ANA PATRICIA FERNANDEZ, an  
individual,

Plaintiff,

v.

LOS ANGELES COUNTY, et al.,

Defendants.

Case No.: 2:20-cv-09876 DMG (PDx)

**DECLARATION OF CAROL  
WATSON IN SUPPORT OF  
PLAINTIFF'S OPPOSITION TO  
DEFENDANTS' MOTION FOR  
SUMMARY JUDGMENT**

Hearing Date: May 10, 2024  
Hearing Time: 2:00 p.m.  
Courtroom: 8C  
Judge: Hon. Dolly M. Gee

**DECLARATION OF CAROL WATSON**

1  
2 1. I, Carol Watson, make this declaration of my own personal knowledge and if  
3 called as a witness, I could and would testify competently to the truth of the matters set  
4 forth herein.

5 2. I am a resident of Orange County, California

6 3. I own and operate Carol Watson's Orange Coast Auctions, an auction house  
7 that frequently deals in auctioning collections of firearms both antique and modern. As the  
8 owner and operator of a firearm auction house, I regularly take in collections of firearms  
9 from estate sales, trusts, widowed spouses, and collectors.

10 4. In 2019, Carol Watson's Orange Coast Auctions was hired to pick up Ana  
11 Patricia Fernandez's late husband's firearm collection from the Los Angeles County  
12 Sheriff's Department, Palmdale Station and to sell the firearms (and parts) at auction.

13 5. Upon receiving the firearms from LASD, I began the process of preparing the  
14 firearms for auction, which includes registering the firearms with the Department of  
15 Justice, reviewing and inventorying the firearms, checking serial numbers, creating  
16 descriptions of each firearm and its condition, and tagging each firearm to prepare it for  
17 auction.

18 6. This process starts with registering the firearms with the Department of  
19 Justice. The firearms are held for 30 days before they can be offered for auction. This  
20 process is exempt for antiques.

21 7. Once the firearms are cleared, each firearm is given to a "describer" who is  
22 particularly knowledgeable in a specific firearm field, e.g., shotguns are given to a  
23 shotgun expert or enthusiast. Of particular interest to my describers, in this case, was the  
24 condition of the Fernandez firearm collection because little care was taken as to how the  
25 firearms were stored by the LASD, as viewed by me and my staff when we picked the  
26 firearms up from the Palmdale Station. Most of the firearms were stacked like cordwood  
27 on top of each other. There was considerable damage to much of it. Stocks, in particular,  
28 were scratched, dinged, marred, cracked, and generally devalued because of poor storage.

1           8.     An inventory of the number of firearms, magazines, scopes, and other parts  
2 that could be accounted for separately is also developed.

3           9.     Next is the evaluation process, where we look at the condition of each  
4 individual firearm. My team and I noted that due to the many scratches, dings, dents, and  
5 discolorations, my describers, who are true collectors in their field, had to note the damage  
6 in their descriptions for prospective auction buyers.

7           10.    The evaluation process also entails reviewing the serial number. There were  
8 significant differences in many of the serial numbers and descriptions listed in the LASD  
9 inventory report compared to what my team and I located. We created the auction list  
10 directly from the firearms themselves and not from the LASD inventory list, as the LASD  
11 list was incorrect and misdescribed with several wrong calibers, wrong serial numbers,  
12 and wrong makes and models. We corrected those serial numbers before listing the  
13 firearms for auction.

14          11.    Also, part of the evaluation process is creating an accurate description of  
15 each firearm. While there were descriptions from the LASD inventory report, many of  
16 those descriptions were not accurate, so my team and I had to research the firearm more  
17 intensively to prepare the correct description. We also take photos of the firearms to  
18 prepare them for auction.

19          12.    My team then tags each firearm with an information tag to prepare them for  
20 auction, and we create an auction pre-look book for potential buyers to review the  
21 firearms in that particular auction.

22          13.    I believe that if the firearms had not been damaged, including scratches and  
23 dents, they would have had a higher starting bid and brought more at auction. A true and  
24 correct copy of my expert report describing the loss in value due to LASD's poor handling  
25 is attached as **Exhibit D** and hereby incorporated by reference.

**Expert Witness Report of Carol Watson**

*Fernandez v. Los Angeles County, et al.*

United States District Court (C.D. Cal.)

Case No: 2:15-cv-05805-R-PJW

August 30, 2023

**I. INTRODUCTION**

Counsel for plaintiff in *Fernandez v. Los Angeles County* (C.D. Cal. Case No.: 2:20-cv-09876 DMG (PDx)) has asked me to offer an opinion about this case. This report sets forth my qualifications, opinions, and foundation for those opinions.

