

DECLARATION OF SUSAN BROWN

I, Susan Brown, declare that if called and sworn, I would state the following under oath which is based on my personal knowledge:

1. I am over the age of 18 and am not a party to this action.

2. From December 19, 2013 through December 20, 2019, I was employed by the Los Angeles County Sheriff's Department as the Station Property and Evidence Custodian for the Palmdale Sheriff's Station.

3. In that capacity, my duties included processing, identifying, cataloging, data entry and maintaining the chain of custody for evidence procured by the Sheriff's Department. My duties also included transporting evidence to and from court appearances and testifying before courts of law regarding the chain of custody for evidence presented to the court.

4. I was the Palmdale Station's property and evidence custodian at the time of the seizure of property from Manuel Fernandez (Uniform Report No. 918-08710-2646-151), at the time of the transfer of the seized property to the Central Property and Evidence Warehouse; at the time of the transfer from the Central Property and Evidence Warehouse back to the Palmdale Station; and at the time of the release of the evidence to the agent for Ms. Ana Fernandez.

5. On June 14, 2018, I was informed that the Palmdale detectives executed a search warrant on the property of Manuel Fernandez who was a person prohibited by law from owning firearms. The detectives arrived at Fernandez's residence and

1 during the search, discovered that there were hundreds of firearms at the location, as
2 opposed to the forty or so, that they expected to be there.

3 6. We were instructed to contact the Sheriff's Department's Central Property
4 and Evidence warehouse (CPE) in Whittier to come and retrieve the property seized
5 and to process it. The Palmdale Sheriff's Station did not have the sufficient staff to
6 process the firearms, nor was there sufficient room to store the firearms at the
7 station for an extended period of time.
8

9
10 7. We were informed that CPE did not have the manpower or capacity to
11 retrieve that volume of firearms and that we would have to process them at the
12 Palmdale Station.
13

14 8. As the deputies delivered the weapons to the station, they removed
15 more than 400 long guns, handguns, and gun accessories from the trucks and radio
16 cars where they had been loaded. The outdoor covered patio was the only space
17 large enough at the station to accommodate the overwhelming number of weapons.
18 Each weapon was placed on the ground and facing in a direction were one could
19 observe that there was no live ammunition round in the chamber. A true and correct
20 photograph of the firearms in the patio area on June 14, 2018, is attached hereto and
21 incorporate by reference herein as Exhibit A.
22

23
24 9. After all of the weapons were removed from the vehicles, and with the
25 help of sworn staff (deputies), we transported the weapons a few at-a-time into the
26 station's evidence room for processing.
27

1 10. The Department conducted two additional searches of Mr. Fernandez's
2 residence and other locations associated with Mr. Fernandez. At each search,
3 additional firearms were seized and processed. In total, the Department seized 517
4 items including 493 firearms, and firearm parts in addition to other evidence from
5 locations associated with Manuel Fernandez.
6

7 11. Processing each weapon entailed the following: Clearing the weapon to
8 make sure that there are no live rounds in the chamber, and no magazines with
9 ammunition inside the weapon. Because firearms are deadly weapons, each weapon
10 must be cleared, even if another person states that they already cleared the weapon.
11

12 12. After the weapon is cleared the process of entering information into the
13 various databases began. First, the deputies completed the "Firearm Entry Forms"
14 with the data necessary for entry into the Sheriff's Department's computer system
15 known as PRELIMS (Property Evidence and Lab Information System), which is
16 also the Sheriff's Department's chain-of-custody system for evidence. A true and
17 correct copy of the PRELIMS printout for the Manuel Fernandez seizures is
18 attached hereto and incorporated by reference herein as Exhibit B.
19
20
21

22 13. PRELIMS requires that each long gun be measured. We used a tape
23 measure to measure each gun. The database requires that the size, model, make,
24 manufacturer and serial number of each firearm be entered.
25

26 14. For many of the Fernandez firearms, I had not seen the type of firearms
27 before, and was unfamiliar with the manufacturer. Also, many of the firearms came
28

1 from other countries and contained writing in Arabic, German, Spanish and various
2 other languages that I could not understand. Several of these foreign weapons did
3 not have traditional serial numbers, which is a required entry for the Department of
4 Justice's database.
5

