomes, so there is -- there's always going to be some debate over the patterns and the correlations in the data.

Q To press my point but without trying to, and please forgive me, I don't want to sound like I'm badgering you in any respect. But the limitations of the scientific data are such that you simply can't say to a reasonable degree of scientific probability that you would be able to reduce public shootings even if you were to eliminate large capacity magazines; correct?

MR. FADER: Objection. You can answer.

THE WITNESS: Again, you can't say that you'll eliminate all public shootings. What these data suggest is that you would reduce the number of victims. I can't necessarily -- it's hard to put specific probabilities on it, but that's what these data suggest. When you see some -- some of these comparisons that were done in Luke's Dillon's thesis even showed statistically significant differences between the LCM cases and the non-LCM cases, that would seem to provide some better degree of scientific

#### BY MR. SWEENEY:

certainty.

Q But because of the availability of multiple firearms and multiple magazines that aren't large capacity, can you truly say to a reasonable degree of scientific probability that reducing the number of or even eliminating the number of large capacity magazines will reduce either the incidents of mass public shootings or the number of people injured in such public shootings?

A I guess the best way to answer that would be that we'd have to -- we'd have to test that. We'd have to see a circumstance where use of large capacity magazines was significantly reduced and see what impact that has on -- on these sorts of shootings.

Q And that's because we simply don't have that evidence today; correct?

A We do have some evidence relevant to that.

It's just how -- how far you can push it, I guess.

Q Not far enough to state with a reasonable degree of scientific probability; correct?

MR. FADER: Objection.

THE WITNESS: Yeah, I struggle a little bit with that particular phrase because I can't put any specific probability or tell you with -- with, you know, five percent, one percent probability that there will be this change. I can simply point to the numbers that exist in these studies, and some of these differences are statistically significant differences and so it suggests in principle that if you could reduce the use of these magazines, you could get a

187 reduction. 1 2 BY MR. SWEENEY: 3 0 And when we're talking about the probability, in order to say more probable than not 4 5 it's more than 50 percent likelihood. 6 Α Uh-huh. 7 And I take it the evidence just doesn't 8 support that right now? 9 MR. FADER: Objection. 10 THE WITNESS: I would be cautious in making 11 the inferences about, you know, how certain it is that 12 it would happen. BY MR. SWEENEY: 13 14 And so you cannot say that it would be more 0 15 likely than not to achieve that? Not -- I would have to see more 16 Α 17 observation. Have to see what happens. 18 0 All right. On page 13, footnote 26, you 19 touch on this in -- this issue of a perpetrator 20 substituting other guns for banned assault weapons, and 21 of course that would also include substituting multiple

188 magazines for banned large capacity magazines. 1 2 it likely in Maryland that a criminal who wants to 3 commit a crime with a firearm will still do so even 4 with the new law? 5 Who wants to commit a? Α 6 Q A crime. 7 MR. FADER: Objection. Would commit a crime with THE WITNESS: 8 9 another weapon you're saying? 10 BY MR. SWEENEY: 11 0 Yes. 12 Α Yes. 13 Q And isn't it likely that in Maryland, the 14 law will have little or no impact on the frequency of 15 firearm crime in general? I would say that's a reasonable inference. 16 Α 17 Have you -- are you familiar with the Safe 18 Streets Program? 19 Α In Maryland? 20 Q Yes. 21 Α Not specifically. There's a lot of

215 Commonwealth of Virginia 1 2 County of Fairfax: 3 I, AMANDA J. CURTISS, a Notary Public of the State of Virginia, Fairfax County, do hereby 4 5 certify that the within-named witness personally appeared before me at the time and place herein set 6 7 out, and after having been duly sworn by me, according to law, was examined by counsel. 8 9 I further certify that the examination was 10 recorded stenographically by me and this transcript is 11 a true record of the proceedings. #### **DECLARATION OF GARY KLECK**

#### **Americans Frequently Use Guns for Self-Protection**

- 1. Defendant expert Alexandra Gordon cites (in her Exhibit 71) a report produced by a gun control advocacy organization, the Violence Policy Center, which claims that estimates of DGU frequency generated by Kleck and Gertz (1995) have been discredited. The VPC report relies for this claim on critiques by David Hemenway (Violence Policy Center 2017, pp. 4-5). What the VPC authors did not share with their readers is that *every single one* of Hemenway's criticisms of the Kleck-Gertz estimates of DGU frequency, as well as all other published criticisms, have been decisively rebutted. These rebuttals have been published and widely available for years, and none of them have been refuted, or even responded to, by the critics of this survey. A handy source compiling all of the rebuttals into one place is Chapter 6 of the 2001 book <u>Armed</u> (Kleck and Kates 2001). None of the defendant's experts or sources cited by the defendants have refuted a single one of these rebuttals.
- 2. Every single claim made by David Hemenway in his critique of the Kleck-Gertz survey has been shown to be false (Kleck 2001). For example, that survey did <u>not</u>, as Hemenway claimed, "show 132,000 perpetrators killed or wounded by defenders each year," and thus there could not be any conflict between our survey results and hospital data on numbers killed or injured. We had too few DGU sample incidents (n=213, unweighted) to reliably estimate the share that resulted in wounded offenders, so our survey did not imply any particular number of "perpetrators killed or wounded by defenders each year," and we did not report any such estimates (Kleck and Gertz 1995). Therefore it was impossible to show any contradiction between our estimates and hospital data.
- 3. Likewise, the Kleck-Gertz survey did <u>not</u> show, as Hemenway claimed, that "more guns are wielded to defend against rapes each year than there are actual rapes or attempted rapes each year," for the simple and indisputable reason that we do not know the actual number of such crimes that occur each year (among many other problems with

- 4. Hemenway falsely claimed the every external check of the validity of this survey's estimates failed to support those estimates, when in fact the opposite was true every single alternative measure of DGU frequency supported the Kleck-Gertz estimates. The latter estimates were not only completely consistent with hospital data on numbers of persons medically treated for gunshot wounds, and estimates of the frequency of sexual assaults and other crimes, but have also been consistently confirmed by the results of every other professionally conducted national surveys of representative samples of the U.S. adult population. By 2001 there were at least 20 such surveys that *all* indicated huge numbers of DGUs each year, ranging from 0.5 million to over 3 million, and exceeding the number of crimes in which offenders used guns (Kleck and Kates 2001, Chapter 6).
- 5. There is no valid scholarly foundation for the claim that the Kleck-Gertz or other survey-based estimates of DGU frequency are even slightly too high. Quite the contrary, the overwhelming weight of scholarly evidence on survey research methodology favors the proposition that surveys are more likely to *under*estimate the frequency of this sort of crime-related experience than to overestimate it. In order to report a DGU in a survey, a respondent who has genuinely had such an experience must be willing to report (1) a victimization experience (otherwise there could not have been a defensive reaction to a crime), (2) their possession of a gun (otherwise the defensive action could not be classified as a defensive use of a gun), and (3) (usually) the crime of

17

18

19

20

21

22

23

24

25

26

27

- 6. Advocates of the theory that DGUs are actually quite rare invariably rely on the National Crime Victimization Survey (NCVS) as their sole source of support, ignoring the 20-plus national surveys that have consistently yielded far higher estimates. Alexandra Gordon cites, in her Exhibit 71, a propaganda report produced by a gun control advocacy organization, the Violence Policy Center (Gordon, p. 11). That report's sole support for the proposition that DGUs are rare is the NCVS.
- As has long been known, this survey radically underestimates the frequency 7. of DGUs, because it never asks any respondents specifically about DGUs, is a nonanonymous survey, and is conducted by the federal government on behalf of the Justice Department, the law enforcement branch of the U. S. government (Kleck 2001). NCVS interviewers never ask respondents specifically about defensive use of guns; instead they only ask broadly about any self-protection actions the crime victim might have taken, giving respondents the opportunity to volunteer the specific information that their self-protective actions included use of a gun. As the Research Director of the National Opinion Research Center, Tom Smith, noted, "indirect questions that rely on a respondent volunteering a specific element as part of a broad and unfocused inquiry uniformly lead to undercounts of the particular of interest" (Smith 1997, p.p. 1462-1463).
- Further, reporting a DGU in this survey may often require admitting to unlawful possession of a gun in a public place (where most DGUs occur), so the facts that (a) the respondent's identity is known to interviewers and that (b) respondents are told that their information is being reported to the Justice Department strongly

discourages reporting of DGUs in the NCVS. Most decisively of all, NCVS estimates of DGU frequency are radically lower (c. 100,000 per year) than estimates generated by every other national survey that has asked about DGU (0.5-3 million per year) (Kleck 2001). Thus, the NCVS cannot be used to support any claim about the frequency of DGU.

Lucy Allen's Analysis of NRA-Selected Defensive Gun Uses (DGUs) Can Tell Us Nothing About How Often DGUs in General Involve Firing More than 10 Rounds

- 9. Defendant's expert Lucy Allen analyzed a sample of 736 DGUs selected by the NRA for inclusion in the American Rifleman "Armed Citizen" column, and concluded that DGUs virtually never involve a crime victim firing over 10 rounds (pp. 3-4). There is no foundation for believing that these incidents are representative of the full set of DGUs, and therefore her analysis can tell us nothing about the share of the full population of DGUs that involve use of LCMs. The NRA's database of "armed citizen" stories is not a representative sample of defensive gun uses (DGUs), nor does the NRA even claim it to be so. Findings from any analysis of this sample therefore cannot be generalized to the larger population of DGUs. Allen admits the sample was "not compiled scientifically," but then proceeds to hint that the large size of the sample somehow makes up for this problem (p. 3). It does not. Larger sample size cannot in any way compensate for sample bias.
- 10. Allen even concedes that the sample is "biased," but speculates that selection biases would favor inclusion of cases with many shots fired because such incidents would put DGUs "in the best possible light." This is counterintuitive. It is just as plausible that NRA compilers who wanted to put DGU in a favorable light would scarcely want to select DGUs in which the defenders appeared to indiscriminately "fling lead," firing arguably excessive numbers of rounds that might endanger bystanders. Instead, NRA staff arguably would better serve their alleged political agenda by selecting stories of responsible gun uses in which the defenders used the minimum amount of force needed to defend themselves, firing the fewest rounds needed to serve that purpose. This

25

26

27 28 would bias the sample of selected DGUs in the direction of excluding cases in which many rounds were fired. Allen's sample would therefore understate the frequency of DGUs in which large numbers of shots were fired by the defender.

### Allen's Analysis of NRA-selected DGUs Nevertheless Confirms that DGUs with Large Numbers of Rounds Fired **Do** Occur, Possibly Thousands of Times Per Year

- Allen's own findings, while seemingly indicating that DGUs with over 10 rounds fired are rare, also indicated that they do occur. She found 2 such incidents in her sample of 736 DGU's, a 0.3% share. Consider the implications, for example, if 0.3% of all DGUs involved over 10 rounds being fired. National surveys that have specifically asked about DGU have indicated 0.5-3.5 million DGUs per year (Kleck 2001), so it would be reasonable to assume an average of at least 1 million DGUs per year in the U.S. If this were the total frequency of DGUs, 0.3% would imply a number of DGU incidents with over 10 rounds fired that was huge in absolute terms – about 3,000 per year – based on Allen's own figures. Thus, the percent of DGUs involving many rounds fired does not have to be very large in order for it to imply a huge absolute number of incidents.
- 12. Indeed, given how small Allen's sample was (n=736), her finding of 0.3% of DGUs with over 10 rounds fired in her small sample of DGUs is actually not statistically inconsistent with the hypothesis that 1% of the *entire population* of DGUs involve over 10 rounds fired, since the 0.3% result is well within the bounds of what one could reasonably expect as a sample result in a randomly selected sample of just 736 cases if 1% of all DGUs involved more than 10 rounds fired. Samples selected from larger populations of events do not all perfectly resemble the population, since they are always subject to random sampling error. That is, due to the random character of the sampling process, an analyst may, by pure chance, obtain a sample that contains either more or fewer of the events of interest than would be the case if the sample resembled the population perfectly.
- 13. The 95% confidence interval (CI) estimate of the percent of DGUs with over 10 rounds fired (symbolized as **p**) is the range in which one would expect to find 95% of

26

27 28

all the estimates one would obtain if one selected an infinite number of samples of a given size. If one assumes that the true population percentage is 1% (p=.01), the 95% CI is 0.28% to 1.719%.