**II. BACKGROUND & QUALIFICATIONS**

I have been in the firearms industry now for over 40 years. I have a California Certificate of Eligibility #16579). I currently possess a Federal Firearms License (FFL) (License #9-33-059-01-6F-03875).

I am the President and Owner of Carol Watson's Orange Coast Auctions, an active retail gun dealer based in Anaheim, CA. We sell both modern and antique firearms. And we evaluate, appraise, and authenticate firearms for auction and the general public. We have been evaluating and appraising private estates and personal firearm collections for more than ten years. We do evaluations and appraisals for various gun collectors or consigners.

In the past ten years, I have not written or contributed to the following published articles or editorials. In the past four years, I have not been deposed or testified at trial as an expert witness.

**III. COMPENSATION**

I am receiving a \$500.00 flat fee for my work on this report and a \$500 flat fee for any supplemental or rebuttal reports. I also charge \$400.00 per hour for deposition appearances, \$400.00 per hour for trial testimony, and \$400.00 per hour for all other time at trial.

**IV. ASSIGNMENT**

Plaintiff's counsel has asked me to provide opinion on the fair market retail value of the firearms seized from plaintiff and allegedly damaged by defendants before their released based on my evaluation and appraisal of the subject firearms.

When the seized firearms were released to me and my staff in December 2019, I observed how they were stored at the police station before I took possession of the guns. We also carefully evaluated and appraised the firearms in the condition in which they returned before auction. At that time, my staff and I prepared descriptions of each gun's make, model, caliber, condition, and any accessories. I thus offer opinion on any diminution in value of those firearms.

## V. OPINIONS & ANALYSIS

### 1. *The value of plaintiff's seized firearm property at issue in this lawsuit was between approximately \$203,700 and \$288,075.*

Based on my experience in evaluating, appraising, buying, and selling modern and antique firearms, as well as my review of relevant references (including *Flayderman's Guide*, *Blue Book of Gun Values*, and then-current firearm auction results), correspondence with colleagues in the firearm retail and appraisal industry, and then-recent sales of some of the very same firearm models, it is my professional opinion that, absent significant damage to the firearms, the total fair market value of the firearms seized from and later returned to plaintiff would have been between \$203,700 and \$288,075.

While I did not have the opportunity to inspect or appraise plaintiff's seized firearm collection before the Los Angeles County Sheriff's Department took custody of it, I understand that the seized rifles had, for the most part, been stored by plaintiff's late husband, Manuel Fernandez, in separate boxes. And that, during the search for and seizure of the firearms, law enforcement officers removed many of the long guns from their boxes and stacked them in the bed of a truck for transportation to the police station.

Attached hereto as **Appendix 1** is a table of all firearms released to me and my staff by the defendants. The table lists each firearm by its Los Angeles Sheriff's Department item number, as well as its make, model,<sup>1</sup> and serial number<sup>2</sup>. It also includes a description of each firearm prepared by Los Angeles Sheriff's Department personnel when the firearms were initially seized, and a description prepared by me and my staff when preparing the firearms for auction in 2020.

---

<sup>1</sup> Information in the "Make" and "Model" columns was generally taken without correction from the "County of Los Angeles Sheriff's Department Evidence and Property Page, URN File # 918-08710-2646-151," a record prepared by employees of the Los Angeles Sheriff's Department. In some cases, a firearm's make or model was unknown to the booking officer, or the booking officer entered incorrect information. The description provided by Carol Watson's Orange Coast Auctions provides a more accurate and detailed description of the firearms at issue, including their makes and models.

<sup>2</sup> Serial numbers were also generally taken from the County of Los Angeles Sheriff's Department Evidence and Property Page, URN File # 918-08710-2646-151." In some cases, however, the booking officer entered an incorrect serial number. In those cases, the "Serial Number" column should reflect the correct serial number as identified by Carol Watson's Orange Coast Auctions.

Supporting my opinion that the value of plaintiff's seized firearm property, absent significant damage, was between approximately \$203,700 and \$288,075, Appendix 1 includes the estimated low and high appraisal values of each firearm without such damage.

**2. *Many firearms released to me and my staff by defendants were allegedly damaged while in defendants' custody and control; those firearms lost significant value because of that damage.***

Based on my experience in evaluating, appraising, buying, and selling modern and antique firearms, as well as my review of relevant references (including *Flayderman's Guide*, *Blue Book of Gun Values*, and then-current firearm auction results), discussions or correspondence with colleagues in the firearm retail and appraisal industry, and my personal inspection of each firearm released to me and my staff, it is my professional opinion that, in the damaged condition those firearms were in upon release, the total fair market value was between \$160,210 and \$240,365 in 2020, when the firearms were appraised to be sold at auction.