6 15. For each of these "problem" weapons, I spent hours researching the
7 weapons online by their physical characteristics. For those that were still
8 unidentifiable, I had to contact personnel at the Sheriff's Department's Crime Lab
9 and the Department of Justice (DOJ) to assist me with the identifying the weapon
10 and/locating identifiable serial numbers. Some of my email communications for
11 identifying the "problem" firearms are collectively attached hereto and incorporated
12 by reference herein as Ex. C.
13
14

15 16. After the PRELIMS entry is complete, a barcode is assigned to each item
16 of evidence. From there, we generate an evidence label with the barcode and affix it
17 to the particular item of evidence. Each firearm, firearm part and other evidence
18 seized in this case had its own separate bar code and evidence tag.
19

20 17. The process of entering the information into the PRELIMS system was
21 done by myself with the assistance of the following deputy personnel: Deputy
22 Richard Leon (June 14, 18 and August 16, 2018); Kyle Dingman (June 14, 2018);
23 Deputy Nicholas Saylor (June 15, 2018); Deputy Murray Jacob (June 18 and July
24 11, 2018); Deputy David Roach (June 19, 2018); Deputy Salvador Moreno (June 22,
25 2018); Deputy Jason Ames (June 22, and 25, 2018); Deputy John Roth (June 28,
26
27
28

1 2018); Deputy Joshua Nemeth (June 15 and 18, 2018); Deputy Kevin Bowes (June
2 15 and 16, 2018).

3 18. On each of these days, the deputies worked their entire 8 hour shifts
4 processing the weapons.
5

6 19. I then reviewed each PRELIMS entry made by deputy personnel for
7 accuracy. Given that most, if not all of the deputies had never processed firearm
8 information prior to this date, I had to go back and correct many of the incorrect
9 entries made.
10

11 20. After the information was entered into PRELIMS, the station personnel
12 then had to enter the information into the AFS (Automated Firearm System)
13 computer system which is a computer system maintained by the Department of
14 Justice (DOJ). The AFS and PRELIMS computer programs do not communicate
15 with one another. Therefore, after the PRELIMS entries were made, the information
16 was printed out and station personnel had to enter the same information (make,
17 model, serial number, manufacturer...) for each weapon into the AFS system.
18
19

20 21. After the information was entered into the AFS system, a printout is
21 generated with data regarding each firearm. The printout will inform the Department
22 and all law enforcement agencies across the country whether the firearm had been
23 reported as having been used in a crime, was stolen, or was otherwise unlawful.
24
25

26 22. After the AFS returns are received from DOJ, the following information
27 is added to each form: whether the firearm has been reported stolen, the Nation
28

1 Crime Information Index (NCIC) code; the name of the person who possessed the
2 firearm; and the address from where the firearm was recovered.

3 23. A hard copy of each AFS return computer return was then affixed to each
4 “Firearm Entry Form” in order to confirm that each firearm had been verified
5 through AFS. True and correct copies of the Firearm Entry Forms with the AFS
6 printouts for the Fernandez firearms are attached hereto and incorporated by
7 reference herein as Exhibit D.
8

9
10 24. The station personnel took approximately 10 minutes per firearm to enter
11 the Fernandez firearms into the AFS database.

12 25. According to the printouts, the station personnel who reviewed the AFS
13 returns were David Sanchez (D Sanchez), David Wonser, Martha Esconde, Monica
14 Zepeda (MLZ), Linda McGuire, Shari McClaran (SMC).
15

16 26. In addition to the work done by the deputies to enter the Fernandez
17 firearms into PRELIMS, and the work done by the station personnel to enter the
18 Fernandez firearms into AFS, I personally spent approximately 6 weeks clearing,
19 entering, researching, correcting computer entries, reviewing crime returns and
20 storing the Fernandez weapons. Beginning June 14, 2018, at the start of each 8 hour
21 shift, I spent approximately 1-2 hours per day on my other duties and 6 hours per
22 day processing the Fernandez firearms before their release to the CPE warehouse on
23 July 25, 2018.
24
25
26