- This is the result of the following computations. The formula for the 95% CI is: **p** plus or minus 1.96 (square root of  $((p \times q)/n)$ , where q=1-p and n is the sample size. If p=.01, then the 95% CI is 0.01 + (-1.96) (square root of  $(.01 \times .99)/(736) = 0.01$  $\pm$  -0.00719, or 0.0028 to .01719, or 0.28% to 1.719%. This means that if the true population percentage of DGUs with over 10 rounds fired were 1%, and one took an infinite number of random samples, each with 736 DGUs, one would expect 95% of sample estimates of this percentage to be between 0.28% and 1.719%.
- In plain English, what this means is that even if 1% of all DGUs involved over 10 rounds, one could nevertheless realistically expect to get a percentage of 0.3% in a sample of 736 DGUs, due solely to random sampling error. Thus, getting a sample result of 0.3%, as Allen did, is statistically consistent with the idea that the actual percentage all DGUs with over 10 rounds fired in the full population of DGUs is 1%.
- 16. Ignoring Allen's fatally flawed analysis, no one really knows how many times LCMs are used defensively. We can say, however, that there are probably at least 1 million defensive gun uses (DGUs) of all kinds per year (Kleck 2001). Therefore, even if just 0.3% of DGUs involved LCM use (as Allen's results indicate), this would imply 3,000 defensive uses of LCMs per year. And if the Defendants chose to assert that it is reasonable to describe this many defensive uses of LCMs as "rare," the exact same characterization would apply with even greater force to the number of times LCMs were used in mass shootings and were likely to have affected the number of victims hurt in those incidents, since (as is demonstrated later) this number is close to zero.

### **Are LCMs Ever Needed for Defense Against Criminals?**

One reason why crime victims might need an LCM in order to effectively 17. defend themselves or others against criminals would be if they confronted a large number of offenders, such as the members of a street gang or a rioting mob. A crime victim who

18. Is it a realistic prospect for a crime victim to face four or more attackers? I examined an NCVS dataset I happened to have on my hard drive, covering the period 1992-1994. My analysis of that dataset indicated that the NCVS estimated, for the United States in 1992-1994, that there were 30,497,554 violent crimes in which victims directly confronted offenders and could state the number of offenders. Of these, 6,368,235 involved multiple offenders. Of these, 1,997,481 involved four or more offenders. Since this total pertained to a three-year period, the average for the U.S. was 2.1 million violent crimes with multiple offenders per year, and about 0.67 million per year involving over four offenders. This was a peak crime period, but even if there were half as many such incidents in recent years, the annual totals would still be one million and 0.33 million respectively. In short, by any reasonable standard, it is a frequent occurrence that American crime victims face four or more offenders in a violent crime.

### LCM Use in DGUs and Innocent Bystanders

19. Alexandra Gordon cites a passage from a study (Koper 2004) that she cites as her Exhibit 66, which argues that "the ability to deliver more shots rapidly should raise the likelihood that offenders hit their targets, not to mention innocent bystanders" (Koper

7

6

8 9

> 17 18

19

20 21

22

23 24

25

26 27

28

2004, p. 83). To be sure, it is a logical possibility that defensive use of guns equipped with LCMs *could* result in the accidental shooting of innocent bystanders, this is a serious concern only if defenders using guns with LCMs actually do shoot innocent bystanders. Neither Gordon nor any of the Defendant's experts cite any cases of this actually happening, nor any evidence that it happens frequently.

- 20. The best available evidence indicates that accidental shooting of bystanders in connection with any kind of DGU – with or without LCMs - is virtually nonexistent. My review of the literature on firearms accidents (Kleck 1997, pp. 309-310) found that accidental shootings linked with DGU were so rare that most studies of gun accidents that classified the circumstances in which the accidents occurred did not even include a category for accidents linked with defensive uses, even when their classifications of the circumstances of gun accidents included categories that included as little as 1% of the accidents. One exceptional study was conducted by the Metropolitan Life Insurance Company (1968), which found just two cases of accidental firearms deaths linked with defensive gun use ("searching for prowlers") out of 143 total accidental gun deaths, or 1.4%. Since other gun accident studies did not report any DGU-linked accidents, this 1.4% should probably be regarded as an upper limit on the share of accidental gun deaths linked with DGU.
- In 2014 there were 461 total accidental firearms deaths in the U.S., so 1.4% 21. of this total would be 6.4 accidental deaths. That is, there were probably no more than six fatal accidents involving DGU in the entire nation in 2014. National surveys that directly ask about DGU indicate there are probably over 1 million DGUs per year. This means that someone is accidentally killed in connection with fewer than six out of every million DGUs. The number linked with just DGUs involving LCMs is almost certainly substantially lower than six since, as the Defendant's expert Lucy Allen (pp. 4-5) acknowledges, relatively few DGUs entail large numbers of rounds being fired, and thus only a small share are likely to have involved LCM use.
  - 22. In any case, none of the Defendant's experts cite even one real-life incident

1 in which a person attempting to use a gun defensively accidentally killed an innocent 2 bystander. While innocent bystanders sometimes are shot, e.g. in connection with street 3 4

gang violence, there is no evidence known to me that any significant number are shot as a byproduct of defensive gun use.

#### How Large a Share of Mass Shootings Involve the Use of an LCM?

- Laura Allen makes the remarkable claim that "large-capacity magazines were used in the majority of mass shootings with known magazine capacity since 1982 (44 of 50 mass shootings)" (p. 7, emphasis added). To support this claim, she relied on compilations of mass shootings that were in turn based on news media accounts (p. 6). Reporters inform their audience, by definition, of information that is believed to be newsworthy. In a period when there was intense public interest and political debate over LCMs, the involvement of LCMs in mass shootings was clearly newsworthy. Thus, there is strong reason to expect that at least one news outlet would note the use of LCMs in every, or virtually every, mass shooting in which it was believed that the shooter used an LCM. In contrast, there is nothing newsworthy about shooters using lower-capacity magazines, and thus no reason for reporters to state this fact in their stories about mass shootings. In short, magazine capacity will ordinarily be mentioned in a story only if the capacity was unusually large. This is consistent with the old news adage that "man bites dog" is news; "dog bites man" is not.
- In this light the only thing remarkable about Allen's finding is that there 24. were any mass shootings for which magazine capacity was reported in news stories but the capacity was not large. Her findings can tell us nothing about the share of all mass shootings that involved shooters using LCMs because she uses a sample of incidents biased to include almost entirely incidents for which news stories reported the use of LCMs.
- Allen sustained her erroneous claim by relying on grossly incomplete 25. compilations of mass shootings, which actually encompass only a tiny share of all mass shootings, and which grossly overstate the prevalence of LCM use. She used two

sources of mass shootings which she erroneously characterized as "comprehensive" (p. 5). In fact these sources cover only a tiny minority of mass shootings, those in which four or more persons were killed and that also had various other attributes such as occurring in public places. By counting only a small share of the mass shootings, Allen grossly overstated the percent that involved LCMs by making the denominator of the percentage far too small.

- 26. There is no comprehensive listing of all mass shootings available, but the most extensive one by far of which I am aware is at the Shootingtracker.com website. For 2014-2016 (all the complete years available), the compilers identified 992 incidents with four or more victims shot, fatally or nonfatally, or about 331 per year. They did not arbitrarily confine their sample of mass shootings to those occurring in public or that involved four or more victims killed. In contrast, Allen's supposedly "comprehensive" Mother Jones compilation covered just 86 mass shootings over the far longer 37-year period from 1982 to 2017, or about 2.3 per year, while her Citizens Crime Commission compilation covered just 33 mass shootings from 1984 to 2012, or about 1.1 per year. As a result, Allen's sources covered well under one percent of the total number of mass shootings.
- 27. Thus, Allen managed to conclude that 88% (44 of 50) of mass killings involved LCMs (p. 7) by focusing only on a tiny unrepresentative subset of mass shootings, those with four or more deaths, and only on those where sources stated the capacity of magazines used. For the same 2014-2016 period covered by the ShootingTracker dataset, the Violence Policy Center (2015) identified just *nine* incidents with four or more victims (excluding the shooter) in which a shooter was known to have used a magazine with a capacity exceeding ten rounds. The Violence Policy Center (VPC) advocates for restrictions on magazine capacity, so its staffers are strongly motivated to identify every single mass shootings in which an LCM was used. To be sure, VPC staffers would miss an LCM-involved mass shooting if not a single news outlet available to them reported the LCM use, but there is no empirical evidence

whatsoever that such incidents are common. Webster argues that VPC compilation of LCM-involved mass shootings is incomplete (p. 9), but does not offer a scintilla of empirical evidence that it is *significantly* incomplete. As far as he or anyone else knows, the VPC compilation of LCM-involved mass shootings is the most comprehensive available.

- 28. Based on this "best available evidence," the data indicate that there were at least 992 mass shootings (four or more victims) in the U.S. in 2014-2016 (ShootingTracker.com 2017), but only 9 mass shootings in which an LCM was known to have been used (Violence Policy Center 2017). These more comprehensive data therefore imply that *only about 8/100th of one percent of mass shootings were known to involve the use of magazines with a capacity exceeding ten rounds.* a far cry from the Defendant's experts claims that *most* mass shootings involve LCM use.
- 29. One could speculate that there are huge numbers of mass shootings that involved LCMs but that not a single news source known to VPC reported the LCM involvement, but one should not lose sight of the fact that this is just guesswork, not evidence. My conclusions are based on the best available empirical evidence. In any case, even if the true number of LCM-involved mass shootings was double or triple the number indicated by the VPC data, the conclusion that mass shootings rarely involve use of LCMs would still be valid. For example, if VPC staff discovered only one third of such incidents, it would imply there were 27 such incidents in 2014-2016 rather than nine, making the LCM-involved share of mass shootings 2.72% (27 of 992). Either way, the claim by Allen that 88% of mass shootings involve LCMs is wildly inaccurate, and even a vaguer claim that LCMs are involved in a large share of mass shootings is not supported. Even with substantial undercounting of LCM-linked incidents, the evidence would still indicate that mass shootings rarely involve LCMs.

