INDUSTRY INTELLIGENCE REPORTSSM

HELPING OUR MEMBERS MAKE INFORMED DECISIONS

FIREARM PRODUCTION IN THE UNITED STATES WITH FIREARM IMPORT AND EXPORT DATA

2023 EDITION

Providing a comprehensive overview of firearm production trends spanning a period of 31 years, this report is based primarily on the data sourced from the Bureau of Alcohol, Tobacco, Firearms and Explosives' (ATF's) Annual Firearms Manufacturing and Export Reports (AFMER). Every effort has been made to provide accurate and updated information so the reader may keep this edition as a reliable resource for trend information. Production data is a leading indicator of industry performance; this is especially true when combined with other valuable sources of information.

This edition includes manufacturing trends for ammunition as sourced from Census Bureau's Annual Survey of Manufacturers (ASM) used for all years that fall between the fifth-year economic census reports. Import and export statistics for firearms compiled from the U.S. International Trade Commission (USITC) are presented in conjunction with the AFMER numbers to provide a more accurate picture of the historical production that has been made available to the U.S. market. These data sources, when used collectively, help to provide an overview of the firearm and ammunition manufacturing industries.

Information on production, imports, exports and other manufacturing variables are only a piece of a more complex puzzle of the firearm industry. Other factors outside of the manufacturing sector, such as the retail sector, the economy and frequently the political climate, must all be taken into consideration. The limitation of the AFMER data is that it reflects historic trends; however, using the data in combination with other reports does provide a more complete picture of the industry. Firearm and ammunition production provide a very significant contribution to the national economy in terms of jobs, wages and benefits. In addition, capital expenditures on materials (energy, equipment, fuels) help boost local economies.

KEY FINDINGS

- The average annual production of firearms in the U.S. was 5,753,055 for the last 30 years.
- Total firearm production reported in the 2021 AFMER was 12,521,614 – an increase of 28.6% over 2020 reported figures.
- Long guns totaled 4,609,800 and accounted for 36.8% of total 2021 U.S. firearm production. Of that, rifles totaled 3,934,374 (85.3% of long gun production) and shotguns totaled 675,426 (14.7%).

(a): Does not include AFMER MISC firearms category which includes items such as: pen guns and starter guns. Also adjusted to exclude/include, as noted:

From 2011 – 2018 several adjustments were made to the data in this chart due to omissions in the AFMER report (i.e.: figures for long guns manufactured by Savage Arms were omitted from the 2017 AFMER), duplication of production due to parts manufactured by machine shops (i.e.: parts reported by machine shop in addition to being reported by the firearm manufacturer resulting in double-counting) and adjustments to the miscellaneous category (i.e: Aero Precision).

More detail on import and export data is available through the USITC website at dataweb.usitc.gov/. To obtain the highest level of product definition, use the HTS (Harmonized Tariff Schedule) 10-digit codes whenever possible.

Refer to the most current 'Harmonized Tariff Schedule' for IMPORT codes and to 'Schedule B' for EXPORT codes. Note that import and export codes do not always match.

DataWeb for 2020-2022 Census Bureau have been updated as of July 5, 2023, based on the latest official revisions from the Census Bureau. (The first official revisions for 2022 data will not be available until June 2024).