1 27. In 2019, we received notice that the Fernandez firearms were not to be
2 destroyed as we were originally informed, but were to be returned to Ms. Ana
3 Fernandez, Manuel Fernandez's wife. Thus, the process identified above had to be
4 reversed, to reflect the change in custody status.
5

6 28. I communicated with Ms. Fernandez's lawyers and the licensed firearm
7 agent, Carol Watson, who was the agent designated by Ms. Fernandez to retrieve the
8 firearms. I confirmed Carol Watson's credentials permitting her to retrieve the
9 firearms.
10

11 29. According to the PRELIMS system, the firearms were delivered back to
12 the Palmdale Sheriff's station from the CPE warehouse on December 18, 2019 and
13 unloaded. I began the process of updating the PRELIMS entries at the start of my
14 shift on that day and worked the remainder of that day on the Fernandez firearms.
15 This entailed clearing each firearm to assure that it was not loaded, scanning the bar
16 code for each firearm and confirming that the firearm would be released from
17 Sheriff's Department custody.
18
19

20 30. On December 19, 2019, Carol Watson and her team arrived at the station
21 in the morning. We released a total of 451 firearms to Carol Watson on that day. Due
22 to the sheer volume of firearms, we processed their return in intervals of about 30
23 firearms per receipt. After 30 firearms were updated in the Sheriff's Department's
24 system, those 30 would be given to Carol Watson, a receipt would be printed, verified
25 and signed by Ms. Watson. We would then begin the process for the next set of 30
26
27
28

1 firearms. This process continued for my entire 8 hour shift until all of the Fernandez
2 firearms that were not legally prohibited were released to Carol Watson. A true and
3 correct copy of the Evidence Transfer Receipts reflecting the release of the Fernandez
4 firearms to Carol Watson, is attached hereto and incorporated by reference herein as
5 Exhibit E. A true and correct copy of my email to my supervisor dated December 19,
6 2019 setting forth the number of firearms released is attached hereto and incorporated
7 by reference herein as Exhibit F.
8

9
10 31. After the firearms were released on December 19, 2019, I am informed
11 and believe that two staff members at the Palmdale station spent another two weeks
12 updating the AFS system to inform the DOJ and all law enforcement agencies that
13 the Fernandez firearms had been released from Sheriff's Department custody.
14

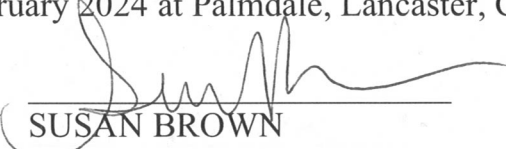

15 32. The weapons seized from Mr. Fernandez were not in pristine condition
16 when we received them at the station. The overwhelming majority of the long guns
17 and rifles had damage (scratches/nicks) to the barrels and stocks, some of the stocks
18 were split. Many of the guns were covered with packing grease and gauze. I often
19 had to clear off debris or other things affixed to a firearm in order to find the serial
20 number or other identifying information.
21
22

23 33. The firearms were not stored in envelopes or boxes at the Palmdale
24 station because we did not have enough storage material for this quantity of firearms.
25 The deputies expected to recover about 40 firearms but recovered nearly 500.
26
27
28

1 34. This seizure was by far the largest seizure of firearms in my history as a
2 property and evidence custodian. I have been informed and believe that it was
3 possibly the largest in Sheriff's Department history. Ordinarily, a seizure of this
4 amount of evidence would be processed by CPE and not at the station, however
5 because CPE did not have the manpower, we did the best work that we could have
6 done at Palmdale Station.
7

8 I declare under the penalty of perjury that the foregoing is true and correct. As
9 for facts provided on information and belief, believe them to be true based on
10 trustworthy sources.
11

12 Executed this 21 date of February 2024 at Palmdale, Lancaster, California.

We are at about 600 guns. They aren't entered yet. It will take a week or so.

Ok, not sure what's happening ... but, we're in receipt of another report involving the number of guns brought to evidence. Again, no firearm forms attached for gun entry (FCNs/clerk initials to be reflected on the gun forms and forms scanned with respective reports). Therefore, this report was also returned to the W. Sgt. It's logged and noted, accordingly.