## The Use of LCMs Has No Known Causal Effect on the Number of Persons Shot in Mass Shooting Incidents

- 30. Advocates of LCM bans note that the use of LCMs allows offenders in mass shootings to fire many rounds without reloading, and argue that reloading is relevant to the casualty count in mass shootings because either (1) reloading gives bystanders an opportunity to tackle the shooter and stop the shooting, or (2) reloading provides nonshooting intervals when potential victims can escape. For example, Defense expert John Donahue argues that "bans on large capacity magazines can help save lives by forcing mass shooters to pause and reload ammunition" (p. 5). Close examination of the way mass shootings actually proceed indicates that bystanders in mass shootings having tackled mass shooters while they were reloading only once, or possibly twice, in the past 30 years, and that reloading detachable magazines does not make nonshooting intervals in these incidents any longer than when the shooter is not reloading (Kleck 2016).
- John Donahue (pp. 6-7) claimed to know of at least 20 mass shooting 31. incidents in which bystanders tackled the shooter while he was "stopping to reload his weapon" (p. 6), based on "a review of the resolution of mass shootings in the U.S." Since Donahue does not cite any other person's review, this is presumably a review he conducted himself. He failed, however, to describe or even briefly outline the methods by which he conducted the review, making it impossible to judge whether it was competently done. Competent scholars describe their methods and cite sources. Notwithstanding his allusion to 20 incidents, Donahue was actually able to cite just four specific mass shooting incidents occurring within the past thirty years, in which bystanders allegedly tackled shooters while they were reloading (p. 6). One of them, which I have reported in previous research (Kleck 1997; 2016) genuinely qualifies – in the 1993 Long Island railroad incident by standers did tackle the shooter while he was attempting to reload, though he was trying to reload individual rounds rather than an entire magazine. On the other hand, a 1994 shooting near the White House cited by Donahue does not remotely qualify, since it was not even a mass shooting. The

perpetrator did not shoot a single person, never mind a large number. The 1998 Oregon incident cited by Donahue also does not qualify because the shooter was not reloading when he was tackled (Kleck 2016). Finally, it is uncertain whether Donahue's fourth cited incident, the Gabrielle Giffords shooting in Tucson, qualifies, since it is unclear from media accounts whether bystanders were able to subdue the shooter because (1) he was reloading (Donahue's position), or because (2) his magazine had failed due to a broken spring and he was unable to fire (Kleck 2016). Since such magazine defects would disrupt a mass shooter's firing regardless of whether the magazine's capacity was large or small, interpretation (2) would not support the position that use of smaller capacity magazines would have reduced the casualty count. In short, there may be only a single unique mass shooting incident in the past 30 years (the 1993 Long Island shooting) that clearly involved the shooter being tackled while reloading, and none in the past 20 years.

- 32. Donahue (pp. 6-7) padded out his list of mass shooting incidents in which magazine changes purportedly affected the casualty count by citing the Sandy Hook shooting, arguing that potential victims escaped "while the shooter was switching magazines." While he claims that there have been "many" mass shooting incidents in which this happened, the Sandy Hook shooting is the only one he could cite. He flatly stated that "11 children at Sandy Hook Elementary School were able to escape while Adam Lanza reloaded his 30 round LCM" (p. 7). Donahue's sole support for this claim is an article in the *Hartford Courant*. That article, however, made it clear that this claim was nothing more than a speculation made by an unnamed source. Some children did escape, and there was a pause in the shooting, but according to the official report of the incident, investigators could not establish either (1) that the children escaped during the pause, or (2) that the shooter was reloading during the pause (State's Attorney Report 2013).
- 33. Indeed, it is unlikely that the Sandy Hook shooter even needed to reload. Crime scene investigators found multiple magazines that had cartridges still left in them,

- 34. In sum, Donahue could cite only one genuinely supportive incident (the 1993 Long Island shooting), and one possibly supportive case (the Gabby Giffords shooting), over a period of 30 years, to support his claim that citizens have "frequently" subdued shooters while they stopped to reload. One or two cases in 30 years in the entire nation probably would not fit most people's notions of what "frequently" means. Regarding his claim that there have been "at least 20 separate shootings" where this happened, Donahue provided no documentation at all. Twenty cases in thirty years, in a nation with over 300 million people, would not be very frequent either, but Donahue did not supply supporting evidence of this many relevant incidents or even half this many.
- 35. Webster (p. 7) and Allen (p. 7) both accurately note that there are, on average, more casualties in mass shootings in which LCMs are used than in those in which they are not used, but go on to infer that LCM use *caused* shooters to inflict more casualties. This simple statistical association, by itself, cannot establish that LCM use causes a higher casualty count. Unless the use of LCMs has an actual *causal effect*, to at least some degree, on the number of victims harmed in crime incidents, there is no scientific basis for believing that restrictions on LCMs would cause a reduction in the

- 36. Regarding the second effect, the intentions of a mass shooter to hurt many people surely has some effect on how many people he in fact ends up hurting. This must be true unless one is willing to believe that there is no connection whatsoever between human intentions and actions. I am not aware of any scholar, including the Defendant's experts, who has disputed either causal effect (1) or (2). Thus, as far as those experts know, the association between LCM use and casualty count may be entirely spurious, i.e. noncausal.
- 37. The claim that LCM use has an actual causal effect of its own on victim count in mass shootings would become more plausible if close analysis of the details of actual incidents indicated the LCM use was actually necessary or significantly helpful for inflicting as many injuries as were inflicted in LCM-involved mass shootings. This sort of analysis, however, indicates precisely the opposite (Kleck 2016).

///

- 38. My close study of every known LCM-involved mass shooting of the past 20 years indicated that there have been *no* mass shootings in the U.S. in the past 20 years in which (1) it was known that LCMs were used and (2) the details of the incident indicated that the shooter needed an LCM to hurt the number of people he killed or injured. Instead, in all incidents where the relevant information was available, mass shooters possessed either multiple guns or multiple magazines, and thus could easily fire many rounds either without reloading at all or by quickly reloading a detachable magazine in a few seconds (Kleck 2016).
- 39. The details likewise show that even if shooters had lower capacity magazines and had to reload more often, this would not slow their rate of fire, since the killers in actual mass shootings average so low a rate of fire that the 2-4 seconds it takes to reload would be no longer a time period than the average interval between shots actually fired in mass shootings, even when the offender was not reloading (Kleck 2016). Thus, the details of actual mass shootings do not support the hypothesis that, in the absence of LCMs, more victims would have time to escape because the shooters were making more magazine changes.
- 40. Webster objects to my limiting my analysis of mass shootings to those with more than six victims killed or wounding, arguing that such a limitation fails to take account of the possibility that LCMs could also affect the casualty count in incidents with "one to five victims as well" (p. 8). This observation is utterly irrelevant to the validity of the analysis I performed or my conclusions. Webster withholds my explicitly stated rationale for analyzing only incidents with many victims. I did so in an effort to give every possible benefit of the doubt to the proposition that mass shooters' use of LCMs *does* cause an increase in casualty counts. I did this by intentionally limiting my sample of LCM-involved shooting incidents to those in which LCMs were most likely to have made a difference those in which many people were shot and many shots were presumably fired.

- 41. The very fact that advocates of LCM bans focus so heavily on mass shootings rather than on ordinary crimes with few victims (e.g., Violence Policy Center 2015) is attributable to the widespread belief that it is the shootings with many victims where LCM use is most likely to matter. While LCM use might affect casualty counts even in incidents in few victims, it is relatively *more* likely to affect casualty counts in incidents with many victims.
- 42. As I explained at length in my research report (Kleck 2016, p. 33), by analyzing only incidents with a large number of victims, I was intentionally biasing the sample *in favor of* the hypothesis that LCM use increases casualty counts. Had I included cases with few victims, as Webster seems to be recommending, this would necessarily have weakened support for this hypothesis, by including many incidents in which it was much less likely that the shooter needed an LCM to hurt as many people as he did.
- 43. Webster falsely claims that I "made an argument ammunition capacity is only logically relevant in incidents in which there is a high rate of fire over a short span of time" (p. 9). I never made such a bizarre argument, and Webster was unable to quote or cite any passage where I made this argument.
- 44. Webster also makes yet another false claim about my research: "lost in Kleck's analysis and consideration is the fact that there is no way to measure the incidents where there was the potential for a large number of casualties in a shooting but fewer occurred *due to the absence of a LCM*" (p. 9). This point was in no way "lost" in my research, given that I explicitly stressed this possibility in the published report of my analysis: "one might also speculate that incidents that did *not* end up with many shooting victims turned out that way because the shooter did *not* use an LCM" (Kleck 2016, p. 45). Unlike Webster, however, I correctly stressed that this is only a speculation, not a fact. Basing policy analysis on idle speculation while dismissing or downplaying known empirical evidence is irresponsible and unlikely to yield accurate conclusions.

### Allen's Misleading Analysis of the Details of Mass Shootings

45. Allen obscures the reality just outlined by describing mass shootings just one

attribute at a time. For example, she states the percent of mass shooters that used only one gun, but does not say how many of those shooters also had just one magazine. Likewise, she reports the percent who had only one magazine, but does not say how many of those also had a single gun. Thus, there is nothing in her analysis to refute the proposition that all mass shooters had *either* multiple guns or multiple magazines – either of which would enable a shooter to fire many rounds with little or no interruption due to reloading.

- 46. Allen also misleads the reader by computing these percentages based on all 88 mass shootings in her dataset, not just the 44 known to have involved LCMs. This is clearly inappropriate because it is an indisputable logical point that LCMs could have affected the casualty counts only in incidents in which an LCM was actually used. Thus, fully half of Allen's sample incidents (44 of 88 cases) were, as far as Allen could tell, irrelevant to a test of whether LCM use affects the casualty count in mass shootings. Significantly, Allen does not report the share of incidents with a single gun and/or a single magazine among just mass shootings known to have involved use of LCMs, i.e. within the set of mass shootings known to be relevant to an inquiry as to the impact of LCM use on casualty counts.
- 47. All this clearly matters, because when the analysis more appropriately focuses on the share of mass shootings in which the shooter had *either* multiple magazines *or* multiple guns, and is more appropriately confined to incidents in which an LCM was known to have been used, the results are quite different from those generated by Allen's misleading analysis. My analysis indicated that U.S. mass shooters who used LCMs *all* possessed either multiple guns or multiple magazines, and thus did not need an LCM to fire many rounds without significant interruption (Kleck 2016).
- 48. It is significant how Webster words his opinion about the impact of LCM use on casualty counts: "LCMs *can* increase the ability of criminal and those attempting to kill or wound large numbers of innocent people" (p. 17, emphasis added). To be sure, it is a hypothetical *possibility* that LCM use *might* increase the ability of criminals to hurt

many people, but the best available evidence indicates that, over the past 20 years in the U. S., LCM use has not *actually* caused an increase in the number of people killed or injured in mass shootings (Kleck 2016). One could justify even the most ineffective public policies to reduce violence by speculating about how crimes *might* occur, but this is surely not a responsible basis for implementing policies that could have serious harmful effects on the public.

49. Attached as "Exhibit QQ" to the declaration of Anna M. Barvir in Support of Motion for Preliminary Injunction filed on May 26, 2017, is a true and correct copy of Kleck (2016).

### What Koper Actually Concluded Regarding the Impact of the Federal LCM Ban on Crime

50. Webster insists (p. 11) that Christopher Koper did not conclude that the federal ban on LCMs was ineffective, and that opponents of the ban have misrepresented his conclusions: "Some claim that bans of assault weapons and LCMs do not work; however, this is not the conclusion of Christopher Koper." This claim is easily refuted, simply by directly quoting Koper. Here is Koper's conclusion, as conveyed in his last published report (Koper 2013) on the impact of the ban on crime:

"On balance, these analyses showed no discernible reduction in the lethality or injuriousness of gun violence during the post-ban years (see Koper 2004, Koper and Roth 2001, and Roth and Koper 1997). Nationally, for example, the percentage of violent gun crimes resulting in death (based on gun homicides, gun assaults, and gun robberies reported to the Uniform Crime Reports) was the same for the period 2001-2002 (2.9%) as it was for the immediate pre-ban period 1992-1993 (Koper 2004, 82, 92). Accordingly, it was difficult to credit the ban with contributing to the general decline in gun crime and gun homicide that occurred during the 1990s" (Koper 2013, p. 165)."