That is, the firearms lost between \$43,490 and \$47,710 in value as a result of being in defendants' custody.

When the collection was picked up at the Palmdale Police Station, the firearms were not individually wrapped. Rifles were stored in trash cans, plastic tubs, and similar containers. It was apparent, based on my many years of experience handling firearms, that there was little to no care given to plaintiffs' firearm collection—especially those that were rare or of high value. Because of this poor handling, there was extensive damage, breakage, and scratches to the gun stocks.

Likewise, valuable handguns were thrown into boxes, with little evidence of care being taken to prevent damage of the firearms during transportation to the police station, during booking, and/or while in storage. Many handguns had missing magazines, grips, and other damage.

Supporting my opinion that, in the damaged condition plaintiff's firearms were in upon release, the total fair market value was between \$160,210 and \$240,365, Appendix 1 includes the estimated low and high appraisal values of each firearm in 2020, when the firearms were appraised to be sold at auction.

Attached hereto as **Appendix 2** are true and correct copies of "Consignor Inventory Listings" prepared by Carol Watson's Orange Coast Auctions describing each of the firearms we appraised and sold on plaintiff's behalf.

		retaining the slotted and grooved steel ramrod, and matching buttstock with sling swivel underneath. Condition is fine as partially refinished: the barrel retains approx. 97% of what appears to be original dull military blue, and sharp markings; the balance of the metal parts were likely reblued during the late 1950s/early 1960s when the Argentine government released these rifles for resale (many to U.S. importers), as the tang markings are weak. Stocks are sound and mostly smooth showing occasional handling dings (mostly on forend, which has a 5.75" wood patch on bottom left between the top and middle bands), and fit "proud," with nice color and smooth varnish finish. Action is very strong and smooth; bore is bright with sharp rifling. Est.: \$450-\$650. (Antique)
961	4234-093	Czech K98 Mauser Bolt Action Rifle, #6194, 8x57mm cal., 23.6" barrel, blued finish, laminated stock with cupped buttplate, inverted "V" front sight and adjustable tangent rear sight, no cleaning rod. Czech crest has been removed from top of receiver ring and marked "CESKOSLOVENSKA ZBROJOVKA,A.S,BRNO". Matching numbers except buttplate. Condition overall is very good+ with approx. 95% finish remaining on the partially reblued metal. Wood has been sanded and refinished and shows a few dents and scratches to the finish. Action is smooth, bright bore is excellent. No visible import marks. Includes a reproduction leather sling in very good condition. Est.: \$500-\$750. (C&R)
976	4234-089	Chinese SKS Semi-Automatic Carbine, with folding bayonet, #11021790, 7.62x39mm cal., 20" barrel, blued finish, hardwood stock, hooded post front sight and adjustable tangent rear sight. Marked on left side of receiver with a "26/(triangle)" stamp and three Chinese characters. Matching numbers, with cleaning rod and butt trap cleaning kit. Condition overall is very good with over 90% finish remaining on the metal, and scratches on the receiver, magazine and barrel. Wood is very good with overall scratches and dents in the finish. Action is smooth, bright bore is excellent with sharp rifling. Triangle bayonet is excellent. Import stamped on left side of receiver. Est.: \$350-\$450. (C&R)

1068	4234-012	Winchester Model 70 Classic Sporter Bolt Action Rifle, #G341360, .338 Win. mag. cal., 26" barrel, blue finish, from the factory without sights, top of receiver drilled and tapped for scope base, with bolt-mounted safety; one-piece checkered pistol-grip walnut stock with an oil finish, cheekpiece, black rubber Winchester recoil pad, and sling swivel studs. Approx. 98% original finish remains, and metal surfaces rate as near excellent overall; right side of barrel near the "Classic Sporter" with an approx. quarter-inch long noticeable scratch; barrel address with nice raised edges; triggerguard and bolt handle with edgewear accounting for most of the finish loss. Stock is serviceable but shows several dings and scratches from storage, no chips or cracks; good overall. Smooth action, clean bore with excellent rifling. Est.: \$350-\$550. (Modern)
1069	4234-020	Tikka Model 695 Bolt Action Rifle, #871537, .338 Win. mag. cal., long action, 24" barrel, blue finish; one-piece walnut stock with Monte Carlo comb is checkered at the pistol-grip and forend, with an oil finish, black rubber recoil pad, and sling swivel studs. Rifle comes from the factory without sights; receiver is factory drilled and tapped for scope mount and is also factory grooved. Receiver mounted safety, bolt-mounted cocking indicator, and one 3-round Tikka magazine. A Burris 4x Mini Model scope has been mounted to the grooved receiver; scope with duplex reticle and gloss black finish. Rifle was made in Finland. Rifle is in good to very good overall condition and the metal would clean to a solid very good, but shows signs of poor storage. Approx. 96% factory blue finish remains with spotted surface rust on the receiver; barrel with light handling marks and larger scratches approx. 18.5" down from the muzzle, these larger scratches correspond with a gouge in the edge of the stock. Stock with scattered mostly shallow pressure dents and scratches; checkering with some flattening, mainly on the forend. Smooth action, mirror bright bore with excellent rifling. Scope exterior with moderate surface wear; optics are clear; rings with spots of surface rust. Est.: \$300-\$500. (Modern)

