Gun Digest

1985/39th Annual Edition

ALL NEW: Technical Articles by Qualified Experts; Field Tests and Evaluations by Shooters; History and Analysis for Students of the Gun.
PLUS: The most comprehensive and easy to use catalog of firearms and accessories available today.

Gun Digest[®]

**39th Anniversary
1985 Annual Edition**

EDITED BY KEN WARNER

DBI BOOKS, INC., NORTHFIELD, ILL.

ABOUT OUR COVER

For 1985, the familiar Sturm, Ruger logo and superb cutaway art is found on the covers of this, the 39th Annual Edition of GUN DIGEST.

At the top you'll see a cutaway of the popular Ruger "Red Label" 12-gauge shotgun. In the center is a rendering of the Ruger Mark II, 22-caliber semi-auto pistol. The Mark II is the offspring of the tried and true Ruger Standard Auto, the gun that made the name "Ruger" one of the most recognized names in American gun-making history. At the bottom is the Ruger Redhawk, a double action, large-framed revolver that's available in 357, 41 or 44 Magnum.

Ruger products have graced the covers of a number of GUN DIGESTS over the past four decades. As most of you know, many of those Ruger covers have featured cutaway artwork. Because of the letters we've received over the past years, we thought you'd be happy to know that Ruger is finally offering reprints of some of the cutaway art so synonymous with that company's well-known line of products. Limited Edition sets of full-color lithos by artist James Kritz are available directly from Sturm, Ruger. Each set contains four cutaway prints, one each of the M-77, the No. 1, the Mini-14 and the Red Label Over & Under.

GUNDEX[®]

A listing of all the guns in the catalog, by name and model, alphabetically and numerically.

This feature of our catalog speeds up the chore of finding the basic facts on a given firearm for the experienced. And it may make the contents of the catalog far more available to the inexperienced.

That is our intention.

To use it, you need the manufacturer's name and model designation. That designation might be a number, as in Winchester Model 94, or it might be a name, as in Colt Python. And you need to know the alphabet.

The manufacturers are listed alphabetically and the entry un-

der each manufacturer is arranged in the quickest way—numbers are in numerical order, names are alphabetical.

It's all very straightforward. It is all pretty voluminous, as well. There are nearly 1400 entries (1397 to be exact). At 255 lines per page, what with headings and all, the GUNDEX[®] is nine pages long.

We have tried to make it easy to find, too—just look for the black GUNDEX[®] label along the edge of the page, flip to there, and get your page number in short order.