51. The way Webster manages to suggest that Koper actually found the ban to be effective is by selectively stressing Koper's speculative conclusions about possible future effects of a revised AW ban, and discounting his evidence-based conclusions.

Koper's main evidence-based conclusion about the impact of the AW/LCM ban on crime is the one quoted above. Koper also, however, *speculated* about the "*potential* long-term effects of banning assault weapons and large-capacity magazines" on violent crime that might be experienced if only various weaknesses of the ban were corrected (Koper 2013, p. 166, emphasis added). Webster echoes these optimistic speculations (pp. 12-14).

52. Webster pads out apparent support for the effectiveness of the AW/LCM ban by referring to the supposed effects of the AW ban that Koper found on "the percentage of guns recovered by police that were *assault weapons*," but this is a red herring that has no relevance to the topic of current interest, i.e. whether the LCM ban reduced the criminal use of *LCMs*. As Webster concedes (p. 12), Koper "saw no evidence of a decline in LCM use in crime."

### Webster's Analyses Do Not Establish Any Effect of the AW/LCM Ban on Mass Shootings

- 53. Webster professes to perceive a "temporal pattern" in mass shootings occurring in public "that is consistent with a hypothesized protective effect of the ... LCM ban" (p. 15), relying on the data displayed in his Figure 1. He does not explain how the ban could have caused a reduction in killings involving LCMs if the ban did not cause a reduction in criminal use or possession of LCMs, as Koper's research indicated. Webster's crude visual examination of trends in the frequency of mass shootings can tell us nothing about the impact of the LCM ban because it does nothing to separate the effects of the ban from those of the many other factors that affect violence.
- 54. At best, the simple examination of trends in mass shootings can only be used to check whether declines in mass shootings coincided with the time the AW/LCM ban was implemented. In fact, what is most striking about the patterns in Figure 1 is declines in mass shootings did *not* even approximately coincide with the time that the AW/LCM ban went into effect. Indeed, mass shootings substantially *increased* after the ban was implemented in 1994, and continued to do so right through 1999. Webster excuses this by speculating that all the ban's effects were "delayed" (p. 14), and suggests that later

declines in mass shootings reflected the impact of the ban. Unfortunately, under this line of reasoning, literally *any* drop in violence, at *any* time after 1994, could be attributed to the ban, no matter how ineffective the ban actually was. Leaving aside this sort of fruitless speculation, the only conclusion we can definitely derive from Figure 1 is that declines in mass shootings did not begin when the LCM ban went into effect. In any case, Webster's claims are purely speculative.

55. None of Webster's crude "negative binomial regression analyses" reported on pp. 16-17 do anything to establish *why* the number of victims per mass shooting changed over the 1982-2016, or whether the LCM ban had any effect. They do no more than what a crude visual examination of the trends shown in Figure 2 (p. 16) could do because they do not control for the effects of any other factors that affect violence. That is, these simplistic univariate analyses do nothing to establish that the LCM had any causal effect on these trends, as opposed to effects produced by thousands of other possibly relevant factors. Webster's claim that his results suggest a protective effect of the LCM ban is sheer guesswork.

# The Virginia Data Cannot be Used to Support the Claim that The AW Ban Was Effective in Reducing Criminal Use of LCMs

- 56. Webster (pp. 12-13) tried to buttress his claim that the AW/LCM ban was actually effective by citing a Washington Post article to the effect that the ban, in effect from 1994 to 2004, caused a reduction in LCM use, and that when the ban sunsetted, LCM use went back up. (From this point forward, Webster simply ignores Koper's finding that the LCM ban did not reduce the use of LCMs in crime.) Webster concludes that the AW ban was therefore effective in reducing LCM use in crime while it was in effect.
- 57. The Virginia data cannot sustain Webster's conclusions. Webster failed to inform his readers of two critical facts about the Virginia data source. First, the data source does not even concern guns *used to commit* violent crimes, but merely guns recovered by police (even though Webster explicitly alludes to LCM "use in crime," p.

1 13). This is not a minor quibble, since the vast majority of guns recovered by police were not used in violent crimes, but rather were recovered in connection with violations of gun control laws, such as "unlawful possession" (Kleck and Wang 2009). Thus, the data cited by Webster say nothing whatsoever about trends in the criminal use of LCMs among violent criminals. This is crucial because guns used in violent crimes are quite different from those connected only with unlawful possession charges (Kleck and Wang 2009). One therefore cannot infer the characteristics of guns used to commit violent crimes from the characteristics of all guns recovered by police, only a small fraction of

9

22

23

24

25

26

27

28

crimes from the characteristics of all guns recovered by police, only a small fraction of which were used to commit violent crimes. 58. Second, the Virginia data cannot even be used to establish trends in criminal possession of guns equipped with LCMs, because it was strictly optional whether Virginia police officers chose to record the presence of an LCM in connection with firearms recovered. They were not required to always record the capacity of every magazine with which recovered firearms were equipped. The inclination of police to record the presence of an LCM can change over time, reflecting the ebbs and flows of police and public concern about LCMs rather than trends in the actual prevalence of LCMs among guns used to commit violent crimes. As public debate and news media focus on LCMs rose in the 1980s and early 1990s, we would expect that this increased the likelihood that police recorded the presence of LCMs among guns they recovered. Then when the AW ban was enacted in 1994, if police concern about LCMs declined because the LCM problem had supposedly been at least partly "solved" by the LCM ban, this would have reduced the likelihood that police officers would record the presence of an LCM – even if the actual prevalence of LCMs among recovered violent crime guns

59. This possibility is not mere speculation. Prior evidence indicates that when the national debate over "assault weapons" (AWs) was at its peak, the guns chosen by

officers to record the presence of LCMs in more gun recoveries.

had remained unchanged. Finally, after the AW ban sunsetted out of existence in 2004,

media attention and public concern would have increased once again, encouraging police

- 60. The only thing about the <u>Washington Post</u> data that might have weakly suggested a causal connection between the LCM ban and the prevalence criminal LCM possession was the supposed temporal correspondence between the span of years when the ban was in effect and the timing of increases and decreases in LCM prevalence. As it happens, the Virginia data did not display any such correspondence. The start of the drop in LCM prevalence among Virginia recovered "crime guns" did *not* correspond with the year the federal LCM ban went into effect, 1994. From 1994 through 1998, there was no consistent pattern of decline in LCM prevalence among recovered VA crime guns. *The decline only began in 1999, long after the ban went into effect.*
- 61. Although some of the effects of the ban may well have been lagged, as Webster speculates, there nevertheless should have been some immediate reduction in LCM use if the AW ban actually caused such a reduction. The ban *immediately* stopped the inflow of new LCMs the instant it became effective in 1994, so some of its effects should likewise have begun to become evident immediately, even if its full effects would only became evident later. Thus, even if one charitably interpreted the Virginia data as reflecting actual changes in criminal use of LCMs (or at least in criminals' possession of LCMs), the timing of changes in LCM trends do not support Webster's thesis that the

AW caused a reduction in criminal LCM use while it was in effect.

### **LCMs Are Almost Never Used to Kill Police Officers**

- 62. Webster (p. 10) cites a study produced by Handgun Control Inc., the previous name of the gun control advocacy organization now known as the Brady Campaign to Prevent Gun Violence (see his fn. 11). (The study Webster cited in his fn. 12 has no information of the use of LCMs.) This study purportedly indicated that an astounding 31-41% of police officers murdered in 1994 were killed with a firearm equipped with a LCM (see his fn. 11). The cited study is no longer available on the organization's website, if it ever was, and I could not find a copy anywhere else on the Internet, so I cannot evaluate its merits. Certainly there is reason to question why analysts would focus on a single year's worth of cases when data on killings of police are available for far more years.
- 63. I therefore examined the summaries of felonious killings of police officers found on the FBI's website (U. S. Federal Bureau of Investigation 2016) to establish how often LCMs were used in these murders for the most recent 10-year period for which data are available, 2006-2015. There were *no* cases where it was clear that a LCM was used. A case occurring in Marlin, TX on 11-1-15 was described involving an offender with a ".38 caliber revolver" that supposedly had a "magazine ...which was designed to hold 15 rounds." Revolvers do not have magazines; they hold cartridges in a revolving cylinder. Further, revolver cylinders do not hold 15 rounds; they usually hold just six rounds and almost never more than nine. Thus, this account was almost certainly erroneous, but it is possible that the authors of the account meant to describe a semi-automatic pistol, which could hold 15 rounds. Nevertheless, the account also indicated that the magazine still had 14 rounds in it when recovered by police, indicating that the shooter made no use of the supposed large capacity of the magazine. If a LCM was used at all in this incident, it clearly did not contribute to the killing of the police officer.
- 64. I found seven other incidents in which LCMs *might* have been used, based on the fact that offenders fired more than 10 rounds, with no explicit mention of

reloading or use of multiple guns or multiple magazines (see the incidents occurring in Puerto Rico on 3-10-14 and 12-7-06; in Tallahassee, FL on 11-22-14; in San Antonio, TX on 5-28-11; in Greene County, NC on 7-28-10; in Tucson, AZ on 6-1-9; and in Bastrop, LA on 8-10-07). Even in these seven cases, however, LCM use is uncertain because it is unknown whether the shooters merely reloaded smaller-capacity magazines or used multiple guns. Still, if we generously classify all seven of these incidents as cases in which LCMs were used to kill police officers, this means that no more than 1.4% of the 491 police officers killed in the U. S. in 2006-2015 were killed by offenders using LCMs.

65. This is a long way from Webster's claimed LCM share of "31% to 41% of police officers murdered" (p. 10). It would be more accurate to say that LCMs are almost

police officers murdered" (p. 10). It would be more accurate to say that LCMs are almost never used in the killing of police officers. Further, it should be noted that, as with mass shootings, we do not know that offenders *needed* LCMs to kill police officers. It is possible that the offenders who happened to use LCMs could just as easily have killed the officers using multiple guns or multiple smaller-capacity magazines – an issue that neither Webster nor the other Defendant's experts address.

///

TO THE COURT, ALL PARTIES, AND THEIR ATTORNEYS OF RECORD:
Notice is hereby given that on June 13, 2017, at 10:00 a.m. in Courtroom 5A of the
above-captioned court, located at 221 West Broadway, San Diego, CA 92101, Plaintiffs
will move for a preliminary injunction under rule 65(a) of the Federal Rules of Civil
Procedure. Specifically, Plaintiffs will seek an order temporarily enjoining Defendant
Attorney General Xavier Becerra and his agents, servants, employees, and those working
in active concert with him, from enforcing or giving effect to California Penal Code
section 32310(c)-(d) during the pendency of this action.

Plaintiffs have filed, and the Court is currently considering, Plaintiffs' Ex Parte Application for Order Shortening Time to Hear Plaintiffs' Motion for Preliminary Injunction, which seeks an order that this motion be heard on June 12, 2017, at 10:30 a.m. Barvir Decl., ¶ 3. Counsel for Defendant Becerra has stated that he would oppose that request. *Id*.

Plaintiffs bring this motion because section 32310—to the extent it bars the possession of firearm magazines over 10 rounds that were lawfully acquired, used, and possessed within California before July 1, 2017—violates Plaintiffs' Second Amendment right to possess commonly used magazines, and constitutes an unlawful government taking under the Takings Clause of the Fifth Amendment and the Due Process Clause of the Fourteenth Amendment. Unless this Court orders the requested preliminary relief, Defendant Becerra will begin enforcing section 32310(c)-(d) on July 1, 2017, and irreparable injury will result to the Plaintiffs as described in the memorandum of points and authorities filed simultaneously herewith.