		from the factory without sights, blue finish; checkered pistol-grip hardwood stock with black plastic buttplate, one quick-release sling swivel, front swivel is missing. Topped with a Bushnell 3-9x32 Sportview scope; scope with duplex reticle and gloss black finish. Made in Japan. With the exception of flaking to the black paint finish on the triggerguard, metal is near excellent retaining approx. 98% original blue, barrel with a few light scratches, factory lettering is crisp. Stock is good with scattered scuffs and pressure dents, some of which have transferred white paint onto the surface. Smooth action, mirror bright bore with excellent rifling. Scope with minor handling marks to the exterior; optics are clean and clear. Est.: \$200-\$300. (Modern)
1074	4234-056	Mauser Model 96 Straight-Pull Rifle, #96007820, 7mm Rem. mag. cal., 24" barrel, parkerized finish, one-piece pistol-grip walnut stock checkered at wrist and forend, with cheekpiece black rubber Mauser recoil pad, and sling swivel studs. Wood with an oil finish. From the factory without sights. Top of receiver is factory drilled and tapped for scope mount, with a tang-mounted safety. Topped with a Bushnell Banner 40mm scope on Redfield mount; scope with duplex reticle and gloss black finish. Metal is near excellent retaining approx. 98% original finish, with light muzzle wear and a few small surface scuffs. Stock is good with mostly shallow surface dents and scratches, predominantly on the left side; checkering shows little wear. Smooth action, bright bore with sharp rifling. Scope with fine scratches to exterior; optics are bright and clear. Est.: \$300-\$500. (Modern)
1076	4234-057	Remington Model 700 Bolt Action Rifle, #E6377042, 7mm STW cal., 26" heavy barrel, blue finish; one-piece brown Monte Carlo laminate wood stock is point checkered at the wrist and forend, with cheekpiece, black rubber Remington recoil pad, ebony forend and grip cap, sling swivel studs. Mfg'd without sights, this rifle is topped with a Tasco 6-24x40mm scope; scope with an old style range finding reticle, gloss black finish, and lens covers. Condition overall is very good showing signs of poor storage and handling. Metal surfaces retain approx. 97% original blue finish, barrel with scattered scratches and a few small spots of surface rust; factory lettering is clear and defined. Stock with scratches and impressions, which includes a few spots of concentrated wear on the right side of the buttstock; checkering is mostly clean and sharp, right side forend checks with a few flat spots. Smooth action; bright bore with excellent rifling; internally a clean rifle that appears to have been fired very little.

<b>Lot</b>	<b>ID NUMBER</b>	<b>Description</b>
		20" barrel with 2-3/4" chamber and CYL bore. Black synthetic pistol-grip stock with black rubber Beretta recoil pad. Iron sights includes a brass beaded blade front sight and adjustable U-notched rear sight. Metal rates very good with scattered surface scuffs and scratches, mainly along the high edges of the receiver. Stock and forend with light scuff marks. Smooth action; bore with some powder fouling and wad residue, otherwise bright; a thorough cleaning would improve the overall bore condition. Est.: \$250-\$400. (Modern)
178	4234-219	Russian Baikal Model MP-153 Semi-Automatic Shotgun, #0015332339B, 12 ga; 28" vent rib barrel with matte finish, 3-1/2" chamber, external screw-in CYL choke; black alloy receiver, checkered pistol-grip hardwood stock, vented black rubber Baikal recoil pad with wood spacer; LOP is 14.25", with gold-colored trigger and cocking indicator. Imported by EAA Corp. Condition overall is very good retaining approx. 95% original finish; inside protected corner where the rib meets the barrel with a few small spots of surface rust. Wood shows moderate handling marks, some which are in the checkering pattern on the forend; buttstock appears to have been lightly sanded, with added coat of satin finish, and is left with some dark streaks to the wood. Action is tight and operates smoothly; excellent bore. Est.: \$200-\$350. (Modern)
184	4234-053	Browning Model B-80 Semi-Automatic Shotgun, #411PY07848, 12 ga., 3" chamber, 30" vent rib barrel, Full choke, blue finish, steel receiver, gold-colored trigger, with silver bead front sight. Checkered pistol-grip walnut stock with gloss finish and a black rubber Browning recoil pad. Made in Portugal by FN Herstal, ca. 1982. Approx. 95% factory finish remains, and metal surfaces rate as very good overall; barrel and receiver with scattered light scratches resulting in finish loss. Factory lettering is clear. Wood rates as good with mostly moderate surface dents and scratches, predominantly on the forend; left side of buttstock with a slightly deeper 3/4" long vertical scratch. Smooth action, excellent bore with just a little powder fouling near the muzzle. Est.: \$200-\$350. (Modern)