Subject: IN CUSTODY #18-08710-26

Good morning,

The EM shift received the incident report for processing as mentioned above that involved the +500 firearms. However, while the writing deputies (Nemeth/Villanova) reflected gun information in the narrative, they did not include an evidence pg.(s) – nor were the respective gun forms attached. Therefore, this report was returned to the W. Sgt. (Mrakich). Anna also inquired whether or not to make a copy for DB for their review – Sgt. stated he would take care of it. This report is logged and notation reflected, accordingly.

Wanted to make all of you aware in the event there're inquiries as to 'where' this report is currently located.

Subject: More EV

Hi Susan.....:)

Bulk 13 shelf is ours (Roth & I), as well as the large blue bin of 90 more guns taken from the same house as the other 450+.

We returned to retrieve computer devices, and while digging through the chest high hoarder piles, the team found the additional guns.

We'll be in early Monday to finish booking all.

We'll bring coffee.

😊

Jason

Subject: Need bodies assigned to ev room for the week.

Hello. I know you've seen and heard about all of the guns from the search warrant. From that initial presentation of roughly 500 that were laid out there have been another 120 or so found. We only got 200 booked the first night with 2 people working fast 6 hours straight. They are extremely difficult guns. Foreign, with very few markings requiring a lot of Google research for each one.

I'm writing this because I need bodies in the evidence room. Booking them is only step 1. The guys can enter them but since they mess up 75% of them, I have to pull and physically review each one and get it corrected. Once they're all entered and individually corrected, the paperwork needs to be printed... and reviewed. Then they have to hand write the crime gun forms for 600+ and it gets sent to secretariat. They'll take days to enter so I'll have a little break but here's the kicker. I then have to pull each gun out again, run the entry make sure it's correct, if not kick back or correct, enter fcn number in prelims and attach paperwork on firearm then re-store it. These guns are extremely heavy and we're stacking them in piles.

I cannot do this alone. I need Saylor, Guerra, Thompson, the whole PAC team etc lol. I need everyone you can throw me. Because not only that...I have to still do my daily work and my pick up is this week.

I have had warrants with 200 or so serialized items before and it's put me weeks behind. This is 600. It's not manageable.

Please let me know

Here's another one

Just a heads up.
Our station hit a house with over 500 guns.
Been booking them since Thursday, we are in the 230's
Might have a few more for ya

To: Oleary-Brown, Susan M. <smoleary@lasd.org>
Subject: RE: firearm identification help 2

Oh, that sounds like fun! I think I would just keep to generic descriptions (bolt action rifle, side-by-side shotgun, etc.) and leaving "unknown" when make/model isn't obvious, which is frequently the case with these older firearms. Finding the actual manufacturer through proof-marks and literature references, for example, would be extremely difficult.

Subject: RE: firearm identification -3

This one took a bit longer to research. Looks like a "Rast and Gasser" .38 Excelsior:

38 caliber excelsior rast

Hello

Having trouble identifying this rifle

I sent a picture of it on a whole and of the only symbol/info I can find on it

Linda,

I checked the gun, it matches.
I cc'd Roth and Ames to contact one of you to check it out.
They may need to write a supp for the locate.

Susan

Hello Susan

See attached JDIC return for Revolver #346

The return matches the description of a Stolen out of Riverside County.

Please, advise on how to proceed by responding to all.

Thank you,

Shari McClaran

Subject: AFS Advice

Our station along with your local DOJ field units recently picked up over 500 guns from a location in the Palmdale area (Agua Dulce)

All of the guns are very old and foreign and we have been having a hard time with a handful of Egyptian firearms. They clearly say HAKIM and RASHEED on them but all of the rest is in Arabic and we do not have anyone at our station who is able to read it.

There are no numbers. We cannot find an AFS code for HAKIM and it says use EGYPT (EY) for RASHEED. We started to enter them as 2antique, as they are old with EY, Egypt as make and HAKIM or RASHEED in misc but we are getting errors that it is a duplicate because we are entering multiples.

Do you possibly have brand codes for either HAKIM or RASHEED? Or can you suggest what we can enter to push the entries through as we need to show custody of the firearms.

Thanks,

Susan O'Leary-Brown

Here's another of the 500
Nothing in English
Look familiar?

Here's another tricky one.
Does the symbol or language look familiar?

Thanks,