This motion is based on this notice of motion and motion, the memorandum of points and authorities filed in support, the supporting declarations of Anna M. Barvir, Virginia Duncan, Richard Lewis, Patrick Lovette, David Marguglio, Christopher Waddell, Michael Barranco, Massad Ayoob, James Curcuruto, Steven Helsley, and Gary ///

Kleck, as well as any exhibits attached thereto. This motion is also based on the pleadings and records already on file, and on any further matters the Court deems appropriate. MICHEL & ASSOCIATES, P.C. Date: May 26, 2017 s/ C.D. Michel C.D. Michel Counsel for Plaintiffs Duncan, Lewis, Lovette, Marguglio, Waddell, and California Rifle & Pistol Association, Incorporated 

1 UNITED STATES DISTRICT COURT SOUTHERN DISTRICT OF CALIFORNIA 2 VIRGINIA DUNCAN, RICHARD LEWIS, PATRICK LOVETTE, DAVID MARGUGLIO, CHRISTOPHER WADDELL, CALIFORNIA RIFLE & PISTOL ASSOCIATION, Case No: 17-cv-1017-BEN-JLB 3 CERTIFICATE OF SERVICE 4 5 INCORPORATED, a California corporation, 6 Plaintiffs, 7 v. 8 XAVIER BECERRA, in his official 9 capacity as Attorney General of the State of California; and DOES 1-10, 10 Defendant. 11 IT IS HEREBY CERTIFIED THAT: 12 I, the undersigned, declare under penalty of perjury that I am a citizen of the 13 United States over 18 years of age. BARVIR IN SUPPORT OF PLAINTIFFS' MOTION FOR 12 INCORPORATED, a California PRELIMINARY INJUNCTION; 13 **EXHIBITS E-LLL** corporation, Plaintiffs, 14 Date: June 13, 2017 Time: 10:00 a.m. 15 v. Dept: 5A Hon. Roger T. Benitez Judge: 16 XAVIER BECERRA, in his official capacity as Attorney General of the State 17 of California; and DOES 1-10, Defendants. 18 19 20 21 22 23 24 25 26 27 28

### **DECLARATION OF ANNA M. BARVIR**

- 1. I am an attorney at the law firm Michel & Associates, P.C., attorneys of record for Plaintiffs in this action. I am licensed to practice law before the United States District Court for the Southern District of California. I am also admitted to practice before the Eastern, Central, and Northern Districts of California, the courts of the state of California, the Supreme Court of the United States, and the D.C., Fourth, Ninth, and Tenth Circuit Courts of Appeals. I have personal knowledge of the facts set forth herein and, if called and sworn as a witness, could and would testify competently thereto.
- 2. On May 25, 2017, I contacted counsel for Defendant Attorney General Xavier Becerra, Mr. Anthony O'Brien, via email to meet and confer regarding Plaintiffs' intention to file a motion for preliminary injunction, requesting the court enjoin enforcement of California Penal Code section 32310(c)-(d), pending resolution of this case on the merits. Mr. O'Brien stated that his client would oppose Plaintiffs' motion. Plaintiffs are unable, however, to forego seeking preliminary relief while this case progresses, for they imminently face the violation of their fundamental, constitutional rights under the Second, Fifth, and Fourteenth Amendments and seeking preliminary relief from this Court is necessary.
- 3. On May 25, 2017, after providing notice to counsel for Defendant Becerra, Plaintiffs filed an ex parte application for order shortening time to hear Plaintiffs' Motion for Preliminary Injunction. The Court has not yet ruled on that application, and counsel for Defendant Becerra has indicated that he would oppose it.

### [Common Use of Magazines Over Ten Rounds]

- 4. A true and correct copy of pages 407-99 from *Gun Digest* 2013 (Jerry Lee ed., 67th ed. 2012), which identify the magazine capacities for a variety of common handguns and rifles, is attached as **Exhibit E.** *Gun Digest* is a standard resource for gun dealers and buyers alike to provide a comprehensive overview of the firearms and related items available to retail buyers. Helsley Decl. ¶ 1.
  - 5. True and correct copies of pages from the current websites of various

1	firearm manufacturers advertising firearms for self-defense purposes, and the
2	specifications demonstrating these firearms have a magazine capacity exceeding ten
3	rounds, are attached as Exhibit F. See Glock "Safe Action" Gen4 Pistols, Glock,
4	https://us.glock.com/documents/BG_Gen4_6_2010_EN_MAIL.pdf (last visited May 25,
5	2017) (specifications for the model 17, 19, 22, and 23 pistols, each equipped standard
6	with 17, 15, 15, and 13-round magazines, respectively, and all marketed as ideal for
7	personal defense); M&P®9 M2.0 <sup>TM</sup> , Smith & Wesson, <a href="https://www.smith-">https://www.smith-</a>
8	wesson.com/firearms/mp-9-m20-1 (last visited May 25, 2017) (marketed as ideal for
9	home and personal protection and equipped standard with a 17-round magazine); CZ 75

- 7. A true and correct copy of pages 73-97 from *The Complete Book of Autopistols: 2013 Buyer's Guide* (2013), identifying various models of handguns for sale to the public that come standard with magazines greater than ten rounds, is attached as **Exhibit G**.

### [Historical Development and Prevalence of Magazines Over Ten Rounds]

- 8. A true and correct copy of David B. Kopel, *The History of Firearm Magazines and Magazine Prohibitions*, 78 Albany L. Rev. 849, is attached as **Exhibit H**. Mr. Kopel's work provides a comprehensive analysis of the history and prevalence of firearms and magazines with capacities over ten rounds, as well as the dearth of historical antecedents to California's ban on the possession of magazines over ten rounds.
- 9. A true and correct copy of pages 168-70 of Lewis Winant, *Firearms Curiosa* (2009) (1st pub. 1954) is attached as **Exhibit I**. These excerpts from this reference document the first known firearm able to fire more than ten rounds without reloading: a 16-shooter created around 1580 using "superposed" loads (each round stacked on top of the other).
- 10. A true and correct copy of pages 716-18 of Clayton E. Cramer & Joseph Olson, *Pistols, Crime, and Public Safety in Early America*, 44 Willamette L. Rev. 699 (2008) is attached as **Exhibit J**. These pages document the continued development of multi-shot firearms through the seventeenth and eighteenth centuries.
  - 11. A true and correct copy of pages 91-103 of Jim Garry, Weapons of the Lewis

and Clark Expedition (2012) is attached as Exhibit K. A true and correct copy of pages 69-70 of John Plaster, *The History of Sniping and Sharpshooting* (2008) is attached as Exhibit L. A true and correct copy of page 31 of Jim Supica, Doug Wicklund & Philip Shreier, *Treasures of the NRA National Firearms Museum* (2013) is attached as Exhibit M. A true and correct copy of the Wikipedia page for the Girandoni Air Rifle, <a href="http://en.wikipedia.org/wiki/Girandoni\_Air\_Rifle">http://en.wikipedia.org/wiki/Girandoni\_Air\_Rifle</a> (last visited May 18, 2017) is attached as Exhibit N. These resources document the Founding-era popularity of the Girandoni air rifle, with a 20- or 22-shot capacity, and detail its many uses.

- 12. A true and correct copy of pages 682-83 of Norm Flayderman, Flayderman's Guide to Antique American Firearms and Their Values (9th ed. 2007) is attached as **Exhibit O**. Flayderman's documents the introduction of the Jennings multishot flintlock rifle in 1821 which, according to the excerpts provided, allowed 12 shots without reloading.
- 13. A true and correct copy of page 33 of Jim Supica, Doug Wicklund & Philip Shreier, *Treasures of the NRA National Firearms Museum* (2013) is attached as **Exhibit P**. A true and correct copy of pages 148-49 and 167 of Jack Dunlap, *American British and Continental Pepperbox Firearms* (1964) is attached as **Exhibit Q**. A true and correct copy of page 250 from Lewis Winant, *Firearms Curiosa* (2009) (1st pub. 1954) is attached as **Exhibit R**. These sources document some advancements in pistol technology from the early 1800s that permitted more than ten shots to be fired without reloading, including a variety of "Pepperbox" pistols that had capacities ranging up to 18 and even 24 rounds.
- 14. A true and correct copy of pages 711, 713, and 716 of Norm Flayderman, Flayderman's Guide to Antique American Firearms and Their Values (9th ed. 2007) is attached as **Exhibit S**. These pages document several different firearm designs in the 1830s to 1850s that increased ammunition capacity beyond ten rounds.
- 15. A true and correct copy of pages 13 and 25 of Harold F. Williamson, Winchester: The Gun That Won the West (1952) is attached as **Exhibit T**. A true and

correct copy of pages 304-06 of Norm Flayderman, *Flayderman's Guide to Antique American Firearms and Their Values* (9th ed. 2007) is attached as **Exhibit U**. These sources document the development of the Volcanic Repeating Arms Company's lever action rifle in 1855 with up to a 30-round tubular magazine and its subsequent evolution into a 15-round Henry lever action rifle.

- 16. A true and correct copy of pages 11 and 32 of R.L. Wilson, Winchester: An American Legend (1991) is attached as Exhibit V. A true and correct copy of pages 128-29 of Louis A. Garavaglia & Charles G. Worman, Firearms of the American West (1985) is attached as Exhibit W. These sources further explain the evolution of the Henry rifle into the Winchester repeating rifle that could hold 17 rounds in the magazine and 1 in the chamber.
- 17. A true and correct copy of pages 307-12 of Norm Flayderman, Flayderman's Guide to Antique American Firearms and Their Values (9th ed. 2007) is attached as Exhibit X. A true and correct copy of pages 137, 1240-41 of the 2014 Standard Catalogue of Firearms (Jerry Lee ed. 2013) is attached as Exhibit Y. These sources document the historical popularity of the Winchester M1873 and then the M1892, lever action rifles holding 12 to 17 rounds in tubular magazines.
- 18. A true and correct copy of pages 122-23 of Norm Flayderman, Flayderman's Guide to Antique American Firearms and Their Values (9th ed. 2007) is attached as **Exhibit Z**. This reference documents the nineteenth-century popularity of the Colt Lightening rifle, a pump action firearm with a 15-round capacity.
- 19. A true and correct copy of pages 60-63, 67-71, 204-208, 244-45 of Lewis Winant, *Firearms Curiosa* (2009) (1st pub. 1954) is attached as **Exhibit AA**. These excerpts document the introduction of firearms with detachable box magazines in handguns in the 1850s, including Jarre harmonica pistol, patented in 1862.
- 20. A true and correct copy of pages 708-09 of the 2014 Standard Catalog of Firearms is attached as **Exhibit BB** (noting that semi-automatic pistols were introduced in the late nineteenth century, and companies had begun selling firearms and magazines

12 13

25 26

27 28 with capacities over ten rounds, including the Mauser C96 beginning in 1896).