<b>Lot</b>	<b>ID NUMBER</b>	<b>Description</b>
		barrel, blue finish; pistol-grip walnut Mannlicher stock features checkering at the wrist and forend, Monte Carlo cheekpiece, red rubber Sako recoil pad, rear sling swivel stud, front swivel is mounted to the barrel band. Sights include a dovetailed brass beaded front sight, "U"-notched Williams rear sight; receiver is factory grooved for scope mount. Made in Finland; imported by Stoeger and marked on right side of barrel. Metal rates in excellent condition retaining approx. 98% factory blue; there are light scratches present on the front sight base, barrel and receiver with a few small handling marks. Stock with intermittent surface dents and scratches, including one larger gouge to the upper right edge of the forend. Smooth action, bright bore with sharp rifling. Most of the blemishes to the stock appear to be storage related as the rifle shows signs of little use. Est.: \$700-\$1,000. (Modern)
268	4234-046	Browning A-Bolt Medallion Bolt Action Rifle, #36099NM217, .308 cal., 22" barrel, bright blue finish, receiver and magazine floorplate are lightly scroll engraved; one-piece pistol-grip walnut stock is checkered at the wrist and forend with a gloss finish, rosewood forend and grip cap, black rubber Browning recoil pad, and quick-release sling swivels. The factory drilled and tapped receiver is topped with a Bushnell Sharpshooter 3-9x32 scope; scope with gloss black finish and duplex reticle. Metal is excellent retaining approx. 98+% original finish; barrel with a small amount of minor handling marks; factory lettering and engraving are clear. Stock with several impressions and scratches that vary in size and degree. Smooth action, mirror bright bore with excellent rifling. Scope exterior with scratches, mainly between the scope rings; optics are clear. Est.: \$300-\$500. (Modern)

Marked on top of barrel shank with Soviet crest over "1942r" and the symbol for Izhevsk Arsenal. Finnish "SA" property stamp on left side. Bolt handle has been re-numbered to match, other numbers are mismatched. Condition overall is very good with approx. 90% finish remaining on the metal. Wood is very good with a chip in the forend and a few scratches and handling marks. Action is smooth, bright bore is very good. Import stamped on right side of barrel. Est.: \$350-\$500. (C&R)
385	4234-118	Spanish Model 1895 Mauser Bolt Action Carbine, #A1398, 7x57mm cal., 17.56" barrel, blued finish, hardwood stock, inverted "V" front sight with protectors and adjustable folding leaf rear sight. Marked on receiver ring with faint Spanish crest, and on left side receiver rail "MAUSER ESPANOL MODELO 1893 MANUFACTURA LOEWE BERLIN". Sling bar and ring on underside of wrist. Matching number on bolt sleeve. Condition overall is fair, with most of the metal turned to a brown patina with rust on the buttplate. Handguard has a full-length crack, and stock shows darkening, deep bruises and scratches. Action is smooth, bore has an area of pitting, otherwise good with good rifling. No visible import marks. Est.: \$300-\$500. (Antique)
387	4234-129	Argentine Model 1891 Mauser Bolt Action Carbine, #A0343, 7.65x53mm cal., 17.6" barrel, blued finish, hardwood stock, inverted "V" front sight and adjustable folding leaf rear sight. Marked on receiver ring with intact Argentine crest, and on left side receiver rail "MAUSER MODELO ARGENTINO 1891 MANUFACTURA LOEWE BERLIN". Matching numbers. Condition overall is very good, with the metal retaining over 80% finish showing areas of browning and rust spots on the buttplate. Stock is probably a local replacement as it does not have the sling swivel at the wrist, but does have a recoil lug and two filled sling swivel holes on the buttstock. There is a crack at the wrist behind the receiver tang, otherwise the wood is very good with handling marks. Action is smooth, bright bore is good with wear to the rifling. No visible import marks.