- A true and correct copy of pages 191-92 of Jim Perkins, American Boys 21. Rifles 1890-1945 (1976) is attached as **Exhibit CC**. These pages explain that in 1911, Savage Repeating Arms Company introduced the Model 1911, a 20-shot repeater that was popular among boys and in shooting galleries.
- 22. A true and correct copy of page 84 of the 2014 Standard Catalog of Firearms (Jerry Lee ed. 2013) is attached as **Exhibit DD** (reflecting that, in 1927, the Auto Ordinance Company introduced a semi-automatic rifle that used a 30-round magazine).
- 23. A true and correct copy of page 859 of David B. Kopel, *The History of* Firearm Magazines and Magazine Prohibitions, 78 Albany L. Rev. 849, is attached as Exhibit EE (discussing the M-1 carbine, with standard magazines of 15 and 30 rounds, which was sold to millions of Americans by the Civilian Marksmanship Program, starting in 1963).
- 24. A true and correct copy of page 104 of Patrick Sweeney, Gun Digest Book of the AR-15 (2005) is attached Exhibit FF (stating that the Armalite 15 was brought to market in 1963 with a 20-round magazine; a 30-round magazine later appeared).
- A true and correct copy of page 294 of Gun Digest 24th Anniversary Deluxe 25. Edition (John T. Amber ed. 1969) is attached as Exhibit GG (listing several other firearms with magazines between 20 and 30 rounds available by 1969).
- A true and correct copy of page 1102 of 2014 Standard Catalogue of 26. Firearms (Jerry Lee ed. 2013) is attached as **Exhibit HH** (recounting the production of the M1A semi-automatic rifle with a 20-round detachable magazine). See also "M1A," Wikipedia, http://en.wikipedia.org/wiki/ M1A rifle (introduced in 1974) (last visited May 23, 2017).
- A true and correct copy of page 1173 of the 2014 Standard Catalog of 27. Firearms (Jerry Lee ed. 2013) is attached as **Exhibit II** (recounting the introduction of the Ruger Mini-14 in 1975 with manufacturer-supplied standard 5-, 10-, or 20-round

detachable magazines).

- 28. The following paragraphs introduce reference materials showing that the historical prevalence and ubiquity of citizen firearms with detachable magazines holding more than ten rounds were not limited to rifles:
  - A true and correct copy of pages 182-183, 432-433 of the 2014 Standard Catalogue of Firearms (Jerry Lee ed. 2013) is attached as Exhibit **JJ** (Browning Hi-Power pistol with 13-round detachable magazine).
  - A true and correct copy of pages 464-66 of the 2014 Standard b. Catalogue of Firearms (Jerry Lee ed. 2013) is attached as Exhibit KK (Spanish Gabilondo with 20-round "Plus Ultra" was introduced in 1925).
  - True and correct copies of pages 72-73 of the 2014 Standard Catalogue of Firearms and pages 216-17 of Joseph J. Shroeder, Jr., System Mauser, a Pictorial History of the Model 1896 Self-Loading Pistol (1967) are attached as Exhibit LL (Azul semi-automatic pistol with magazines of 10, 20, and 30 rounds entered the market in 1935). A true and correct copy of pages 121-26 of the 2014 Standard Catalogue of Firearms is attached as Exhibit MM (Beretta model 92 with a 16-round magazine entered the market in 1976).
  - A true and correct copy of page 184 of the 2014 Standard Catalogue d. of Firearms (Jerry Lee ed. 2013) is attached as **Exhibit NN** (The Browning Double Action with 14 rounds introduced in 1977).

### [Impact of Magazine Bans on Offensive and Defensive Gun Uses]

KAHR CM SERIES Caliber: 9mm (6+1), .40 S&W Barrel: 3". Weight: 15.9 oz. Length: 5.42" overall. Grips: Textured polymer with integral steel rails molded into frame. Sights: CM9093 - Pinned in polymer sight; PM9093 - Drift adjustable, white bar-dot combat. Features: A conventional rifled barrel instead of the match grade polygonal barrel on Kahr's PM series; the CM slide stop lever is MIM (metal-injectionmolded) instead of machined; the CM series slide has fewer machining operations and uses simple engraved markings instead of roll marking and finally the CM series are shipped with one magazine instead of two magazines. The CM9 slide is only .90 inch wide and machined from solid 416 stainless slide with a matte finish, each gun is shipped with one 6 rd stainless steel magazine with a flush baseplate. Magazines are USA made, plasma welded, tumbled to remove burrs and feature Wolff Gunsprings. The magazine catch in the polymer frame is all metal and will not wear out on the stainless steel magazine after extended use. Price: CM9093.

Barrel: 2.9". Weight: 20.5 oz. Length: 5.5" overall. Grips: Polymer. Sights: Contrast / SIGLITE night sights. Features: Unlike many small pistols, the P290 features drift adjustable sights in the standard SIG SAUER dovetails. This gives shooters the option of either standard contrast sights or SIGLITE® night sights. The slide is machined from a solid billet of stainless steel and is available in a natural stainless or a durable Nitron® coating. A reversible magazine catch is left-hand adjustable. Interchangeable grip panels allow for personalization as well as a custom fit. In addition to the standard polymer inserts, optional panels will be available in aluminum, G10 and wood. ...\$758.00 Price: Model 290-9-TSS .....\$786.00 Price: Model 290-9-BSS-L with laser sights . . . ### CZ 75 TS CZECHMATE

Caliber: 9mm Luger, 20-shot magazine. Barrel: 130mm. Weight: 1360 g Length: 266 mm overall. Features: The handgun is custombuilt, therefore the quality of workmanship is fully comparable with race pistols built directly to IPSC shooters wishes. Individual parts and components are excellently match fitted, broke-in and tested. Every handgun is outfitted with a four-port compensator, nut for shooting without a compensator, the slide stop with an extended finger piece, the slide stop without a finger plece, ergonomic grip panels from aluminium with a new type pitting and side mounting provision with the C-More red dot sight. For the shooting without a red dot sight there is included a standard target rear sight of Tactical Sports type, package contains also the front sight.

### CZ 75 TACTICAL SPORTS

Caliber: 9mm Luger and .40 S&W, 17-20-shot magazine capacity. Barrel: 114mm. Weight: 1270 g Length: 225 mm overall. Features: semi-automatic handgun with a locked breech. This pistol model is designed for competition shooting in accordance with world IPSC (International Practical Shooting Confederation) rules and regulations. The pistol allow rapid and accurate shooting within a very short time frame. The CZ 75 TS pistol model design stems from the standard CZ 75 model. However, this model feature number of special modifications, which are usually required for competitive handguns: - single-action trigger mechanism (SA) - match trigger made of plastic featuring option for trigger travel adjustments before discharge (using upper screw), and for overtravel (using bottom screw). The adjusting screws are set by the manufacturer - sporting hammer specially adapted for a reduced trigger pull weight - an extended magazine catch - grip panels made of walnut wood -guiding funnel made of plastic for quick inserting of the magazine into pistol's frame. Glossy blue slide, silver polycoat frame. Packaging includes 3 pcs of magazines.

Price: ..... \$1,272.00

### CZ 85 COMBAT

Caliber: 9mm Luger, 16-shot magazine. Barrel: 114mm. Welght: 1000 g Length: 206 mm overall. Features: The CZ 85 Combat modification was created as an extension to the CZ 85 model in its standard configuration with some additional special elements. The rear sight is adjustable for elevation and windage, and the trigger for overtravel regulation. An extended magazine catch, elimination of the magazine brake and ambidextrous controlling elements directly predispose this model for sport shooting competitions. Characteristic features of all versions A universal handgun for both left-handers and right-handers, The selective SA/DA firing mechanism, a large

Case5:13-cv-05807-RMW Document20-2 Filed12/23/13 Page3 of 33

## **HANDGUNS—Competition**

capacity doublecolumn magazine, a comfortable grip and balance in either hand lead to good results at instinctive shooting (without aiming). Low trigger pull weight and high accuracy of fire. A long service life and outstanding reliability - even when using various types of cartridges. The slide stays open after the last cartridge has been fired, suitable for COMBAT shooting. The sights are fitted with a three-dot illuminating system for better aiming in poor visibility conditions. The COMBAT version features an adjustable rear sight by means of micrometer screws. ..... \$615.00

#### DAN WESSON HAVOC

Caliber: 9mm Luger & .38 Super, 21-shot magazine capacity. Barrel: 4.25". Weight: 2.20 lbs. Length: 8" overall. Features: The HAVOC is based on an "All Steel" Hi-capacity version of the 1911 frame. It comes ready to dominate Open IPSC/USPSA division. The C-more mounting system offers the lowest possible mounting configuration possible, enabling extremely fast target acquisition. The barrel and compensator arrangement pairs the highest level of accuracy with the most effective compensator available. The combination of the all steel frame with industry leading parts delivers the most well balanced, softest shooting Open gun on the market.

Features: The MAYHEM is

DAN WESSON MAYHEM Caliber: .40 S&W. 18-

shot magazine capacity. Barrel: 6". Weight: 2.42 lbs. Length: 8.75" overall.

based on an "All Steel" Hi-capacity version of the 1911 frame. It comes ready to dominate Limited IPSC/USPSA division or fulfill the needs of anyone looking for a superbly accurate target grade 1911. Taking weight away from where you don't want it and adding it to where you do want it was the first priority in designing this handgun. The 6" bull barrel and the tactical rail add

to the static weight "good weight". We wanted a 6" long slide for the added sight radius and the enhanced pointability, but that would add to the "bad weight" so the 6" slide has been lightened to equal the weight of a 5". The result is a 6" long slide that balances and feels like a 5" but shoots like a 6". The combination of the all steel frame with industry leading parts delivers the most well balanced, softest shooting 6" limited gun on the market. \$3,899.00

### DAN WESSON TITAN

Caliber: 10mm, 21-shot magazine capacity. Barrel: 4.25". Weight: 1.62 lbs. Length: 8" overall. Features: The TITAN is based on an "All Steel" Hi-capacity version of the 1911 frame. Turning the most well known defensive pistol "1911" into a true combat handgun was no easy task. The rugged HD night sights are moved forward and recessed deep in the slide yielding target accuracy and extreme durability. The Snake Scale serrations' aggressive 25 lpi checkening, and the custom competition G-10 grips ensure controllability even in the harshest of conditions. The combination of the all steel frame, bull barrel, and tactical rail enhance the balance and durability of the most formidable target grade Combat handgun on the market

### EAA WITNESS ELITE GOLD TEAM AUTO

### STI STEELMASTER

Caliber: 9mm minor, comes with one 126mm magazine. Barrel: 4.15". Weight: 38.9 oz. Length: 9.5' overall. Features: Based on the renowned STI race pistol design, the SteelMaster is a shorter and lighter pistol that allows for faster target acquisition with reduced muzzle flip and dip. Designed to shoot factory 9mm (minor) ammo, this gun delivers all the advantages of a full size race pistol in a smaller, lighter, faster reacting, and less violent package. The Steelmaster is built on the patented modular steel frame with polymer grip. It has a 4.15" classic slide which has been flat topped. Slide lightening cuts on the front and rear further reduce weight while "Sabertooth" serrations further enhance the aesthtics of this superior pistol. It also uses the innovative Trubor compensated barrel which has been designed

WESSON MODEL **GOVENOR™** REVOLVER Caliber: .410 2 1/2", 45 ACP, .45 Colt; 6 rounds. Barrel: 2.75°. Weight: 35 oz. (2.5" barrel). Length: 7.5", (2.5" barrel). Grip: Synthetic. Sights: Front: Tritium Night Sight (Dovetailed), Rear: fixed. Grips: Synthetic. Finish: Matte Black. Weight: 29.6 oz. Features: Capable of chambering a mixture of .45 Colt, .45 ACP and .410 gauge 2 1/2-inch shotshells, the Governor is suited for both close and distant encounters, allowing users to customize

the load to their preference. The shooter's choice of ammunition is housed in the revolver's six-shot stainless PVD-coated cylinder, which adds an extra level of protection to this already rugged platform. On top of the revolver's compact 2-3/4" barrel, Smith & Wesson has added a dovetailed Tritium front night sight for enhanced accuracy in low-light conditions, while the Governor's fixed rear sight is aptly suited for this self-defense handgun. The Governor measures 8-1/2\* inches in overall length along with a width of 1-3/4\*, Carry ability of this revolver has been further enhanced with the Governor's unloaded weight of 29.6 ounces and standard matte black finish designed to reduce unwanted glare while adding an all-business like demeanor to this self-defense handgun. On the lower portion of the frame, the revolver will be

packaged with either shock absorbing synthetic grips or with factory-installed laser grips from Crimson Trace®. Accurate, rugged and reliable, the Governor is further enhanced by Smith & Wesson's renowned smooth double-action and crisp single-action trigger pull. The new revolver will also come standard with 2-round and 6-round moon clips. Made in U.S,A. by Smith & Wesson.

#### COLT NEW FRONTIER REVOLVER

Caliber: .44 Special and .45 Colt. Barrel: 4-3/4\*, 5-1/2\*, and 7-1/2\*. Grip: Walnut. Features: The legend of Colt continues in the New Frontier®, Single Action Army. From 1890 to 1898, Colt manufactured a variation of the venerable Single Action Army with a uniquely different profile. The "Flattop Target Model" was fitted with an adjustable leaf rear sight and blade front sights. Colt has taken this concept several steps further to bring shooters a reintroduction of a Colt classic. The New Frontier has that sleek flattop design with an adjustable rear sight for windage and elevation and a target ready ramp style front sight. The guns are meticulously finished in Colt Royal Blue on both the barrel and cylinder, with a case colored frame.

CA), and the new .460 S&W Magnum - as well as .454
Casull. Barrel: 6.5", 7.5", and 10". Welght: 3.6 lbs. - 5.3

lbs. Grips: Black rubber. Sights: Rear sights are the same configuration as the Ruger revolvers. Many after-market rear sights will fit the BFR. Front sights are machined by Magnum in four heights and anodized flat black. The four heights accommodate all shooting styles, barrel lengths and calibers. All sights are interchangeable with each BFR's. Features: Crafted in the U.S.A., the BFR single action 5-shot stainless steel revolver frames are CNC machined inside and out from a "pre-heat treated" investment casting. This is done to prevent warping and dimensional changes or shifting that occurs during the heat treat process. The result is a dimensionally perfect-machined frame. Magnum Research designed the frame with large calibers and large recoil in mind, built to close tolerances to handle the pressure of true big-bore calibers. The BFR is equiped with Transfer Bar. This is a safety feature that allows the gun to be carried safely with all five chambers loaded. The transfer bar allows the revolver to fire ONLY after the hammer has been fully cocked and trigger pulled. If the revolver is dropped or the hammer slips while in the process of cocking it the gun will not accidentally discharge.

NAVY ARMS BISLEY MODEL SINGLE-ACTION REVOLVER

### **PUMA BOUNTY HUNTER RIFLE**

Caliber: .44/40, .44 Mag. and .45 Colt, 6-shot magazine capacity. Barrel: 12". Weight: 4.5 lbs. Length: 24". Stock: Walnut. Sights: Fixed sights. Features: A piece of 1950's TV nostalgia, the Bounty Hunter is a reproduction of the gun carried by Western character Josh Randall in the series "Wanted: Dead or Alive". The Bounty Hunter is based on a Model 92 rifle, but is considered by Federal Law as a pistol, because it is built from the ground up as a handgun. Manufactured in the U.S.A. by Chiappa Firearms of Dayton, OH, the Bounty Hunter features a 12" barrel and 6 round tubular magazine. At just 24" OAL, the Bounty Hunter makes an ideal pack gun or camp defense pistol. The Bounty Hunter has a teardrop shaped loop lever and is built with the same fit, finish and high grade Italian walnut stocks as our Puma M-92 and M-86 rifles.

## **GLOCK Gen4 Compatibility**

GLOCK "Safe Action" pistols only require 34 components - clearly less than conventional pistols. This simplifies spare parts logistics, reduces susceptibility to errors, reduces maintenance costs and above all results in unsurpassed parts compatibility among various GLOCK pistol models.

### SAFETY RULES

Handle all firearms as if they were loaded.

Always keep the firearm pointed in a safe direction.

Keep your finger out of the gun's trigger guard and off the trigger until you have aligned the gun's sights on a safe target and you have made the decision to fire.

Always be certain that your target and the surrounding area are safe before firing.

Whenever you handle a firearm, the first thing you should do (while keeping it pointed in a safe direction with your finger outside the trigger guard) is open the action to determine whether or not the firearm is loaded.

horoughly read the instruction manual supplied with your firearm.

ual supplied with your firearm.
Before firing your weapon, you should routinely make sure that your firearm is in good working order and that the barrel is clear of dirt and obstructions.

Only use ammunition recommended by the firearm manufacturer, and always be certain that the ammunition matches the caliber of your gun.

SLOCK pistols are equipped with the Safe Action System, a fully automatic safety system consisting of three passive, independently operating mechanical safeties, which sequentially disengage when the trigger is pulled and automatically reengage when the trigger is released.

Quality ear and eye protection should always be worn when shooting or observing.

Never use firearms while under the influence of drugs or alcohol.

All firearms should be stored unloaded and secured in a safe storage case, inaccessible to children and untrained adults.

The transportation of firearms is

The transportation of firearms is regulated by Federal, State and local laws. Always transport your firearm in a safe, unloaded condition and in accordance with applicable laws.

VEXT GENERATION OF PERFECTION

2 Firing Pin Safety

Drop Safety

## 1 Trigger Safety

The trigger safety is incorporated into the trigger in the form of a lever and when in the forward position, blocks the trigger from moving rearward. To fire the pistol, the trigger safety and the trigger itself, must be deliberately depressed at the same time. If the trigger safety is not depressed, the trigger will not move rearwards and allow the pistol to fire.

## 2 Firing Pin Safety

The spring-loaded firing pin safety projects into the firing pin channel and mechanically blocks the firing pin from moving forward. When the trigger is being moved rearwards, a vertical extension of the trigger bar pushes the firing pin safety upwards, clearing the firing pin channel. During the slide cycling process, the firing pin safety automatically reengages.

### 3 Drop Safety

The rear part of the trigger bar, which has a cruciform shape, rests with both arms on the drop safety shelf located in the trigger mechanism housing. When the trigger is pulled to the rear, the trigger bar begins to move off until finally separating from the firing pin lug. During the slide cycling process, the trigger bar is lifted and caught by the firing pin lug. The trigger bar is reengaged by the firing pin lug.

### **OVERVIEW**

The M&P M2.0 pistol, the newest innovation to the respected M&P polymer pistol line. Designed for personal, sporting, and professional use, the M&P M2.0 delivers an entirely new platform, introducing innovative features in nearly every aspect of the pistol, including trigger, grip, frame, and finish. Highlights of the M&P M2.0 pistol include an extended stainless-steel chassis and high grip to barrel bore axis ratio for reduced muzzle rise and faster aim recovery. The M&P M2.0 pistol further improves performance with a fine-tuned, crisper trigger, lighter pull and a tactile and audible reset. The pistol, available in three calibers, includes an aggressively-textured grip and four interchangeable palmswell inserts for optimal hand-fit and trigger reach. The striker-fire, semi-automatic polymer pistol is available in matte black or FDE – Flat Dark Earth – finishes, and includes two magazines, a limited lifetime warranty and a lifetime service policy.

### **Features**

- High grip to barrel bore axis makes the M&P pistol more comfortable to shoot reducing muzzle rise and allowing for faster aim recovery.
- Proven optimal 18-degree grip angle for natural point of aim.
- Four interchangeable palmswell grip inserts for optimal hand fit and trigger reach S, M, ML, L.
- · Aggressive grip texture for enhanced control.
- New M&P M2.0 crisp trigger with lighter trigger pull.
- · Tactile and audible trigger reset.
- Accurate 1 in 10" twist M&P M2.0 barrel.
- Extended rigid embedded stainless steel chassis to reduce flex and torque when firing.
- Armornite® durable corrosion resistant finish.

ALL BACKED BY OUR SMITH & WESSON LIFETIME SERVICE POLICY.

Availability subject to applicable federal, state and local laws, regulations, and ordinances.

**CZ 75 B** 

# PRODUCT DESCRIPTION

Designed in 1975, the CZ 75 is the flagship model of the CZ handgun line with over one million

produced. An entire family of pistols is available based on the basic CZ 75 design: compacts, decockers, single action only, ambidextrous, alloy frames as well as competition pistols.

The 75 B features a steel frame, a black polycoat finish, 3 dot sights, 16+1 9mm capacity (10+1 in .40 S&W) and, of course, the ergonomics and DA/SA action that have made it the most copied handgun design second only to the 1911. The 'B' designation is an indicator that the model is equipped with a firing pin block safety.

CZ 75 B is used by more governments, militaries, police and security agencies than any other pistol in the world. The CZ 75 is quite possibly the perfect pistol.

- All steel construction (except alloy framed compacts)
- · High capacity double column magazines
- Hammer forged barrels
- Ergonomic grip and controls
- Unparalleled accuracy
- Slide-in-frame design for better recoil control
- 3 dot sighting system (Tritium night sights available)
- Smooth double action and crisp single action
- · Extended service life due to advanced design and superior materials
- · Firing pin block safety

# **SPECIFICATIONS**

CZ 75 B - 9mm CZ 75 B - .40 S&W CZ 75 B - 9mm (low capacity)

Purpose	Home Defense
Chambering	9mm Luger
Magazine Capacity	16
Frame	Steel
Grips	Plastic
Trigger Mech	DA/SA
Sights	Fixed Three-Dot
Barrel	Cold Hammer Forged
Barrel Length	4.6
Weight	2.2 lbs
Overall Length	8.1 in
Height	5.4 in
Width	1.4 in
Safety	Manual Safety, Safety Stop on Hamme

I have a CZ 75 B from 2007 in .40 S&W. I tell ya' what... there is no finer firearm manufacturer than CZ. It was the first rifle I owned and now the first pistol I owned. This handgun is truly superb.

# Mike - April 4, 2016:

There's nothing better than the feel of this classic 9mm handgun in your hand. Shoots incredibly accurate, even for a beginner and is extremely reliable.

# Andy Martin - March 28, 2016:

I own three 9mm Glocks. G26, G17,G19

I target shoot almost everyday. Its an addiction. I shoot in extremely tight groups with my Glocks. I tend to pull all three of my Glocks 2 to 3 inches dead left of bullseye at ten yards out. One day, out of frustration, I asked asked the range attendent for the most accurate 9mm pistol they have so that I could make a comparison. I expected him to suggest some sort of competition pistol. Instead he handed me a CZ 75b. I can easily say that I have never shot a more accurate gun. Every round hit dead center of bullseye. I put the CZ 75b down and then fired off a few rounds with my full size Glock 17. Making sure as to not change my technique at all, I shot rounds consistently 2 to 3 inches left of where I was aiming. I tip my hat to the CZ 75b.

## Marcus Fidel – March 19, 2016:

I own a cz 75 B and am in love with it. It shoots tight groups and fits in my hand well. Frame is heavy enough for second shot acquisitions that are reliable because the recoil is well controlled. This is my sport, carry and home defense pistol and it excels in all three areas. I trust my life on the reliability and accuracy of this firearm.

# Nicholas Dearman – March 15, 2016:

As of three months ago I was in the market for a new pistol. Still new to the scene the only pistol I had at the time was a Springfield XDs 3.3" 9mm but I wanted a full size 9mm. Something heavy, reliable, and accurate. Which is why I went to my local shop to buy a Beretta M92A1. However when I asked the lady behind the counter if I could see one she brought me out the CZ 75B instead and told me "Why don't you try this one first." It felt as if the grip was molded and made specifically for my hand! I tried the Beretta afterwards and quickly "tossed" it to the side. I love my CZ! Now I'm looking to replace my XDs for the CZ 75 Compact as my EDC. I am a CZ member for life!

# **Brian D.** – February 21, 2016:

I wasn't looking to purchase another gun. My collection consists of a Ruger SR-22 for plinking and an LCP 380 for concealed carry. I like guns in general but don't care to own a whole lot. if they are to be owned they better have some redeeming quality.

While at the gun shop getting ammo I asked to see the CZ-75 since I had read about it being one of the best handguns available and it felt good. Then the store owner showed me a newer CZ tactical model and it didn't do much. He proceeded to show me the precision and smoothness of the 75B and I said wrap it up!

The thing fires so smoothly and is a pleasure to look at and handle. Every day I have had off since purchasing I have taken it out shooting.

Beautiful guns guys!

# Fred WG - February 15, 2016:

Just tried my CZ -75- B, real sweet,accurate,great feel,and smooth action. The only problem I had was getting it out of the case, didn't see the spot that said PUSH. Get it out and enjoy your CZ-75

# Martin Watts - January 19, 2016:

Purchased my CZ75 when I found our secret service agents were using them. Pre-import-ban first generation. Was a little put off by it's "painted" finish, having been accustomed to the flawless bluing on the Colt model70 government 9mm I traded in on it,but have since come to love it. The pistol was insanely accurate right out of the box, and reliability is superb! After nearly 40 years, and thousands of rounds run through it, it is still one of my most accurate 9mm pistols and reliability is as good as the first day out of the box! I own a fair number of pistols in various calibers, and while many look much nicer, none are as finely designed and crafted as my CZ75. I have purchased several other CZ firearms based on this experience, and will most certainly be purchasing more on the future. Thanks, CZ!!

#### Albert Sievers – December 13, 2015:

Years ago I was shopping for a gun. I shot Glocks, Berettas, Rugers. At the gun store I rented a CZ75B at the suggestion of one of the salesmen.

The accuracy and comfort of the CZ was so impressive I bought one.

I have let others shoot it, and every person loved it.

At an indoor range I offered the rangemaster to try it. I had the shootnsee 6" target 20 yards out.

"Do you usually train at that distance?" I said "Just see how it goes."

He was duly impressed, and probably surprised at how well he hit the target.

CZ is to guns like BMW is to cars; others are good, but you won't be disappointed with the CZ. I love mine and it's hard to resist collecting them.

# Joe Manis – December 9, 2015:

Bought my first CZ 75 (pre B) 20 years ago.

A used piece with a lot of rounds through it.

most accurate pistol I have ever owned. But they do wear out. So now I am shooting the 75 Compact, Same pistol, just shorter barrel but still one of the best point and shoot pistols on the market.

# John Barker - November 29, 2015:

My first pistol, the CZ 75B (9mm) has provided me with endless fun on the range and peace of mind at home for about five years now. Prior to owning this pistol, I had fond memories of growing up shooting my father's trusted and reliable Browning Hi-Power. I learned gun safety and developed a love for range shooting with his classic Browning (which is still going strong after untold 1000's of rounds). I initially rented a CZ 75B at an indoor range in Western NC on the advice of the proprietor. That day I spent a few hours and a couple hundred rounds admiring the rental pistol's accuracy, reliability and balance, but truly it was love after my first tight grouping. Add to this the 16+1 capacity, and I didn't consider any other makes or models afterward. Flash forward five years and dozens of range sessions later, and my 75B is still just as reliable and accurate as it was out of the box. With regular cleanings/maintenance and the use of mid- to high-grade ammunition, this gun has never jammed on me. Like the Browning is to my father, this CZ 75B is destined to be my own personal favorite many years (and rounds) from now. A beautiful piece of precision craftmanship and highly recommended!

#### Mark D. Aul-Professional Gun-Smith - November 19, 2015:

I had a Deputy US Marshal see me about upgrading her CZ-75 P01 in 9mm. I have to commend the parts dept for getting me the parts I needed in a very timely manner. She wanted full length metal recoil rod new recoil spring slide stop and the dark coco-bolo wooden grips. she was very pleased Thanks again

# Jimmy Perez – November 12, 2015:

I brought my first cz75b in a pawn shop in the late 90s in a 9mm I lake it so much very time I went target shooting I took my cz and left my eaa witness 45 at home I liked the feel of the cz so I had to buy another one but in 40s&w best choice ever made

# Zack H Duncan IV - October 7, 2015:

purchased my CZ 75B in Bremerhafen Germany through my rod and gun club in 1988 and have had it ever since.

It is without a doubt the finest handgun I have ever fired. I will own it until the day I die!!!

# Donald Bondick - September 6, 2015:

I first owned and fired a CZ many, many years ago and am fortunate to have purchased a brand new CZ-USA pistol for classroom instruction for NRA Basic Pistol Shooting Course and for Illinois Concealed Carry. I'm positive it will last for generations to come and will be loved by all.

## Senahid M - August 23, 2015:

My first CZ and my first pistol in general. It is really hard to say something about this gun and stop there. There is so much to say. I really hate the fact that I see so many clones of CZ 75, whose owners might not even never heard of CZ. But, he knows he is shooting "amazing EAA" Witness" and swears it's the most accurate...List of copied guns is too long to go that route. But it is actually proof that it's the platform that's best sought after. I will never sell my 75B, unless I am replacing it with new one. Lots of time spent with this model, 10's of thousands of rounds fired. After I shot couple of thousands through 75B barrel, I was bragging about it with my friends. One of them, used to be an officer in former communist country. He told me "I am going to stand and allow you to shoot at me at 60 meters" I just started to laugh, knowing that from that distance, I could pick and chose which body part I would shoot. I guess only gun he handled was TT-33, which is nightmare to shoot. Eventually, we were celebrating Independence day in mu home country. We were outside the city, in the hills. I let that friend shoot my CZ 75B before I showed him how far I have gotten with practice. After about 20 rounds from 20 meters or so, he looked at his target and just said "I'll be d...." Then, I asked him if he was still ready for "60 meters challenge". He just shook his head in disbelief. There, I was prod that I made best choice there was at that time. Now, I would only put one CZ model little ahead of 75B. But it's not about that now, so let's stick with 75B.

## clyde osborne - August 16, 2015:

I have been a fan of the c z design for several years. I have owned several of the clones because of the lower prices. But I since moved up to real deal . I now own a C Z 75 B and C Z 75 D compact ( my EDC )!! I love these gun's, they are of better quality than any of the clones and well worth the price difference !! If you are thinking about getting one of these , quit thinking and do it , you will be glad you did !!

# Christopher Simon - July 30, 2015:

I rented a CZ 75B at the indoor gun range I belong to and was pleasantly surprised after my first shot. The standard pistol target was placed out at 30 feet and my first round went thru the 8 ring. I consider myself to be a novice shooter, and was so astonished by the shot placement I had to reel in the target to make sure my eyes were seeing right. I was sold out right; this will be my next handgun purchase.

# ac guevara - July 16, 2015:

JUST bought my second cz 75 and really do think these pistols are top notch guns. I have the cz 75b and also the cz 75 p-01. I live in California so I can not get the other models. I enjoy these guns so much and have not had any problems of any type on both guns. i do have other guns ,S&W shield,springfield XD,H&K USP,SIG SAUER 226 &220.And of course COLT 45 ACP. I LOVE GUNS AS YOU CAN SEE BUT THE CZ PISTOLS ARE MY GO TO PISTOL.

## Christopher S. – June 25, 2015:

Excellent firearm. I rented the 75 B model at the gun range I belong to and sent the pistol target out to 30 feet. On my first shot I had to bring the target in because I hit the black and with the dark range background could not see where I hit. I did not have to be concerned

5/17/2017 Case 3:107ase:01170:1576(BHELNO)11/05/2001(3):1102:10156723.5586(42):1015626(1/1/7.56-3):01170:1576(BHELNO)11/05/2001(3):1102:10156723.5586(42):10156/216/11/7.56-3(1):01170:1576(BHELNO)11/05/2001(3):1102:10156723.5586(42):10156/216/11/7.56-3(1):01170:1576(BHELNO)11/05/2001(3):1102:10156723.5586(42):10156/216/11/7.56-3(1):01170:1576(BHELNO)11/05/2001(3):1102:10156723.5586(42):10156/216/11/7.56-3(1):01170:1576(BHELNO)11/05/2001(3):1102:10156723.5586(42):10156/210156/21/05/2001(3):1102:10156723.5586(42):10156/21/05/

about where to hold the sights to hit center, I just lined up and shot. I sure was impressed with the accuracy of this pistol. All rounds were in the black, and this was with a range rental gun. I'm sold period the CZ 75 will be my next purchase and if I don't get the Classic B model it will be because I bought the upgraded SP-01.

# Garry McClanahan - June 7, 2015:

I bought a new CZ 75B several years ago because I got it really cheap as mainly a cheap practice gun because I didn't know much about them. Now after 18,000+ rounds thru the years I had to buy another one because quite simply my first one has been flawlessly reliable darn accurate and feels great in the hand.

# Roger Salter – May 24, 2015:

Great gun, I own some expensive 1911's, but this is by far the most reliable handgun I own. Only addition I have made to it is a set of Hogue grips. Recently qualified for a conceal permit with this gun, completly blew the bullseye out of the target. Looking to buy my next CZ a sub compact in a few weeks. keep up the good work CZ.

# Ash Boysel - May 2, 2015:

FANTASTIC gun love everything about it, had a CZ in a 22 long gun and when it was time to get a pistol I went with the CZ in 9mm none better

# Jon Kellogg – February 20, 2015:

I had one of the Italian copies of the CZ75 years ago and had to sell it. I liked it so much I decided to get the original this time around and "Oh Baby" am I happy. I put the factory cocobolo grips on mine on my second trip to the range and it was love at first sight. My 75b is

one of the finest firearms I have ever had the pleasure to fire, its a keeper.

#### Derald Cox - December 14, 2014:

CZ75B A fine fire arm for about 500 bucks new. many others of about 1000 bucks or more move over CZ has my vote, hands down. MY only regret, I did not purchase one long before now.

#### Paul Martin – November 26, 2014:

Traded my SR9 in today for a CZ75B. I was happy with my SR9 but never really liked the double action trigger, especially after I bought a SR22 with SA/DA action. I started looking for a SA/DA 9mm and was leaning towards a Berretta. Tried one out at my armory/range and it shot well but no better than my SR9. One of the salesman then showed me the CZ75B and after reading as many reviews as I could find I went back and bought one this morning. Shot 100 rounds with way more accuracy than was typical with my SR9 and even tried shooting out to 50' with all ten shots on the 12" target. I know that isn't match quality shooting but for me a long way out. All in all, couldn't be happier with the acquisition.

# Jonathan Chandler - September 30, 2014:

This was my first hand gun and my first CZ. I've shot a few other brands, but I can't say enough about this particular model. I love it, and wouldn't replace it with anything else. A bit heavy and bulky for me to carry based on my frame size, but if I could, I'd be very happy. Extremely, no, ridiculously accurate and easy to maintain. The 75B weight distribution with a full clip is spot on and the design isn't over the top or under promised. It's just right! Love it.

Jon Frost - September 11, 2014:

I have a 75bd Police that I got from CZ Custom with some trigger work, etc. Exceptional gun. Accurate, easy to shoot, and zero malfunctions. I use it in USPSA, liked it so much I bought a Tactical Sport, P-09, and P-07. Saving my pennies for my next CZ!!

# Kerry Lancaster - September 3, 2014:

My first 9mm(75B) pistol. Highly accurate and feels great in my hand. My wife loves this gun also.

every one I let shoot this gun is so impressed that five of my friends bought CZ,s. A total of Nine and my next is the 97BD.
